-

Thank you for the attached letter which we have "scanned in" following its receipt this morning.

The calculations you propose to send must be based on the fuel use of the large combustion plant from the beginning of 2001 to the point when it ceased operation in preparation for what can now be regarded as a period of refurbishment of the installation it serves. The fuel use must be averaged over that operational period, which clearly will be somewhat shorter than the full period 1 January 2001 to 31 December 2010 which, under Article 32(3) of the industrial emissions Directive, would otherwise apply.

Richard Vincent

Head of Industrial Pollution Control

Area 5F, Ergon House

17 Smith Square
