Capital Fiscal Stimulus

In response to the recession the Government accelerated £3 billion of investment spending from 2010-11 into 2008-09 and 2009-10.

Support for construction

This capital fiscal stimulus has brought forward investment in roads, housing, health, flood defences and school refurbishments to help support the construction industry, jobs and businesses across the country. For example:

- £150 million spent on the Warm Front programme has benefited £72,000 households with reduced heating bills;
- £250 million is bringing 23,000 homes up to the Decent Homes standard ahead of plans; and
- £100 million has enabled more than 800 GP practices to have additional funding to improve and extend training facilities.

Support for growth

Accelerated spending on science, transport and further and higher education has helped prepare the economy for growth. For example:

- 124 Higher Education institutions benefited from advanced funding to improve their capital infrastructure in 2008-09;
- 2009-10 funding has benefited over 140 projects in Higher Education institutions, including a new building for the Centre for Immunology and Infection at York; and
- £400 million has accelerated investment in high value schemes on the strategic road network, including the A46 road-widening scheme, hard shoulder strengthening on the M6 and barrier renewals on the M1 and M18.

Fiscal Stimulus Distribution across England

To find out how this action has been taken across England, follow the links below for an in-depth look at spending on:

Statement of Data Quality

The data contained on this website are estimates or projections of fiscal stimulus spending in 2009-10, which contain significant elements of plans or allocations of funds, rather than being actual spending outturns. They are therefore outside the domain of official statistics. Provisional outturns for actual spending in 2009-10 will be published for the first time in the HM Treasury National Statistics release of public expenditure scheduled for release on 8 July, which will contain aggregate national figures for fiscal stimulus spending.

