Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to

ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

The 24hr drinking law was brought in by politicians, this was a grave error of judgement and now the government are using a sledgehammer to crack a nut. It is too broad, and will not target the correct people. The High Streets of our nation are pitiful on Friday and Saturday nights. The young do not go to Supermarkets to buy drinks but prefer the High Street clubs and bars. What the people of this nation want is an end to twenty four hour drinking. Midnight or 2a.m. is fine. Give the NHS a chance to return to normal.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper that the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while

minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

what is the prescribed amount?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

The level of taxation that inflates alcohol price is already increasing the price of alcohol, so applying any minimum price would further undermine a free market from operating - which didn't work out too well under prohibition laws in the 1920s. Most people are responsible drinkers so why start tinkering - those that are addicted aren't going to be put off by a small percentage increase, and significant increases will undermine economic growth

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

a) The economic impact on growth. b) The logic of what happens when governments look for quick fixes to alcohol abuse - eg prohibition laws in the US were a disaster. (Odd that the options below don't allow for a "no adjustment to minimum pricing" option!)

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Don't know

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

a) Businesses struggling under the biggest recession for a century. b) Members of the public subject to inflation and pay freezes looking to shop effectively and finding bills going up even further with this bonkers proposal (buying a multi-pack of beer doesn't mean people will drink it all the same day! Why not have a minimum price for doughnuts, presumably that would cut obesity levels!)

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and

Q16. Should other factors or evidence be taken into account when considering a ban on multi-buy promotions? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 200 words):

As before, the economic impact on reduced sales would hit growth, and the inflationary affect based on increased costs to members of the public who are already stretched with pay freezes and increased bills generally. Rigging pricing in a free market economy rarely has a positive outcome and is kind of backward looking in approach (eg protected pricing for booksellers which impeded the free market, but was held onto to support limited interest groups). If targetting offers then they should focus on pub happy hours - as that is designed to encourage people to consume the product in a set time, unlike the purchase of alcohol in a shop which keeps for 1-2 years and can therefore easily be consumed responsibly.

0

Q17. The aim of a ban on multi-buy promotions is to stop promotions that encourage people to buy more than they otherwise would, helping people to be aware of how much they drink, and to tackle irresponsible alcohol sales. Do you think that there are any other groups that could be particularly affected by a ban on multi-buy promotions? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

1) Responsible drinkers shopping for a good deal. It's far fetched to assume that getting a good deal on a case of 12 beers results in that consumer celebrating by returnign home and quaffing the lot. More likely they are just getting a good deal for their money. 2) Those producing and selling wuold no doubt be impacted, laying off staff and further impacting growth.

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

Rigging a free market rarely works - look at 1920s US prohibition laws as an example.

Impact assessment on increasing unit prices, page 2., Price increases will add to inflationary pressure, which will have an economic impact, which doesn't seem to be addressed?

Impact assessment, on unit pricing, section A, page 4, consumers: There seems to be a disregard for the individual's right to choose responsibly. Most people shop for a good deal - that doesn't mean they celebrate by promptly drinking their purchase. Alcohol unlike perishable goods lends itself to buying and benefiting from offers. In the context of pay freezes, inflation another price hike will not be welcomed or thanked.

Impact assessment on increased unit price, page 2. "impact on business not known"! Says it all. Reducing expenditure by customers will hit economic growth, which seems almost bizarre in its timing (ie we're in the biggest recession in over a century!)

The Impact Assessment on increased unit pricing states (section b) £21bn cost, which seems fanciful. Does this include all injuries where people had had alcohol, making an assumption that without alcohol that person would have had perfect health, not had an accident, and not committed a crime - which seems a leap of logic, and not really proveable. And would alcohol dependency be tackled by a small increase in the unit cost - unlikely as its a dependency ...

