COLLECT and Secure Access

Access to COLLECT is now through the Department's Secure Access System (SA), <https://sa.education.gov.uk/idp/Authn/UserPassword> which was implemented on 10 December 2012.

To access Secure Access existing users will need their COLLECT username and password, which should have been retained from the 2012 data collection. **If you have forgotten your login details, or have not received details of your unique PIN**, please complete a ['Service Request' form](#) on our website.

Full Secure Access guidance is published on the [Secure Access Website](#).

Once successfully registered, open the **'Your applications'** tab to access COLLECT, as above.

Then click on to **'Continue'** to enter Collect as above.

If you are bounced back to your homepage at this point please check that you are not trying to access the site from a link within an e-mail. Please copy and paste the address into the address bar then save it to your favourites.

Please follow the steps below to add the web addresses to your trusted sites

Go into the **'Tools'** menu option at the top of the screen.

Select **'Internet Options'** from the drop down menu. Select **'Security'** from the option buttons, Selected **'Trusted Sites'**, Select **'Sites'**, Then select **'Add'** and type the following into the text box:

<https://collectdata.education.gov.uk>

Then select ok and ok. Please check that the secure access site is also in the trusted sites The addresses should appear in the large box .

Select Data Collection

News

Welcome to GENERIC UAT COLLECT (Collections On-Line for Learning, Education, Children, and Teachers).
COLLECT is the DfE Centralised Data Collection and Management System for Education

Select the collection by clicking on the collection name to highlight it (if there is only one it will be automatically highlighted) and then click on the 'Select Data Collection' button to open it.

The Agent main screen will be displayed

This shows the current status of the returns and a breakdown of the errors within them. All information is read only.

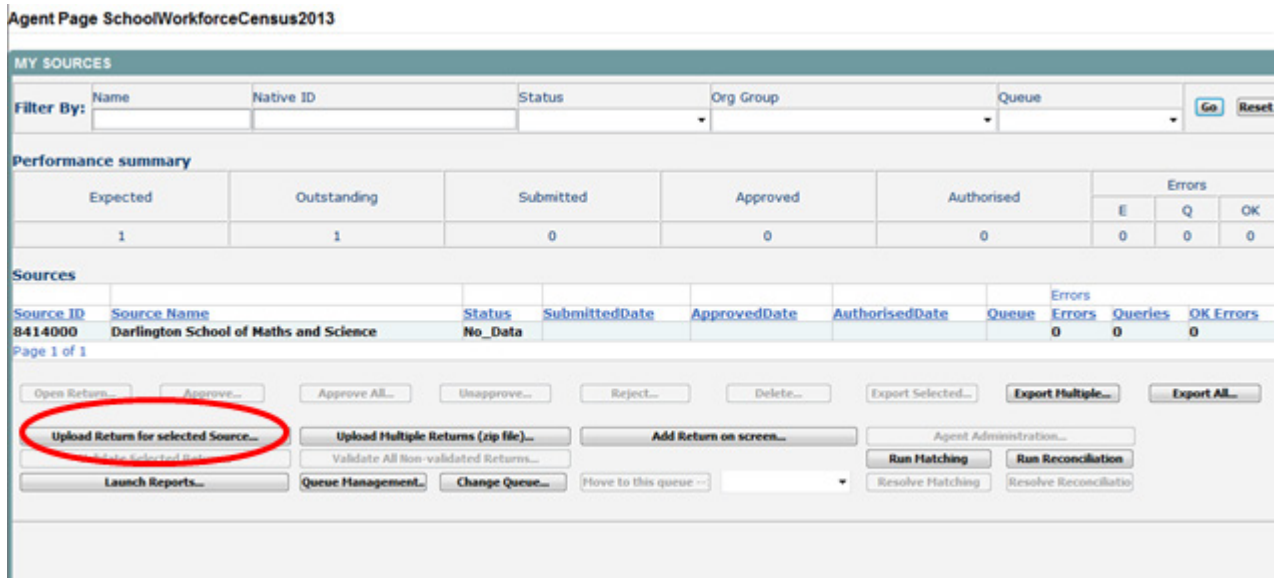

Return Management

The Return Management interface contains the following buttons and controls:

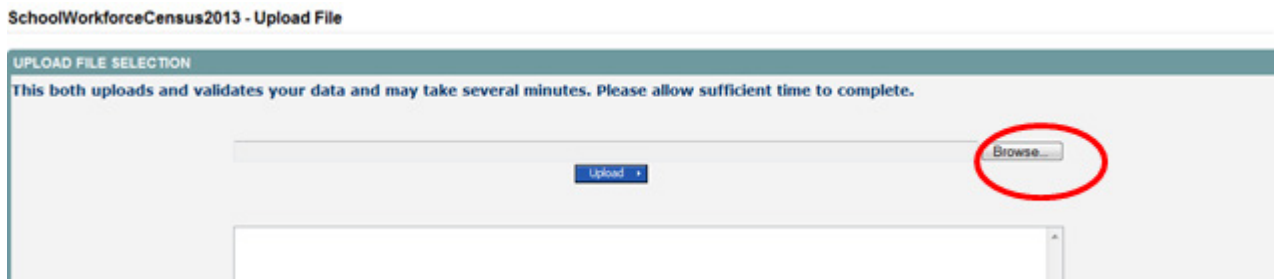

- Open Return...
- Approve...
- Approve All...
- Unapprove...
- Reject...
- Delete...
- Export Selected...
- Export Multiple...**
- Export All...**
- Upload Return for selected Source...**
- Upload Multiple Returns (zip file)...**
- Add Return on screen...**
- Agent Administration...
- Validate Selected Return...
- Validate All Non-validated Returns...
- Run Matching**
- Run Reconciliation**
- Launch Reports...**
- Queue Management...**
- Change Queue...**
- Move to this queue --> [Dropdown]
- Resolve Matching
- Resolve Reconciliation

This provides a set of functions that can be used to manage/progress the returns. Those with bold text and highlighted borders are available.

