

For the attention of "The Department of ENERGY and CLIMATE CONTROL": Dear Sir or Madam, The incredible attempt to overturn the DEMOCRATIC vote in Cumbria against allowing a huge Nuclear Waste store in Cumbria is very upsetting to concerned inhabitants. Experts have advised that the Geology is totally unsuitable in West Cumbria. The damage and risk to the people and nature on land and sea is unforgivable. It is a dishonest attempt by the Government to support the plans for new Power Plants and their subsequent highly radioactive waste to be hidden away at great risk for future generations. Yours faithfully, Ann and Paul Cremer.