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Cheap alcohol in Supermarkets results in un-regulated drinking, the 45p minimum will not curb this. Drinking in pubs especially local pubs, is self policing. The older customers keeping an eye on the younger ones, therefore regulating the intake. This is a generalisation but think about how one behaves in a controlled situation. The Landlord has a statutory duty not to serve a drunk person.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Far greater consideration should be given to the extended licensing hours which have had a far greater impact on blighting our towns and cities - these need to be reduced significantly.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take

decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary

sales of alcohol occasional provision of licensable activities at community events an extension of the temporary event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

This is penalising responsible drinkers and is a disproportionate response to a City/Town centre problem.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Setting a Price in town centre pubs or clubs may be reasonable but not for home responsible consumption

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Any body wh drinks responsibly either out and about or at home will be penalised, This is unfair to those people: and appears to be yet another " stealth tax " on the Middle Class!!.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I do not believe a minimum unit price reduction will have any effect because there has been no genuine empirical research on this subject. Figures are based on assumptions that at there on core are incorrect. Binge drinking will not fall because alcohol price alone is not the one and only factor in this behaviour. If the government feel that a minimum price will solve this problem they are severely misguided. Introducing a minimum price of alcohol is not the correct step forward for a government to get involved with in market economy. Prices should be dictated by economics of supply and demand not by government. Obesity costs the NHS millions per year however I have yet to hear calls for minimum pricing on biscuits, cakes, fizzy drinks or chocolate. Government should listen to 'balanced' people who do not have anything to gain either way in this debate and not 'so-called' experts in health, supermarkets or the drink industry. There are much easier ways to cut under-age and binge drinking without any need for a minimum price. There should be no minimum price!

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Legislation is already in place to close outlets that serve intoxicated customers these should be enforced more readily with larger fines and closure for outlets that break the law. To buy alcohol in stores, like in the US, customers should provide ID (drinking, licence or passport). If a customer is not in the possession of any of these ID's then simple answer they will have to get one. Providing ID at point of sale will cut down all illegal sales to underage drinkers.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract		X	
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers		X	
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is

only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes

Score

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Evidence from other regimes is people will commit theft and other crimes rather than change their habits. Especially those with time on their hands...

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Interfering with the pricing will drive further the tendency to smuggle alcohol into the UK. Pricing is NOT the key to reducing demand.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

People who do enjoy a bargain. People who can't afford to indulge in the social scene at the higher end etc.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary

sales of alcohol occasional provision of licensable activities at community events an extension of the temporary event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

This is penalising responsible drinkers and is a disproportionate response to a City/Town centre problem.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I do not believe a minimum unit price reduction will have any effect because there has been no genuine empirical research on this subject. Figures are based on assumptions that at there on core are incorrect. Binge drinking will not fall because alcohol price alone is not the one and only factor in this behaviour. If the government feel that a minimum price will solve this problem they are severely misguided. Introducing a minimum price of alcohol is not the correct step forward for a government to get involved with in market economy. Prices should be dictated by economics of supply and demand not by government. Obesity costs the NHS millions per year however I have yet to hear calls for minimum pricing on biscuits, cakes, fizzy drinks or chocolate. Government should listen to 'balanced' people who do not have anything to gain either way in this debate and not 'so-called' experts in health, supermarkets or the drink industry. There are much easier ways to cut under-age and binge drinking without any need for a minimum price. There should be no minimum price!

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Legislation is already in place to close outlets that serve intoxicated customers these should be enforced more readily with larger fines and closure for outlets that break the law. To buy alcohol in stores, like in the US, customers should provide ID (drinking, licence or passport). If a customer is not in the possession of any of these ID's then simple answer they will have to get one. Providing ID at point of sale will cut down all illegal sales to underage drinkers.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is

only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Minimum price will increase crime as poorer people will require more money to obtain alcohol.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on

business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary

sales of alcohol occasional provision of licensable activities at community events an extension of the temporary event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

No

Score

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

It does not take an expensive, Government, impact assessment to realise that the simplest and most effective (cost and objective) is to RAISE THE MINIMUM AGE TO 21!!! Or, when/if this does not have the desired affect, raise it to 25! Come on, I am an intelligent person, why play around with Units etc., just raise the age as the current 18-21 year-olds have PROVED that they CANNOT handle alcohol! For God's sake it's so SIMPLE!

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Any level is inappropriate and infringes on personal freedom and ability to choose

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary

event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

No level - retain competitive pricing

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

How people will avoid paying higher price. For example returning to the 'Booze cruise' by going to France on Day Trips and purchasing cheaper alcohol in France. This is VAT paid in an EU country so can be imported in large volumes.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Charities
Parish Councils
Town Councils

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make		X	
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Yes

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I believe a MUP of 45p will lead to a significant increase in the price of a lot of alcohol sold in off-licences and supermarkets. For example, two 3-litre bottles of cider (total 45 units) currently available from Iceland supermarket for £7.00 will increase to £20.25 which is a huge price increase. This will severely affect the poorest members of society in a grossly disproportionate and unfair way.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

The obvious factor of affordability! Clearly, the public has many differing levels of disposable income and it is therefore unfair to the poorest if the minimum price, which obviously applies to everybody, is set too high, such as 45p a unit. A lower 'floor' price should be set, in which the public can have confidence is not just a revenue-raising price.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Social groups who bulk-buy their alcohol for infrequent gatherings off licensed premises will be faced with a significant price increase at 45p per unit.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make		X	
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

Page one of the minimum pricing impact assessment (policy objectives) states that MUP is a 'targeted policy'. Surely not? It does not target the alleged 'drink problem' in society, it is just a blanket price increase to be imposed on the whole population.

