

Highways Agency Specification 2013-14 – Scoping Document

Field	Notes
Short Title	Measures to Reduce Numbers of KSI on Network.
Performance Specification Reference	Output 6 – PS 4.9b Part 2
Requirement / Output Details	They should also work with others to introduce and/or continue with measures which reduce the numbers killed or seriously injured using and working on the SRN.
Scope	Working in partnership with operational stakeholders, for example, LHAs, Sustrans to ensure that vulnerable road user groups are considered in scheme designs and working closely with safety partnerships and other safety organisations (e.g. CFOA, RSGB, ROSPA, PACTS, RoadSafe) to support local road safety initiatives. Continue to work with industry to support aiming for zero road worker initiative.
Rationale	By continuing to target road safety information through organisations and the public we will reduce the number of incidents on the network.
Proposed Deliverables (with Associated Completion Dates)	Annual Report to report on progress against 40% target and trajectory, flagging up actions for DfT.
