

Dear Department of Energy and Climate Change,

I'm writing to respond to the consultation on the Review of the Siting Process for a Geological Disposal Facility.

I'm concerned that:

- a) Powers are taken away from local councils
- b) It will be harder for local people to stop nuclear dumping
- c) There will be less certainty around community consent

I urge you to consider what the long term impact of these changes are, and reconsider.

Yours sincerely,

Catherine Avery
