## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

### Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

*If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):*

I think it needs to be raised to 50p as advised by experts in this field.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

Drinks promotions, loopholes, taxation etc.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Don't know

### Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## **Page 8: Health as a licensing objective for cumulative impact policies**

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

## **Page 9: Health as a licensing objective for cumulative impact policies**

Q24. What sources of evidence on alcohol-related health harm could be used to support the introduction of a cumulative impact policy (CIP) if it were possible for a CIP to include consideration of health? Please specify in the box below (keeping your views to a maximum of 200 words):

Violent crime, disorder reports and figures. A&E and health service data. Local knowledge of public health experts, social workers and police.

Q25. Do you think any aspects of the current cumulative impact policy process would need to be amended to allow consideration of data on alcohol-related health harms? Please select one option.

Yes

Score

0

Q26. What impact do you think allowing consideration of data on alcohol-related health harms when introducing a cumulative impact policy would have if it were used in your local area? Please specify your answer in the box below, providing evidence to support your response (keeping your views to a maximum of 200 words):

It would allow for a more meaningful assessment of the impact of introducing more licensed premises in the area in relation to harm caused by alcohol consumption on communities - in a wider sense rather than being strictly geographical. It would ensure more deprived neighbourhoods were not seeing more off licenses targeted at them and city centres could be more diverse rather than the NTE being solely based on alcohol

consumption. It would enable an assessment of the costs and benefits of such premises on the community in a more meaningful manner; addressing issues such as violence, domestic violence, injury and accidents, depression, alcohol-related disease, disorder, litter and many many more.

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

**No Response**

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary

event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>			X
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>			X
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

A different tax regime should be introduced for cask conditioned ale sold only in pubs or other licensed premises. This product is unique to the UK yet has no special status in the way that cornish pasties or pork pies do. If the tax rates were lowered for this class of drink only it would; 1) encourage responsible drinking in controlled circumstances 2) provide a boost to the craft brewing industry 3) revitalise dying local pubs 4) encourage people away from consuming damaging high alcohol beverages 5) boost british farm produce 6) assist in the localism agenda

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>		X	
<b>Florists, providing alcohol alongside the purchase of flowers</b>		X	
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

A different tax regime should be introduced for cask conditioned ale sold only in pubs or other licensed premises. This product is unique to the UK yet has no special status in the way that cornish pasties or pork pies do. If the tax rates were lowered for this class of drink only it would; 1) encourage responsible drinking in controlled circumstances 2) provide a boost to the craft brewing industry 3) revitalise dying local pubs 4) encourage people away from consuming damaging high alcohol beverages 5) boost british farm produce 6) assist in the localism agenda

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

No

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please

select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>		X	
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>		X	
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>		X

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

How about any other of the millions of members of public that don't drink to excess and smash the town centre up on Friday/Saturday night?

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

Model is out of date, Government very rarely gets these things right

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application

if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
The provision should be limited to a specific list of certain types of business and the kinds of sales they make			X
The provision should be available to all businesses providing they meet certain			X

qualification criteria to be an ancillary seller			
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>		X	
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X		

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>			X
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>			X
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>			X

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might

wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

No

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>	X

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

### Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

The type of drink should be taken into consideration when setting price. I drink low alcohol lager - 2% and this is already reducing the amount of alcohol that I consume. Products of this nature should be encouraged by NOT setting a minimum price whereas high strength beers and ciders - say 5% and above should be subject to a progressive price regime

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Don't know

### Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact

## policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

### Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

*If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):*

Prohibition in America caused more problems than it solved. This seems to be a step in that direction. I disagree with minimum pricing altogether.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

What are the unintended consequences of a minimum price? Unintended consequences always occur.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

Nobody will benefit- hardened drinkers will still do so & give up other things to pay for it, shoplifting & other crime will increase to supply alcohol, responsible people will be penalised. Duty & VAT income will increase- this is probably a major factor.

### Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in

2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

**No Response**

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

*If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):*

leave all prices to market forces and the decision of suppliers and retailers

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

The proposals will penalise responsible drinkers It will harm the drinks and associated UK businesses, deplete jobs and lose UK trade i.e. 'booze cruises' to France. Alcohol possibly of dangerous quality will appear on the black market Price control will increase interest by young people due to the attraction of buying on the black market

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

All business and people working in the leisure industry

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Don't know

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

A significant part of alcohol sales are at a regular (ie non-sale) price below this level, eg a bottle of wine for £4 (v. £4.20 for this), or half a litre of 4.8% beer for 90p (v. £1.08) for this). This include all consumers, not just binge drinkers, and it will be inflationary both for these consumers, and those consuming drinks currently priced a little above this level, as differential prices will largely be maintained. The figure should be chosen so that it is roughly non-inflationary for regular pricing; 40p per unit would manage this, though even that will increase some prices. Forbidding 'loss-leader' prices does make sense.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

