**Notes**

\* The government has recently set out the new definition of fuel poverty which it intends to adopt under the Low Income High Costs (LIHC) framework – the data above relates to the 10 per cent definition (i.e. a household is said to be fuel poor if it needs to spend more than 10% of its income on fuel to maintain a satisfactory heating regime)

\*\* Where 1/15 is the most expensive and 15/15 is the least expensive.
