

QUARTERLY REVENUE EXPENDITURE OUTTURN FOR LOCAL AUTHORITIES IN ENGLAND:

October - December 2013-14

- Total net current expenditure for quarter 3 of the financial year 2013-14 is estimated to be £28.46bn, slightly down from £28.52bn in quarter 2.
- The forecast net current expenditure for the whole year is £115.21bn. This forecast is 1.6 per cent lower than the equivalent budget figure (£117.09bn) reported by local authorities prior to the beginning of the financial year.
- The quarter 3 net current expenditure is 24.3 per cent of the initial reported budget figure for 2013-14 of £117.09bn and 24.7 per cent of the revised forecast of £115.21bn.

Introduction

This statistical release provides quarterly revenue expenditure outturn data for all local authorities in England, for quarter 3 of the financial year 2013-14 (October to December 2013), and compares it to revenue account data for the same financial year. The Revenue Outturn details Local Authorities' actual expenditure for each quarter, while the Revenue Account is their expected expenditure as forecast at the beginning of the year. The data are drawn from Quarterly Revenue Outturn (QRO) forms and Revenue Account (RA) forms requested from all of the 444 authorities in England. The release has been compiled by the Local Government Finance: Data Collection, Analysis and Accountancy Division of the Department for Communities and Local Government.

- Authorities in England submit budget data to the Department before the start of each financial year on the Revenue Account (RA) form, and Revenue Outturn (RO) data after the end of the year.
- The Quarterly Revenue Outturn (QRO) data, which are collected following quarters 1, 2 and 3 of the financial year, provide an early indication of local authority revenue expenditure outturn. Historically, outturn on revenue spending has differed from initial (RA) budget.
- The quarter 3 figures in this release are based on valid returns from 442 authorities. The quarters 1 and 2 figures are based on valid returns from 443 authorities. Authorities whose data are missing or invalid are listed in the data quality section on page 10. Where authority information is missing or invalid, figures have been imputed for the purpose of calculating aggregate figures, as described in the methodology section of this release.
- This release provides the first estimate of financial quarter 3 revenue expenditure outturn data. Authorities have had the opportunity to revise their quarters 1 and 2 data at the same time as they submitted Q3 data.
- Throughout this release, comparisons are made between the budget (RA) figures submitted by authorities and their QRO outturn figures. It is important to note that the RA figures are a snapshot produced by authorities at a single point prior to the financial year. The purpose of the comparison is to update the expected expenditure data with actual expenditure data and give a clearer picture of what authorities are spending over the year. A difference between the budget figure and the outturn figure does not necessarily represent an over- or under-spend.

1. Quarterly revenue outturn by service

Table 1 shows the estimated quarterly revenue outturn data for the quarter 3 of the financial year 2013-14 at a national level compared to the RA figure.

- Nationally, net current expenditure for the quarter is estimated at £28.46bn which is 24.3 per cent of the comparable budgeted (RA) figure for the year.

Table 1: Estimated Quarterly Revenue Outturn data for England Q3 2013-14					
Expenditure (£m)	Q1 Outturn (Revised)	Q2 Outturn (Revised)	Q3 Outturn	2013-14 Budgeted (RA) figure	Q3 as % of Budget

1, 2	672	614	647	2,537	25.5
3	12	12	12	52	23.5
4,5	3,349	3,382	3,346	13,764	24.3
6, 7, 8	1,151	1,195	1,212	5,374	22.5
9	1,025	1,157	1,131	4,599	24.6
10, 11, 12	377	416	421	1,749	24.1
13, 14	544	624	621	2,699	23.0
15	630	644	635	2,663	23.8
16	7,036	7,026	7,019	29,339	23.9
Imputed	2,099	2,124	2,162
17, 18	5,499	5,789	5,836	23,089	25.3
19	146	153	155	632	24.6
20	4	3	4	19	20.0
21	2	1	2	5	39.0
22	132	110	100	550	18.2
23	22,679	23,252	23,303	96,526	24.1
24	3,913	3,999	3,955	15,642	25.3
25	130	138	142	536	26.5
26	1,072	1,094	1,066	4,296	24.8
27	2	4	3	11	26.6