The anomaly of cider being taxed at low rates was kept by Parliament in 2010, and needs to be abolished. Ciders up to 7.5% ABV are taxed at the same rate as 2% beer; this is a major part of extremely cheap alcohol supply. Still cider should pay the same duties as beer.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into

consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. ## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks

for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>			X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

I believe that 45p is too low, and that the 50p rate proposed in Scotland is a better level, because of the current 'standard' (i.e. non-bulk) prices of some of the cheaper supermarkets.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

It should consider not only the issue of alcohol consumption, but provide a small encouragement towards moderate social drinking in pubs rather than drinking at home by reducing the extreme price difference. Pubs are where drinking can most effectively monitored to ensure it is sensible and responsible, but the traditional model of treating supermarkets and pubs as entirely separate markets is pricing them out of the market because of the loss-leader element in supermarket pricing (which pubs cannot compete with). This is an anticompetitive manipulation of the alcohol market by an effective cartel of one part of the sector.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

If implemented at the correct level, it could have a positive effect on licensed traders, without having a significant negative impact on supermarkets.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

Score

0

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 200 words):*

The biggest issue that is being consistently ignored is the serving of alcohol to people who are already intoxicated. This is against the law, but that law is never, ever enforced. People should lose their licences and/or be prosecuted for breaching this - that would be the single most important measure for improving the crime, safety and nuisance issues that could possibly be implemented.

Score

0

Q22. Do you think that the current approach, with five mandatory licensing conditions applying to the on-trade and only one of those to the off-trade, is appropriate? Please select one option.

No

*If no, please explain why you think the current approach is not the best approach (keeping your views to a maximum of 100 words):*

Irresponsible promotions are a huge issue in both sectors, and there is an over-emphasis on age verification, especially in 'local' pubs where responsible drinking is encouraged, driving youngsters onto the streets to drink irresponsibly.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

*If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):*

The 50p level the Scottish Government are proposing would be better and would help keep regulations and prices aligned across the UK as a whole.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Don't know

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

Minimum pricing will benefit public houses, which are a central feature of community life in both urban and rural areas. The price gap between alcohol sold in supermarkets and that sold in pubs should narrow. Indeed prices probably won't rise at all for most alcoholic items in pubs when the scheme comes into force. Drinking in pubs is a much better culture to have.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

Yes

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

This is just another way of the government taxing the pound in our pockets they can bleat on about how much it costs the public but government have learnt to make the figures jump around to please themselves we only have to look at ministers expense forms to see this. its just about taxing us & controlling us ! Question how much revenue is already taken by gov from alcohol sales ?

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## **Page 8: Health as a licensing objective for cumulative impact policies**

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Anyone who would like to.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while

minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>	X		
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>		X	
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>	X

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

It would be much fairer, and make much more sense, to control the price of alcohol by means of the tax/duty regime. It would increase the minimum price of cheap alcohol, but it would also raise much-needed revenue for the exchequer. If it is true that the poor need to drink less, and the rich can afford to pay more for booze, it is - as they say these days - a 'no brainer'!

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Don't know

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

Score

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

**If yes, please specify these in the box below (keeping your views to a maximum of 200 words):**

Minimum pricing will not work as alcoholics, like druggies, will pay whatever is needed, binge drinkers and hooligans in town centres already pay more than 45 p per unit, the only people it will effect will be people like me who drink 3 cans of Carlsberg or Fosters standard lager on an evening and who will be paying an extra £317 per annum under these plans for the privelege of doing so. Price is of no consideration to alcoholics or binge drinkers, its the normal people who will suffer. Is this fair? Is it fair that I pay an extra £317 per annum for a failed government initiative that will not work. Do not alienate the greater majority of the British public based on one piece of unproven research from Sheffield based on a lot of assumptions..

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while

minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this

consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

I do not think it will make any difference whatsoever and will penalise us the public who like a quiet drink at home causing no trouble at all.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

I refer to the members who cause no trouble the vast majority and we will be penalised yet again

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

Not only the pubs and clubs like small towns and villages which have a pub or small club which will lose a lot of customers.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of

harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

A review of the underlying assumptions (statistics, studies, surveys etc.) that suggest that minimum unit pricing is necessary.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints of beer or cider or 125ml glasses of wine. More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. ## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

I think a 50% minimum price, like what is proposed in Scotland and what research points to would be a better target. In the long term I think we will reach this target anyway, so things are moving in the right direction.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

Yes - where the alcohol is sold. Most people who cause problems in night clubs and bars in city centres haven't bought their drinks there. Drinks in clubs and bars remain the most expensive part of a night out for most young people today. The rise of 'pre-loading' with cheap drinks from off-licenses and supermarkets is the main cause of alcohol related anti-social behaviour incidents. When buying a drink in a club or bar, the sales person can assess whether or not the customer should be served a drink and there are often security staff on site to ensure everyone is in a safe state. When drinks are bought in a supermarket, customers can buy large amounts of alcohol and give it to whoever they wish, theoretically. This, in my opinion, is the main cause of alcohol related problems and the main source of 'cheap' alcohol. I believe there should be a different set of regulations for supermarkets and off-licenses than to bars, pubs and clubs, for example a different rate of taxation.

