

## Tariffs and technologies affected by the 2013 Non Domestic Early Tariff Review

Technology		Current tariffs (1), (2)	Reviewed tariffs (proposed for 2014/15)
Biomass Boilers	Small (up to 200kW)	Tier 1: 8.6, Tier 2: 2.2	NO CHANGE
	Medium (200 to 1MW)	Tier 1: 5.3, Tier 2: 2.2	
	Large (1MW and above)	1.0	2.0
GSHPs	Small (up to 100kW)	4.8	7.2 <sup>(3)</sup> – 8.2 <sup>(4)</sup>
	Large (100kW and above)	3.5	
Solar Thermal (up to 200kW)		9.2	10.0 <sup>(5)</sup> – 11.3

## Notes:

<sup>(1)</sup> The forecast expenditure on the medium tariff band is such that a 5% degression of that tariff will occur on 1 July, as a result of the operation of the degression policy set out in regulations. This will reduce the tariffs to 5.0p/kWh for tier 1 and 2.1p/kWh for tier 2. Quarterly expenditure statements will be published and notice of any further tariff reductions will be provided, as set out in regulations.

<sup>(2)</sup> For comparison purposes please note that these tariffs will be uprated for any RPI increase. An estimate of these tariffs in nominal terms for 2014/15 can be found in the technical annex, available at the following link https://www.gov.uk/government/consultations/non-domestic-rhi-early-tariff-review

<sup>(3)</sup> The minimum proposed level for the GSHP tariff, 7.2p/kWh, is equivalent to 10.0p/kWh of renewable heat: an updated estimate of the value for money cap (the equivalent cost of offshore wind) for 2014/15.

<sup>(4)</sup> Equivalent to 11.3p/kWh in renewable heat

<sup>(5)</sup> Equivalent to 10.0p/kWh of renewable heat: an updated estimate of the value for money cap (the equivalent cost of offshore wind) for 2014/15.