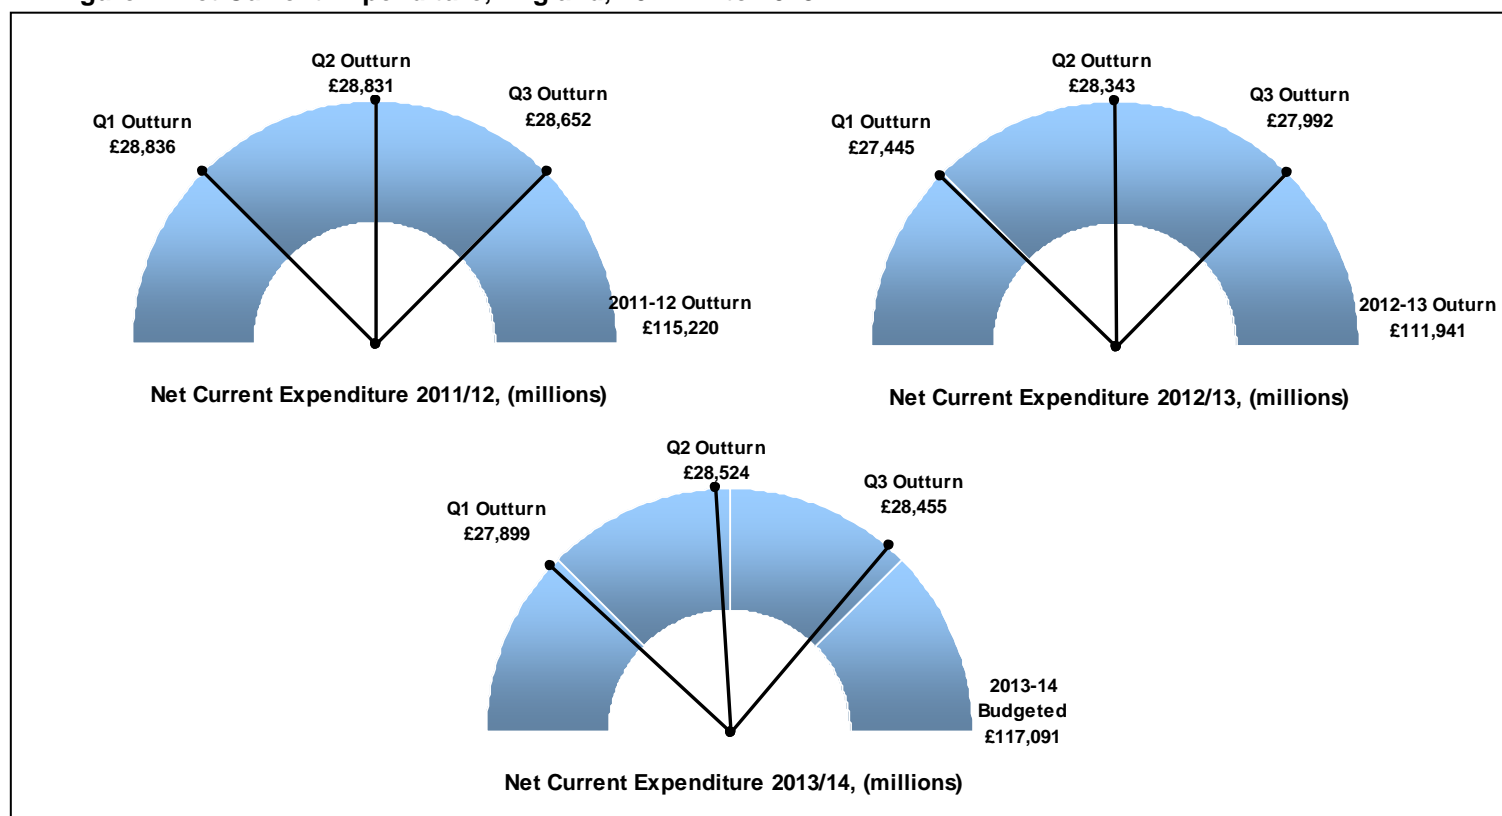

28	Contribution to the HRA re items shared by the whole community	3	2	3	15	17.4
29	Parish precepts	116	101	82	367	22.3
30	Integrated Transport Authority levy ^(b)	-11	-3	-12	n/a	n/a
31	Waste Disposal Authority levy ^(b)	3	-10	-27	n/a	n/a
32	London Pensions Fund Authority levy	6	7	6	25	24.5
33	Other levies	13	7	7	27	25.0
34	External Trading Accounts net surplus(-)/ deficit(+)	-74	-70	-65	n/a	n/a
39	<i>Capital charges included in External Trading Accounts (Line 34)</i>	5	3	3	n/a	n/a
35	Internal Trading Accounts net surplus(-)/ deficit(+)	37	-8	-19	n/a	n/a
40	<i>Capital charges included in Internal Trading Accounts (Line 35)</i>	-2	-2	-3	n/a	n/a
36	Adjustments to net current expenditure	10	11	12	65	18.5
37	Appropriations to(+) / from(-) Accumulated Absences Account	-1	-1	-1	-6	20.1
38	NET CURRENT EXPENDITURE (TOTAL OF LINES 23 TO 37)^(a)	27,899	28,524	28,455	117,091	24.3
41	Interest payable and similar charges	609	672	674	2,928	23.0
42	Interest receivable ^(c)	-100	-121	-96	-417	23.1

(a) Includes non-pay element of schools expenditure imputed from RA returns.

(b) This levy should net out to zero across the year. The fact that it does not do so for the outturn figure(s) is likely to be due to timing differences and estimation on the part of authorities.

(c) The negative figure denotes income.

Figure 1: Net Current Expenditure, England, 2011-12 to 2013-14

2. In-year forecasts