Score

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might

wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

Motivation for drinking to excess

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should be reviewed after a set period

Score

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to

ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove

unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		

Score

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints of beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application

if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

The impact assessment on MUP states that "....." There is expected to be a limited impact on responsible consumers" It later goes on to suggest that the average annual increase for this group will be just £7. However, the methodology behind the calculation is lost amidst a whole range of figures/tables/percentages in a 34 page document which I would suggest, is not easy reading for the average person. Indeed, all the impact assessments are similarly wordy, and as such disadvantage those without the time or expertise to full engage with them.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q47. Do you have any comments on the methodologies or assumptions used in the impact assessments? If yes, please specify in the box below, clearly referencing the impact assessment and page to which you refer (keeping your views to a maximum of 400 words).

There is nothing here that allows me to complain about this supreme example of 'Nanny-Stateism'. It constantly references 'the benefits' but does not identify the disadvantages - the loss of personal responsibility for our own actions. Why do law-makers always turn into control freaks? Keep pressure-group opinions out of the law. Police already have more-than-sufficient powers to tackle street crime, if they chose to use them. Take drunks off the street and increase fines for drunken behavior. Treat ordinary people as adults and do not penalise the many for the sins of a few! But this is a waste of my time anyway - the die is already cast.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact

## policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>	X		
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes

Score

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

Everyone. The statistics as published by the ONS are exceedingly clear that alcohol consumption have been declining year on year. Clearly a minimum price would not affect "binge" drinkers to any statistically significant effect. Indeed if cheaper drinks go up in price then premium brands will too, to maintain their margin/status. A general drop in consumption will affect revenues meaning that Government will ask for yet more money. The published (in your evidence) cost of drinking to the NHS is c. £3bn a year against £10's of billions in tax receipt.

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>	X		
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Just stop over regulating. Tear up the rules and let the economy flourish

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

Score

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

*If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):*

From your own figures, the additional cost to significant drinkers would be little more than £3 per week. In most towns, this is about the same as one pint of beer. As is well recognised, due to other financial pressures, many of the younger persons responsible for the drunken behaviour still live at home so have far more disposable income available to absorb this small cost.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

it is pointless exercise

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

The elderly and occasional drinkers that might like to drink but are on low or limited incomes will be affected by the unwarranted pecuniary increase.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

It would be better to have the unit price higher, say at 50pence, to match the Scottish lead and increase the positive outcomes.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Don't know

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

Score

0

Page Score

0

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>	X		
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>		X	

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Accommodation providers should be kept to "small operators" and not large hotels with function rooms, etc. Bingo Halls, Theatres, Museums, Garden Centres (where ancillary to a meal), and similar.

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that:

alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

No

**Please use the space below to provide further comments (keeping your views to a maximum of 200 words):**

This is likely to present "loopholes" and the legislation should be kept simple, specific and the less open to challenge or "stretching" the better.

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>		X	
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>	X		
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>		X	

Score

0

Q33. Do you think these proposals would impact adversely on one or more of the licensing objectives? Please select one option.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>		X	
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>	X		
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>		X	

Score

0

Q34. What other issues or options do you think should be considered when taking forward proposals for a lighter touch authorisation? Please specify in the box below keeping your response to a maximum of 200 words:

The premises need to be small and not have the ability to hold functions for other than a small number of people. The larger the number the more experience and staff are required to provide a control measure.

Q45. In addition to the suggestions outlined above, what other sections of or processes under the 2003 Act could in your view be removed or simplified in order to impact favourably on businesses without undermining the statutory licensing objectives or significantly increasing burdens on licensing authorities? (Please keep your views to a maximum of 200 words.)

the PR & SR Act 2011 added a "late TEN" to the guidance, but this is not covered in legislation. The late TEN principle should be removed, returning to the "minimum 10 days notice" to remove disagreement and interpretation. Alternatively introduce a definitive list of "exceptional circumstances" or give examples. Changes of DPS to be given prior to change being made - it is easier to "stop" a process than to remove a person with authority under Section 38.

There is a need to Review the whole of the Licensing Act 2003, its aims, ethos, procedures and outcomes. The "light touch" approach is not always best. In some respects it is a vast improvement upon LA 1964, but in others has had a detrimental effect on crime, disorder and anti-social behaviour. Later licensing hours have created unforeseen burdens upon the Police. Few of the "partners" in the licensing regime take an active part and shirk their responsibilities under the Act.

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

I am undecided at this stage as to whether the minimum unit price will achieve its aim. The aim is to target hazardous and dangerous drinkers. In my experience as a Police Officer of 17 years these groups tend to drink high ABV drinks. Should it be considered to set a MUP on drinks with an ABV of 6% and above thus targetting the group intended rather than all groups of drinkers.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Do you think that there are any other groups that could be particularly affected by a ban on multi-buy promotions? Please select one option.