Also the alcohol misuse cost of £21bn per year quoted on the same page, is so high that this is bound to create scepticism from much of the public. Particularly as alcohol misuse only occurs within a minority of society.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Binge drinking will continue its cultural! Limit the production of high strength products. When I was young beer was around 3.5% and this has gone up and up, 'Shots' didn't exist - they've been specifically marketed to binge drinkers and this is what you need to address. It will take time to change but don't punish the sensible majority. You also risk encouraging illegal alcohol production and black market - a very bad idea.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Yes it won't work!

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Your statement acknowledges this will affect responsible drinkers. This is not justifiable. Small local pubs are closing at a tremendous rate and this will push more out of business as there majority responsible drinkers will probably be the ones who drink/spend less.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related

deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Get the new Police Commissioners to tackle the crime and place a policing presence around known trouble spots for alcohol abuse. Solve the problem at it's source.

Score

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and

the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 200 words):

Pubs / Clubs etc. should have to have security / police presence outside and / or local to the premises during opening hours. This resource could be provided by the new Police Commissioners with financial contribution from the pubs / clubs.

Score

0

Q22. Do you think that the current approach, with five mandatory licensing conditions applying to the on-trade and only one of those to the off-trade, is appropriate? Please select one option.

No

If no, please explain why you think the current approach is not the best approach (keeping your views to a maximum of 100 words):

Change to the UK drinking culture needs to be addressed, not the pricing. Restrict alcohol sales to over 21's only and make a law so that anyone buying alcohol for under 21's that is consumed anywhere other than in a private home / grounds is prosecuted. Target the parents of any problem drinkers who are under the age of 21. This problem needs to be tackled by educating children at a young age (primary school), so that there is less likelihood of them becoming problem drinkers in their teens onwards.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business		X	

and the kinds of sales they make			
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract		X	
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment		X	
Florists, providing alcohol alongside the purchase of flowers		X	
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket		X	
Regular charitable events, providing alcohol as part of the wider occasion		X	

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

There should be no special provisions - WE ARE ALL IN THIS TOGETHER, right?!!!

There should NOT be a minimum pricing set by government on any goods / consumables for anyone.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

There should be no special provisions - WE ARE ALL IN THIS TOGETHER, right?!!! There should NOT be a minimum pricing set by government on any goods / consumables for anyone.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact

policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

The price of alcohol is not the issue regarding out of control drinking habits. You cannot change the culture by adding to the price because after a couple of drinks, the way one perceives things is altered. This is minimal effort on the part of the government to attempt to manage a major cultural issue and will only affect those who already manage their money and do not binge drink or go into town every weekend to drink as part of a socially accepted and required form of 'entertainment'.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

You should consider the following: 1. How will adding to the financial cost prevent addicts from using alcohol? 2. Why will young people geared up for their usual nights out at the weekends stop drinking because of this measure? 3. Who will be most penalised due to these measures? Those you are targeting or those who already manage their alcohol consumption and stick to their budget? 4. Why do you think this will have any long term effect once those you are targeting have become used to the new prices and probably found ways around them? 5. Are you really hoping to manage alcohol issues or are you hoping to create more revenue under the guise of social control? Where is the evidence that this will have any effect? 6. Have you considered other more long term options such as how pubs are run and education?

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

As I have stated. The government is choosing the least effective method to try and manage a massive problem. Only those who already budget effectively and do not have an addiction or are not part of weekend pub and club culture will notice any change. Perhaps you should ask yourselves regarding your own lives, what would you do if something you enjoyed and was part of your network of friendships increased in price? Would you stop doing it or would you find ways around it? Add to that the issues of addiction and it is easy to see how such a simplistic, uninformed and sociologically implausible this idea is. Whatever the reasons behind it, the government is missing the important aspects of how people function in society. It's really rather illuminating!

