[UK Armed Forces Redundancy Programme
Statistics](#) This publications contains information
on the number of UK Armed Forces personnel
either applying or being selected for
redundancy in the various tranches. Please
note that not all of those who applied were
selected and not all of those that were selected
had applied for redundancy.

[Royal Navy Quarterly Pocket Brief](#) This
quarterly publication contains information on
strengths, requirements, intakes and outflows
from the Royal Navy service

All data within this report are derived from the Defence Statistics ARES2 Manpower Database. The date of this report represents data as at the last day of the preceding month, for example the Feb 2014 report represents data as at the 1st of February 2014. The strengths data represents the position at the first day of the month whereas the flows data shows movement during the previous calendar month. The strength does not include personnel who are Absent without Leave (AWOL) or Long Term Absentees (LTA).

All totals are rounded in accordance with the Defence Statistics rounding policy; therefore totals may not equal the sum of their parts. All numbers over 100 are rounded to the nearest 10 with numbers ending in 5 rounded to the nearest multiple of 20 to avoid bias. Numbers under 100 are rounded to the nearest 5, with numbers that would be rounded to '0' represented by '~'.

From June 2011, liability split by Branch & Specialisation is taken from the relevant Planning Liability; this is currently PL 1-14, scaled to DP. Monthly liability figures are calculated using a straight interpolation between the relevant PL April points, currently April 2013 and April 2014.

Information about some of the tables used in this report

The Royal Marine Aircrew-men are included with XAV; Royal Marine Medical Assistants are included with Medical. Where an RM/RN total split is given they are included with the RM. Royal Marine Officers include Royal Marine pilots.

Ratings and Officers whose specialisation has not yet been assigned are covered by 'No Spec' for Officers and 'No Trade' for the Ratings. FTRS are only included in Table 1, unless otherwise stated. Transfer trainees have been removed the Trained Strength Tables. Previously published graphs linked to future exits have been removed in line with the Data Protection Act 1988.

Voluntary Outflow (VO)

VO exit rates are calculated using the 12 months total exits divided by the average strength which is calculated using a 13 month centred rolling average.

Headline Figures for this months publication

Strengths

The trained regular strength of the RN/RM including FTRS Regulars was equal to the previous month at 30,510, giving a surplus of 0.6% against the liability as shown in Table 1a. The trained regular strength excluding FTRS regulars was 30,310, a decrease of 10 from the previous month, also shown in Table 1a.

Outflows

The total outflow from the trained regular strength was 3,220 in the 12 months to 1st April 2014, made up of 2,760 Ratings and 460 Officers as shown in Tables 9a and 9b.

Revisions

Defence Statistics has undertaken a major review of all Armed Forces personnel data from the Joint Personnel Administration System (JPA). This has resulted in changes to the strengths, intake and outflow reported in this publication, the following periods are affected; **Flows** – from period ending 31 March 2009 to the period ending 31 October 2011. Changes to monthly outflow figures range from fewer than 10 to around 50. **Strengths** – from 1 May 2009 to 1 November 2011 (inclusive). Changes of around 20 per month have been made to the headline strengths. The revised data are considered finalised and are therefore no longer marked provisional. Data for 1 November 2011 and subsequent dates are considered final.

1. The original release of this publication reported outflow figures incorrectly. Tables 9a and 9b did not count redundancies in the total outflow for financial year 2011/2012. Table 10b reported figures in the wrong financial year, affecting financial years 2010/2011, 2011/2012 and 2012/2013. This has since been corrected.

Apr-14 Edition.

From Jan 10 and elsewhere in this document, Liability split by Officer/Rating, Branch & Spec is taken from the relevant Planning Liability (currently PL 1-14) scaled to DP. Monthly liability figures are calculated using a straight line interpolation between the relevant PL April points (currently April 13 and April 14).

*From Jun 09 in this table only, the FTRS Strength has been split into those that are counted against the Regular Liability (FTRS "Regulars"), and those that are not (FTRS "Non-Regulars").