Yes

**If yes, please specify in the box below (keeping your views to a maximum of 100 words):**

Although it can be argued that multi-buys encourage consumers to drink more I don't believe this to be the case in every instance. Responsible drinkers who merely wish to 'stock up' at a good price would be penalised and I think this may be an unpopular proposal for the majority of consumers. There is an element of self responsibility which the silent majority of consumers take seriously. I feel these aims are targetting a minority by penalising the majority.

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks

for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain

qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

it will only result in illegal manufacture and importation of drinks, (with uncertain production methods), which is more likely to be injurious to health. And it won't stop the heavy drinkers from seeking alternatives such as meths, which is more damaging to health. So there is no minimum price which would have the desired effect. it will merely penalise the responsible drinkers.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

Costs should be passed on to those who are committing crimes, getting Liver damage treatment, cost of cells overnight etc. Options include Court action with exceedingly high fines and terms of imprisonment, required attendance at educational classes etc. There are a whole range of options more likely to result in people thinking twice before drinking excessively. the difference being those will require govt funding (until paid for by receipts for treatment and from fines. Target those who are the problem !

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

The Government, because you will certainly lose my vote (in additon to UKIP getting it because of the lack of a referendum !). Stop milking me for every penny, and trying to stop me having life's little pleasures. I've never been drunk and disorderly, never drive if I'm drinking. Stop penalising me for something I haven't done. I'm not a criminal !

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of onethree for the price of twobuy one get one freebuy six and get 20 per cent off24 cans of lager costing less than 24 times the cost of a single can of lager in the shopa case of wine sold cheaper than the individual price at which the same bottles are sold in the shop3 for £10 where each bottle costs more than £3.33 More information is available in the full consultation document and the impact assessment. ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? This is an unnecessarily bureaucratic survey, to get a simple opinion across, and disagree with everyone being penalised for the sake of a few. Some people steal. Why don't the Government send everyone to jail for a spell, to catch the guilty, even though it will tarnish the innocent as well. It's the same principle !

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

At least 50p/unit should be set as it would have a greater deterrent effect and bring England into line with Scotland. To have 2 different regimes will cause confusion and encourage cross-border movements to reduce costs in Scotland.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

*No Response*

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

There may well be others but the needs of a tiny minority should not offset the good for the majority.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set

out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>	X		
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>		X	
<b>Florists, providing alcohol alongside the purchase of flowers</b>		X	
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>		X	

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

*Please use the space below to provide further comments (keeping your views to a maximum of 200 words):*

Restricting consumption to a prescribed amount per individual is clearly unworkable in practice.

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>	X		
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>	X		
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>	X

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

However, I think 45p is really too low. It still represents cheap alcohol.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes

Score

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of

45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

50p would be preferable but it remains to be seen if this minimum price has any effect - it will not affect pub/club drink prices just supermarkets

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

Use economic demand models for 45p and 50p price points - demand for alcohol is likely to be price inelastic so price may not impact on consumption considerably

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Don't know

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set

out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know
<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>		X	
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>		X	

Score

0

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>		X	
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>		X	
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

No

*Please use the space below to provide further comments (keeping your views to a maximum of 200 words):*

This exemption will be subject to widespread abuse with businesses all saying that alcohol sales are only a small part of their business turnover - there will be no obligation to disclose alcohol sales turnover. Premises Licences will not be applied for/be renewed and Council income from licensing fees will fall. This will create a regulatory mess - we need certainty that premises selling alcohol need a licence to do so.

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>	X		
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>	X		
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>	X		

Score

0

Q33. Do you think these proposals would impact adversely on one or more of the licensing objectives? Please select one option.

	Yes	No	Don't know
<b>Allow premises making ancillary sales to request in their premises licence application that the requirement for a personal licence holder be removed</b>	X		
<b>Introduce a new, light-touch form of authorisation for premises making ancillary sales - an ASN but retaining the need for a personal licence holder</b>	X		
<b>Introduce a new, light touch form of authorisation for premises making ancillary sales - an ASN - with no requirement for a personal licence holder</b>	X		

Score

0

Q34. What other issues or options do you think should be considered when taking forward proposals for a lighter touch authorisation? Please specify in the box below keeping your response to a maximum of 200 words:

All premises selling alcohol should be regulated by a Premises Licence - a business being prosecuted for not having a licence will always claim that sales were ancillary.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact

## policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Yes

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify these in the box below (keeping your views to a maximum of 200 words):*

The cost per unit of alcohol proposed in Scotland should be considered so that the two prices are identical.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

No

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Don't know

**If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):**

Simple. Rather than bringing in a blanket price, what \*should\* be done is that the "experts" who want this to be legislated and imposed on people should try out the minimum pricing for themselves. The benefits are threefold. 1. The effects of minimum pricing could be investigated before the price is increased for everyone 2. After, say, five years of charging the experts (doctors and MPs) a minimum price, we would be able to see whether the alcohol consumption had been reduced and whether it worked 3. Whether antisocial behaviour of these groups, especially MPs, had been reduced.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