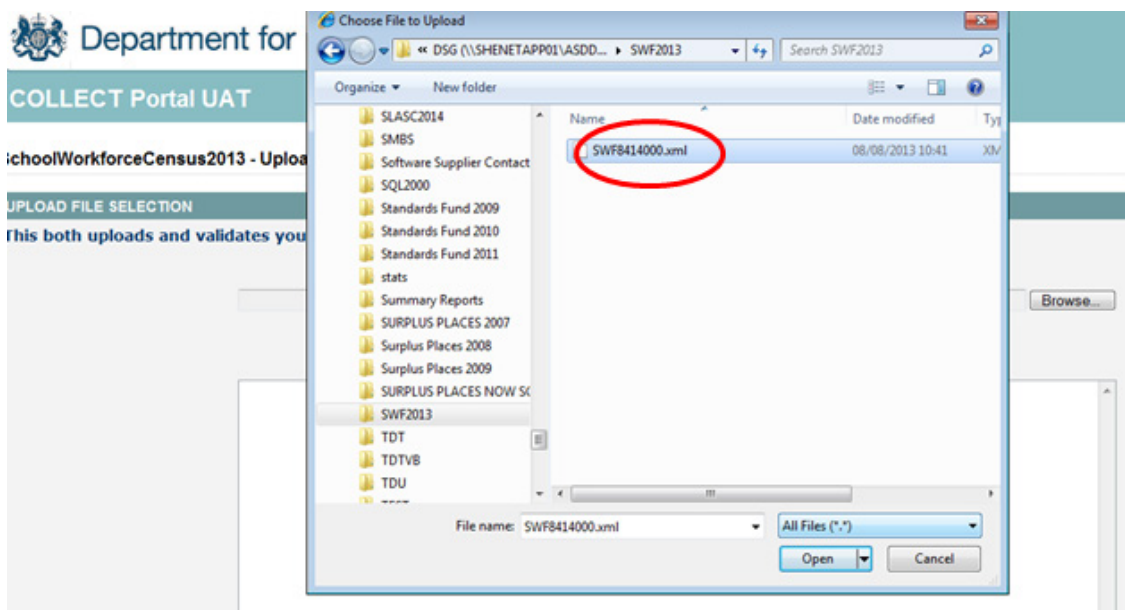

Uploading a Return

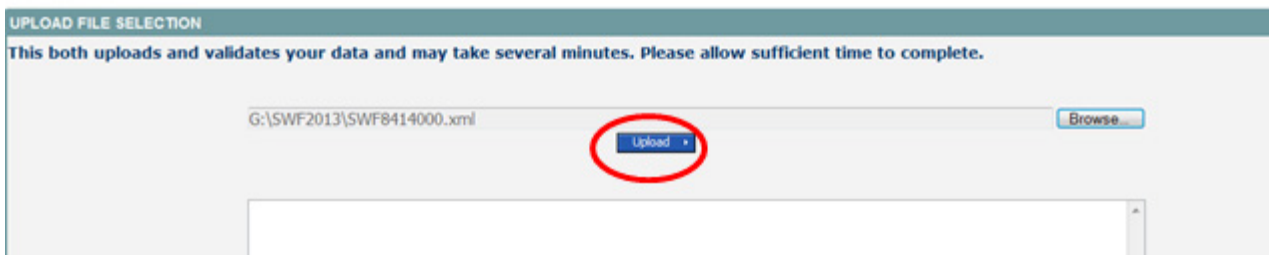

Click on the **Upload return from selected source** button

Use the **browse** button to locate the XML file. Highlight the file name and click on **Open** to select the return.

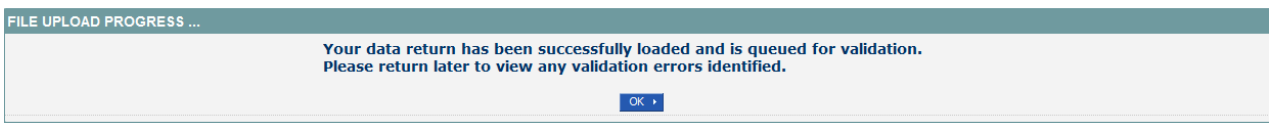

Click on the upload button to load the return

Once the return has been loaded, the following message will be displayed on screen

Source UpLoad In Progress

This indicates that the return has successfully loaded and is now placed in the validation queue to be validated. Press the OK button to return to the Agent main page. During periods of heavy demand, there may be a delay before the return is validated. Whilst the return has a status of "Waiting_for_validation" then the return cannot be viewed or edited. Once the return has been validated, the return status section on the source main page will display "Submitted" and the date. The total number of errors and queries found in the return will also be displayed.

Viewing the Data Return

Opening the Return

Open the return by clicking on the **Open Return** button

Agent Page SchoolWorkforceCensus2013

Screen Functionality

Before viewing the return it is useful to understand some of the basic controls and screen operations.

Screen Navigation

The screenshot shows the 'Source' application interface. At the top, there are buttons for 'Approve', 'All Errors', 'All Notes', 'Add', 'View', 'Edit', 'Delete', and 'Status'. Below these is a navigation pane on the left with a tree view containing items like 'School Workforce Annual Collection', 'Source', 'CBDS Levels', 'School Workforce Modules', 'School Workforce Member', 'Given Name', 'Former Family Name', 'Contract or Service', 'Additional Payment', 'Role', 'Absence', 'Curriculum', 'Qualification', 'Subjects', 'School', 'Vacancy', 'Occasionals', and 'Agency TP Support Count'. The main area displays 'Source - Darlington School of Maths and Science' with a 'Drill Up' button circled in red. Below this is a table with columns: LA (DARLINGTON), Etab (4000), Source Level (School), Software Code (SIMS), and Rule Errors (0). A detailed table follows with columns: Data Item, Value, Errors, Errors Queries, OK, Notes, and History. The detailed table lists items like SOURCE, Source Level, LA, Etab, Software Code, Release, Xversion, Serial No, and DateTime. At the bottom, there are links for 'View CBDS Levels', 'View School Workforce Modules', 'View School Workforce Members', 'View School Details', and 'View LA Details'.