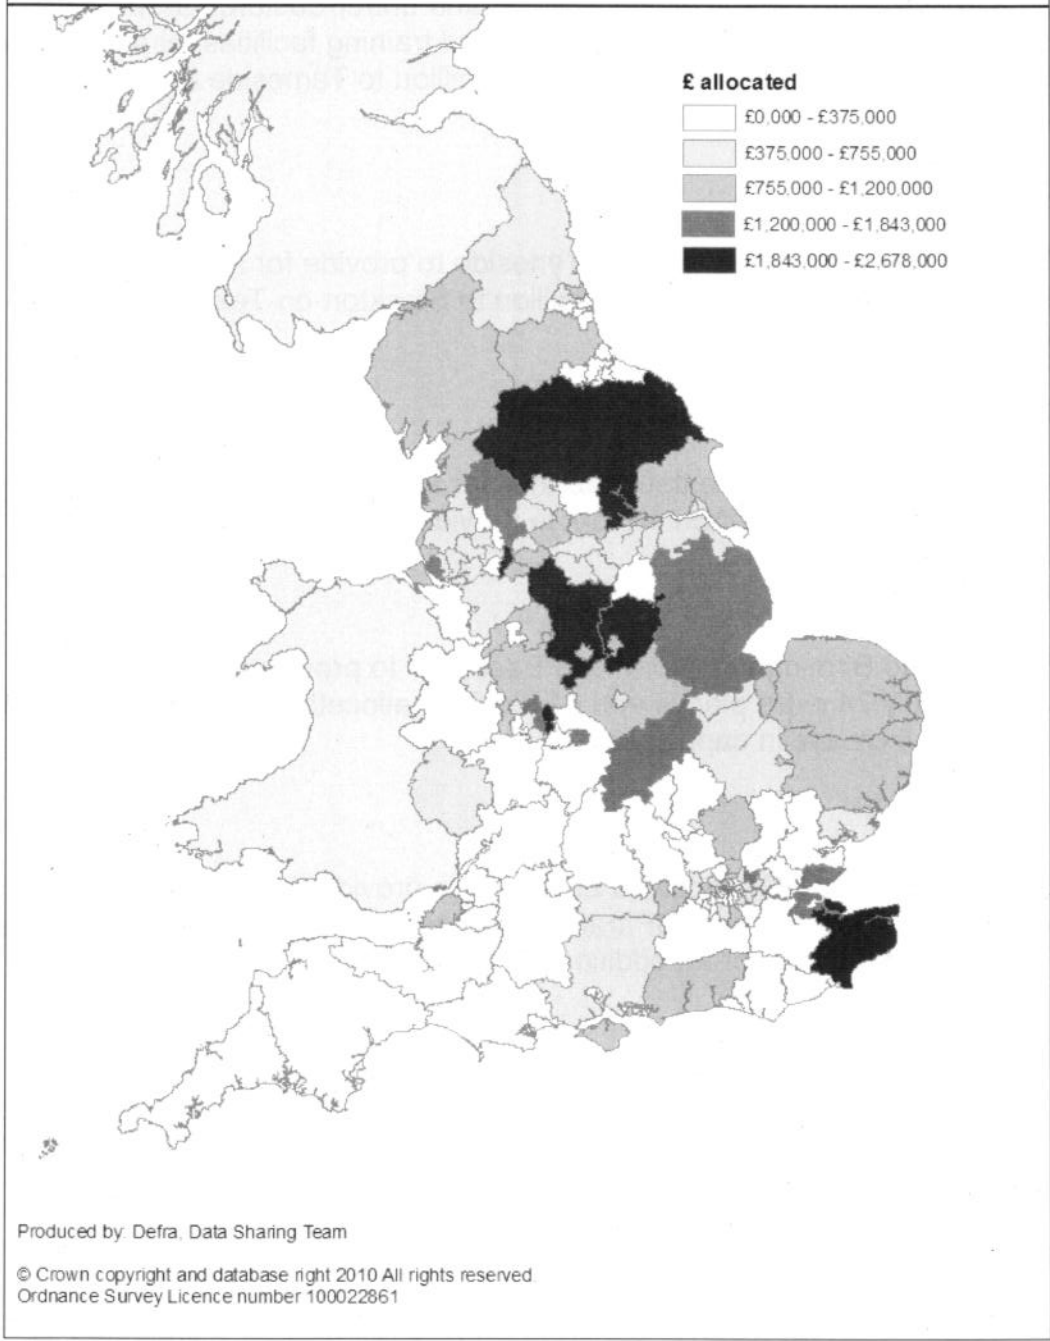

The data detailed on this website has been sourced from departmental financial records but, as outlined above, these are not yet spending outturns and have not yet been scrutinised through an end of year audit process. They show departments' allocation of spending to individual regions. Where the information is available, the data also includes departments' estimates or allocations of spending within each region to individual local authorities or individual regional organisations. All this data has been subject to a quality assurance process both within the relevant departments and HM Treasury, but as highlighted they are estimates, and only reflect planned allocations.

Health Fiscal Stimulus

£100 million of spending on GP surgeries in 2009-10 was allocated to Primary Care Trusts (PCTs) around the country to improve and extend GP training facilities.

Distribution of accelerated £100 million to upgrade GP surgeries

GP Surgeries

More than 800 GP surgeries received accelerated funding and over 500 have been completed, with the remainder under construction. Funding was targeted to those areas that historically have had a lower provision of doctors. Examples are provided below.

North West

The North West region received the highest allocation, with £22 million of investment, as the North West historically had a lower provision of doctors. This funding supports the planned expansion of GP training so that patients will have access to GPs in disadvantaged and under-doctored areas. This includes £2.7 million in Manchester to extend training facilities for an expected 22 additional GP training places and £1.1 million to Tameside and Glossop PCT.

North East

£0.8 million was allocated to North Tyneside to provide for a projected 13 additional training places and £0.4 million to Stockton-on-Tees for 20 extra places.

Yorkshire and Humber

£1.1 million in Kirklees to extend facilities for a projected increase in capacity of 18 places and £2.3 million in York to provide for 32 additional places.

West Midlands

£2.5 million to Birmingham North and East PCT to provide facilities for approximately 24 extra places and £1.6 million allocated to Coventry to meet a projected increase in capacity by 28 places.

East Midlands

Derbyshire County PCT received £2 million to provide the facilities for approximately 33 additional GP training places and Nottinghamshire received £1.9 million to provide for an additional 23 places.

East of England

£1.2 million allocated to Norfolk is expected to increase capacity by 14 places, £1.5 million in South East Essex by 9 places and £1.1 million in Suffolk by 20 places.

London

Redbridge PCT received £1.3 million to provide facilities for a projected 18 extra GP training places and Croydon received £1.2 million to extend by an estimated 20 extra training places.

South West

£1.2 million allocated to North Somerset PCT to extend facilities for an expected increase in capacity of 15 places and £0.3 million allocated to Devon PCT to extend by an estimated 7 extra places.

South East

£2.5 million to extend facilities in Eastern and Coastal Kent to provide for an increase in approximately 10 training places and £1.1 million on the Isle of Wight to provide for an additional 8 places.

[Environment Page Link]

