

FOI Release
Information released under the Freedom of Information Act

Title: Registered value of IP

Date of release: 3 December 2013

Information request:

I wonder if you could please let me know the total registered value of IP in the UK and the percentage which is thought to be unregistered – I have a huge variant of figures – ranging from £5.2bn to £54bn.

Information released:

The only information we currently hold on this subject are two reports referred to in a press release of July 2011 [now archived by The National Archives]. The reports were commissioned by the IPO and are based on research undertaken by academics from Imperial College and the European University Institute. The reports themselves are also published on our website.
