Pertussis vaccination programme for pregnant women 2012-13

Provisional national data, as submitted by PCTs for the month ending 31 October 2012

Pertussis vaccine uptake for pregnant women 2012/13

October 2012 (Cumulative data from 1 to 31 Oct 2012)

	2012/13							
	Response summary			Vaccine uptake (%)				
England total	No. of PCTs	No. of PCTs making a return	% of PCTs making a return	Number of pregnant women with an estimated date of delivery in the survey month	No. of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax®	Vaccine uptake (%)		
	151	133	88.1	41321	18011	43.6%		

Provisional: these data should be interpreted with caution

- 1. These data are based on 88% of Trusts responding to the October 2012 survey and have not been extrapolated to cover all PCTs.
- 2. The national figures are provisional and may vary following further data validation checks.
- 3. The denominator is determined as the number of pregnant women with an estimated date of delivery in the survey month.
- 4. The numerator is determined or defined as the number of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax® past the 28th week of their pregnancy
- 5. The data was provided from GP Practices to Primary Care Trusts (PCTs) and include uptake from 1 October 2012 to 31 October 2012 inclusive.
- 6. This is the first data collection for the new programme using a new method; hence there is wide variation in the reported number of pregnant women between PCTs that suggests variation in collection of relevant data.

There are anomalies in the data so the uptake estimate needs to be interpreted with caution.

- 7. The data quality may improve over time as more experience is gained from collecting the data.
- 8. These data have been provided by NHS Trusts under Review of Central Returns (ROCR) licence ROCR/OR/2160/FT6/001MAND
