1 INTRODUCTION

1.1 Purpose of this document

This guide is provided to outline the main requirements of the 2013 Phonics Screening Check data collection and submission arrangements. The check will be administered during the week commencing 17th June. The deadline for submission of results to the DfE by LAs is Wednesday **31 July 2013**.

This document is provided for use by Local Authorities (LAs) so that relevant staff:

- can understand the rationale behind and purpose of the Phonics Screening Check (Section 1).
- are able to populate their systems with the required data for children and schools (Section 2).
- are able to complete the Phonics Screening Check return for 2013 (Section 3).

It relates to the collection of data for:

- children who are in National Curriculum Year Group 1 in the 2012/2013 academic year and as such are eligible to take part in the Phonics Screening Check
- for the first time in 2013, children in National Curriculum Year Group 2 who have not previously met the expected standard for phonics decoding and as such are required to take the check

This document is published on the Department for Education's [website](#) and LAs may choose to use it directly with their schools or amend it to suit their local needs as appropriate. Software suppliers and developers of in-house systems may also find it a useful reference document.

1.2 Who is in the scope of the Phonics Screening Check data collection?

All State-funded schools (including Academies and Free Schools) are within the scope of the Phonics Screening Check data collection if they have:

- a Year 1 cohort in the 2012/2013 academic year.
- Year 2 pupils in the 2012/2013 academic year who have not met the expected standards for phonics decoding in Year 1, including those who were absent or disapplied from the check or have not taken the check for other reasons.

All State-funded schools (Including Academies and Free Schools) should report pupil-level phonics screening check results to their Local Authority (LA). LAs will submit phonics check results data to the Department for Education (DfE) via COLLECT. Independent schools are out of scope for this collection.

1.3 Rationale behind the Phonics Screening Check data collection

The phonics screening check is a statutory assessment for all children in Year 1, designed to confirm whether individual children have learnt phonic decoding to an appropriate standard. Children who do not achieve the appropriate standard should receive support from their school to ensure they can improve their phonic decoding skills. These children will then be expected to retake the check the following year.

The Phonics Screening Check data collection will provide information at school level via RAISEonline for schools to analyse their own performance; and at national and Local Authority level to allow schools to benchmark their children's performance. National results will also be used to track standards over time.

1.4 Statutory Basis of Phonics Screening Check data collection

The individual level data collection from State-funded schools (including Academies and Free Schools) is a statutory requirement of the Education (School Performance Information) (England) (Amendment) Regulations 2013.

By putting the collection of the Phonics Screening Check data on a statutory basis:

- Schools do not need to obtain consent for the provision of information from parents of individual children. They must, however, meet their obligations to Data Subjects under the Data Protection Act – see 1.5 below
- Schools and Local Authorities are protected from any legal challenge that they are breaching a duty of confidence; and
- It helps to ensure that returns are completed by schools.

1.5 Data Protection & Security

Data kept on children (in any medium, including within a MIS) are personal data. The data must be managed in accordance with the requirements of the Data Protection Act 1998. All staff that have access to personal data should be aware of their responsibilities under the Act. Local Authorities should advise schools about their responsibility to hold data in line with the Act.

1.6 Data quality

In order to properly ascertain whether individual pupils have learnt phonic decoding to an appropriate standard, it is important that the data collected by schools and Local Authorities, for onward transmission to the DfE, is both accurate and complete.

Please note that in addition to the Year 1 cohort, the check must also be administered to Year 2 pupils who have not previously met the expected standard for phonics decoding. Schools must return all check outcomes for Year 2 pupils (along with those for their Year 1 cohort) to their LA. LAs will submit all phonics check results data to the Department for Education via COLLECT.

The Department wrote to Local Authorities in March 2013, providing them with the indicative number of Year 2 pupils by school, who are expected to take the Phonics Screening Check in their area. LAs were advised to share this information with their schools and to use it to validate returns from their schools.

In [Section 2](#) there is a complete list of data items that are required to be submitted to the LA by schools, and then to DfE by the LA, together with an explanation of each of them.

LAs can download a copy of the Year 1 Phonics [Assessment and Reporting Arrangements](#) handbook from the Department's website and find guidance for carrying out assessments and moderation to ensure that practitioner judgements are consistent with nationally agreed assessments.