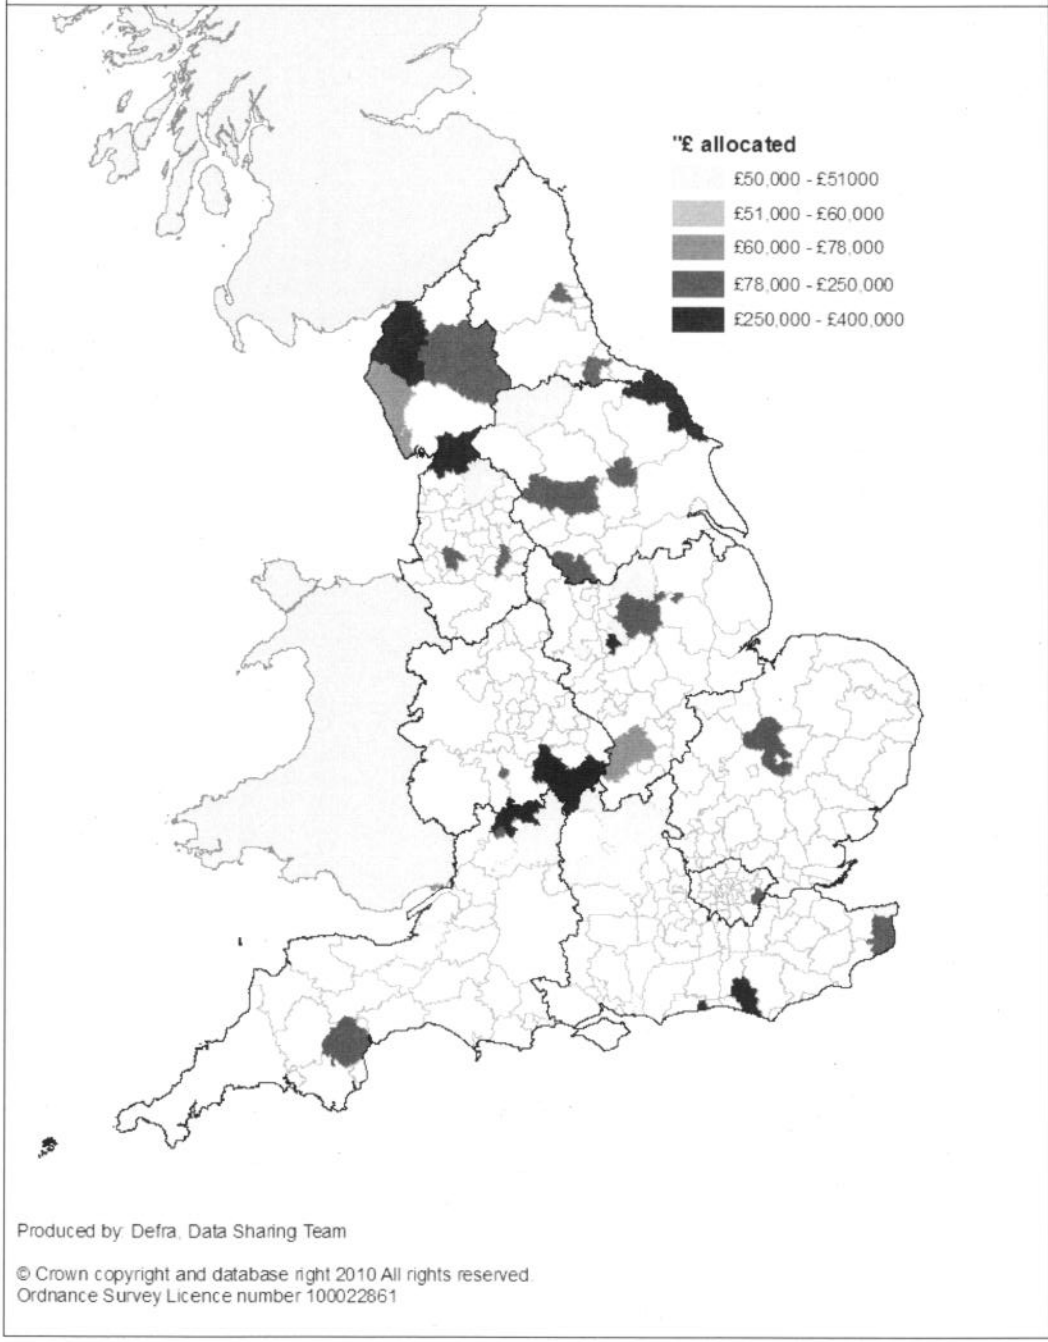

Environment Fiscal Stimulus

[Insert map for floods and map for BW]

Flood and Coastal Erosion Risk Management

£20 million of accelerated investment into flood and coastal erosion risk management will deliver better protection to over 27,000 homes in high priority areas earlier than would otherwise have been the case.

Distribution of accelerated £20 million investment on flood and coastal erosion defences