**If yes, please specify these in the box below (keeping your views to a maximum of 200 words):**

Yes, rather than a blanket society-wide introduction, a trial should be initially conducted involving those in favour of an introduction of minimum pricing, such as doctors in favour and MPs voting for the minimum price. They will have to carry a card (with a smart chip and photograph of themselves), and told to wear a high visibility vests with the words "I choose to be charged extra for alcohol" printed in 18 point arial font on the front and at least 48 point Calibri on the rear of the jacket with the words "Helping society fight anti-social behaviour by paying a minimum price for alcohol". This will have two beneficial effects 1. By easily identifying the people involved in the study, the general public will be encouraged to support them 2. Staff working in the shops will know that the customers have chosen willingly to be charged the minimum price for alcohol and won't then laugh at them.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

The minimum unit price should automatically be updated in line with inflation each year

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

**If yes, please specify in the box below (keeping your views to a maximum of 100 words):**

MPs. They like to drink on the public purse in their private bar in "a royal court". Perhaps minimum pricing could be "pre-introduced" in the houses of parliament. Of course, the charge would be entirely voluntary. Then the public could see just how popular it is before the vote in parliament. Democracy in action with MPs leading the way.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Please select one option.

## Page 5: A ban on multi-buy promotions in the off-trade

Q14. Do you think there should be a ban on multi-buy promotions involving alcohol in the off-trade? Please select one option.

No

Score

0

Q15. Are there any further offers which should be included in a ban on multi-buy promotions? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

Only for MPs and Doctors. MPs and Doctors surely should not be affected by multibuy promotions. Imagine the effect on Wine clubs, such as Virgin Wine, Telegraph Wine Club, Times Wine Club and Wine Clubs all over the country. Majestic Wine would have an awful time. So boxes of wine should be excluded from any restrictions. But four packs of lager or cider? Of course they must be restricted.

Score

0

Q16. Should other factors or evidence be taken into account when considering a ban on multi-buy promotions? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 200 words):*

Oh. I've got 200 words for this box instead of 100! Good. Well in that case I'll say it's obvious that plebs should have as many restrictions as possible. And upper class people (and upper middle class) should not have any. So, boxes of wine and champagne MUST be exempt, but lager and cider? Of course minimum pricing must be as vicious as possible. Anything to get money out of the plebs (or are they prols?)

Score

0

Q17. The aim of a ban on multi-buy promotions is to stop promotions that encourage people to buy more than they otherwise would, helping people to be aware of how much they drink, and to tackle irresponsible alcohol sales. Do you think that there are any other groups that could be particularly affected by a ban on multi-buy promotions? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

People who don't drink very often, but buy alcohol for special occasions such as arties for the Boat Race, Ascot and Royal Weddings

## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## Page 7: Reviewing the mandatory licensing conditions

Q19. Do you think each of the mandatory licensing conditions is effective in promoting the licensing objectives? For more information on the licensing objectives please see the glossary at the end of the full

consultation document. Please select one option (Yes, No, Don't know) from each drop down menu.

	Prevention of crime and disorder	Public safety	Prevention of public nuisance	Protection of children from harm
<b>Irresponsible promotions</b>	No	No	No	Yes
<b>Dispensing alcohol directly into the mouth</b>	No	No	No	Yes
<b>Mandatory provision of free tap water</b>	No	Don't know	Don't know	Yes
<b>Age verification policy</b>	No	No	No	Yes
<b>Mandatory provision of small measures</b>	No	No	No	Yes

Score

0

Q20. Do you think that the mandatory licensing conditions do enough to target irresponsible promotions in pubs and clubs? Please select one option.

Don't know

**If no, please state what more could be done in the box below (keeping your views to a maximum of 100 words):**

I had to say "no" in order to comment, but with only 100 words for this, I think I might run out of words. 200 words, such as in other questions, would have been a fairer limit. But "irresponsible promotions" seems to simply mean "good value". The government doesn't like it because the cheaper the price the less VAT is received. Indeed, "irresponsible promotions" are probably seen as "tax dodging".

Score

0

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

Yes

**If yes, please specify in the box below (keeping your views to a maximum of 200 words):**

Yes. More and more I am seeing the confusing signs saying things like "Are you under 21?", "You must show ID if you appear to be under 25". I thought the law was 18 and over. I get very confused by all these different ages on stickers, posters and signs. Is the law 18, 21, or 25? Surely simple one age should be shown. And that is 18. Anything other than this is an affront to liberty.

Score

0

Q22. Do you think that the current approach, with five mandatory licensing conditions applying to the on-trade and only one of those to the off-trade, is appropriate? Please select one option.