[Further information](#) on the technical aspects of the data collection is available on the Department's website.

2 DATA REQUIRED

- Local Authority number
- Estab number of the school: This is a 4-digit number.

Pupil Data

- Pupil's Surname
- Pupil's Forename
- Pupil's Unique Pupil Number
- Pupil's Date of Birth
- Gender
- National curriculum year group

Phonics Screening Check results

Schools must report the following for all pupils:

- Phonics Mark as recorded
- Phonics Outcome as recorded

The Phonics Mark is the actual mark from the screening check and should be a number in the range 0-40. The following code set should be used for the Phonics Outcome:

Wa	met the expected phonic decoding standard for a pupil at the end of year 1
Wt	has not met the expected phonic decoding standard for a pupil at the end of year 1
A	Absent
D	Disapplied
L	Left

Information about the threshold mark that pupils need to achieve in order to be considered as working at the expected standard will be available to schools in the week of the Screening Check.

3 REQUIREMENTS

The live 2013 Year 1 Phonics Screening Check COLLECT system will be available on **Monday 17th June 2013**.

The Department will not be providing a COLLECT school blade. There will be a single blade that LAs can use to submit Phonics Check data.

The Department will continue to collect **full** individual child level data. COLLECT will be the means by which data is collected from local authorities.

3.1 Local Authority Data Reporting Format

Please note that the Department has no requirement for data in aggregate forms (e.g. LA aggregate data); rather a single XML file for each school, containing all eligible pupils, will be created by LAs' central processing system software (i.e. Keypas, Capita-ONE, Tribal, or a bespoke LA system approved by the DfE).

The separate school XML files will need to be zipped (we would suggest using an identifiable filename e.g. LA name. Please note that the .zip suffix is required) and imported into COLLECT where the respective school files will be extracted.

Successfully loaded data is subjected to validation. For more details of the specific validation rules that will be applied, please see the [Phonics Screening Check Technical Specification](#).

After validation is complete you will be able to view your data return, observe the validation outcomes and decide if there is any further action on your part in response to the validations. For example, you may need to query something with a school and return to COLLECT to make a change to the data. Ultimately you will need to “approve” the data so that the department can consider it to be finalised.

For the options available to you to create Phonics Screening Check data see [section 3.4](#).

3.2 Data Collection Timetable

The Department is committed to providing national and Local Authority level analysis of performance as quickly as possible. To this end, we are asking that Local Authorities make their Phonics Check submissions by **Wednesday, 31st July 2013** – the departmental deadline.

It is of utmost importance that the data we hold by the beginning of August 2013 are as complete and accurate as possible as the data received by this date will be taken as final for the purpose of our main headline statistical release and will be also be published in the unvalidated release of RAISEonline . Your co-operation in helping to achieve as complete and accurate a dataset by the beginning of August will be to our mutual benefit.

There will be a limited opportunity for LAs to submit late and/or corrected results, any late results **will not** be included in the unvalidated release of RAISE online.

LAs should note that amendments will not be accepted after the database is closed.

3.3 Expected List of Schools Submitting Results

The EDD Helpdesk has updated the expected list of schools on COLLECT with an extract taken from the School Census. The expected list includes all schools with Year 1 and Year 2 pupils expected to take the check in 2013. LAs will be able to view the expected list on COLLECT when the collection goes live on 17th June. We would appreciate it if LA contacts could check the lists for any schools that are missing or incorrect and advise the helpdesk using the Service request form.

If the COLLECT system is not updated with the correct schools you will be unable to load their data returns.

The schools list will not include any information on the number of children we expect results to be submitted for, although the Department will internally flag any returns with numbers of children significantly different to what we would expect in COLLECT.

LAs will need to ensure that Phonics Screening Check results are collected from **every** expected school and include all eligible pupils, including those disapplied (which could include whole cohorts in special schools) or absent from the check.

3.4 School Recording and Reporting Options

3.4.1 School Management Information System (MIS)

State-funded schools including Academies, Free Schools and special schools should report pupil-level phonics screening check results to their geographical LA. Schools will be able to use their (updated) Management Information System (MIS) to enter and export Phonics data to their LA in Common Transfer File (CTF) XML format, or as agreed with the LA.