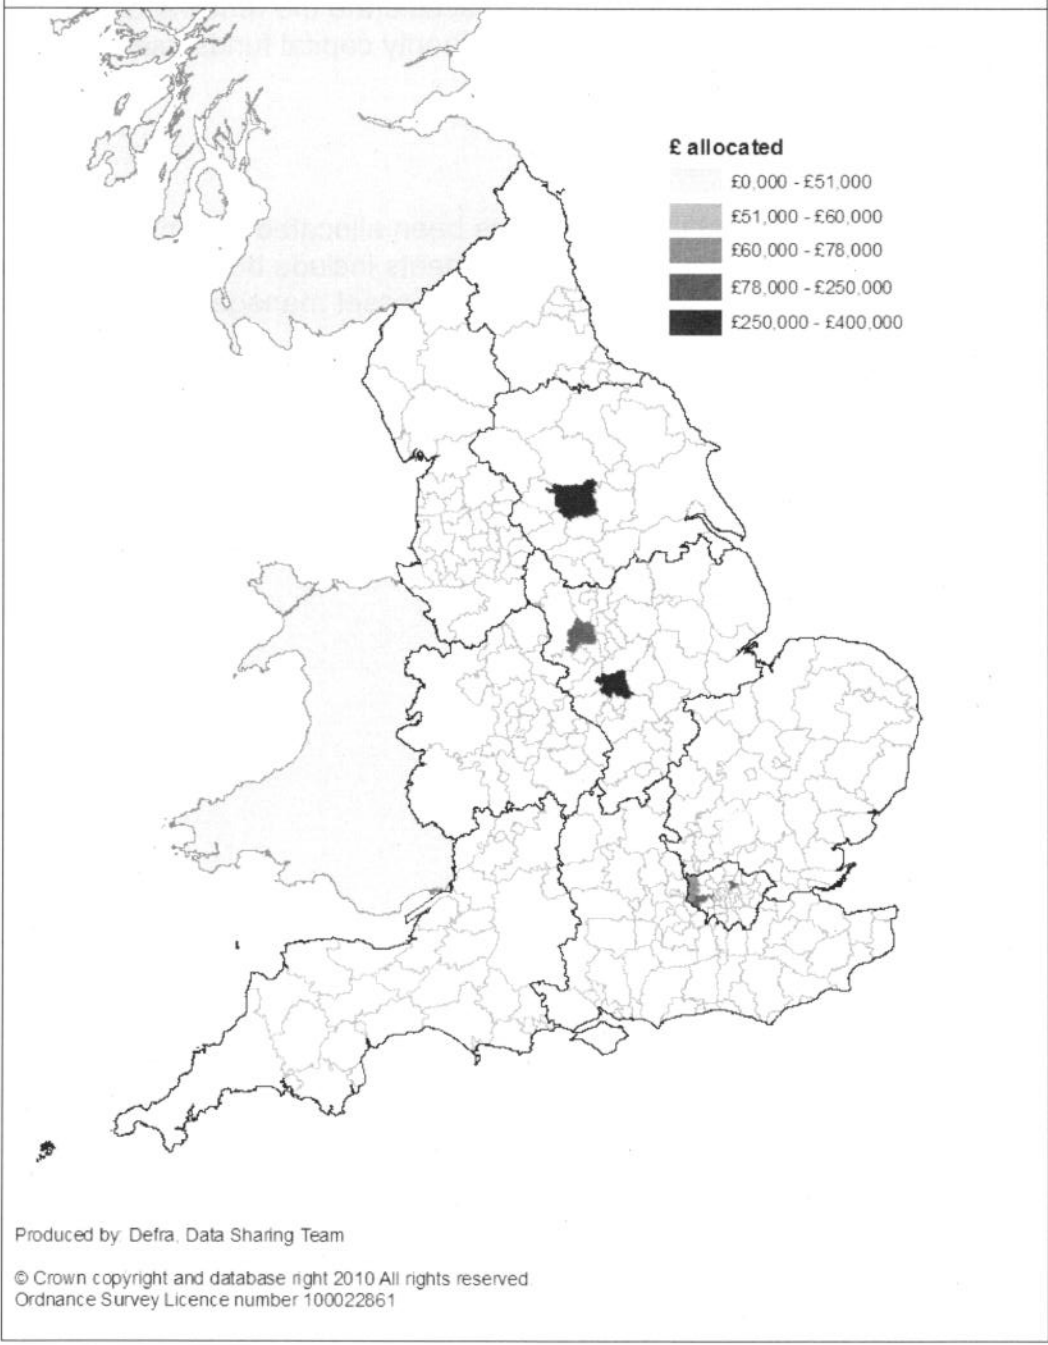

Spending was targeted on high priority areas and further information on the prioritisation metric can be found at: <http://www.environment-agency.gov.uk/research/planning/33700.aspx>

British Waterways

£5 million of accelerated spending to improve the infrastructure of the British Waterways network.