No

**If no, please explain why you think the current approach is not the best approach (keeping your views to a maximum of 100 words):**

There should only be one mandatory condition applying to on-trade. The same as for off-trade. Lets face it, the problems are not caused by on-trade premises, but by "pre-loading" at home. Ban drinking in the home is the only way to solve the problem.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local

decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

## Page 9: Health as a licensing objective for cumulative impact policies

Q24. What sources of evidence on alcohol-related health harm could be used to support the introduction of a cumulative impact policy (CIP) if it were possible for a CIP to include consideration of health? Please specify in the box below (keeping your views to a maximum of 200 words):

Full studies on the health of MPs who drink in the bars in the Palace of Westminster. Full disclosure to the public on the amount of alcohol consumed by MPs in the palace, (and anywhere if the law is going to apply "anywhere"), so we can see just how antisocial they become.

Q25. Do you think any aspects of the current cumulative impact policy process would need to be amended to allow consideration of data on alcohol-related health harms? Please select one option.

Yes

*If yes, please specify which aspects in the box below (keeping your views to a maximum of 200 words):*

Absolutely. We need to know what impact alcohol is having on the people responsible for passing laws in the UK. Imagine someone having to vote on a matter of law who is "under the influence". Disgraceful. And drink in the workplace? I thought that the H&SAWA banned that... ah but it doesn't apply to MPs working in a "Royal Palace".

Score

0

Q26. What impact do you think allowing consideration of data on alcohol-related health harms when introducing a cumulative impact policy would have if it were used in your local area? Please specify your answer in the box below, providing evidence to support your response (keeping your views to a maximum of 200 words):

Probably kill off the remaining pubs. Over \*half\* the pubs in the area have closed. Such considerations would probably finish off the remainder. Just think of the impact on duty and VAT

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Yes

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

	Yes	No	Don't know

<b>The provision should be limited to a specific list of certain types of business and the kinds of sales they make</b>		X	
<b>The provision should be available to all businesses providing they meet certain qualification criteria to be an ancillary seller</b>	X		
<b>The provision should be available to both a specific list of premises and more widely to organisations meeting the prescribed definition of an ancillary seller, that is both the above options</b>	X		
Score

Q29. If special provisions to reduce licensing burdens on ancillary sellers were to include a list of certain types of business, do you think it should apply to the following? Please select one option in each row.

	Yes	No	Don't know
<b>Accommodation providers, providing alcohol alongside accommodation as part of the contract</b>	X		
<b>Hair and beauty salons, providing alcohol alongside a hair or beauty treatment</b>	X		
<b>Florists, providing alcohol alongside the purchase of flowers</b>	X		
<b>Cultural organisations, such as theatres, cinemas and museums, providing alcohol alongside cultural events as part of the entry ticket</b>	X		
<b>Regular charitable events, providing alcohol as part of the wider occasion</b>	X		

Score

0

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

Yes. MPs bars. These need to be fully transparent, with a daily list of which MP has consumed what. This could be published on a website, or even published in Hansard

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount Do you think that the qualification criteria proposed meet this aim?

No

Score

0

Q32. Do you think that these proposals would significantly reduce the burdens on ancillary sellers? Please select one option in each row.

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

Don't know

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

I believe that the same level should be established throughout the UK and would support the 50p level as being proposed for Scotland. The 45p level seems at the low end of the range in terms of affordability for people on modest incomes. Based on the Governments own figures a 50p level should offer even greater health benefits

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing

authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENS) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

***If you think another level would be preferable, please set out your views on why this might be in the box below (keeping your views to a maximum of 200 words):***

I do not believe setting a minimum price will work. If you do this you will create other problems associated with addicts unable to afford their addiction. You will alienate responsible drinkers who are on a low income.

Alcohol abuse is not an issue in France but wine is less than €1 per bottle. Price levels won't solve the issues, only education over time will.

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

Responsible drinkers on a budget caused brought about by the policies of the last 2 governments. We have 3/4 bottles of wine each week, in the home, we can't afford to go out due to the high taxes on alcohol. Why should we have to pay more when we pay our taxes and drink responsibly??

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Don't know

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify in the box below (keeping your views to a maximum of 100 words):***

Anyone who drinks responsibly will be affected. Why should that be? It's ok if you are on a reasonable wage, but what if you aren't? Fuel goes up, utility prices go up, water goes up, shopping bills go up, entertainment costs go up, VAT went up, you can't keep squeezing more out of the ordinary man / woman.

## **Page 4: A ban on multi-buy promotions in the off-trade**

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Do you want to answer questions on reviewing the mandatory licensing conditions? Please select one option.

## **Page 8: Health as a licensing objective for cumulative impact policies**

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? Please select one option.

## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Cost of alcohol is NOT the problem; otherwise countries such as France, where costs are much lower would have greater problems. The answer has to be education but councils have seen government subsidies cut and so education cannot be funded locally.

