

Applications received by the 10 December 2014 from organisations wishing to operate new or extended building regulation competent person self-certification schemes or air tightness testing schemes

Scheme Applicant	New or Extension to scheme	Types of work applied for
Network Veka	Extension	11 - Replacement of doors and windows in existing buildings other than dwellings (not including replacement of load bearing structural glass glazed curtain walling or revolving doors)
CERTASS	Extension	17 - Insertion of insulating material into the cavity walls of an existing building. 20 - Installation of insulating material to the external and internal walls of a building ("hybrid insulation"), not including insulation of demountable-clad buildings, and not including the installation of flexible thermal linings
OFTEC	Extension	3 - Installation of a solid fuel-burning combustion appliance other than a biomass appliance.
NAPIT	Extension	11 - Installation as a replacement of a window, rooflight, roof window or door in an existing building other than a dwelling.
STROMA	Extension	3 - Installation of a solid fuel burning combustion appliance. 13 - Installation of a wholesome cold water supply or a softened wholesome cold water supply. 16 - Installation, as a replacement, of the covering of a pitched or flat roof and work carried out by the registered person as a necessary adjunct to that installation. 20 - Installation of insulating material to the external and internal walls of a building ("hybrid insulation"), not including insulation of demountable-clad buildings, and not including the installation of flexible thermal linings.
Institute of Chimney Sweeps (ICS)	New scheme	Installation of flexible flue liners for solid fuel appliances Installation of Twin-Wall flue systems for solid fuel appliances
Blue Flame Certification	New Scheme	2. Installation of— (a) an oil-fired combustion appliance; or (b) oil storage tanks and the pipes connecting them to combustion appliances. (This paragraph does not apply to the provision of a masonry chimney.) 4. Installation of a heating or hot water system, or its associated controls.

Blue Flame Certification	New Scheme	<p>5. Installation of a mechanical ventilation or air conditioning system or associated controls, which does not involve work on a system shared with parts of the building occupied separately, in a building other than a dwelling</p> <p>6. Installation of an air conditioning or ventilation system in a dwelling, which does not involve work on systems shared with other dwellings</p> <p>7. Installation of an energy efficient lighting system or electric heating system, or associated electrical controls, in buildings other than dwellings.</p> <p>8. Installation of fixed low or extra-low voltage electrical installations in dwellings.</p> <p>9. Installation of fixed low or extra-low voltage electrical installations in dwellings as a necessary adjunct to or arising out of other work being carried out by the registered person.</p> <p>10. Installation, as a replacement, of a window, rooflight, roof window or door in an existing dwelling.</p> <p>11. Installation, as a replacement, of a window, rooflight, roof window or door in an existing building other than a dwelling. This paragraph does not apply to glass which is load bearing or structural or which forms part of glazed curtain walling or a revolving door.</p> <p>15. Installation in a building of a system to produce electricity, heat or cooling— (a) by microgeneration, or (b) from renewable sources (as defined in European Parliament and Council Directive 2009/28/EC of 23 April 2009 on the promotion of the use of energy from renewable sources)</p> <p>17. Insertion of insulating material into the cavity walls of an existing building.</p> <p>18. Installation of insulating material to the internal walls of a building, not including the installation of flexible thermal linings.</p> <p>19. Installation of insulating material to the external walls of a building, not including insulation of demountable-clad buildings.</p> <p>20. Installation of insulating material to the external and internal walls of a building (“hybrid insulation”), not including insulation of demountable-clad buildings, and not including the installation of flexible thermal linings</p>
