### 8. In what areas of global affairs does the EU add value or deliver impact or not on behalf of the UK?

Being a part of the EU makes the UK: 1). more interesting to the main global powers (USA, China) and other countries with which the UK would like to develop a prosperous relationship BRIC countries); 2). maximise its foreign policy resources (pooling diplomatic resources with other EU member states e.g consulars - could help reduce costs to UK taxpayers; joint diplomatic/military missions )

### 9. How effective is the EU at combining its foreign, defence, economic and civil contingency policy instruments to deliver best effect in foreign policy? What, if anything, should it do differently?

Member States should learn to work as a team rather than think of their own narrow national interests.