Don't use the browser buttons! When in the data collection, unpredictable behaviour may be experienced if you use the back/forward buttons on your web browser's toolbar

To return to the previous page, press the **'Drill Up'** button.

Mode Buttons

Those buttons determine which operation mode the on-screen data form is in, and which operations are available

Dark Grey text on sunken button with light border = Active Mode
Black Text on button and highlighted border = Available Mode
Light Grey text on button with light border = Unavailable Mode

Filter Bars

Only available on screens that could have a large record set e.g. Workforce Member. Allows criteria to be entered to identify a group of related records or a single record. For example if the user type a name in the 'Family Name' box and selects the 'Go' button then only workforce members with that family name will be displayed in the record list. This enables the user to go to specific records rather than having to page through all the records

FilterTeacher By: Number	Family Name	Gender	Date of Birth	QT Status	Reset	Go
-----------------------------	----------------	--------	------------------	-----------	-------	----

Filter Left Hand Menu

Please avoid using the left hand filter menu (**grey panel on the left hand side of the page**) to navigate through the return as it does not always display sections of the return in the correct format and functions such as Add or Edit are not always available

This displays the 'Records List' section, with all members of staff visible

Record List

Clicking on one of the blue column headers e.g. 'Date of Birth' will order all the records in date of birth. The record list can be sorted ascending or descending by clicking once or twice on the header of any of the columns.

Teacher Number	Name	Gender	Date of Birth	QT Status	Rule Errors
8023415	Regular Teacher,One	Female	1963-06-08	True	0
8035261	Teacher,Three	Male	1973-08-12	True	1
8023416	Teacher,Two	Female	1980-09-25	True	1

The lower part of the screen will show the record details of the record highlighted in the top half of the screen.

Errors

When a return has been uploaded a number of validation checks are run against the data in that return and all errors and queries are highlighted in red against the relevant data item. There are different levels of errors, 'Return Level' and 'Data Item Level'

Total Return Errors

The breakdown of errors for a school return is shown in the Return Status section of the school's main screen

Performance summary					Errors		
Expected	Outstanding	Submitted	Approved	Authorised	E	Q	OK
91	90	1	0	0	0	1	0

Return Level Errors

Return level errors relate to a validation rule that applies to the return as a whole rather than an individual data item within the return, e.g. the school return must contain details on occasional teachers and a return-level error is generated if this information is missing.

Return level errors are displayed and are accessible from the 'Header Information' screen

[View Source Details](#) [View All](#)

Data Item Level Errors and Queries

Data item errors are highlighted against the item to which they relate. **All** data items that are part of a failed validation rule will contain an error marker, not only the item containing the potentially invalid value. E.g. the rule that checks whether a person appears to be aged over 100 years compares the date of birth with the date of the census, so both items would be flagged if that validation failed, even though it is probably only the date of birth that is wrong.

From the Workforce Members screen, select the record, then click **View All** in the 'View Absence Details' row. Errors are displayed against the 'First Day' and 'Last Day' data items in the 'Errors' section of the screen.

Click on the red box in the row for 'Last Day'. An error report will be displayed showing all errors and queries associated with that data item

Providing Clarification/ Supplementary Information

In some instances it may be useful to add explanatory information about a data value, in particular when an item has an associated query against it.

There are several levels where you can add Notes, return level, field level, Error level and in All errors against the query. **All Notes should be in the return level section on the front page of the return to avoid being deleted should you need re upload the return**

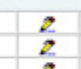

To add a return level note click on the pen icon in the return level notes section

Approving your return

If you do not need to run Matching & Reconciliation for a school (meaning – you are only loading one file to COLLECT) and you have added all notes and corrected any errors on your return please remember to click 'Approve' to send the information to the department. This will then show the date of approval in the corresponding box.

If you have completed all of your returns (M&R is completed for the required schools, notes have been added to all errors/queries) you can use the approve all function.

You will be asked to confirm this function, once confirmed you will see the main screen and a date will be entered in the Approved section.

Reports

A number of reports are available on COLLECT, return to the **Agent page** by selecting **Back to My Collect page** at the top of the page and click on the **Launch Reports** button. A drop down menu will be display and a report can be selected from that drop down list.

The screenshot shows the 'MY SOURCES' interface. At the top, there is a 'Filter By:' section with fields for Name, Native ID, Status, Org Group, and Queue, along with 'Go' and 'Reset' buttons. Below this is a 'Performance summary' table:

Expected	Outstanding	Submitted	Approved	Authorised	Errors		
1	0	1	0	0	E	Q	OK
					1	2	0

Below the table is a 'Sources' table with columns: Source ID, Source Name, Status, SubmittedDate, ApprovedDate, AuthorisedDate, Queue, Errors, Queries, OK Errors. The first row shows: 8414000, Darlington School of Maths and Science, Amended_by_agent, 12/08/2013, and error counts of 1, 2, 0.

At the bottom, there is a toolbar with various buttons. The 'Launch Reports...' button is circled in red. Other buttons include: Open Return..., Approve..., Approve All..., Unapprove..., Reject..., Delete..., Export Selected..., Export Multiple..., Export All..., Upload Return for selected Source..., Upload Multiple Returns (zip file)..., Validate Selected Returns..., Validate All Non-validated Returns..., Agent Administration..., Run Matching, Run Reconciliation, Queue Management, Change Queue..., Move to this queue..., Resolve Matching, and Resolve Reconciliation.

Along the top of the report you will see a toolbar with various functions

Once you have selected your report you will need to select the school you want to run it for and click Launch report. The report will be produced and along the top of the report you will see a toolbar with various functions.

