Monthly Statistics of Building Materials and Components

February 2014

No. 468

NOTES

In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Symbols. The following symbols have been used throughout.

- | | |
|-----------------------|-------------------|
| .. = not available | (P) = provisional |
| - = nil or negligible | (R) = revised |

All figures are subject to revisions.

Unless otherwise stated, revisions are due to more complete information from late returns. If any figures are revised by 5% or more from the previously published value, an explanation will be provided.

The United Kingdom Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods, and
- are managed impartially and objectively in the public interest.

Unless otherwise stated, the statistics published in this volume have been collected by the Office for National Statistics on behalf of the Department for Business, Innovation & Skills.

Lead Statistician: Liam Cavin

Note : 1) We have improved our sampling panel to include some new sites and have removed some non-pure slate sites. In line with the Code of Practice we have revised the data for Q2, Q3 and Q4 2010.

2) From Q1 1995, the coverage of 'powder & granules' has been extended to include non-quarry manufacture; and 'crude blocks' are included in 'other' manufacture slate.

- (a) Refers to stocks at the end of the period.
- (b) Consists of all slate tiles which could be used as roofing tiles.
- (c) Consists of all slate products for cladding and decorative uses

Monthly data no longer available¹

1. Arrangements for publication of the cementitious data have been revised following discussion and agreement by the Mineral Products Association (MPA) Cement members. Data will be available on an annual basis, with data for 2013 expected for publication on 7th of May 2014 at the latest.

NB Where the coverage is for Great Britain, the figures for imports & exports are defined accordingly and have been estimated. Cementitious material covers cement itself, fly ash to EN 450 Part 1 where used as part of the cement in concrete

Deliveries of Bricks, Blocks & Cement

12-month moving totals

The data is taken from tables 8, 9 and 11. See footnotes on table 11 concerning data from December 2011 to June 2012.

Note: Data covering January 2009 to February 2011 were revised in the December 2011 edition of this bulletin. These data are included in this table. Additionally, data covering January 2013 to November 2013 have been revised for the February 2014 edition of this bulletin. These revisions were due to the receipt of more accurate data from sites already sampled. For more information on revisions, see the 'Pre-announcements and Summary of Revisions to Monthly Statistics of Building Materials and Components Publication' document on our website.

Data from December 2011 to June 2012 has been revised following receipt of corrected data. The period August 2007 to November 2011 may also be affected, but non-availability of a back-series of corrected data means that this period cannot be revised, and should be treated with caution. Full details are available in the 'Summary of revision to monthly statistics of building materials and components publication' document on our website

(1) Lightweight aggregate including aerated concrete blocks where appropriate.

Data from December 2011 to June 2012 has been revised following receipt of corrected data. The period August 2007 to November 2011 may also be affected, but non-availability of a back-series of corrected data means that this period cannot be revised, and should be treated with caution. Full details are available in the 'Summary of revision to monthly statistics of building materials and components publication' document on our website.

* Refers to stocks at the end of the period.

