Quarterly NHS Commissioning Population Statistics: based on military and civilian medical patient registrations 01 July 2013

INTRODUCTION

1. This quarterly Official Statistic is the first in a new series providing summary statistics on the number of serving UK Armed Forces personnel and civilian personnel with a Defence Medical Services (DMS) registration. This report uses a snapshot of data as at 1 July 2013. Future reports will be released quarterly, 8 weeks after the reporting point. The next report will be published on 28 Nov 2013. This official statistic has been revised due to some locations being included in error in the previous version.
2. This report is being released to enable the MOD, the Department of Health (DH), NHS England (and devolved administrations), Public Health England, Local Area Authorities (LAA) and Clinical Commissioning Groups (CCG) to make informed decisions regarding the commissioning of clinical services in different parts of the country depending on the size and make-up of the Armed Forces populations requiring access to care, and to contribute to the MODs commitment to release information where possible.
3. Data are presented for personnel with a DMS registration: UK Armed Forces Serving personnel comprising Regular personnel, Gurkhas, Officer Designates and Full Time Reserve Service (FTRS) personnel. Civilian personnel data presented comprise Service personnel family dependants and MOD employed civilian personnel who are entitled to care at MOD primary care facilities.

DATA QUALITY NOTE

4. **Following a methodology review, two separate errors led to some personnel being double counted in this edition of the NHS Commissioning statistic. The first error was due to the fact some military personnel had two separate medical IDs. These were treated separately, when in fact they referred to the same individual. The second was due to an error in processing the data. The size of the double counting errors in the previous report is approximately 6,200 individuals (5,800 in the military and 400 civilians). This impacted mainly on the London and Birmingham areas in the following places:**
 - **DPHC Regions of London and South East (around 5,100 military personnel) & Wales and West Midlands (around 620 military personnel & 400 civilians).**
 - **LAA Regions of Inner London (around 2,650 military personnel), Outer London (around 2,450 military personnel) and West Midlands (around 620 military personnel & 400 civilians).**
 - **CCG Regions of NHS Central London (Westminster) (around 1,020 military personnel), NHS Hillingdon (around 860 military personnel), NHS Hounslow (around 580 military personnel), NHS Greenwich (around 900 military personnel), NHS Lambeth (around 1,600 military personnel), NHS Richmond (around 110 military personnel), and NHS Birmingham CrossCity (around 620 military personnel & 400 civilians).**

All other regions in this report were largely unaffected (no more than 15 people were double counted in any other region). Please refer to the latest publication (available on the Defence Statistics website) for accurate information on these locations.

KEY FINDINGS

5. As at 1 July 2013:
 - 76% of all patient DMS registrations with MOD medical centres were for UK Armed Forces personnel.
 - 74% of all patient DMS registrations with MOD medical centres were in the UK; 66% of all DMS registrations were in England.
 - For UK Armed Forces personnel; 87% of personnel were registered in the UK; 13% were registered overseas.
 - For civilian personnel; 31% were registered in the UK; (29% were registered in England), 69% were registered overseas.
6. As at 1 July 2013:
 - 78% of UK Armed Forces personnel were registered in England.
 - 6% of UK Armed Forces personnel were registered in Scotland.
 - 1% of UK Armed Forces personnel were registered in Wales.
 - 1% of UK Armed Forces personnel were registered in Northern Ireland.

