 Regulatory Policy Committee	OPINION	
Impact Assessment (IA)	Increasing the fees for entering Energy Performance Certificates and related documents on the Energy Performance Certificate Registers	
Lead Department/Agency	Department for Communities and Local Government	
Stage	Final	
Origin	Domestic	
IA number	-	
Date submitted to RPC	15/02/2013	
RPC Opinion date and reference	12/03/2013	RPC12-CLG-1663
OIOO Assessment	GREEN	
<p>Overall comments on the robustness of the OIOO assessment. The IA says that the proposal relates to a change in fees and charges, with no evidence of the proposal resulting in change in the level of regulatory activity. The increase in fees is out of scope of 'One-in, One-out' in line with the OIOO methodology (paragraph 16 x).</p>		
<p>Overall quality of the analysis and evidence presented in the IA</p> <p>The IA explains clearly the need for an increase in the lodgement fees for entering Energy Performance Certificates (EPC) on EPC registers in order for the Department to meet its objective to seek full-cost recovery.</p>