[Schools Page Link]

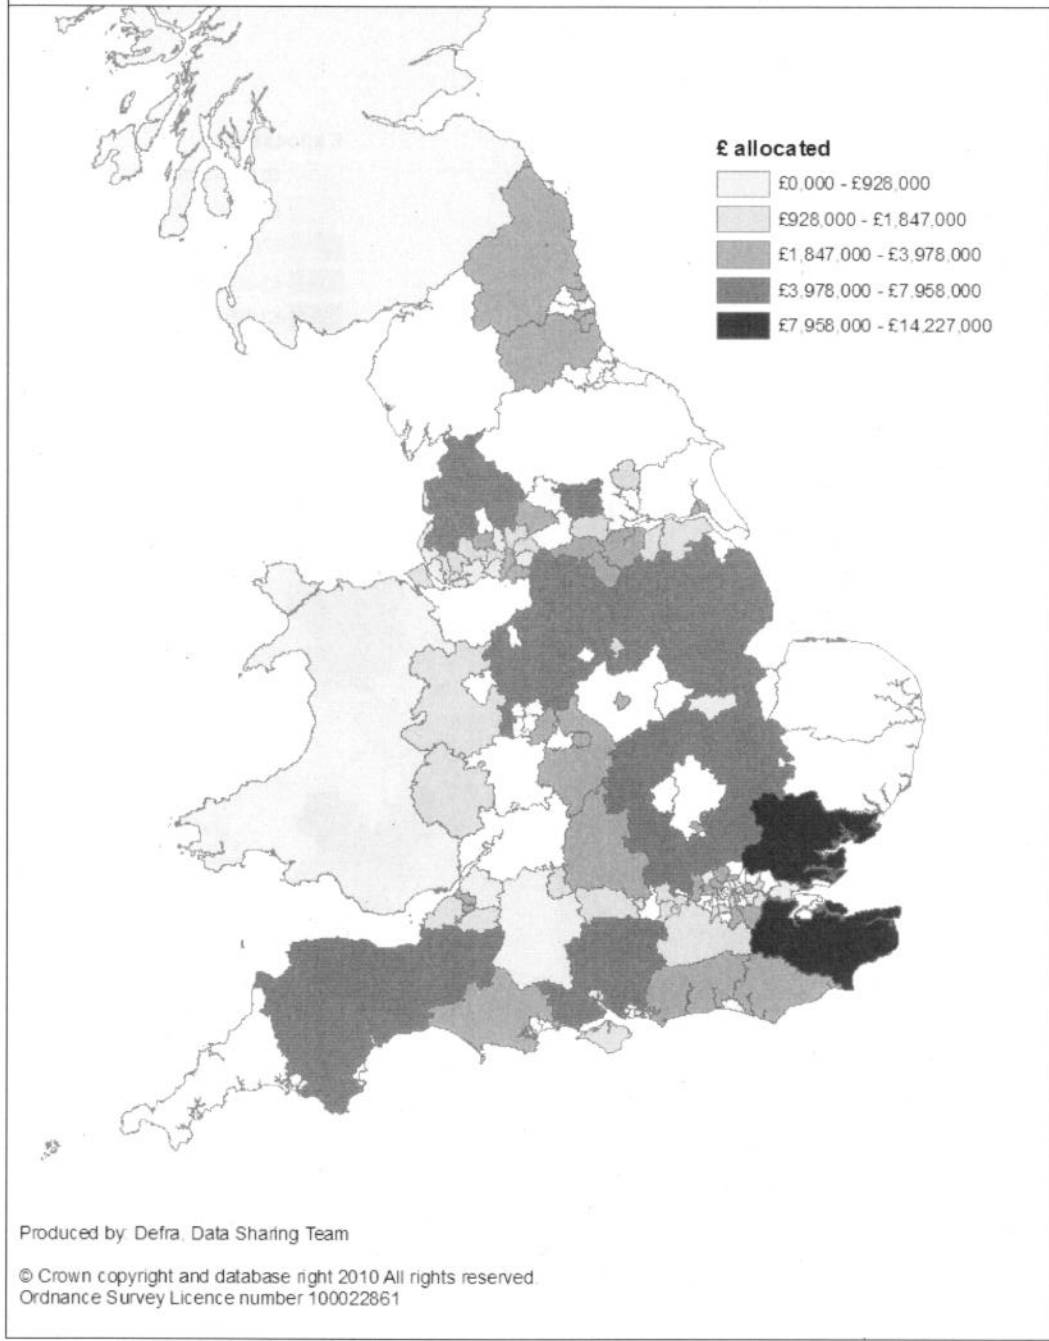

Schools [Insert 5 maps for different areas of spend]

For schools, the additional capital funding in 2009-10 was brought forward in the priority schools capital programmes to accelerate the renewal of the primary school estate and to boost local authority capital funds used to modernise school infrastructure.

Local Authority Formula Grant

£240 million of accelerated investment has been allocated to improve the infrastructure of the school estate. Improvements include both upgrading and building new buildings and facilities in line with asset management priorities.

Distribution of accelerated £240 million Local Authority Formula Grant

Locally Coordinated Voluntary Aided Programme

£51 million of accelerated spending was allocated to upgrade buildings and facilities, providing new pupil places and developing access to facilities for disabilities and those with special needs in Voluntary Aided schools.