BACKGROUND

7. Across the UK the systems and policies regarding the provision of healthcare varies between the devolved administrations of England, Wales, Scotland and Northern Ireland.
8. The Health and Social Care Act 2012 reshaped the NHS in England; aiming to make it more responsive, efficient and accountable¹. Central to this restructuring was the establishment of Clinical Commissioning Groups, putting clinicians in charge of shaping services. CCGs are made up of GPs with representatives from nursing, public health and hospital doctors. Their role is to improve the health of their section of the population by choosing and buying services. CCGs are supported by Commissioning Support Units; who provide technical support data, contract negotiations etc, and Clinical senates; hospital doctors providing specialist advice on patient groups or conditions. CCGs are also supported by NHS England (the operating name of the NHS Commissioning Board). NHS England has a role of assurance, support and development of, and co-commissioning with, CCGs. It is also responsible for specialist commissioning, regionally or nationally for smaller groups of patients with rare conditions and the commissioning of primary care services (not done by CCGs)².
9. The Act also provided a new focus for Public Health; the public health budget was moved over to local government budget putting local authorities in charge of driving health improvement. Health and Wellbeing boards (part of local authorities) bring together key players to improve health and social care to improve care in a joined up way and reduce health inequalities. They are responsible for commissioning services such as smoking cessation, alcohol and drug misuse services, or interventions to tackle obesity. CCGs and Health and Wellbeing boards will work together in assessing local needs and developing commissioning plans².
10. The Armed Forces Clinical Reference Group will provide clinical advice to NHS England in support of its commissioning decisions regarding serving Armed Forces personnel, their families, mobilized reservists and veterans, ensuring that patients experience a seamless transition between MOD and NHS services.
11. In Wales, the NHS reforms in 2009 saw the former 22 Local Health Boards and seven NHS Trusts replaced with seven integrated Local Health Boards (LHB) and a new Public Health Wales NHS Trust. (The former Velindre NHS Trust and Welsh Ambulance Services Trusts also continued)³. The seven Local Health Boards plan, secure and deliver healthcare services on their areas. These reforms aim to improve joined up working between health and social care services, to place a greater emphasis on public health and to improve health outcomes.
12. Scotland has been developing a partnership working between health and social care since 2001, with a number of policies and Acts aimed at increasing flexibility for NHS and councils to work together and introducing more focus on patient-centered care. The NHS Reform (Scotland) Act 2004 abolished separate acute and primary care trusts and required NHS Boards to manage both types of service. It also required NHS Boards to set up Community Health Partnerships (CHP) in their local area to bridge the gap between primary and secondary healthcare and health and social care. CHPs were also expected to coordinate the planning and provision of primary and community health services in their area.⁴.
13. In Northern Ireland, health and social care are jointly managed and provided. The Health and Social Care in Northern Ireland Board was established in 2009 and has five Local Commissioning Groups (LCG) that are responsible for assessing, planning and securing the delivery of health and social care.
14. Gaining an understanding of the local population is vital to any assessment of health. The make up of the Armed Forces population is very different to that of the UK as a whole, which has implications for the planning and provision of public services. The Armed Forces population is typically young males who tend to be physically fit, but due to the nature of their employment can sustain more injuries than in the civilian population.
15. The nature of military employment also means that the population is transient, and regularly move around the country and to overseas locations.

³ NHS in Wales - Why we are changing the structure' *Oct 2009*; www.wales.nhs.uk

⁴ 'Review of Community Health Partnerships' *June 2011*; www.audit-scotland.gov.uk

16. Throughout 2013 the provision of healthcare by the MOD has also changed. Prior to 2013, the Single Services (Naval Service, Army and RAF) were responsible for the provision of care through the medical centres located at their units. From April 2013 clinical provision was restructured so that one headquarters organisation; Defence Primary Health Care (DPHC), became responsible for the provision of care across all MOD medical centres in the UK and overseas (excluding Operations). The project achieved Initial Operating Capability on 1 Apr 2013 when the command and control of Medical Centres in the South region, Regional Occupational Medicine Departments, Regional Rehabilitation Units, and Defence Community Mental Health units started to pass from the single Services to the new HQ DPHC. The transfer of medical centres in the remaining regions begins in October 2013, with Full Operating Capability following by 1 Apr 2014.
17. MOD staff, mainly Public Health, Healthcare and DPHC, are in constant communication with NHS England to determine overall commissioning requirements, quality standards and pricing. The specialist medical and occupational health needs of MOD patients are arranged by this grouping, bringing in specialists for cases of "exceptional funding".
18. NHS England has appointed three Local Area Teams (LAT) to manage local requirements for Armed Forces commissioning in England. These are the main NHS contact for DPHC Regions. The LATs are in York, Nottingham and Chippenham and cover, north, central and southern England.
19. This statistical notice will provide information to commissioning and public health bodies to enable them to understand the MOD population at risk and in order that the needs of the Armed Forces can be considered in the commissioning of clinical services and provision of public health initiatives. Information has been presented by⁵:
 - Clinical Commissioning Group and Local Area Authority (England)
 - Local Health Board and Local Area Authority (Wales)
 - Community Health Partnership and Council Area (Scotland)
 - Local Commissioning Group and Local Government District (Northern Ireland)
 - Defence Primary Health Care Region (UK)