In-year forecasts (predicted outturn for the whole year) are provided for a number of lines on the QRO form. Table 2 shows these figures at a national level for total service expenditure and net current expenditure and compares them to the budget (RA) figures provided before the start of the financial year.

Forecast expenditure for 2013-14 is less than the budgeted figure reported in the RA forms at the start of the year.

- The in-year forecast for total service expenditure is 2.0 per cent lower than the RA figure for the year.
- The in-year forecast for net current expenditure is 1.6 per cent lower than the RA figure for the year.

Table 2: Forecast Revenue Outturn data for England at Q3 2013-14

Expenditure (£m)	2013-14 Forecast Outturn (QRO) ^(a)	2013-14 Budgeted (RA) figure	Percentage change from RA
23 TOTAL SERVICE EXPENDITURE	94,598	96,526	-2.0%
38 NET CURRENT EXPENDITURE	115,215	117,091	-1.6%
41 Interest payable and similar charges	2,637	2,928	-9.9%
42 Interest receivable ^(b)	-447	-417	7.3%

(a) Forecast includes non-pay element of schools expenditure imputed from RA returns.
(b) The negative figures denote income.

3. Quarterly revenue outturn by class of authority

Table 3 shows total net current expenditure (including the imputed non-pay element of schools expenditure) for quarter 3, the in-year forecast, and the comparable RA figure, by class of authority.

- For non-levying authorities the percentage difference between in-year forecast outturn and RA ranges from -0.5 per cent for Shire Districts to -2.7 per cent for Unitary Authorities.
- For non-levying authorities, quarter 3 outturn ranges from 22.7 per cent of the in-year forecast for Greater London Authority to 25.6 per cent for Shire Districts.

