Mr Vincent,

Reference your request we are reluctant to make any firm commitments at the moment. -----

. Implementation of this project will ensure that the two gas turbines comply with IED regulations. We cannot make a firm commitment on this project until we reach Final Investment Decision (Date to be advised)

I trust the information provided is sufficient to meet your requirements.

Best Regards,

-

Mr -

Please also provide a short note on what measures are foreseen to enable the plant to comply with the Directive when the TNP comes to an end in June 2020. I need this information, and the confirmation sought below, by **close on Tuesday 11 December**.

Richard Vincent

-

Please confirm that the two Turbines you mention (97 MW each) discharge their waste gases through a common stack and thus constitute a single combustion plant for the purposes of the Directive.

Richard,

Please find attached the information you requested recently.

On the attachment you will find a covering letter and the updated information to Tables A.1, A.2, B.1, B.2, and B.3 which formed part of Appendix A.

I trust you will find the information supplied acceptable.

Best Regards,

-

Mr -

I am sorry to be contacting you so long after your letter of 8 May (attached for your convenience) and with a short deadline request.

That request is that you complete, for each plant Tables A.1, B.1, B.2 and B.3 as set out in Appendix A of the attached document and further explained in its main text. Whilst what you sent in and with your 8 May letter contains most, if not all, of what is required, it would be best if you could complete those tables so as to avoid the possibility of misunderstanding on my part as we finalise the draft TNP. I would be grateful for those tables as soon as possible and certainly by **7 December**.