DATA, DEFINITIONS AND METHODS

Data Sources:

20. Data are compiled by Defence Statistics (Health) from the Defence Medical Information Capability Programme (DMICP) data warehouse. The DMICP programme commenced during 2007 and comprises an integrated primary Health Record (iHR) for clinical use and a pseudo-anonymised central data warehouse. Prior to this data warehouse, medical records were kept locally, at each individual medical centre. By 2010, DMICP was in place for the UK and the majority of Germany. Rollout to other overseas locations took place between November 2011 and May 2013.
21. The patient registration data from DMICP were cross referenced with the Joint Personnel Administration (JPA) system for UK Armed Forces personnel. JPA is the most accurate source for demographic information on UK Armed Forces personnel and is used to gather information on a person's service, Regular/Reservist status, gender and age. All demographic data for civilian personnel was gathered from DMICP alone.
22. Data presented was a snapshot of the current MOD medical centre DMS registrations at the reporting time point. Changes in population sizes at different reporting points may be due to bulk personnel moves (e.g. troops leaving Germany, units deploying to a given location) or may be due to overall changes in the numbers of personnel across the UK Armed Forces.

Definitions:

23. A DMS registration⁶ at an MOD medical centre means that the MOD are responsible for providing long term, permanent and full primary healthcare; however these individuals will be referred to the NHS for secondary healthcare provision as required. Some individuals, e.g. certain types of Reservist, some foreign military personnel or civilian employees may have a 'non DMS' registration where the MOD is

⁵ As advised by the Office of National Statistics (ONS)

⁶ DMICP Process – Patient Registration, Transfer and Ceasing from DMS Care PHCUG/DMICP Process_PatientRegistration/1.0

not responsible for providing long term, permanent primary healthcare. These registrations have not been included in this report as these individuals should also have an NHS registration.

24. Across the MOD and NHS, only one medical centre can be responsible for providing long term, permanent and full primary healthcare at a time. Patients that have their primary healthcare provided by Defence Medical Services (DMS) **cannot** be registered with an NHS GP Practice. The medical centre where a patient is registered is responsible for providing primary healthcare to that individual. However it is possible for an individual to be treated at an alternative medical centre (e.g. if they experience an emergency away from home), however their registration will not change. A small number of UK Armed Forces personnel will not be registered at a MOD medical centre, for example, if they are posted to an overseas location where MOD do not have a medical facility. Other arrangements are made for the delivery of primary healthcare for these individuals.

UK Armed Forces Personnel

25. The following UK Armed Forces personnel have been included; Regulars, Full Time Reserve Service personnel (FTRS), Gurkhas. This includes both trained and untrained personnel. Other types of reservists (e.g. mobilised TA) are excluded from this report because they will be registered with a patient registration status of "Reservist (non-DMS)". The "non-DMS" denotes that their Primary Healthcare is delivered by the NHS, with a record also being held on DMICP.
26. Naval Service personnel registered to surface or submarine flotilla have been allocated to either HMS Nelson (Portsmouth), HMS Drake (Plymouth) or HMS Neptune (Faslane, Scotland) as per Naval Service policy, as their base ports are responsible for the care of individuals requiring medical treatment or onward referral to the NHS.

