Subject: Pub cos

Dear Mr cable. I am sending this email to find out about your campaign to help people like my and I who run a punch tavern pub on the tied to beer and bottles. I have read with much interest over recent months about your campaign to free us from this. Will it ever happen. It would keep our pub open and we would be able to compete with the managed houses who sell their beer for a lot less than us. A lot of them being punch tavern owned. Could you please inform me what is happening. Kindest regard. It certainly is giving us hope. The pubcos would save thousands of pounds by not using independent bottle companies. Now the latest thing is. They walk in your pub at any time and check your fridges to see if you are selling anything not purchased from them. My refused them entry behind our bar on Saturday as I was serving customers. They could have come at ten forty. Five before we opened. I was informed that we will be getting a solicitor's letter from punch. We have both worked very hard to keep this local open but feel it may be time to sell our lease if nothing comes of this free of tie and the snooping and harassment. Sorry to go on.
