

Pertussis vaccination programme for pregnant women 2012-2013

**Provisional national data, as submitted by PCTs for the month ending
31 March 2013**

Pertussis Vaccine Uptake for Pregnant Women 2012/13 Figures for March 2013 (1 March 13 to 31 March 13)						
England Total	Response Summary			Vaccine Uptake (%)		
	No. of PCTs	No. of PCTs making a return	% of PCTs making a return	Number of pregnant women with an estimated date of delivery in the survey month	No. of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax®	Vaccine Uptake (%)
	151	129	85.4	31579	18075	57.2

Provisional: these data should be interpreted with caution

1. These data are based on 85.4% of Trusts responding to the March 2013 survey and have not been extrapolated to cover all PCTs.
2. The national figures are provisional and may vary following further data validation checks.
3. The denominator is determined as the number of pregnant women with an estimated date of delivery in the survey month.
4. The numerator is determined or defined as the number of pregnant women with an estimated date of delivery in the survey month that received a dose of Repevax® past the 28th week of their pregnancy.
5. The data was provided from GP Practices to Primary Care Trusts (PCTs) and include uptake from 1 March 2013 to 31 March 2013 inclusive.
6. This is the sixth data collection for the new programme; there remains wide variation in the reported number of pregnant women between PCTs that suggests variation in collection of relevant data. There are anomalies in the data so the uptake estimate needs to be interpreted with caution.
8. For those PCTs that did not participate in the March 2013 survey, the rows contain no figures.
9. These data have been provided by NHS Trusts under Review of Central Returns (ROCR) licence ROCR/OR/2160/FT6/001MAND.