Reservist Personnel

27. Within the Armed Forces there are different categories of Reservist personnel with differing entitlements to MOD primary care. However, there appear to be some discrepancies between the reservist category as recorded on JPA and the registration entitlement recorded on DMICP. Defence Statistics will investigate these discrepancies for the next release. There are in the region of 600 records which have inconsistent information recorded.
28. The full picture of Reservist data on DMICP is not yet clear. Defence Statistics will continue to investigate the numbers of Reservists with and without DMICP records and identify where registration information or registered practice information is not complete.

Civilian Personnel

29. The data presented on civilian personnel were based on the number of DMS registrations in DMICP identified as 'civilian'. 'Civilians' include contractors, entitled civilians and military family dependents. These figures present the number of entitled civilians registered at DMICP enabled military medical practices in the UK. Please note the numbers presented are NOT representative of the number of civilians or military dependents associated with the MOD, as the majority of MOD civilian employees are not entitled to military care, and the majority of military dependents will be registered with an NHS GP practice. In the UK, when civilian spouses and partners of military personnel are entitled to military care, the movements of patients around medical centres will be just as frequent as movements in military patients. That is because civilian families follow their military partners around to the locations where they have been based.
30. There are a small number of MOD UK medical centres which provide primary healthcare to families of UK Armed Forces personnel. A full list of these practices can be found at Annex F. The medical centres in the UK that treat civilians are training facilities for military healthcare personnel, and exist to offer a full range of training opportunities for the purposes of GP revalidation.

Data Methods:

31. In providing this analysis, Defence Statistics (Health) have examined patient registration information from the Defence Medical Information Capability Programme (DMICP) and cross-referenced with the Joint Personnel Administration system (JPA) for Service personnel.
32. The absence of a UK area or region in the tables of this report means that there are no MOD patient registrations associated within that area.
33. The information shown has been compiled from data held by Defence Statistics (Health) on 1 July 2013. Information has been provided for UK Armed Forces personnel and civilian personnel, with figures broken down by age band and gender. Information has been presented by Clinical Commissioning Group (CCG) and Local Area Authority (LAA) for England, and equivalent commissioning groups and local authorities for other UK countries, as advised by the ONS. (See paragraph 39). Data are also presented by each Defence Primary Healthcare (DPHC) region.
34. Personnel registered at a MOD medical centre in Germany or Cyprus have been presented. This will enable stakeholders to identify any changes in the populations in these areas, and any subsequent impact on UK MOD medical centres, for example the drawdown of troops in Germany and the return of these personnel to UK locations.
35. At any time there are large numbers of UK Armed Forces personnel stationed/deployed overseas. In order to enable commissioning bodies to make decisions regarding the possible numbers of personnel who may need access to services, it is important to include as many of these personnel as possible in the analysis. Therefore, for UK Armed Forces personnel registered at medical centres in overseas locations (other than Germany and Cyprus), or on Operations at the time of the data extract, Defence Statistics (Health) identified the medical centres at which they were previously registered in the last 12 months. Where this was a UK medical centre, the personnel have been allocated to their most recent UK location and presented for the corresponding region. These figures have been presented as 'registrations'. Where a previous UK medical centre could not be identified in the last 12 months they have remained categorised as 'other overseas'.
36. Due to movements of UK Armed Forces personnel, potentially to a non DMICP enabled location, and the movements of troops on deployment, it is necessary to have data management practices set up for the handling and movement of patient records. These practices perform a legitimate function, but sometimes records are not correctly moved out of these locations. For Service personnel registered at data management practices, Defence Statistics (Health) identified the medical centres at which they were previously registered in the last 12 months. Where this was a UK medical centre, the personnel have been allocated to their most recent UK location and presented for the corresponding region. These figures have been presented as 'registrations'. Where a previous UK medical centre could not be identified in the last 12 months they have remained categorised as 'unknown'.
37. Where UK Service personnel are incorrectly registered at non primary care locations (e.g. Regional Occupational Health Teams (ROHT), Regional Rehabilitation Units (RRU), Departments of Community Mental Health (DCMH) and Primary Care Rehabilitation Facilities (PCRF)), Defence Statistics (Health) identified the medical centres at which they were previously registered in the last 12 months. Where this was a UK medical centre, the personnel have been allocated to their most recent UK location and presented for the corresponding region. These figures have been presented as 'registrations'. For personnel who were not registered at a UK medical centre at any time during the last 12 months, the record has been presented in the 'Unknown' category in **Table 1**.
38. Where civilian personnel were registered overseas, at a data management practice or at a non primary care practice such as ROHT, RRU, DCMH etc, they have been classified as 'Other' in **Table 1**. Previous registrations for civilians were not looked into due to the sporadic nature of their care patterns and locations (civilians will constantly move around with their military partners as outlined in paragraph 28). Civilians under military care are known to move between NHS and military practices. As such, tracing civilians to their last known UK military medical centre could create a false impression of civilian registrations. It was not possible to tell when civilians were registered under NHS care and as such, current practice registrations only were used in this report. This accounts for the high numbers of civilians in the 'Other' category.
39. The 'Other' category in **Table 1** presents registrations not in the UK. It presents the number of personnel who were currently registered in Germany, Cyprus, and those records from Operations and other non-UK locations whose previous registrations over the last 12 months were also not in the UK. This group includes registrations in:

- British Forces Germany (BFG)
- Cyprus
- Other overseas locations
- Operations (presented as "Other overseas")
- Exercises (presented as "Other overseas")
- Reserve practices
- A data management or holding practice (presented as "Unknown")
- Decommissioned Naval Service vessels (presented as "Unknown")
- Blank records - persons without a named medical centre - (presented as "Unknown")

40. All UK medical centres identified from DMICP were mapped to an NHS Commissioning Group using a list published by the Health and Social Care Information Centre and the Office of National Statistics (ONS).
41. Defence Statistics (Tri Service) produce Quarterly Location Statistics on population locations. Although there are differences regarding the inclusion of certain groups of individuals between the two reports (e.g. Quarterly Location Statistics exclude reservists and Gurkhas; NHS Commissioning population statistics include full time reservists and Gurkhas), there is overlap between the two reports on the location of military personnel. The CCGs with the largest number of reported medical registrations in the Commissioning statistics also stand out as being the most heavily populated areas in terms of stationed locations within the military. However, the numbers of UK Armed Forces presented by location will be also different to those presented by Defence Statistics (Tri Service) as they are based on patient registration data and in order to ensure access to care is available for the maximum population in a region, where possible, overseas registrations have been tied back to a UK medical practice as in the majority of cases patients will be returned to the UK to access secondary health care.
42. For tables where age bands have been presented, the Service age bands start at 16 (the youngest age at which it is possible to join the Armed Forces). The civilian age bands start from 0-4. Note that the age bands in the tables span five years with the exception of a 16-19 category for Service personnel and the 60+ category for both Service and civilian personnel.
43. The tables in this report have been scrutinised to ensure individual identities have not been revealed inadvertently. In line with Defence Statistics' rounding policy (May 2009), we have rounded all figures to the nearest 10 in keeping with the Office for National Statistics Guidelines. All numbers fewer than five have been suppressed and presented as '~'. Rounding is desirable both as a means of disclosure control and to improve the clarity of outputs and convey appropriate levels of precision to users. Totals and sub-totals have been rounded separately and so may not equal the sums of their rounded parts. Numbers ending in "5" have been rounded to the nearest multiple of 20 to prevent systematic bias.

FINDINGS

44. **Table 1** presents the location of all UK Armed Forces and civilian personnel as at 01 July 2013.

