Subject: radioactive waste

Dear Sirs,

Currently resident in Cumbria I was and remain totally opposed to the creation of a storage facility as turned down by Cumbria C. C. earlier this year.

The reasons:

- 1 testimony from 2 Professors that the site was not safe
- 2 no veto option as the stages went on
- 3 ruination of Ennerdale by boring tests
- 4 damage to lanes, roads, infrastructure
- 5 danger of leaks into the water of the Lake District, ruining the tourist industry
- 6 appalling safety record at West Cumbria nuclear facilities already
- 7 Hodge report saying £57 billion was needed to ensure safety right now
- 8 geographical remoteness of Westminster government, no knowledge of Cumbria and no interest.

Should this issue resurface here I would treble all my efforts to spread the word among everyone I know, and hope for the same outcome as last time.

Yours sincerely,