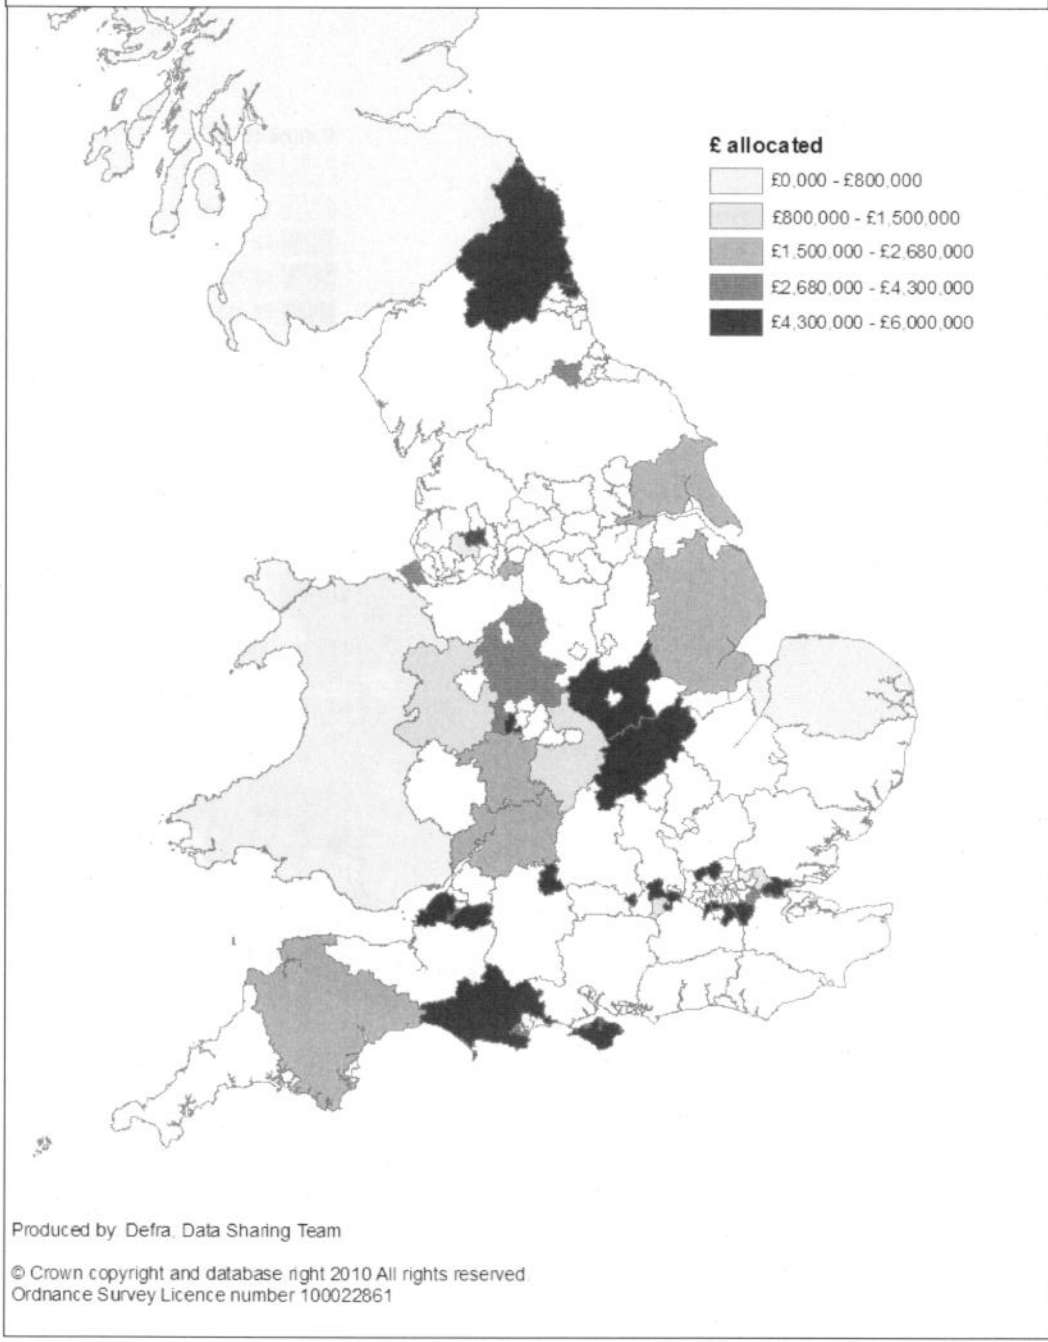

Distribution of accelerated £51 million Locally Coordinated Voluntary Aided (VA) Programme

Targeted Capital Fund

£151 million of accelerated investment to provide those local authorities not currently in the Building Schools for the Future capital programme with additional funding to support the provision of facilities for 14-19 diplomas and/or to improve the facilities for pupils with special educational needs and disabilities.