Table 3: Quarter 3 net current expenditure by class of authority					
Total net current expenditure (£m)	Quarter 3 outturn	2013-14 Forecast Outturn (QRO)	2013-14 Budgeted (RA) figure	Q3 outturn as percentage of in-year forecast	Percentage change of forecast to RA
ENGLAND	28,455	115,215	117,091	24.7	-1.6
<u>Class of authority</u>					
London Boroughs	5,072	20,575	20,784	24.7	-1.0
Greater London Authority	1,159	5,110	5,194	22.7	-1.6
Metropolitan Districts	5,856	23,747	23,905	24.7	-0.7
Unitary Authorities	5,365	22,047	22,649	24.3	-2.7
Shire Counties	6,440	25,442	25,991	25.3	-2.1
Shire Districts	2,231	8,719	8,760	25.6	-0.5
Police Authorities	2,014	8,103	8,267	24.9	-2.0
Fire Authorities	326	1,410	1,442	23.1	-2.3
Other Authorities ^(a)	-8	62	99	-12.3	-36.9

(a) Other authorities include park, passenger and waste authorities. These authorities levy and so expenditure will be offset by levy income within the financial year. Greater Manchester waste authority had a large under-spend because of pre commissioning deductions being applied for facilities that should have been operational now but are now expected to be operational next financial year. This is the main reason for the low quarterly and forecast figures for Other Authorities.

Table 4: 2013-14 (3 Quarters) Total net current expenditure by class of authority

Total net current expenditure (£m)	Quarter 1 outturn	Quarter 2 outturn	Quarter 3 outturn	2013-14 Forecast Outturn (QRO)	2013-14 Budgeted (RA) figure	Outturn as percentage of in-year forecast	Outturn as percentage of RA forecast
ENGLAND	28,045	28,605	28,455	115,215	117,091	73.9	72.7
<u>Class of authority</u>							
London Boroughs	5,046	5,098	5,072	20,575	20,784	74.0	73.2
Greater London Authority	1,115	1,257	1,159	5,110	5,194	69.1	68.0
Metropolitan Districts	5,781	5,931	5,856	23,747	23,905	74.0	73.5
Unitary Authorities	5,356	5,419	5,365	22,047	22,649	73.2	71.3
Shire Counties	6,219	6,329	6,440	25,442	25,991	74.6	73.1
Shire Districts	2,170	2,207	2,231	8,719	8,760	75.8	75.4
Police Authorities	2,017	2,029	2,014	8,103	8,267	74.8	73.3
Fire Authorities	343	342	326	1,410	1,442	71.7	70.1
Other Authorities(a)	-3	-6	-8	62	99	-27.6	-17.4

(a) Other authorities include park, passenger and waste authorities. These authorities levy and so expenditure will be offset by levy income within the financial year. Greater Manchester waste authority had a large under-spend because of pre commissioning deductions being applied for facilities that should have been operational now but are now expected to be operational next financial year. This is the main reason for the low quarterly and forecast figures for Other Authorities.

Accompanying table

An additional table has been produced at local authority level for authorities who submitted valid data. This is not included in the printed version of this release. It is available on the Department's website at:

<https://www.gov.uk/government/collections/quarterly-revenue-outturn-for-local-authorities-in-england>

and shows quarters 1, 2 and 3 outturn data and in-year forecast data at local authority and class of authority level. The quarters 1 and 2 data in this release are the most up-to-date figures received from authorities, who had the opportunity to update their Q1 and Q2 figures on their Q3 return. The aggregate figures may, therefore, differ from the figures reported in the Q2 release. Underlying local authority level data from the Q2 release remain available online, accompanying the Q2 release, at the link above.

Definitions

A list of terms relating to local government finance is given in the glossary at Annex G of Local Government Finance Statistics England No. 23 2013. This is accessible at

<https://www.gov.uk/government/publications/local-government-financial-statistics-england-2013>.

The terms most relevant to this release are explained below.

Aggregate External Finance is the total amount of grant provided to finance all local government expenditure, excluding that subject to separate arrangements under statutory schemes, rent allowances and rebates and council tax benefit, which are funded by specific grants outside Aggregate External Finance.

Classification of the Functions of Government (COFOG) codes provide a standard means of referring to services provided by government. Further detail on what is covered by each COFOG code is available from the UN Statistics Division (link below). COFOG-1 codes (the highest level of the hierarchy) are used on the QRO form.

(<http://unstats.un.org/unsd/cr/registry/regcst.asp?Cl=4>).

