

Having been forwarded a copy of your email of 13 May, requesting views on how the selection process for a geological disposal facility, outlined in the 2008 Managing Radioactive Waste Safely White Paper could be improved, Seaton Parish Council comments as follows:

The Council believes that the complex geology in West Cumbria would render it unsuitable for a geological disposal facility & considers it paramount that the selection process should focus on seeking areas around the country which have suitable geology & selecting a preferred site from those, rather than seeking suitable geology after an area has expressed an interest in hosting such a facility.

Regards
