Consultation on draft amendments to supply licence conditions

British Gas response
19th November 2013

Part 1

Question 1. Do you have any comments on the proposed legal re-drafting (at Annex 4) to take account of the changes that were consulted upon in the Open letter consultation on proposed amendments to the roll-out licence conditions?

- 1.1. We are satisfied that the redrafting generally reflects the decisions taken, but have one comment on paragraph 39.11. It is our assumption that this paragraph requires a direction to be issued 'in accordance with paragraph 39.5', before 6th April 2016. In the absence of such a direction it is unclear whether the date of 6th April 2016 would apply.
- 1.2. One general observation is that it would have been considerably easier to review the draft conditions if a full set had been produced, rather than (or in addition to) a list of the amendments.

Part 2

Question 1. Do you have any comments on the proposed legal re-drafting to take account of the extension to the completion of the smart metering roll-out to the end of 2020?

- 1.1. We have no comments on this redrafting.