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can

make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

Q16. Should other factors or evidence be taken into account when considering a ban on multi-buy promotions? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 200 words):

You really MUST consider the majority of people who benefit from promotions and remain perfectly healthy, sound of mind and sober overall. Alcohol is not a terrible thing and I am sure plenty of people in Westminster partake of plenty of alcohol every year! That the government has decided to use such controlling policy to penalise the mass because of the few is ridiculously short sighted. Tackle the CULTURE and EDUCATE people. Alcohol will always be purchased by those who can find a way and all your tactics will do is create ways for criminals to make money! Fake brand spirits are already a problem in the UK and this will increase if demand does!

Score

Q17. The aim of a ban on multi-buy promotions is to stop promotions that encourage people to buy more than they otherwise would, helping people to be aware of how much they drink, and to tackle irresponsible alcohol sales. Do you think that there are any other groups that could be particularly affected by a ban on multi-buy promotions? Please select one option.

No

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

This will NOT affect anyone's drinking habits. This shows a complete ignorance of cultural and addiction issues across the board. It's quite shocking to me that this has been suggested as a means by which to 'control' people who need help, not a higher alcohol bill! As for weekend drinking, it is a cultural EVENT! No-one will stop spilling out onto the streets and causing trouble because of a ban on multi-packs and 2-for-one offers! You need to tackle the pubs and clubs and go back to reduced opening hours. Plus more education.

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions, a ban on dispensing alcohol by one person directly into the mouth of another, a requirement to provide free tap water on request to customers, a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine. More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want

Q19. Do you think each of the mandatory licensing conditions is effective in promoting the licensing objectives? For more information on the licensing objectives please see the glossary at the end of the full consultation document. Please select one option (Yes, No, Don't know) from each drop down menu.

	Prevention of crime and disorder	Public safety	Prevention of public nuisance	Protection of children from harm
Irresponsible promotions	No	No	No	No
Dispensing alcohol directly into the mouth	-	-	-	-
Mandatory provision of free tap water	Yes	Yes	Don't know	Don't know
Age verification policy	Yes	Yes	Don't know	Don't know
Mandatory provision of small measures	Yes	Yes	Yes	Don't know

Score

0

Q20. Do you think that the mandatory licensing conditions do enough to target irresponsible promotions in pubs and clubs? Please select one option.

No

If no, please state what more could be done in the box below (keeping your views to a maximum of 100 words):

This is where the main issues lie. Pubs and clubs are open too long and too late, they also do not take enough responsibility for serving people who are already drunk. Also, the age limit should be 21 minimum for clubs at least.

Score

0

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 200 words):

Increase the lower drinking age in clubs and possibly pubs too.

Score

0

Q22. Do you think that the current approach, with five mandatory licensing conditions applying to the on-trade and only one of those to the off-trade, is appropriate? Please select one option.

No

If no, please explain why you think the current approach is not the best approach (keeping your views to a maximum of 100 words):

It is when people are together in a pub or club that the number of drinks they have gets totally lost. People drink much more quickly in a group and there are often drinking games etc in pubs especially. In clubs, the heat and dancing makes people more thirsty and some offer salty snacks to make people want to drink more. All of these issues should be tackled. If pubs and clubs had more mandatory conditions regarding the sale of alcohol, this would do so much more for public safety and drunken hospital visits than anything else. For alcoholism which is more likely to be at home as much as in a pub, more services to address addiction are needed. No alcoholic will stop drinking due to increased prices, they will simply do without something else more important ie food or basic amenities. Addiction has nothing to do with prices, hence the regular link between addiction and other forms of crime.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make		X	
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Alcohol is not the problem, I am not able to make a value judgement on which establishments are capable of offering wine with a meal or a bunch of flowers without issue. Neither is anyone at Westminster or anyone else for that matter. The government is not addressing the issues at all, they have found a way to make it look like they are trying to manage a huge problem by choosing the least effective method which just happens to increase their income from tax! It's a ludicrous situation and nothing is being addressed.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

Why should a guest house have to tell its patrons how much they are 'allowed' to drink with their meal? We are not children and few of us are alcoholics or in clubs at the weekend!