Current expenditure is the cost of running local authority services within the financial year. This includes the costs of staffing, heating, lighting and cleaning, together with expenditure on goods and services consumed within the year. This expenditure is offset by income from sales, fees and charges and other (non-grant) income, which gives **total net current expenditure**. Total net current expenditure also includes payments made by local authorities on behalf of central government, under statutory schemes and the payment of rent allowances and rebates. Such payments are fully funded by central government through specific grants outside **Aggregate External Finance**.

International Accounting Standard 19 (IAS 19). Local authorities' final accounts are required to comply in full with International Accounting Standard 19 on employment benefits. This requires future liabilities for retirement benefits to be recognised in the accounts for all the main categories of local government employees, with the exception of teachers. However, for National Accounts

purposes, the cost of retirements is taken to be the benefits and contributions actually payable in the year.

PFI schemes in accordance with the International Financial Reporting Standards (IFRS). Under the International Financial Reporting Standards (IFRS), assets provided under PFI schemes are normally shown on the authority's balance sheet. Local authorities are required to account for their PFI schemes on the IFRS basis. For National Accounts purposes, however, PFI schemes are accounted for on an "on balance sheet" basis only where economic ownership of the asset rests with the authority. **Economic ownership** for national accounts purposes is determined by whether the local authority or the contractor has an asset of the property used to provide the contracted services. A party has an asset of the property where that party has access to the benefits of the property and exposure to the risks inherent in those benefits.

Total service expenditure is added to figures for housing benefits, parish precepts, levies, trading accounts and adjustments to expenditure to reach the net current expenditure figure. The majority of the difference between total service expenditure and net current expenditure is made up of housing benefits.

Technical notes

Methodology

This release compares QRO data with RA data. The forms are not directly comparable and so, in order to make the comparison, relevant RA lines have had to be aggregated to provide a comparison to each QRO line. A mapping document which shows the relationship between lines on the RA, RO and QRO forms is available online at

<https://www.gov.uk/government/publications/quarterly-revenue-outturn-for-local-authorities-in-england-quarter-1-2013-to-2014>

To conform to National Accounts principles, these figures are provided on a non International Accounting Standard 19 (IAS19) and a PFI "off balance sheet" basis, unless otherwise stated. (Move to end – methodology or definitions section?)

The non-pay element of schools expenditure is not a mandatory part of the QRO collection. Where an education authority does not provide this figure, it is imputed from the 2013-14 RA figure and the 2012-13 RO figure. This non-pay element is taken to be the proportion of RA line 190 (total schools expenditure) for each authority which is deemed likely to apply to schools' non-pay (see section on non-pay below), multiplied by the percentage determined below which converts it to a quarterly figure.

Aggregate national and class of authority figures are produced by using imputed figures for any authority which failed to submit its form by the deadline for inclusion in this release, or for which the form was received but contained significant data quality issues which could not be resolved with the authority in time for publication.

The imputed figures for such authorities are taken to be a percentage of the comparable Revenue Account (RA) figures submitted for the financial year. This is the Q3 outturn figure as a percentage of the comparable RA figure for valid authorities. For this release, this percentage was calculated to be 24.3 per cent. This methodology assumes that the missing authority's outturn is in keeping with its budgeted expenditure and that its expenditure in the current quarter, as a percentage of its

budgeted expenditure for the year, is the same as that for authorities for which validated QRO data are available. As the RA and QRO lines are not identical, RA lines have been aggregated to form a comparison with the relevant QRO line.

In order to estimate the education line (line 16) for authorities with missing or invalid data, both RA and RO (Revenue Outturn) figures are used. The 2012-13 RO for each authority¹ is used to determine the percentage of its total net current expenditure on schools which is made up of employee costs. This percentage is applied to the RA figure for total net current expenditure on schools to estimate the employee element of this expenditure, and is added to RA lines 150 and 160 (services to young people and other community learners, and other strategic functions) to produce an estimate of the annual QRO education figure for the authority. The quarterly figure is then estimated by applying to this annual figure the percentage described above.

Similarly, the non-pay element of schools' expenditure is calculated by taking the remaining portion of the RA figure and estimating the quarterly figure for education as described in the paragraph above. This calculation is carried out for all education authorities who did not explicitly supply a non-pay figure on the Q3 return, and the figures are reported separately in Table 1.