					Role Identifier	Higher Level Teaching Assistant	Educational Psychologist
					Role Identifier	Classroom Teacher	Higher Level Teaching Assistant
				Absence	First Day	2013-06-03	2013-06-05
Regular Teacher, One	08/06/1963	WA145678B	School	SIMS	School Workforce Member	QTS Route	[Blank]
					Absence	First Day	2013-06-03

Produced by COLLECT Report Date 13/08/2013 12:02:32

Clicking the drop-down menu, results in the display of a list-box showing various formats in which you can export the report. Select one of the formats, click the **Export** button and you will then be prompted to 'Open' or 'Save' the output file. Click on the 'Save' button to save the report file

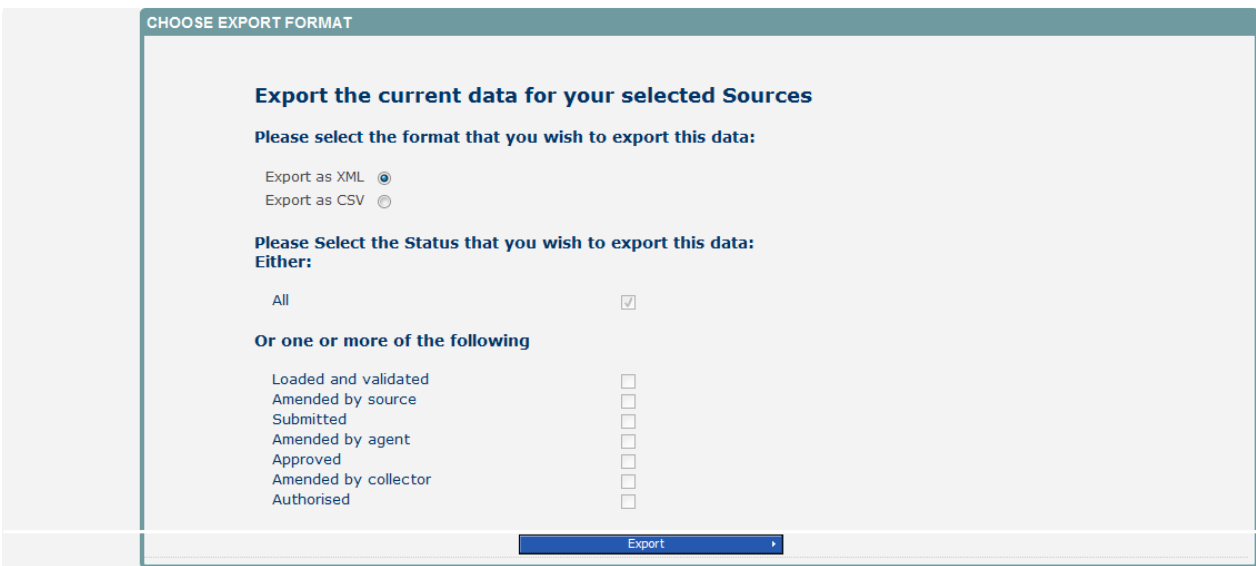

Exporting a return

A return can be exported in xml or csv format by using the **Export selected**

If not already selected, select the **Export as xml** option and then click on the **Export** button. A progress message will be displayed.

SchoolWorkforceCensus2013 Export

Important Note: If the export process fails, with a message stating that Internet Explorer has blocked download of a file, you might succeed if you try again. On the second attempt, hold down the Ctrl key down continuously from before you click on **Export** until after you see the resulting files displayed in Windows Explorer. If this is still not successful, you will have to adjust the security settings on your internet browser.

When complete the result of the export will be displayed and you will be offered the options of saving or opening the export file. Click on the **Open** button

The security settings on your pc may prevent the '**File Download**' appearing If this is the case then go into the '**Tools**' menu option at the top of the screen.

Select '**Internet Options**' from the drop down menu.

Select '**Security**' from the option buttons

Selected '**Trusted Sites**'

Select '**Sites**'

The select '**Add**' and type the following into the text box:

https://collectdata.education.gov.uk

Then select ok and ok.

Alternatively you could try changing you security settings by

Going into the **Tools** menu option at the top of the screen, Select **Internet Options**, Select **Security**, Click on the **custom level** button, then make sure that **automatic prompting for file downloads** is set to **enabled** (it's a third of the way down the list)

Then trying producing the export again and this time the Open/Save/Cancel dialogue box should appear

Export Results Page

The screenshot shows a web application interface with a 'File Download' dialog box overlaid. The dialog box contains the following information:

- Do you want to open or save this file?
- Name: Current-Blade-Export.zip
- Type: WinZip File
- From: collectdataat.education.gov.uk

