Subject: Re: Pub Companies and Tenants: A Government Consultation

Dear :

I write in reference to the recent BIS consultation and the hugely negative light that it puts pub companies such as Enterprise Inns in.

Having worked for Enterprise Inns for nearly years, I have seen first hand, the support given to publicans from the moment they enquire about taking on a pub, right through to the ongoing support given by dedicated regional managers to ensure that they are getting the best out of their business.

This representation of the company I work for, along with other pub companies is misleading and I fear, potentially more damaging to our business and could result in more pub closures, a reduction in publican support as well as a number of job losses.

I would be most interested to hear how you intend to ensure that pub companies are treated fairly.

Yours sincerely
