

## **Byelaws Signage**

As the review proceeds and new byelaws are made by the Secretary of State, it will be necessary to replace existing byelaw notices and where necessary erect additional signs on the byelaw boundaries to ensure they are properly marked in accordance with the Military Lands Act 1892. A byelaw notice is an enlarged reproduction of the current byelaw, including a map of the area covered by the byelaw. The notice is printed on a metal sign and is normally located at site access points to inform the public where a byelaw applies and will incorporate the use of coloured maps.

Byelaws signs will follow the concepts of Controlled areas or Protected areas and will indicate the extent of public access.

The new signage will be produced in a variety of sizes and materials designed to meet each sites' individual needs.

Signage example 1: Controlled Area Sign

Signage example 2 : Protected Area Sign

Signage example 3. Combined Range Area Sign

**( Examples of the new signage can be viewed in the pdf's attached to this webpage )**