Table 1: UK Armed Forces and civilian personnel, registration location by Service, 01 July 2013, Numbers^{2,3}

Location	All persons	All Military	Military split by			Civilian
			Naval Service	Army	Royal Air Force	
ALL	228,760	173,820	33,600	102,400	37,820	54,940
UNITED KINGDOM	168,240	151,050	32,650	83,100	35,300	17,190
<i>of which:</i>						
England	151,640	135,830	28,420	75,680	31,720	15,810
Wales	1,810	1,550	30	1,120	400	260
Scotland	11,670	11,080	4,170	3,840	3,080	590
Northern Ireland	3,120	2,580	20	2,470	90	530
OTHER	60,530	22,780	950	19,300	2,520	37,750
<i>of which:</i>						
Germany	33,030	14,070	120	13,590	360	18,960
Cyprus	8,030	2,770	20	1,910	840	5,260
Other overseas	12,810	2,320	170	1,190	960	10,480
Reserve Practices	380	380	50	340	0	~
Unknown ¹	6,270	3,230	590	2,270	370	3,040

¹ Unknown includes blank practice registrations, and data quality issues such as registrations at decommissioned Naval Service vessels and in data management and holding practices (see paragraph 38).

² In line with Defence Statistics rounding policy, numbers fewer than 5 have been suppressed and presented as '~'. Please see paragraph 42.

³ Due to rounding, please note that totals may not equal the sum of their parts.

45. **Table 1** shows that for UK Armed Forces personnel:

- 78% were registered in England (n=135,830)
- 9% were registered elsewhere in the UK (n=15,220)
- 8% were registered in Germany (n=14,070)
- 2% were registered in Cyprus (n=2,770)

46. **Table 1** shows that for civilian personnel:

- 29% were registered in England (n=15,810)
- 3% were registered elsewhere in the UK (n=1,380)
- 34% were registered in Germany (n=18,960)
- 10% were registered in Cyprus (n=5,260)

47. There were a small proportion of personnel (3%, n=6,270) whose registration location was incorrect, unknown or in a data administration practice. Defence Statistics (Health) are working with Defence Primary Healthcare (DPHC) to identify and resolve data quality and registration issues.

SECTION 1: England Regional Analysis

Clinical Commissioning Group (CCG)

48. **Table 2** presents numbers of UK Armed Forces personnel and civilian personnel registered to a CCG in NHS England by Service/civilian status. Please refer to the 'Data Methods' section of this report for how patient registrations have been assigned.

Table 2: UK Armed Forces personnel and civilian personnel, registered to NHS CCG by Service, 01 July 2013, Numbers^{1,2}

¹ In line with Defence Statistics rounding policy, numbers fewer than 5 have been suppressed and presented as '~'. Please see paragraph 42.

² Due to rounding, please note that totals may not equal the sum of their parts.

FINDINGS

49. The three CCGs with the largest:

- number of registered military patients were NHS Wiltshire (**n=14,700**), NHS Hambleton, Richmondshire and Whitby (**n=10,760**), and NHS North, East, West Devon (**n=10,140**).
- number of registered civilian patients were NHS Wiltshire (**n=5,520**), NHS Hambleton, Richmondshire and Whitby (**n=2,420**), and NHS Oxfordshire (**n=1,180**).
- number of registered patients of age 60+ were NHS Wiltshire (**n=20**), NHS Hambleton, Richmondshire and Whitby (**n=10**), and NHS Shropshire (**n=10**) (**Table A1.1**).
- child populations (aged under 15 years) were NHS Wiltshire (**n=3,130**), NHS Hambleton, Richmondshire and Whitby (**n=1,320**), and NHS Oxfordshire (**n=660**) (**Table A1.1**).
- female populations were NHS Wiltshire (**n=5,010**), NHS Hambleton, Richmondshire and Whitby (**n=2,370**), and NHS Oxfordshire (**n=1,900**) (**Table A1.4**).

Local Area Authority (LAA)

50. **Table 3** presents numbers of UK Armed Forces personnel and civilian personnel registered to an English LAA by Service/civilian status. Please refer to the 'Data Methods' section of this report for how patient registrations have been assigned.

¹ In line with Defence Statistics rounding policy, numbers fewer than 5 have been suppressed and presented as '~'. Please see paragraph 42.

² Due to rounding, please note that totals may not equal the sum of their parts.