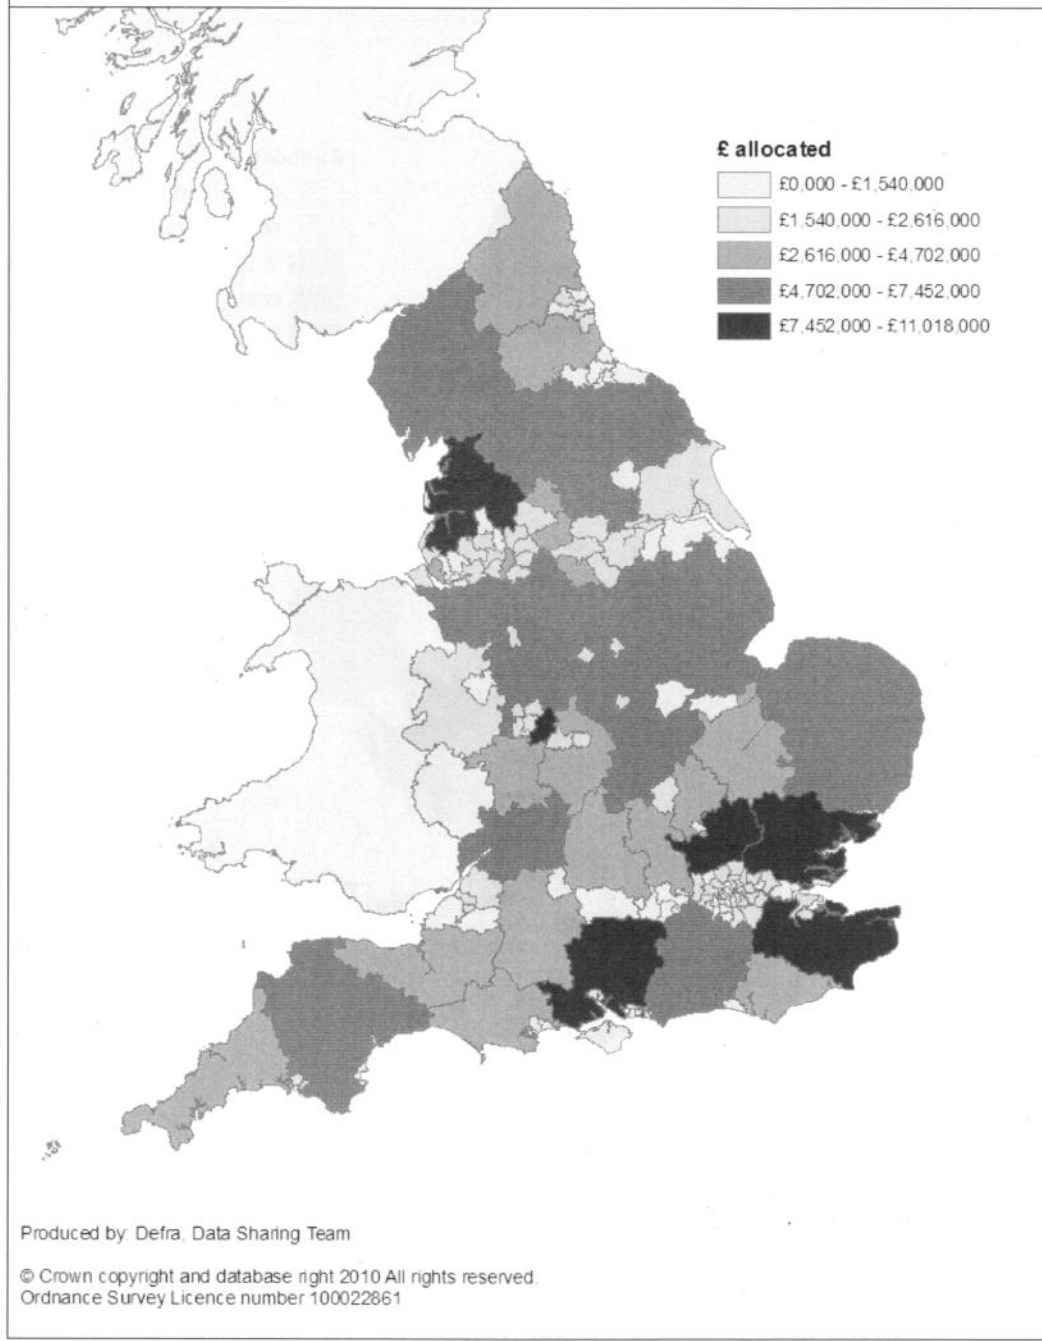

Distribution of accelerated £151 million Targeted Capital Fund

Devolved Formula Capital

Devolved capital is allocated annually on a formula basis taking into account pupil places, need and deprivation, to provide each school with its own capital money to address its priorities. £390 million of accelerated Devolved Formula Capital was allocated to schools to address their investment priorities sooner.

