(a) From 2009-10, industry categories are based on UK Standard Industrial Classification of Economic Activities 2007 (SIC2007). Most categories comprise one or several of the 21 Sections from SIC2007.

(b) Section M (Professional, Scientific and Technical Activities) has been split into two industry categories (Legal and Accounting Activities and Other Professional, Scientific and Technical Activities) so that Legal and Accounting Activities, a significant component of self employment activity, can be separately identified.

Notes on the table

Self employment income assessable to tax, 2010-11

- Self employment income assessable to tax, 2010-11

 Self employment income is as defined in the Notes to the table T3.6 paragraph 3'. Individuals are included in this according to whether (and how many) sets of pages covering income from trades or from partnerships were completed in the tax return. Such pages are required for all trades, and for all shares in partnerships, trading at any time in the tax year. If or any individual or source a loss is made, or the profits are completely offset by the deduction of capital allowances and/or losses brought forward from earlier years, the individual or source is included in the table but the amount of self-employment income is shown as nil.

 2. Although special rules apply to businesses which have recently started or ceased trading, the general rule is that the profit assessable for 20 11 are those earned in the business accounting periods ending in 2010-11. On average, profits assessable for 2010-11 may be regarded as profits arising in the calendar year 2010.
- An individual with two or more sources of self employment income (from trades or partnerships) is counted more than once, according to the industry group and profit for each source.

 For more information about the SPI and symbols used in this table, please refer to Personal Income Statistics release 2010-11
