

Field	Comment
Location	Brief Project identifier. Further details are held in a contact database
Classification	Describes the project as PPP (local authority driven Public Private Partnership); or PFI (local authority driven Private Finance Initiative); or M (private sector driven Merchant plant)
Status	Describes the life cycle stage of the project - see drop down list for descriptors
Operational Date	The date on which the plant became or will become operational
FY Completed	The fiscal year (end) in which the plant became or will become operational. Plants already operational by March 2010 have been assigned as FY(End) 2010 regardless so the actual operational date
Operational Capacity	The operational throughput capacity of the plant NB. Not the permitted capacity or the design capacity which will tend to be higher. In the case of operational plant the entered figure should be the average of the past years throughput as reported by Environment Agency data
Plant Type	Plant is (user) classified as: Energy from Waste (EfW); Biodrying Mechanical Biological Treatment (BMBT); Landfill Mechanical Biological Treatment (LFMBT); or Mechanical Treatment (MT)