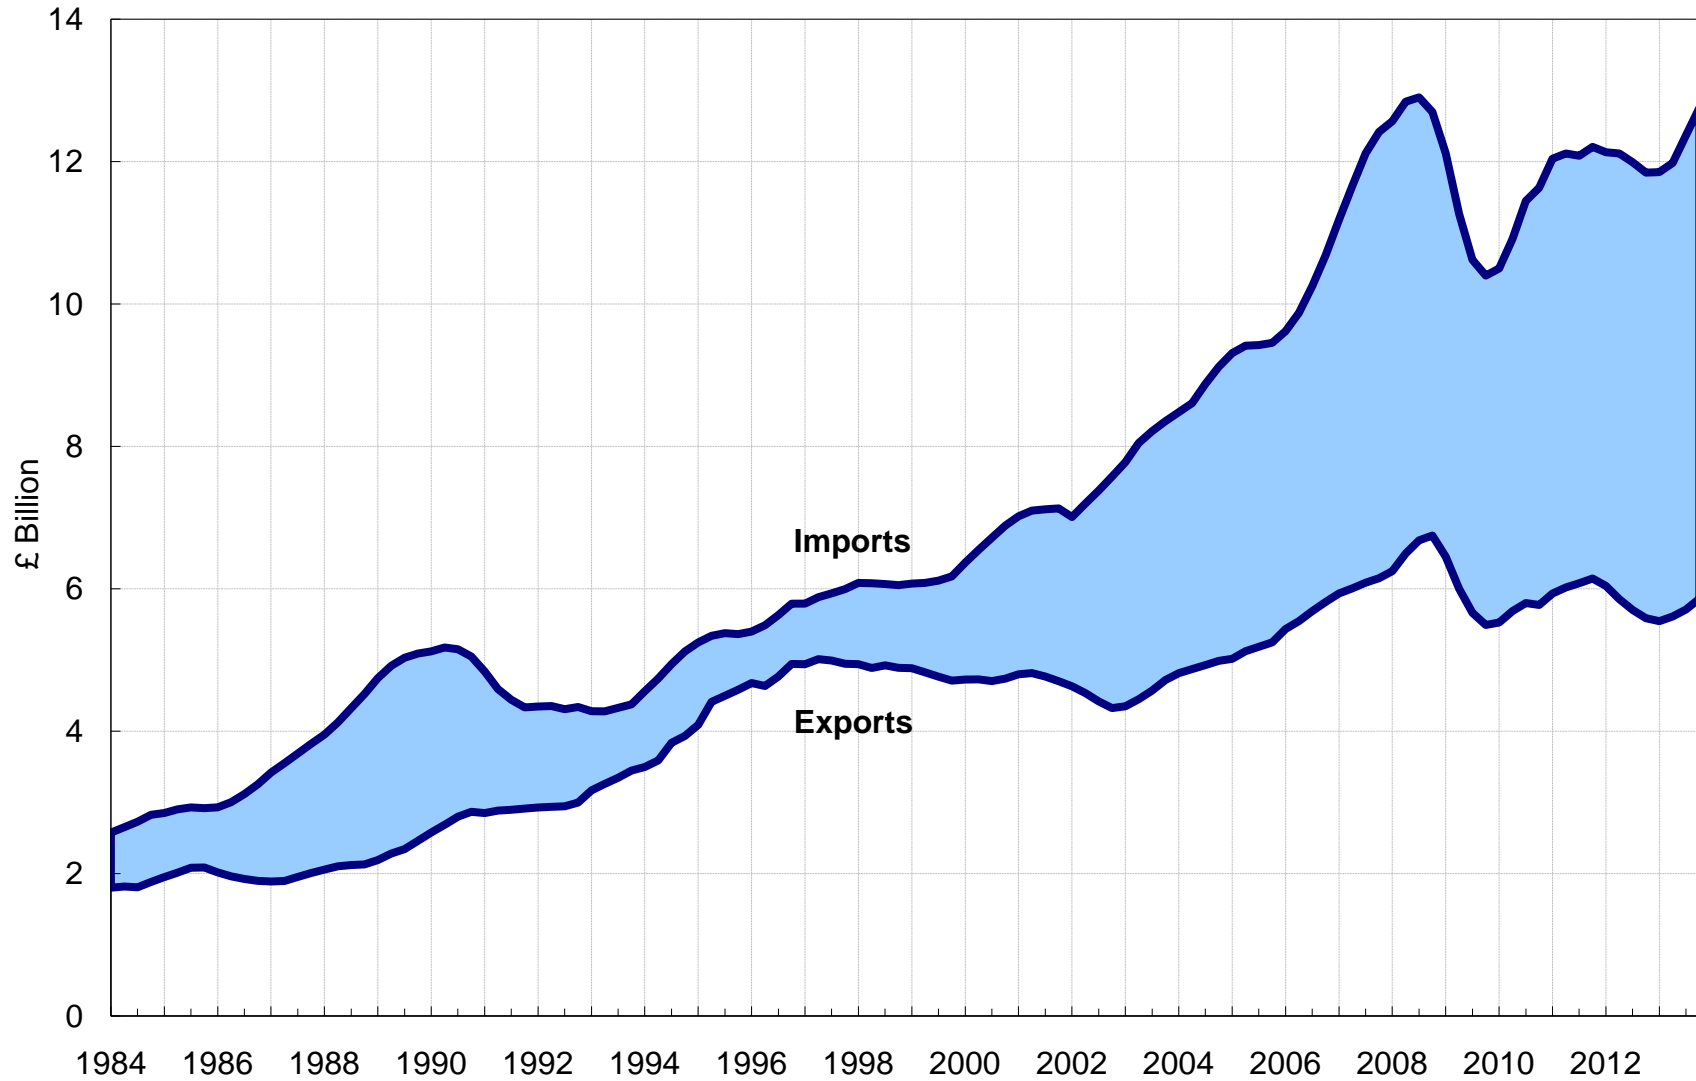

In April 2012, the Mineral Products Association (who provide these figures), estimated that data understates UK deliveries by around 20-25%. Previously, they had estimated that figures understate UK deliveries by 14-18%.

Concrete roofing tiles data underwent imputation for a non-responder/s in each quarter from 2012Q1 to 2013Q4.

Data from 2012Q3 to 2013Q2 have been revised following the development of a new imputation methodology.