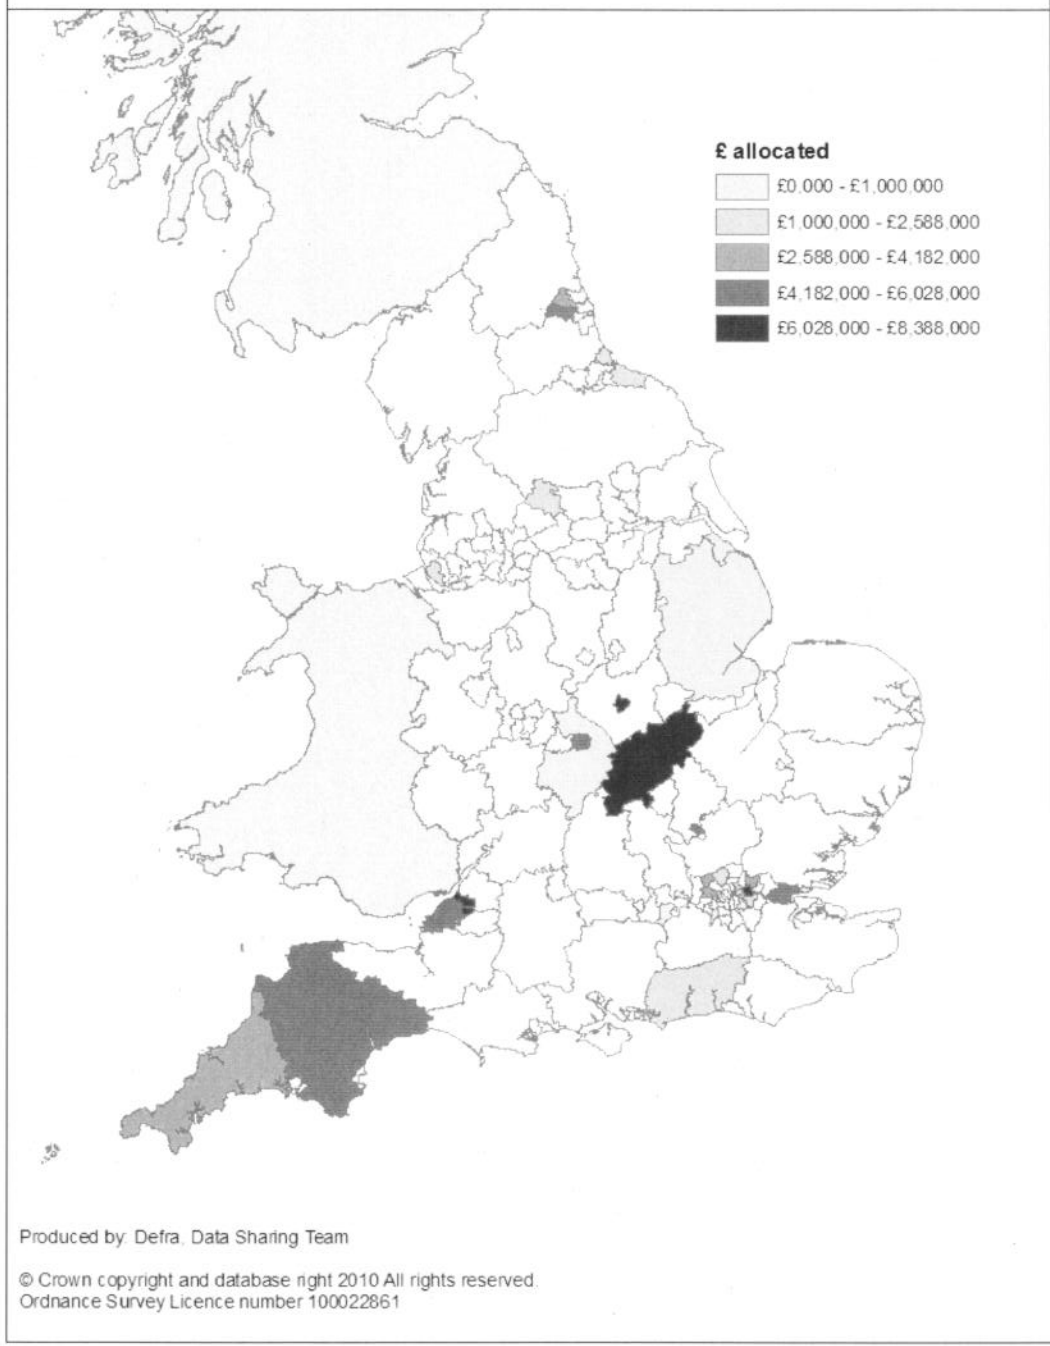

Distribution of accelerated £390 million Devolved Formula Capital

Primary Capital Programme

An additional £107 million of accelerated investment was allocated to some schools [how was this allocated?] across the country to spend on the Primary Capital Programme which enables a strategic approach to capital investment for the primary sector.
