Dear Mr Hemming

I am writing to you as a member of the [redacted] for Enterprise Inns. I am very passionate about our industry and feel strongly about how unfairly certain parties are towards my company at the moment. I can honestly say that everyone I know that is employed by Enterprise Inns does nothing but help Publicans at every level and stage. Everything we do on a daily basis is geared towards working together in partnership with Publicans – if they fail, we fail so why would we make it more difficult for them? I believe that there are discussions in parliament very shortly and the outcome from this could impact a great deal of hard working colleagues and customers that do work with us.

The company offers lots of support whether that is financial, free training or marketing support however very little of this positive activity is reported on?

I personally enjoy my job, I speak to a great variety of people on a daily basis and rewards me by working with our tenants. It also gives me great work/life balance and a steady income which I need as a father to [redacted]. I fear that should the government make a knee jerk reaction it could result in me losing my job - which in turn would mean I lose my car, would be unable to pay debts, and would result in me being another government statistic, being a burden on the state having to claim all the necessary benefits which ultimately would drain money out of the national account! It would also have a major affect on the upbringing of my [redacted] as it would then be a struggle to afford clothes/days out/learning activities. I hope the government have considered the effect that this could have on their unemployed statistics, and subsequently, the increased amount coming out of the national account. I want to work, and I love my job - I hope the government does not see fit to potentially take this away from me and force me into job seekers allowance!

I do hope that all aspects of our industry are investigated and are not just based on the accusations of the minority that simply shout the loudest. I am very concerned that if the government makes an ill informed decision, that it would have a massive impact on the local community, and could mean

fewer local jobs not only for Enterprise but also our tenants.

Kind regards

and Father of
