

Dear Sir or Madam

I am a resident of Cumbria

My comments are:

When a previous consultation took place Cumbria County Council, Friends of the Lake District and a majority of Cumbria's residents did not express an interest in hosting nuclear waste underground. Why then is a further consultation excluding both groups taking place ignoring their expressed wishes?

I am not convinced of the safety of the West Cumbria site and cannot understand why safety investigations have not taken place prior to a second consultation about expression of interest.

I personally strongly oppose any siting within Cumbria and share the views of Nuclear Free Lakeland.

Regards

Chris Green (Ms)