Buttons: Open, Save, Cancel

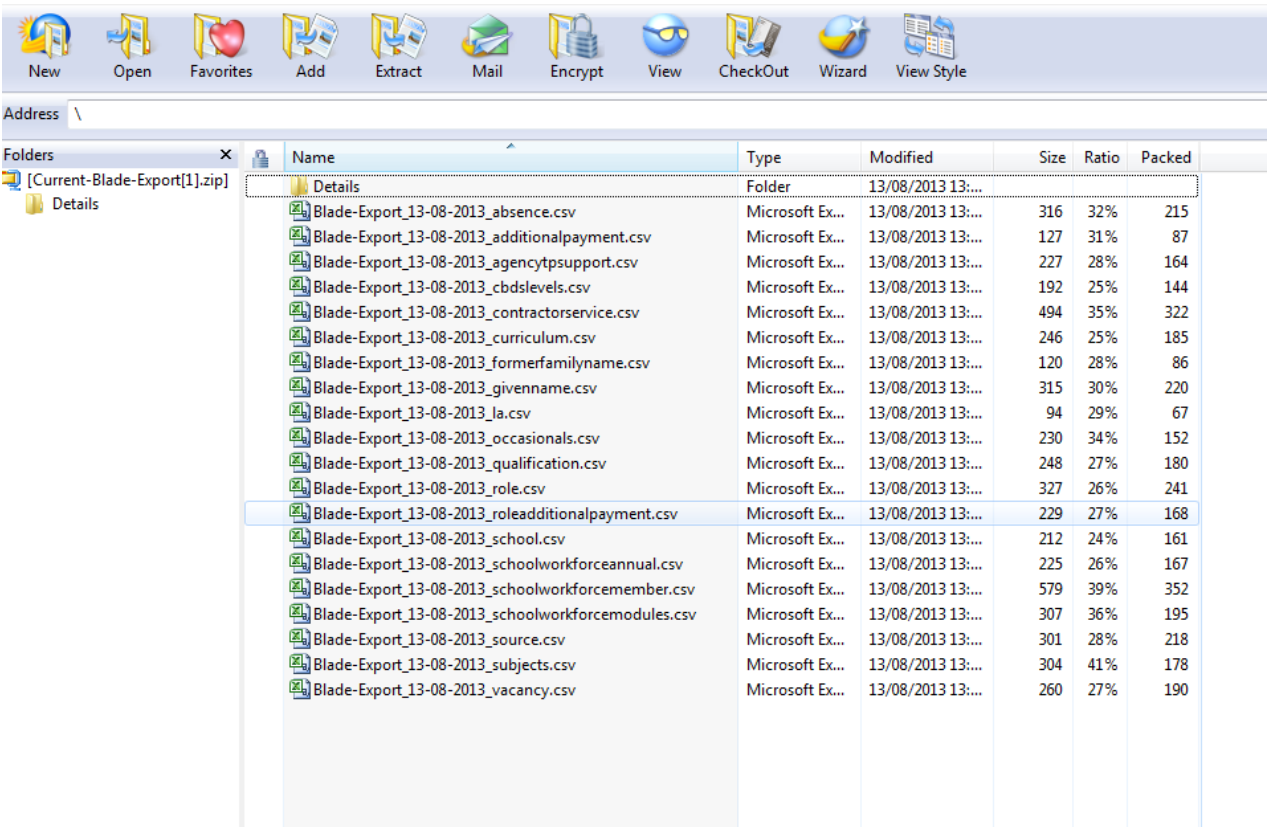

Background text: INFORMATION, Export Finished., EXPORT RESULTS, Results of export, Folder, Organisation Name, /EstabNo=8414000, Darlington School of, Native Id, Result, 8414000, Data Collected, © Crown copyright | Disclaimer | Privacy

Click on the **Open** button to bring up the file details in Windows Explorer

Double click on the folder '**EstabNo=**' to open it; it contains the exported XML file, which you can double click to display the data.

Exports can also be provided in CSV format. Select 'Export as CSV' and when the **Save** and **Open** options appear click on the **Open** button

Matching and Reconciliation

IMPORTANT INFORMATION: You only need to complete matching and reconciliation if you have uploaded data from two separate sources e.g. staff information from the MIS and pay details from your HR system.

There are four stages to this process:

- Run Matching
- Resolve Matching
- Run Reconciliation
- Resolve Reconciliation

This process allows Academies who have more than one return for their schools to merge the data from the multiple returns thereby creating one return only per school. Academies who only have one return per school do not need to run M & R.

IMPORTANT INFORMATION: The guidance below is provided due to issues that arose around M & R in previous collections.

1. After completing Matching and Reconciliation the return should be 're-validated'. Do this by highlighting the return and selecting the 'Validate Selected Return' button from the main agent screen. This will remove all the errors associated with the original partial returns and re-validate the data in the 'Master Collect' return.
2. Issues with data – Some returns had multiple records with very similar or the same data in them. For example curriculum records with the same Year Group and Subject and multiple contract records which had the same role and post and overlapping start and end periods. The M & R process does not handle these as they would seem to be duplication in the original data from the MIS system. If the Academy experience this then they should investigate why these are occurring in the XML file before trying to complete the M & R process. Reason being that they might need to produce new XSLT files from their MIS to eliminate these duplicates and then run M & R against the new files. This was typically occurring on Contract, Curriculum and Absence records
3. Data edited or added or deleted records during the M & R process. Once the process of M & R has been started or is part way through i.e. return has been matched but not yet reconciled then the data in the original returns and the master collect returns should not be edited or records added or deleted as these will corrupt the M & R process. If it is necessary to add, edit or delete data then the user should go back amend the original return data and then re-run M & R on the amended return.
4. Some LAs found it difficult to see which schools were at which stage of the M & R process, particular now that M & R has been decoupled and returns were in queues for the Matching or Reconciliation processing. To help Academies with this a number of new reports have been provided in. These are only relevant for LAs using M & R and we would not recommend that these are run by Academies who do not use M & R. Please see details on M & R reports at the end of this section.
5. Matching functionality will only be available on schools or a central return with more than one return associated with it.

6. Reconciliation' functionality will only be available when more than one return for that school has been uploaded and matching has been successfully completed on that return.
7. Please note when matching, if one return has blanks, or NOBT in a field e.g. QTS Route, Ethnic Code, Disability and the other return has these fields populated then the 'Master Collect' return will be populated with the valid values rather than the nulls or 'NOBT' values.
8. After M & R has been successfully completed there should only be one visible source in COLLECT for that school. This should be 'Collect Master' source. If there is still more than one source then M & R has not yet been fully completed.
9. **WARNING:** If a return has already been reconciled, re-running the matching again will undo any reconciliation action previously taken.
10. There are a number of business rules which are used to determine when two records should be **matched**. Please see Annex A for these rules.
11. There are a number of business rules which are used to determine when two records should be **reconciled**. Please see Annex B for these rules.
12. Whenever contract data is supplied then the post and allowance data should also be supplied alongside the contract data in the same return. If some contract information comes in on one return and post and allowance information comes in on another return then this can result in two contract records being generated even after matching and reconciliation.
13. If data is edited either by the source or the agent after matching but before reconciliation then it is recommended that matching is rerun as new matches may be required. If this is not done then sometimes after running reconciliation the will return will have a status of 'Reconciliation_Failed'. If this happens then re-run matching again, resolve any outstanding matches and then re-run reconciliation.

