Notes on the table

Income of individuals with self employment sources, 2010-11

1. Self employment income is as defined in the 'Notes to the table T3.6 paragraph 3'. Individuals are included in this according to whether (and how many) sets of pages covering income from trades or from partnerships were completed in the tax return. Such pages are required for all trades, and for all shares in partnerships, trading at any time in the tax year. If for any individual or source a loss is made, or the profits are completely offset by the deduction of capital allowances and/or losses brought forward from earlier years, the individual or source is included in the table but the amount of self-employment income is shown as nil.

2. Although special rules apply to businesses which have recently started or ceased trading, the general rule is that the profit assessable for 2010-11 are those earned in the business accounting periods ending in 2010-11. On average, profits assessable for 2010-11 may be regarded as profits arising in the calendar year 2010.

3. Each individual is counted only once. This table shows how many of the individuals with self-employment income in any of the given ranges also have other sources of income, and the amounts arising from these sources. Other income excluding pensions consists of employment income assessed under the Income Tax (Earnings and Pensions) Act 2003 and other miscellaneous income.

4. For more information about the SPI and symbols used in this table, please refer to <u>Personal Income Statistics release 2010-11</u>
