Notes

The table shows provisional data on the number of eligible girls and the percentage uptake of first and second dose for the Routine Cohort, Cohort 10. These are vaccinations administered up to the end of November 2012 since the beginning of the programme, 1 September 2012. The data are broken down by England, Strategic Health Authority (SHA) and Primary Care Trust (PCT). Medway PCT shows low uptake due to delay in reporting vaccination information. The data will be captured in the next month's figures.

This information is supplied by each PCT and is submitted monthly using the Department of Health's ImmForm website. These data are subject to change; data from the monthly vaccine uptake collections should be considered provisional. The denominators for Cohort 10 are based on school roll data supplied by the Department for Education. Therefore, the vaccine uptake rates should be regarded as indicative. Annual coverage data will be collected in September 2013. It is the annual survey that will provide the formal uptake figures and will be subsequently published as final data.