The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm

from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

Page Score

0

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

Yes

***If yes, please specify these in the box below (keeping your views to a maximum of 200 words):***

take a look at swedish and norwegian laws. they do not work. if anything they make the problem worse. i lived in sweden four years. by increasing the price of alcohol you will open this country up to illegal stills and importation of very harmful alcohol from abroad which will be run by criminal gangs. alcoholism is a disease and should be treated as such.

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotions a ban on dispensing alcohol by one person directly into the mouth of another a requirement to provide free tap water on request to customers a requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, and a requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. ## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application

if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary event notice limit at individual premises, late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

## Page 11: Freeing up responsible businesses

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement.

Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? Q20. Do you think that the mandatory licensing conditions do enough to target irresponsible promotions in pubs and clubs? Please select one option.

No

**If no, please state what more could be done in the box below (keeping your views to a maximum of 100 words):**

There are numerous offers available in numerous outlets that are just as dangerous and have as much effect as the direct pouring of alcohol into the mouth. The offers sometimes seem just a simple promotion to boost sales but if studied closely have the opposite effect. Example - buy two glasses of wine and the rest of the bottle free. A shot of whisky for £1.50 and (double-up) get a second shot for £1.

Score

0

Q21. Are there other issues related to the licensing objectives which could be tackled through a mandatory licensing condition? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 200 words):*

I am not sure if this is the correct "box" for this answer..... There should be a review and tightening-up of the conditions for allowing young people (under 16) in pubs. The idea of allowing the introduction of youngsters to licensed premises at an early age is well intentioned but misguided. The effect is something that cannot always be expressed with pen and paper; it has to be seen and experienced.

## Page 8: Health as a licensing objective for cumulative impact policies

Q23. We want to ensure that licensing authorities are able to take alcohol-related health harms into consideration when making decisions about cumulative impact policies (CIPs) which can be used to manage problems linked to the density of premises in specific areas. A CIP introduces a rebuttable presumption that all new licence applications and variations in that area will normally be refused if the licensing authority receives a relevant representation stating that the application will add to the cumulative impact. However each application must still be considered on its own merits and the licensing authority may still grant the application if it is satisfied that the application will not contribute to the cumulative impact. We are proposing that licensing authorities will be able to take evidence of alcohol-related health harm into account in deciding whether to introduce a CIP and the extent of that CIP. This would be a discretionary power and not an obligation. We expect that those areas with the highest levels of alcohol-related health harm, or fast rising levels of harm from alcohol, will be most likely to use this power. It will allow local health bodies to fully contribute to local decision making and mean licensing authorities can restrict the number of licensed premises in the local area on the basis of robust local evidence. More information is available in the full consultation document and impact assessment. Do you want to answer questions on health as a licensing objective for cumulative impact policies? ## Page 10: Freeing up responsible businesses

Q27. The government has committed to consult on giving licensing authorities greater freedom to take decisions that reflect the needs of their local community. Following the government's Red Tape Challenge in 2011, three areas of reform were specified: alcohol licensing for certain types of premises providing minimal alcohol sales, temporary event notices (TENs) and the licensing of late night refreshment. This section asks for views on these proposals and suggests further ways to reduce burdens on business. The proposals set out here can be seen alongside work undertaken by the Department for Culture, Media and Sport to remove unnecessary red tape from regulated entertainment. More information on each of these areas for reform is available in the full consultation document. There are five subjects covered in this section. They are: ancillary sales of alcohol, occasional provision of licensable activities at community events, an extension of the temporary

event notice limit at individual premises late night refreshment, and further proposals to reduce burdens on business. Do you want to answer questions on freeing up responsible businesses? Please select one option.

Q28. Ancillary sales of alcohol. For many businesses, the sale of alcohol is only a small part of, or incidental to, their wider activities, and occurs alongside the provision of another product or service (which this consultation refers to as an 'ancillary sale'). For example, a guesthouse might wish to provide wine to its guests with an evening meal or a complimentary bottle of wine in a guest's room, while a hairdresser might wish to offer clients a glass of wine. Should special provision to reduce the burdens on ancillary sellers be limited to specific types of business, and/or be available to all types of business, providing they meet certain qualification criteria for limited or incidental sales? Please select one option in each row.

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

## Page 2: A minimum unit price for alcohol

Q8. In the alcohol strategy, the government committed to introducing a minimum unit price for alcohol in England and Wales. This consultation will contribute to the debate on the most appropriate price per unit and the mechanism by which, once set, minimum unit pricing would remain effective. It is also an opportunity for interested parties to raise other issues around minimum unit pricing. The purpose of minimum unit pricing is to reduce alcohol consumption, particularly by the most hazardous and harmful drinkers who tend to show a preference for the cheapest alcohol products. By doing so the government estimates there will be a reduction in the associated crime and health harms, especially the numbers of hospital admissions, alcohol-related deaths and alcohol-related crimes. Minimum unit pricing is not intended disproportionately to affect responsible drinkers or particular social groups but to reduce the availability of alcohol sold at very low or heavily discounted prices. More information (including the definitions of hazardous and harmful drinkers) is available in the full consultation document and the impact assessment. Do you want to answer questions on minimum unit pricing? Please select one option.

