

The Millom Without Parish Council has considered this consultation and has had sight of the response submitted by the Cumbria Association of Local Councils.

The Parish Council would support the response from CALC and would place particular emphasis on the following points:

- That safety should be a paramount consideration
- That the decision on the site to be chosen should be based on geological suitability.
- That greater attention should be given to the perspective and role of town and parish councils with this first tier of local government being placed within the decision making arrangements.

Yours sincerely

S Brighton
Clerk to the Parish Council