FINDINGS

51. The three LAAs with the largest:

- number of registered military patients were Wiltshire (**n=14,700**), North Yorkshire (**n=13,630**), and Hampshire (**n=13,180**).
- number of registered civilian patients were Wiltshire (**n=5,520**), North Yorkshire (**n=2,640**), and Oxfordshire (**n=1,180**).
- number of registered patients of age 60+ were Wiltshire (**n=20**), North Yorkshire (**n=10**), and Shropshire (**n=10**) (**Table A2.1**).
- child populations (aged under 15 years) were Wiltshire (**n=3,130**), North Yorkshire (**n=1,440**), and Oxfordshire (**n=660**) (**Table A2.1**).
- female populations were Wiltshire (**n=5,010**), North Yorkshire (**n=2,720**), and Oxfordshire (**n=1,980**) (**Table A2.4**).

SECTION 2: Wales Regional Analysis

Local Health Board (LHB)

52. **Table 4** presents numbers of UK Armed Forces personnel and civilian personnel registered to a Welsh LHB by Service/civilian status. Please refer to the 'Data Methods' section of this report for how patient registrations have been assigned.

Table 4: UK Armed Forces personnel and civilian personnel, registered to NHS Local Health Board (LHB) by Service, 01 July 2013, Numbers¹

	All Persons	All Military	<i>Military split by</i>			Civilian
			Naval Service	Army	RAF	
WALES	1,810	1,550	30	1,120	400	260

South Eastern	1,820	1,820	10	1,800	10	0
Western	~	~	0	~	0	0

¹ In line with Defence Statistics rounding policy, numbers fewer than 5 have been suppressed and presented as '~'. Please see paragraph 42.

² Due to rounding, please note that totals may not equal the sum of their parts.

FINDINGS

61. The LCG with the largest:
- number of registered military patients was South Eastern (**n=1,820**).
 - number of registered civilian patients was Northern (**n=530**).
 - number of registered patients of age 60+ was Northern (**n<5**) (**Table D1.1**).
 - largest child population (aged under 15 years) was Northern (**n=290**) (**Table D1.1**).
 - largest female population was Northern (**n=440**) (**Table D1.4**).

Local Government District (LGD)

62. **Table 9** presents numbers of UK Armed Forces personnel and civilian personnel registered to a Northern Irish LGD by Service/civilian status. Please refer to the 'Data Methods' section of this report for how patient registrations have been assigned.

Table 9: UK Armed Forces personnel and civilian personnel, registered to NHS LGD by Service, 01 July 2013, Numbers^{1,2}

	All Persons	All Military	Military split by			Civilian
			Naval Service	Army	RAF	
NORTHERN IRELAND	3,120	2,580	20	2,470	90	530
Antrim	1,290	760	10	670	80	530
Down	610	610	0	610	0	0
Limavady	~	~	0	~	0	0
Lisburn	560	560	10	540	~	0
North Down	660	660	~	650	10	0

¹ In line with Defence Statistics rounding policy, numbers fewer than 5 have been suppressed and presented as '~'. Please see paragraph 42.

² Due to rounding, please note that totals may not equal the sum of their parts.

FINDINGS

63. The LGD with the largest:

- number of registered military patients was Antrim (**n=760**).
- number of registered civilian patients was Antrim (**n=530**).
- number of registered patients of age 60+ was Antrim (**n<5**) (**Table D2.1**).
- child population (aged under 15 years) was Antrim (**n=290**) (**Table D2.1**).
- female population was Antrim (**n=440**) (**Table D2.4**).

SECTION 5: Defence Primary Healthcare Regional Analysis

INTRODUCTION

64. Please note that the transfer from MOD Single Service regions to DPHC began with the South Region standing up in April 2013. The remaining regions will transfer from Single Service to DPHC in October 2013, with transfer expected to be complete by April 2014.
65. **Table 10** presents numbers of UK Armed Forces personnel and civilian personnel registered to each DPHC region in the United Kingdom by Service. Please refer to the 'Data Methods' section of this report for how patient registrations have been assigned.

Table 10: UK Armed Forces personnel and civilian personnel, registered to DPHC regions by Service, 01 July 2013, Numbers^{2,3}