Matching

Matching is the first part of the M & R process and is concerned with identifying and matching the data at staff member level. Staff members will only be matched using a predefined set of business rules (see Annex A). Using these rules the majority of the staff workforce members will be matched but a few will need to be matched manually if some of the key id fields vary so the system cannot be certain that two or more member records are the same person.

All returns for a school should have a status of submitted or amended by source or agent in order to run Matching.

To run matching, go into the Agent page and select the 'Run Matching' button

Highlight the school and selected the 'Add' button. This will move the school highlighted across to the right hand box. Then select the 'Run Matching' button

Matching

SELECT SOURCES TO MATCH

AVAILABLE SOURCES FOR MATCHING

Available Sources: Darlington School of Maths and Science

Selected Sources:

By selecting this button you will have started the matching process for the return. The user will be returned to the main agent screen and the matching process will be queued. The status of the return will allow you to see the stage the return is at in the process

Status of Return During Matching Process

Return with a status of 'Awaiting_Matching' then the return has been marked ready for matching but is still in a queue waiting for the matching process to start.

Return with a status of 'Matching_in_Progress'. This is when the matching is actually being completed on that return. While the return has this status then a user cannot view or edit that return.

Return with a status of ' Matching_Failed'. This is when the matching process has failed to complete. In these cases then matching will need to be rerun.

Return with a status of 'Amended_By_Agent' then the matching has been completed and is now ready for the user to check whether a records need to be manually matched.

Rules for Matching

Please refer to Annex A for more detail on the rules used for producing the matches. Matching will be performed at Staff Details level i.e. identifying whether the individual staff members are the same individual or could be the same individual. There are two levels of matching, automatic and manual.

Automatic Matches - no manual intervention is required, the record will be marked as a match and resolved
Potential Matches – will need to be manually matched
No Matched identified

Resolve Matching

Once the Matching has been run and the Amended_By_Agent' is shown as the status you will need to resolve any records not Automatically matched. Click on the resolve Matching button to run this

Agent Page SchoolWorkforceCensus2013

Automatic Matches

The example below shows where there are two records one from each return which can be automatically matched as they match on a number of 'key' fields. The given name and NI number are different but teacher number, family name and DOB all match. So this will result in one individual going through to reconciliation rather than two. Please see example below.

Manual Matching

Darlington School of Maths and Science

Select match type: Automatic Matches

Automatic Matches

No of Automati
Matches:

AUTOMATICALLY MATCHED DATA ITEMS

First record in set	No of records in set
8023415: Regular Teacher, One - 08/06/1963	2

Page 1 of 1

MATCHES FOR THIS DATA ITEM

Result	Teacher Number	Family Name	Given Name(s)	Former Family Name(s)	Date of Birth	Gender	NI Number	LA No	Estab No	Software Code	Source Level
Match - 1	8023415	Regular Teacher	One		08/06/1963	Female	WA145678B	841	4000	HR	School
Match - 1	8023415	Regular Teacher	One		08/06/1963	Female	WA145678B	841	4000	SIM5	School

The user does not have to take any action on these matches unless they do not want them to be a match. If user decides that these are in fact not a match then they can change the result from 'Match - 1' to 'No match' by either using the 'Flip all match results' button or change each line by selecting from the 'Result' column, then select the 'Update Matches'. This will result in two workforce members going through to reconciliation rather than one.

AUTOMATICALLY MATCHED DATA ITEMS											
First record in set										No of records in set	
8023415: Regular Teacher, One - 08/06/1963										2	
Page 1 of 1											

MATCHES FOR THIS DATA ITEM											
Result	Teacher Number	Family Name	Given Name(s)	Former Family Name(s)	Date of Birth	Gender	NI Number	LA No	Estab No	Software Code	Source Level
Match - 1	8023415	Regular Teacher	One		08/06/1963	Female	WA1456788	841	4000	HR	School
Match - 1	8023415	Regular Teacher	One		08/06/1963	Female	WA1456788	841	4000	SIMS	School

Manual Matches

If there are records which match on a few of the key ID fields e.g. Teacher Number, family name, DOB, NI Number but not enough of them then they will be identified in the 'Manual Matches – unresolved' as COLLECT does not know whether to treat them as one person or not so the user has to resolve these, please see example below.

If these are the same person then select 'Update Matches' and that will treat them a one individual, if user selects 'Flip all match results' button and set them to no match then that will be treated as two none matching individuals.

Reconciliation

The aim of reconciliation is to allow the system to decide how to process more than one set of data for a school e.g. should the records be merged and which records should be merged and which kept separate. Data reconciliation will be performed automatically using a set of predefined business rules (please see Annex B); however there is also a requirement for manual reconciliation where data differences across records cannot be resolved automatically.

Unlike Matching which is just done at 'Workforce member' level reconciliation is carried out at record level for example all the 'curriculum' records for an individual will be reconciled, 'absences' records for an individual will be reconciled.

To run reconciliation, select the 'Run Reconciliation' button from the Agent screen. Schools will only be included in the picklist of schools to reconcile if they have more than one return and matching has been run and all manual matches have been resolved.

If return has a status of 'Matching_Failed' then again Matching will have to be rerun before reconciliation can be run.

MY SOURCES

Page 1 of 1

Reconciliation (Running)

Once all the manual matches on a return have been resolved then the user can go on and run 'Reconciliation' against that return.

Highlight the School, click add and then select the 'Run Reconciliation'.

Reconciliation

SELECT SOURCES TO RECONCILE

AVAILABLE SOURCES FOR RECONCILIATION

Available Sources	Selected Sources
Darlington School of Maths and Science <input type="button" value="Add"/>	
	<input type="button" value="Remove"/> <input type="button" value="Remove All"/>

This will start the reconciliation process which will now run in the background so a number of schools can be run overnight and will then be ready to work on the next day. Use the status of the return to identify whether reconciliation has been run successfully or not.

Return with a status of 'Awaiting_Reconciliation' is when the return has been placed in the reconciliation queue but reconciliation has not yet been completed.

Return with a status of 'Reconciliation_in_Progress'. This is when the return has reached the top of the reconciliation queue and is currently being reconciled.

