

BRDO provides externally funded technical assistance, in collaboration with the DfID sponsored IFUSE programme, to developing countries wanting to improve the environment for business and stimulate trade and investment.

Working with the IFC-World Bank, OECD and the EU, BRDO helps governments, regulators and businesses improve the way regulations are implemented, making sure that regulations are focused on the things that matter and are enforced in a fair, transparent and consistent way.

Our staff are technical experts, many with experience as regulators, and are skilled in working with business and regulators, analysing problems and providing practical solutions.

Working with:

BRDO
Better Regulation Delivery Office

Why work with BRDO?

“This is quite simply a unique institution, with its specific focus on regulatory delivery and enforcement, of major value.”

Investment Climate Advisory Services,
World Bank Group

What we can deliver

A better regulatory environment can:

- Make it easier to start up and run a business
- Improve the health of communities and protect workers and the environment
- Support businesses to grow and create new jobs
- Promote fair competition
- Expand markets and trade by improving border controls

We can:

- Help governments improve the environment for business
- Reduce **barriers, costs and risks** of doing business
- Reform **business inspections** to deliver growth and protect people
- Improve the **skills and knowledge** of regulators
- Support growth, encourage inward investment and improve the lives of communities and businesses

Inspection planning guidance: practical guidance and interactive workshops for front line regulators on planning, preparing and carrying out risk-based inspections.

Checklist development: creating easy to apply tools for risk-based and targeted approaches to inspections.

Professional competency and leadership training for regulators: improving the professional skills and knowledge of regulators and inspectors.

Working with business: training on working in partnership to meet the needs of large and small businesses.

Reducing the cost of inspections to business: providing advice on efficient approaches to regulation.

Evaluating the effectiveness of regulators: providing advice on how to best organise and structure regulatory agencies.