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority

receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I highly doubt that a minimum price for alcohol would help reduce deaths or crime.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

A minimum price would hurt everybody, including responsible drinkers.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

It will cost everybody more money - it is unfair on those who drink responsibly.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be

limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is

available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make			X
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller			X
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options			X

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

no

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority

receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I don't believe that any minimum unit price level should be set. It will not achieve the Government's aims, but simply penalize the majority of moderate drinkers, who can ill afford yet another rise in price on top of increases in tax. Other European countries with LOWER prices than ours do not share our 'binge drinking' problems. It's the whole culture of drinking which should be addressed through EDUCATION. The proposed move will simply put more money in Government coffers, whilst doing nothing to cure the problem.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

our alcohol problem is not caused by price. I am a responsible drinker. alcohol is already really expensive at pubs or bars. I prefer staying home having a drink with friends. supermarket discounts do not encourage me to drink more... but to spend less whilst drinking the same. my alcohol-sensibility is a reflection of my education values and traditions. the government should not force me to buy less buy increasing the price... I already drink little enough... this rise would only affect my finances negatively because I'll have to spend more to do the same.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

people will always find a cheaper option... going abroad... black markets. the alcohol problem cannot be regulated by price or curfews if bars or clubs stop selling earlier... people will get drunk earlier. if alcohol is prohibited on weekends... people will drink on week nights. if bars are closed... people will drink at home. prohibition is never the answer.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

the entire population will be affected. if the approach is to encourage responsible drinking... maybe they should raise the price of supermarket alcohol but at the same time reduce pub and bars prices to encourage people to go out... to reward responsible drinkers by making their dinner glass of wine cheaper.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

People who binge drink would still do so, and may even make crime rates increase if they then steal the alcohol.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Income levels in different areas

Score

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary

sales of alcohol occasional provision of licensable activities at community events an extension of the temporary event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make		X	
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options		X

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental

to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Why "hair and beauty salons" but not travel agents or booksellers? (And, as an aside, who the hell spends so long choosing a bunch of flowers that they'd be able to accept a drink from a florist?)

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed

amount Do you think that the qualification criteria proposed meet this aim?

Yes

All recent pronouncements regarding alcohol pricing and regulation seem to be overly influenced by temperance campaigners prone to making up numbers and facts. If anyone in government actually knows of a supermarket where "strong lager is cheaper than water" I would appreciate the address. It's not true of any supermarket I've shopped at in the last two years. I'd love to see one, even if I don't drink lager....

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Although politically a lower level may seem more appealing - practically, a higher level, such as 50 or even 60p per unit is much more likely to push alcohol to a cost level where it will be re-considered a luxury good or occasional good for the home, rather than an everyday product.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

The counter argument of 'why punish the majority or good drinkers' should not be considered. Alcohol is a controlled substance and should be considered as much - it is not proposed to put a minimum price on milk. The majority of products currently below this price point are either low quality, or on promotion in a major supermarket.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Q20. Do you think that the mandatory licensing conditions do enough to target irresponsible promotions in pubs and clubs? Please select one option.

No

If no, please state what more could be done in the box below (keeping your views to a maximum of 100 words):

The conditions in themselves are quite strict - however I feel not enough is done to enforce such conditions as the mandatory provision of small measures.

Score

0

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

No

Score

0

Q22. Do you think that the current approach, with five mandatory licensing conditions applying to the on-trade and only one of those to the off-trade, is appropriate? Please select one option.

No

If no, please explain why you think the current approach is not the best approach (keeping your views to a maximum of 100 words):

The on-trade are held strongly to account as to the behaviour of patrons on their premises, and even prior to entry and past leaving. Restrictions are placed on service measures and promotions, and yet it seems much less restriction is placed on retailers serving where there is no responsibility as to the quantity or speed of consumption. Alcohol related behaviour is often blamed on on-trade venues, when often it can be attributed in part, or even in whole, on alcohol purchased from the off-trade. Off-trade alcohol is also far more accessible to children.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Score

0

Page Score

0

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract		X	
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment		X	
Florists, providing alcohol alongside the purchase of flowers		X	
Cultural organisations, such as theatres, cinemas and museums, providing		X	

alcohol alongside cultural events as part of the entry ticket			
Regular charitable events, providing alcohol as part of the wider occasion		X	

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No - surely, whether the sale is primary or ancillary, if alcohol is agreed to be a controlled substance, it should be controlled uniformly. Perhaps lower licencing costs for very small businesses, but otherwise a business is suitable to sell alcohol or not.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

Why do we wish to make alcohol as widely available as possible? Would this in itself not go against the licensing objectives? Normalising alcohol as part of other activities, such as barbers/hairdressers surely would increase the incidental consumption that the government and health bodies wish to reduce? No licence is currently required for complimentary, no purchase necessary provision of alcohol.

