Source: Survey of Personal Incomes 2010-11

Table updated January 2012

Notes on the Table

Income and tax, by gender, region and country, 2010-11

- Estimates for sub-UK geographical areas (e.g. by country, region, county etc) should be treated with particular caution (see Personal Incomes Statistics release Annex B)
- This table gives distributions of total income and tax for United Kingdom, England, Wales, Scotland and Northern Ireland. The information is presented on region basis for England. The numbers of individuals with self employment income are consistent with the definition used for Table 3.6 and only include people who are liable to tax in 2010-11.
- The breakdown of income is restricted to earned income. Separate figures for investment income are not given because, as explained in the Notes to the table 3.7 paragraph 2, large amounts of investment income are not included in the Survey of Personal Incomes. Estimates have been made for the United Kingdom in tables 3.1 to 3.10 but the methods used are not sufficiently reliable to give distributions for the regions. It should not be assumed, therefore, that an estimate of the distribution of investment income obtained by subtracting earned income from total income in a region would be reliable.
- Incomes are allocated to regions and countries according to the residence of the recipient. The postcode has been used to determine the county and hence the region for the overwhelming majority of cases. Some members of the Forces and Merchant Navy, together with a small number of people serving overseas and people with overseas addresses have not been allocated to regions, but have been included in the UK figures. There are also a small number of people in the sample where it was not possible to identify their postcode and therefore identify the correct region. These have also been included in the UK figures. This explains why the regional amounts do not add up to the UK total.
- Self employment income is profit chargeable under the Income Tax (Trading and Other income) Act 2005 less losses brought forward and capital allowances allowed. The number of individuals with self employment income shown in this table is lower than that shown in Table 3.10. In this table only individuals who are liable to tax in 2010-11 are included, whereas Table 3.10 includes all people with a self employment source in 2010-11. Employment income includes all pay from employment, from taxable benefits and from unemployment benefit, income support or Jobseeker's Allowance. In previous years we have used as our definition of self-employed, those who have non-zero profits, capital allowances or losses brought forwards. From 2003-04 we changed the definition to encompass all taxpayers who have a self-employment source.
- For more information about the SPI and symbols used in this table, please refer to [Personal Incomes Statistics release 2010-11](#)