Return with a status of 'Reconciliation_Failed'. This shows that there has been an error during the reconciliation process. This can be caused because the return has been editing between matching being completed and reconciliation being run and unresolved matches have been generated. These need to be resolved before reconciliation should be re-run.

Return with a status of 'Amended_By_Agent' then the reconciliation has been completed and is now ready for the user to check whether all records have been automatically reconciled or whether some need to be manually reconciled

While the process of reconciliation is being carried out on the return then the user will not be able to added/edit/delete.

Resolve Reconciliation

Once the reconciliation has been run and the Amended_By_Agent' is shown as the status you will need to resolve any records not Automatically reconciled. Click on the run reconciliation button to run this.

The screenshot shows the 'MY SOURCES' interface. At the top, there is a filter section with fields for Name, Native ID, Status, Org Group, and Queue, along with 'Go' and 'Reset' buttons. Below this is a 'Performance summary' table:

Expected	Outstanding	Submitted	Approved	Authorised	Errors		
					E	Q	OK
1	0	1	0	0	3	2	0

Below the summary is a table of sources:

Source ID	Source Name	Status	SubmittedDate	ApprovedDate	AuthorisedDate	Queue	Errors	Queries	OK Errors
8414000	Darlington School of Maths and Science	Amended_by_agent	13/08/2013				3	2	0

At the bottom of the interface, there are several action buttons. The 'Run Reconciliation' button is circled in red.

Reconciliation Business Rules

To be able to combine multiple records into one record, the SWF Collect system uses defined business rules (please refer to Annex B) to determine when these can be reconciled automatically and when they have to be reconciled manually.

When the return status returns to Amended_By_Agent then the users needs to go in and check the results of the reconciliation. To go in and check the result of the reconciliation select the 'Resolve Reconciliation' button. The following screen will appear and you have the choice of checking the 'Reconciled Records' or the 'Unreconciled Records'.

There is no action required on the 'Reconciled Records' as these are the ones that COLLECT has been able to automatically reconcile. The number in brackets is the number of records which were reconciled.

Manual Reconciliation

Select reconciliation type: Reconciled Records

Select record type: SchoolWorkforceMember (1) Undo Reconciliation

Reconciled SchoolWorkforceMember records No of Reconciled Records: 1

RECONCILED SCHOOLWORKFORCEMEMBER	Software Code	Source Level	TeacherNumber	PersonFamilyName	PersonGender	CurrentPersonBirthDate	Ethnicity	Disability	QTStatus	HLTASStatus	QTStatus
COLLECT System	School	7932786	Brown	PN802417A	Male	09/11/1957	White - British	Yes	False		

Page 1 of 1

Unreconciled Records – These are records than cannot be resolved using the predefined business rules. In these cases the user has to made decisions as to which data should be included in the 'Master' record.

The user should work down the list of record types, reconciling the SchoolWorkforceMembers first, then the 'GivenName' then the ContractorService' and so on.

Select reconciliation type: Unreconciled Records

Select record type: SchoolWorkforceMember (2) No of Unr

Unreconciled SchoolWorkforceMember Record:

SCHOOLWORKFORCEMEMBER DETAILS	Software Code	Source Level	TeacherNumber	PersonFamilyName	PersonGender	CurrentPersonBirthDate	Ethnicity	Disability	QTStatus	HLTASStatus
CSV B	School	999999	Smithy	AB234567D	Not Known	10/01/1960	White - British	Yes	Yes	Tr
CSV B	School	999888	Brown	AD99999D	Male	10/01/1960	White - British	Yes	Yes	Tn

Page 1 of 1

If we look at this example of a workforce member that needs manual reconciling. The bottom half of the screen show that there are two workforcemember records ,which have some of the same information and some different. The different fields are PersonFamilyName and TeacherNumber. By selecting from the drop down options for these fields the user can select the values that will be included in the 'Master Collect' record, then select the 'Update Master' button to save those selections

POSSIBLE SOURCES FOR MASTER RECORD									
Software Code	Source Level	TeacherNumber	PersonFamilyName	NINumber	GenderCurrent	PersonBirthDate	Ethnicity	Disability	QTStatu
CSV B	School	999999	Smithy	AB234567D	Not Known	10/01/1960	White - British	Yes	Yes
csv A	School	1234567	Smith	AB234567D	Not Known	10/01/1960	White - British	Yes	Yes
		999999	Smithy	AB234567D	Not Known	10/01/1960	White - British	Yes	Yes

In the next example, this is where there are two 'Given name' entries for the workforcemember 'Brown'. The middle part of the screen provides details of the workforcemember, the bottom part of the screen show the two 'Given name' records. The user can either save both entries to 'Master Collect' by first selecting the 'Copy to COLLECT Master' button to save one entry then select the 'Update Master' to save the second entry. The result of this is that Brown will have two 'Given name' records in the 'Master Collect' return

If the users only want to have one 'Given Name' entry included in the 'Master Collect' return then select the entry from the 'PersonGivenName' drop down list and the select 'Update Master' button.

In this final example there are two 'Additional Payment' records for Smith with exactly the same data in them from the same return. In this case there are no different values to pick from but the user must decide whether they should be treated as two separate 'Additional Payments' for Smith in which case they must use the 'copy to COLLECT master' and 'Update Master' buttons to take them both into 'Master Collect' return. If they are genuine duplicates and only one 'Additional Payment' is required then just select the 'Update Master' and only one of the 'Additional Payment' will be copied across to the 'Master Collect' return

PARENT MASTER RECORD (CONTRACTORSERVICE) HAS NOT BEEN CREATED				
POSSIBLE SOURCES FOR MASTER RECORD				
	Software Code	Source Level	PaymentType	PaymentAmount
<input type="button" value="Copy to COLLECT Master"/>	csv A	School	Inner London Weighting (Support Staff)	1000.99
<input type="button" value="Copy to COLLECT Master"/>	csv A	School	Inner London Weighting (Support Staff)	1000.99
			Inner London Weighting	1000.99

Rolling back a manual reconciliation

If the user has incorrectly reconciled a record then they can undo the last reconciliation. To do this select 'Reconciled Records' from the drop down list on the 'Manual Reconciliation' screen.