The Department has provided [software specifications](#) to commercial suppliers of LA database processing systems, and to those LAs that have indicated they wish to design their own systems for this purpose. The LA processing software will accept a school MIS CTF export file and the DfE spreadsheet CSV export file and create the necessary DfE export file. LAs will fully meet the statutory requirements for the submission of its Phonics results by using appropriate software that will enable them to create the necessary file.

The Department will only accept Phonics results created from software that can produce the information in the correct format to upload onto the COLLECT system.

3.4.2 Phonics Screening Check spreadsheet

The Department will provide LAs with a DfE Phonics data collection spreadsheet for State-funded schools that, in exceptional circumstances, are unable to use their MIS for the recording and submission of 2013 Phonics Screening Check results.

The spreadsheet “Export” option creates a CSV file containing the relevant pupil data for loading into the LA’s central processing system. Please be aware that this CSV file cannot be imported directly into COLLECT and needs to be loaded into the LA central software.

If the spreadsheet is used to return data to the LA, then this must be done in a secure way to safeguard pupils’ personal data.

The 2013 spreadsheet and user guide are available under the [Year 1 Phonics Data Collection](#) section of the DfE Website.

3.5 Use of COLLECT

3.5.1 Live system

The Department will make the live 2013 Phonics Screening Check COLLECT system **available on Monday 17th June 2013**. Further notifications will be emailed to the relevant LA officers nearer to the time, as will any further Phonics Screening Check /COLLECT updated information as necessary.

Screenshots of COLLECT with user guide notes are under development and will be available on the department's [website](#).

3.5.2 User names and passwords

Please note that access to departmental data collection systems (including COLLECT) changed on 10 December 2012 with access now obtained via Secure Access. If you have not activated your account a simple registration process requiring a unique PIN will need to be completed in order to gain access to COLLECT via Secure Access. You can access further information on Secure Access on the [DfE website](#).

If you did **NOT** have access to the 2012 Phonics Data Collection on COLLECT and wish to request access for 2013, please use the 'COLLECT access form' service request below:-

[Data collection access form \(LAs only\)](#)

Completing this form will mean that you will be automatically added to our contacts database for the specified data collections, so you won't need to separately register to be a contact.

If you wish to be added to our contacts database, but do not require COLLECT access for one or more data collections, please use the [Data Collections Service Request form](#).

3.5.3 General Issues

If you have any COLLECT or Phonics queries of a general nature, please contact the EDD Helpdesk using the [Service Request Form](#)

We have every confidence the 2013 Phonics Screening Check data collection exercise will be successful and we know you will do all you can to ensure its success. Many thanks for your anticipated co-operation.

EDD HELPDESK

4 APPENDICES

4.1 Appendix 1: Local Authority Codes

	North East			East Midlands
841	Darlington		831	Derby
840	County Durham		830	Derbyshire
390	Gateshead		856	Leicester
805	Hartlepool		855	Leicestershire
806	Middlesbrough		925	Lincolnshire
391	Newcastle upon Tyne		928	Northamptonshire
392	North Tyneside		892	Nottingham
929	Northumberland		891	Nottinghamshire

4.2 Appendix 2: Glossary

COLLECT	COLLECT is a web based data collection tool which will be familiar to those who participated in School Census. It has been developed and made available by the DfE and facilitates the data collection process. It enables the transfer of census data between LAs and the Department. It supports the management of the collection process, with various reports that monitor the quality and completeness of the return. Validation checking and error reporting is also built into COLLECT.
CSV	A CSV format data file is a text file consisting of a number of text records. Text values are separated by a comma and can optionally be enclosed in double quotes.
CTF	A Common Transfer File is a file that contains statutory information about a child that should be transferred when they move schools and includes UPN, Surname, Forename, Date of Birth, Gender together with other information for example, Assessments, Attendance, SEN and Contacts. A complete list of fields can be found in the CTF Guide Notes .
MIS	Management Information System(s) – propriety software system(s) used by schools and LAs to collect, validate, store, and analyse a range of pupil, school, and workforce data.
XML	XML is the EX tensible M arkup L anguage. It improves the functionality of the web by letting you identify your information in a more accurate, flexible, and adaptable way. XML contains a Header followed by a repeating group of data. Government Interoperability Framework encourages the use of XML for data.
