

To the LCPD Stakeholders Group

Dear Colleagues

I am sending you the following on behalf of Richard Vincent:

With just over a month before the deadline for the submission of the UK Transitional National Plan, and in the light of some new views from Commission officials, I would urge you:

- (i) to ensure that you have submitted the required information on all the plants which you envisage being in the TNP. If you are really not sure, it's better to submit, but please do not submit "just in case";
- (ii) if you do decide to submit more plants, it is essential that the required information reaches us as soon as possible and certainly by **Friday 7 December**;
- (iii) if you know that you have submitted incomplete information, please update it as soon as possible and certainly by **7 December**. Some submissions lacked information on first permit date and even the rated thermal input. Others lacked information on fuel use and waste gas flow; and
- (iv) if you haven't already, submit for each plant an indication of the measures foreseen for it after the TNP finishes.

Finally, if you are aware of any operator who remains unaware of the TNP option (although all the indications are that all do), please draw it to their attention urgently.

Richard