Where imputation methodology has been applied to an authority for the purpose of producing aggregate figures, no data are published for that authority in the online LA-level table (available at

<https://www.gov.uk/government/collections/quarterly-revenue-outturn-for-local-authorities-in-england>

Data quality

The information in this Statistical Release is derived from Department for Communities and Local Government Quarterly Revenue Outturn (QRO) returns submitted by local authorities in England. All local authorities are required to complete all relevant parts of the QRO return. Figures are subjected to rigorous pre-defined validation tests as the data are received and stored, and queries are followed up with authorities prior to publication.

The release document, once prepared, is also subject to intensive peer review before being cleared as fit for the purposes of publication.

Data quality can be expected to improve as an increase in the amount of data available provides more options for validation checks.

The QRO data provide a timely indication of revenue expenditure at local authority level, giving an earlier indication than was previously possible using only the RO data collected after year-end.

The data are limited by certain factors, as outlined below.

- a. Local authorities are asked to work to a level of materiality of £1m for all lines except 34, 35, 39 and 40 (trading account lines), for which the materiality level is £5m.
- b. For the purposes of the QRO return, authorities are asked to estimate the apportionment of central service charges to the appropriate service lines on an accrued basis. However, the majority of authorities do not undertake this apportionment formally until year end. There is a large difference, therefore, between the RA and QRO for line 2 within General

¹ At quarters 1 and 2 the 2012-13 RO data were not available and 2011-12 data were used instead.

Public Services, as authorities have either had to estimate the apportionment or have not undertaken any apportionment of recharges in their return (instead including all costs in line 2 of the return).

- c. The non-pay element of schools expenditure is not a mandatory element of the QRO collection, and is imputed from the RA form as outlined in the methodology section of this release where not provided by the authority. This methodology assumes that the spending pattern for this type of expenditure is the same as the average spending pattern of valid authorities across all lines on the form.
- d. Where authorities fail to submit a return, or where, at the point of publication, significant data quality issues remain, figures for the authority are imputed for the purpose of calculating aggregate figures. This imputation relies on a number of assumptions, including that the authority's expenditure remains in line with its budget and that the proportion of its expenditure occurring in the current quarter is equal to the same proportion for validated authorities. **0.9 per cent of the quarter 3 2013-14 net current expenditure estimate for England is comprised of imputed values.**
- e. Thurrock was the only authority for whom valid Q1, Q2 and Q3 data were not received; Camden failed to submit revised Q3 QRO form at the point at which this release was finalised.

Revisions policy

This policy has been developed in accordance with the UK Statistics Authority Code of Practice for Official statistics and the Department for Communities and Local Government Revisions Policy (found at <https://www.gov.uk/government/publications/statistical-notice-dclg-revisions-policy>). There are two types of revisions that the policy covers:

Non-Scheduled Revisions

Where a substantial error has occurred as a result of the compilation, imputation or dissemination process, the statistical release, live tables and other accompanying releases will be updated with a correction notice as soon as is practical.

Scheduled Revisions

Authorities had the opportunity to revise their quarter 1 and quarter 2 data in quarter 3, and an update of these figures are published

Uses made of the data

The purpose of the QRO collection is to improve the economic data used for fiscal monitoring by HM Treasury and the data used to monitor changes in the wider economy which are maintained by the Office for National Statistics. This in turn supports the Government's aims of maintaining sound public finances and macroeconomic stability. Improving the local authority data provided to central government is a key part of this.

Comments and feedback from the end user for further improvement or about your experiences with this product will be welcomed. Please send all views to gro@communities.gsi.gov.uk.

User engagement

Users are encouraged to provide feedback on how these statistics are used and how well they meet user needs. Comments on any issues relating to this statistical release are welcomed and encouraged. Responses should be addressed to the "Public enquiries" contact given in the "Enquiries" section below. The Department's engagement strategy to meet the needs of statistics users is published here: <https://www.gov.uk/government/publications/engagement-strategy-to-meet-the-needs-of-statistics-users>