Manual Reconciliation

SWF Training School 1
Select reconciliation type: Reconciled Records
Select record type: GivenName (3)

Reconciled GivenName Records No of Reconciled Records: 3

RECONCILED GIVENNAME RECORDS IN MASTER RETURN		
Software Code	Source Level	PersonGivenName
COLLECT System	School	James
COLLECT System	School	Baby John
COLLECT System	School	Peter

Page 1 of 1

Select the appropriate record type from the 'Select record type' drop down list and highlight the select the relevant record from the list of records which have been reconciled then select the 'Undo Reconciliation' button. The user can then work back unreconciling more records if required.

When all the manual outstanding reconciliations have been resolved by the user then reconciliation has been completed and there should only be one return visible in the COLLECT system for the school, namely 'Master Collect' return. If there are still more than one return then reconciliation has not been completed.

Once you are happy with your data please Remember to Approve the data from your front screen.

M & R Specific Reports

These are all new reports for this year which have been introduced which should help Academies to monitor returns through the M & R process. These reports will be run against the previous day's data rather than the current day's data.

1. **M & R Matching Required** but Not Yet Started report :- This enabled an Academies to list all the schools where M & R is required i.e. they have more than on return but no matching action has been initiated yet.
2. **M & R Reconciliation Required** but Not Yet Started report :- This enabled an Academies to list all the schools where matching has been completed but reconciliation has not yet been initiated.
3. **M & R Matching Started** but Not Yet Completed report :- This enabled an Academies to list all the schools where matching has been started but not completed.
4. **M & R Reconciliation Started** but Not Yet Completed report :- This enabled an Academies to list all the schools where reconciliation has been started but not completed i.e. there are still records which need manually reconciling.

5. **M & R Remaining Visible Source Records after completing M & R report** :- This enabled an Academies to list all the schools where reconciliation has been completed but some original source records are still invisible. If the M & R process has been completed successfully then there should be no original sources records left so these need individual investigation by the Academy. Reasons why this could be occurring are provided earlier on in this guide at the top of the M & R section.
6. **M & R Number of Returns By M & R Status report**:- This provides an Academy with a breakdown of their returns in relation to the Matching and Reconciliation process. The report provides figures for the following:-
 - Total No Data = Number of schools where return status = 'No Data'
 - Total not requiring M & R = Number of schools with only one return associated with it so no M & R is required
 - Total Matching not yet started = Number of schools with more than one return and matching has not been started
 - Total Matching started but not complete = Number of schools with more than one return where Matching has been run but has not yet been completed
 - Total Matching completed but Reconciliation not yet started = Number of schools with more than one return where matching has been completed but reconciliation has not been run (started)
 - Total Reconciliation started but not complete = Number of schools with more than one return where Reconciliation has been run but has not yet been completed
 - Total Reconciliation completed, single source = Number of schools where reconciliation has been completed and they now have once single return.
 - Total Reconciliation completed, multiple sources = Number of schools where reconciliation has been completed but they still have more than one return associated with them.
 - In the case of this last category them please investigated then schools and check M & R Important Information and if none of that explains the reason why there are multiple sources then please contact the helpdesk.

Annex A – Matching Business Rules

Rule No	Description
1.	Matching will be performed at the Staff Details level. Within a data return, data items on the staff details record will be compared against other staff details records within the data return and to matching individual across all the data returns for that source.
2.	Matching will only be carried out on Data Returns with a status of submitted or above in the workflow.
3.	If records are not matched automatically but are identified as potential matches manual matching will be required.
4.	Incorrect automatic matches will be available to be manually marked as not matched and should not subsequently be display unless and amendment is made to the data either online or via a resubmission..

5.	If records cannot be reconciled automatically as the data is found to differ in the data sources manual reconciliation will be required.
6.	A data agent is expected to have completed matching and reconciliation prior to Approving a Data Return.

Staff Module

Ref	Rule	Notes
1	If two records within the returns for that source have the same Teacher Number and NI Number	Records Matched Automatically
2	If two records within the returns for that source have the same Teacher Number, Person Family Name and Date Of Birth where the records have differing NI Numbers.	Records Matched Automatically
3	If two records within the returns for that source have the same NI Number, Person Family Name and Date Of Birth where the records have differing Teacher Numbers	Records Matched Automatically
4	If two records within the returns for that source have the same Teacher Number, Person Family Name where the records have differing Date Of Birth and NI Numbers	Possible Match Resolve manually
5	If two records within the returns for that source have the same Teacher Number, Date Of Birth where the records have differing Person Family Name and NI Numbers	Possible Match Resolve manually
6	If two records within the returns for that source have the same NI Number and Person Family Name but records have differing Date Of Birth and Teacher Numbers.	Possible Match Resolve manually
7	If two records within the returns for that source have the same NI Number and Date Of Birth but the records have differing Person Family Name and Teacher Numbers.	Possible Match Resolve manually
8	If two records have the same NI Number but none of the other identifying fields match.	Possible Match Resolve manually
9	If two records have the same Teacher Number but none of the other identifying fields match.	Possible Match Resolve manually

10	If two records have the same Surname and DOB but records have differing Teacher Numbers and NI Numbers.	Possible Match Resolve manually
11	If two records have a Surname equal to the Former	Possible Match
12	All other records will not be classified as having a match.	No Match

NOTE: Two or more records would be identified as matches using the above rules. The exception to this is where one record has a Contract Type of Contract – where the Contract Type = ‘PRM’, ‘FXT’ or ‘TMP’ – and another record has a Contract Type of Service Agreement – where the Contract Type = ‘SLA’, ‘SAG’ or ‘SOT’. In this case the records will not be matched.

Annex B – Reconciliation Business Rules

Contract / Service Agreement Module
