

I am sorry to have been delayed in replying.

If, at 31 December 2015, a plant currently participating in the NERP has, besides its annual mass emissions allowance, ELVs set to protect the local environment, those ELVs will need to be maintained.

Subject: LLD Query

Dear David

Please see below query for the attention of Richard Vincent.

Kind regards

Dear Dr. Vincent

A member of the Combustion Engineering Association (CEA) has raised a question regarding the application of LLD emission limits, please see below.

Re. Article 33(1)(c))

“the emission limit values for sulphur dioxides, nitrogen oxides and dust set out in the permit for the combustion plant applicable on 31 December 2015, pursuant in particular to the requirements of Directives 2001/80/EC and 2008/1/EC, shall at least be maintained during the remaining operational life of the combustion plant.”

If a plant presently in the NERP decides to go for Limited life time derogation under IED how will their current emissions limits be maintained as they enter the new arrangement in 2016?

We look forward to our meeting 23rd October

Kind regards

, Mechanical Engineering Placement Student