Yes

Score

0

Page Score

## Page 3: A minimum unit price for alcohol

Q9. The impact of minimum unit pricing will depend on the price per unit of alcohol. The government wants to ensure that the chosen price level is targeted and proportionate, whilst achieving a significant reduction of harm. The government is therefore consulting on the introduction of a recommended minimum unit price of 45p. The government estimates a reduction in consumption across all product types of 3.3 per cent, a reduction in crime of 5,240 per year, a reduction in 24,600 alcohol-related hospital admissions and 714 fewer

deaths per year after ten years. Do you agree that this minimum unit price level would achieve these aims? Please select one option.

No

Score

0

Q10. Should other factors or evidence be considered when setting a minimum unit price for alcohol? Please select one option.

No

Score

0

Q11. The government wishes to maintain the effectiveness of minimum unit pricing and is therefore proposing to adjust the minimum unit price level over time. How do you think the level of minimum unit price set by the government should be adjusted over time? Please select one option.

Do nothing - the minimum unit price should not be adjusted

Score

0

Q12. The aim of minimum unit pricing is to reduce the consumption of harmful and hazardous drinkers, while minimising the impact on responsible drinkers. Do you think that there are any other people, organisations or groups that could be particularly affected by a minimum unit price for alcohol? Please select one option.

Yes

*If yes, please specify in the box below (keeping your views to a maximum of 100 words):*

This will affect perfectly normal people who enjoy a drink in moderation, particularly the lower paid and pensioners.

## Page 4: A ban on multi-buy promotions in the off-trade

Q13. The government is consulting on introducing a ban on multi-buy promotions in the off-trade (e.g. shops and off-licences) as part of its wider strategy to reduce excessive alcohol consumption, and alongside the introduction of a minimum unit price. A ban on multi-buy promotions would therefore not apply to pubs, clubs, bars or restaurants. The term 'multi-buy promotions' refers to alcohol promotions that offer a discount for buying multiple items. The aim of a ban would be to stop promotions that encourage people to buy more than they otherwise would, making it cheaper (per item) to purchase more than one of a product than to purchase a single item. As well as being part of a wider strategy to reduce consumption and tackle irresponsible alcohol sales, a ban on multi-buy promotions would also contribute to the government's aim of encouraging people to be aware of how much they drink and the risks of excessive drinking, so that they can make informed choices. The aim of this consultation is to assess support for such a ban and contribute to our understanding of the impact a ban on multi-buy promotions may have. The types of promotion it is proposed that a ban would include, are: two for the price of one, three for the price of two, buy one get one free, buy six and get 20 per cent off, 24 cans of lager costing less than 24 times the cost of a single can of lager in the shop, a case of wine sold cheaper than the individual price at which the same bottles are sold in the shop, 3 for £10 where each bottle costs more than £3.33. More information is available in the full consultation document and the impact assessment. Do you want to answer questions on a ban on multi-buy promotions in the off-trade? ## Page 6: Reviewing the mandatory licensing conditions

Q18. In its response to the 'Rebalancing the Licensing Act' consultation in 2010, the government committed to review the impact of the current mandatory licensing conditions. More recently, the alcohol strategy made a commitment to review these mandatory licensing conditions to ensure they are sufficiently targeting problems such as irresponsible promotions in pubs and clubs. The government has also committed to consult on whether these mandatory licensing conditions should, where relevant, apply to both the on- and off-trade. This consultation forms part of that review, and will contribute to the government's understanding of how these mandatory conditions are perceived. The five mandatory licensing conditions currently set out in regulations in relation to the supply of alcohol are: a ban on irresponsible promotionsa ban on dispensing alcohol by one person directly into the mouth of anothera requirement to provide free tap water on request to customersa requirement to have an age verification policy to prevent the sale of alcohol to persons under 18 years of age, anda requirement to make available to customers small measures such as half pints or beer or cider or 125ml glasses of wine More information is available in the full consultation document. An explanation of each of these terms can be found on page 20 of the consultation document, in the glossary at the end. Q30. Do you have any suggestions for other types of businesses to which such special provision could apply without impacting adversely on one or more of the licensing objectives? Please write your suggestions in the box below, keeping your views to a maximum of 200 words:

*No Response*

Q31. The aim of a new 'ancillary seller' status is to reduce burdens on businesses where the sale of alcohol is only a small part of their business and occurs alongside the provision of a wider product or service, while minimising loopholes for irresponsible businesses and maintaining the effectiveness of enforcement. Alternatively, a second option is to broaden the definition of 'ancillary sales' to include all businesses (and/or not for profit activities) through the use of a general set of qualification criteria, for example, to the effect that: alcohol must be sold or supplied as a small part or proportion of a sales transaction or contract for a wider service, and the amount of alcohol that could be supplied as part of that contract cannot exceed a prescribed amount. Do you think that the qualification criteria proposed meet this aim?

Yes