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed		X	
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder		X	
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder		X	

Score

0

Q33. Do you think these proposals would impact adversely on one or more of the licensing objectives? Please select one option.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed	X		
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder	X		
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder	X		

Score

0

Q34. What other issues or options do you think should be considered when taking forward proposals for a lighter touch authorisation? Please specify in the box below keeping your response to a maximum of 200 words:

As stated above - if the aim is to lower consumption of alcohol, and protect children from harm, why would we allow the sale of alcohol, albeit ancillary, in a less controlled and more widespread manner? It is in part the normalisation and familiarisation, let alone the availability of alcohol that increases sales. This proposal will do all of these things.

Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

An assumption that ancillary sales will of alcohol will increase service levels and benefit consumers is flawed.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

70p-£1 per unit, would be more suitable as this would make alcohol, more expensive than a chocolate bar, which of course it should be.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Yes, it should be noted that it is common practice for people drink prior to going out to pub or restaurant.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary

sales of alcohol occasional provision of licensable activities at community events an extension of the temporary event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract		X	
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

No

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

No, you are increasing more places where people can purchase alcohol and as such increasing more pressure on the emergency services, if things go array

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed		X	
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder	X		
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder		X	

Score

0

Q33. Do you think these proposals would impact adversely on one or more of the licensing objectives? Please select one option.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed		X	
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder	X		
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder		X	

Score

0

Q34. What other issues or options do you think should be considered when taking forward proposals for a lighter touch authorisation? Please specify in the box below keeping your response to a maximum of 200 words:

You are putting the regulation on pubs and clubs, to prevent crime and disorder, however if its an ancillary business, its not there problem, remember some organisations may say its ancillary, but if could be a free for all. If would have to be done on a case for case basis.

The proposed measures of 45p per unit are a sensible starting point, I would be happy to see it a little higher say 50p.

Overall I would say that we should be encouraging sensible social drinking which can be done in pubs and clubs where there is a responsible licensee, rather than the current situation which encourages people to drink at home in advance of going out.

As far as penalising people on a low income, like everyone else life has to be balanced and it won't harm any of us that alcohol is not a trivial cost.

Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

All members of society need to drink responsibly. I don't believe that the negative impact on someone with a low income should be a major consideration as with everyone else only a small proportion of your income should be going on alcohol, so the impact should still be small. If the medical evidence suggested a big increase in minimum price per unit then a compensation could be made in another area so that a low income person, drinking a sensible amount would have their other essential costs reduced proportionally.

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks

for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make		X	
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller	X		
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

I do not believe this will achieve the aim of reducing pre-loading, as the problem is with societies attitude to alcohol and drunkenness. not the price. This has been produced by the 24 hour drinking culture we have created in the country, driven by the current licencing laws. I do not believe having a minimum price will stop preloading it will just mean they have one drink less when they are out. People will still be excessively drunk and the consequences on policing and the health service will be unchanged.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

What real evidence of the effectiveness of minimum pricing? As far as I can see this new policy is based on a theoretical model not facts.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

It will impact on people o low or fixed incomes not on the target drinkres.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact

policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage

problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

Lifestyle changes won't be affected by price it will just hurt more

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Real research that links price with reduced consumption. I do not intend to change my consumption based on price but will have to spend less elsewhere.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Ordinary people like us - minimising the impact on responsible drinkers is government speak - there will be an impact, with less money to spend elsewhere. Stop trying to manipulate people and interfering in the freedom of choice. This is increasingly trying to interfere with people's private lives and choices and should stop.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Don't know

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

The financial benefits to the health service (stated in the impact assessments) are questionable, as anyone not dying of liver disease will die from something else, and people who live longer will cost the Treasury more in pension payments (if longer life did not increase costs, there would be no talk of a 'pension crisis')

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

The impact on other products which at current prices would not be affected: a minimum price will inevitably increase the price of all products to maintain price differentiation, which contradicts statements by the government indicating that there should be little to no impact on moderate drinkers. Any additional revenue generated by minimum pricing should not go to retailers or manufacturers of alcohol products, but should be earmarked for programs designed to treat alcohol related illness or otherwise reduce alcohol-related harm; it is not fair to force the public to provide supermarkets etc. with profit beyond that generated by normal, competitive business, nor should government be incentivised to raise the minimum price to generate additional revenue.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Everyone who buys alcohol products is likely to be affected; see statement re. price differentiation, above. Minimum pricing will impact poorer people more than rich; with this policy the government is taking the position that it will enforce health improvement for the poor while doing nothing to impact wealthier drinkers.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade?

Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Q26. What impact do you think allowing consideration of data on alcohol-related health harms when introducing a cumulative impact policy would have if it were used in your local area? Please specify your answer in the box below, providing evidence to support your response (keeping your views to a maximum of 200 words):

Little to none. Alcohol is freely available in my area (and most areas); allowing more off-licenses simply reduces the required walking distance to obtain alcohol by a few minutes. The granting of an on-license is unlikely to impact health as again, there are plenty of 'cheap' drinking establishments available already.

Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Score

0

Page Score

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make	X		
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller		X	
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options			X

Score

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment		X	
Florists, providing alcohol alongside the purchase of flowers	X		

Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Please use the space below to provide further comments (keeping your views to a maximum of 200 words):

The criteria do not rule out extending the sale/provision of drinks with little regulation to places/situations where children do not currently see alcohol being consumed. The more situations in which children see adults drinking, the less likely they are to limit their consumption to pubs/occasional treats as adults. The example 'Theatre and a drink' - the drink could make up a significant proportion of the transaction (3 or 4 pounds on a 10-20 pound ticket - community/student theatre, lower-quality seating), yet still be reasonably be considered an 'ancillary sale', while the same proportion of a shop or restaurant's sales in alcohol would reasonably require a full license. Hair/beauty salon example - providing even a free drink in an environment where people may be persuaded to buy more products/services would probably have the unintended(?) consequence that people will spend more than they intended to. Florist example - a florist may sell a whole bottle of wine alongside an expensive set of flowers - a reasonable 'ancillary sale', yet would fall foul of a limit on alcohol quantity designed to preclude drunkenness in hair salons.

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed			X
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder			X
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder			X

Q33. Do you think these proposals would impact adversely on one or more of the licensing objectives? Please select one option.

	Yes	No	Don't know
Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed			X
Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder			X
Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder			X

Score

0

Q34. What other issues or options do you think should be considered when taking forward proposals for a

lighter touch authorisation? Please specify in the box below keeping your response to a maximum of 200 words:

Although I generally agree with this proposal, it would seem to increase the number of venues at which the public can buy alcohol, and is likely to increase overall alcohol sales. This seems to directly contradict the aims of the minimum unit price/multibuy policies.

Or, is it the case that as ancillary sales will be associated with premium products and services (beauty salons, florists, cultural events, even charity events), this is a further extension of the government's apparent aim of reducing alcohol consumption among the poor, while continuing to ignore the middle/upper class (Conservative) voter's drinking problems!

Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

The figures quoted in the impact assessment seem to rely on one model, by one team of seven people. The report reads well, but I hope that independent experts on statistics, health and general scientific method have critically reviewed this before the Government accepts it verbatim.

I also dispute the underlying assumption that trading the freedom of the public to choose whether, where and how much to drink for a reduction in alcohol related health problems is 'beneficial'.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set

out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make			X
The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller			X
The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
Accommodation providers, providing alcohol alongside accommodation as part of the contract	X		
Hair and beauty salons, providing alcohol alongside a hair or beauty treatment	X		
Florists, providing alcohol alongside the purchase of flowers	X		
Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket	X		
Regular charitable events, providing alcohol as part of the wider occasion	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):

No minimum unit price that would be fair or acceptable to moderate drinkers would have much effect on binge or addictive drinkers.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Consideration should be given to more restrictive hours for the sale of alcohol.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

No Response

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or

not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify these in the box below (keeping your views to a maximum of 200 words):

Minimum pricing will not stop people drinking. Not one bit.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

If yes, please specify in the box below (keeping your views to a maximum of 100 words):

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary

event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know

Please provide your reasons in the box below:

A completely bad idea. It won't stop people binge drinking, as those who do that have the money do it anyway and won't worry if it costs a few more quid. However it WILL harm the lower paid like myself who like to shop around for a 99p bottle of beer or a £4 bottle of wine, or three bottles for a tenner at Asda. I think you'll find that those who take advantage of that promotion are not trouble making binge drinkers.

Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, 3 for £10 case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage

problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?
