Dear Richard,

Industrial Emissions Directive – Large Combustion Plants

I refer to your letter of 28th December 2011 in relation to the above. I am responding on behalf of Tata Steel UK Limited. We operate large combustion plants (LCP) at our integrated steelworks in Scunthorpe and Port Talbot and currently participate in the National Emissions Reduction Plan (NERP) under the LCP Directive.

Following consideration of the points set out in your letter, and whilst noting that this does not constitute a binding commitment, I confirm that Tata Steel wishes to place those of its LCPs currently covered by the NERP into the Transitional National Plan (TNP) for all three pollutants. The table below provides the summary details of the LCPs covered by this notification:

Operator	LCP Name	NERP Ref. No.	Pollutants to be Covered
Tata Steel	Scunthorpe Works 1 (Central Power Station)	54	NOx, SO ₂ , Dust
Tata Steel	Scunthorpe Works 2 (Turbo Blower House - Boilers 1-4)	55	NOx, SO ₂ , Dust
Tata Steel	Scunthorpe Works 3 (Turbo Blower House - Boilers 5-6)	56	NOx, SO ₂ , Dust
Tata Steel	Port Talbot Works 1 (Service Boilers)	58	NOx, SO ₂ , Dust
Tata Steel	Port Talbot Works 2 (Mitchell Boiler)	59	NOx, SO ₂ , Dust
Tata Steel	Port Talbot Works 3 (A5 Boiler)	60	NOx, SO ₂ , Dust
Tata Steel	Port Talbot Works 4 (6&7 Boiler)	61	NOx, SO ₂ , Dust

With regard to the required statement on 'measures foreseen' in respect of achieving compliance with ELVs from 1st July 2020, although our planning is still ongoing, we will comply through either one or a combination of the following: fuel changes, rationalisation of our current configuration and/or targeted implementation of BAT (where this is cost-effective to do so and where techniques can be retro-fitted to existing plant).

We plan to provide you with a copy of the calculations of the emissions ceilings for each plant within the next 10 days. In the meantime, if you have any questions, please don't hesitate to contact me.

Yours sincerely,

--
