Dear Mr Martin

"CHART-TRACK" CHART & PUBLICATIONS MANAGEMENT SYSTEM

I am pleased to advise you that, following a period of evaluation of "Chart-Track", the Maritime and Coastguard Agency (MCA) will accept the system as satisfying the carriage requirement for "notices to mariners" under Regulation 19.2.1.4 of the revised Chapter V of the SOLAS Convention and the corresponding Merchant Shipping (Safety of Navigation) Regulations 2002.

Acceptance of Chart-Track is primarily on the basis of a recommendation of my colleague, Captain Ken Gordon, who undertook the evaluation and is given on the understanding that the information supplied via the system:

- originates from a national hydrographic office, and
- is in a read-only format that can not be altered by end-users.

You will also be required to inform MCA in writing when a new version of the Chart-Track software is realised, with details of the functional changes that have been implemented.

I trust that you are satisfied with this arrangement.

Yours sincerely

J.P. Collins
Principal Marine Surveyor (Nautical)
