1. Introduction

Introduction

- 1.1. The Department of Health Manual for Accounts (MFA) sets the accounting policies to be followed by members of the Department's Consolidation Group and provides principles-based guidance to NHS bodies on how to prepare and complete their annual report and accounts (but see paragraph 1.3 below re: Monitor).
- 1.2. The Group is defined in law by Designation Orders ([SI 2013 No.488, The Government Resources and Accounts Act 2000 \(Estimates and Accounts\) Order 2013](#)) made under the [Government Resources and Accounts Act 2000](#) (GRAA). The GRAA requires Group bodies to:
- prepare such financial information in relation to the year as HM Treasury may request
 - present the information in such form as HM Treasury may direct
 - arrange for the information to be audited, and
 - deliver the information to HM Treasury, in such manner and by such date in the next year as HM Treasury may direct.
- 1.3. This Manual is not directly applicable to NHS Foundation Trusts. These bodies will follow guidance issued by Monitor. Monitor prepares a sector-specific consolidated account that represents a sub-consolidation from the Group viewpoint. It follows that the sub-consolidation and Group returns must be prepared in accordance with accounting policies set out in this Manual.
- 1.4. NHS England will issue Accounts Directions to Clinical Commissioning Groups (CCGs). The Directions require compliance with the MFA: the Manual is therefore directly applicable to CCGs, as it is to NHS England.
- ~~1.4.~~1.5. [The Group-level guidance in the core manual is in some respects inadequate to meet the full reporting needs of NHS Trusts and CCGs. Additional appendices will supplement core guidance in the relevant chapters: these will form an integral part of the Manual, but will be organised so as to assist in locating entity-type specific guidance. An example of this will be the CCG corporate governance reporting requirements: these are unique to CCGs and so will be presented in an appendix to Chapter 2.](#)
- ~~1.5.~~1.6. [Annex 1](#) below summarises the current statutory requirements on Accounts Directions and guidance for the various NHS organisations.

The FReM

~~4.6.1.7.~~ This MFA has been drafted to meet the [Government Financial Reporting Manual 2014 to 2015](#) requirements. The FReM is the technical accounting guide for the preparation of Departmental Accounts. The FReM follows International Financial Reporting Standards (IFRS) and Companies Act requirements, but in several important areas interprets and adapts Standards to better meet Government's reporting requirements. The FReM also details additional disclosures for the public sector. The MFA provides guidance that specifically addresses the NHS' requirements, but readers must refer to both documents.

~~4.7.1.8.~~ While not directly applicable to NHS Trusts and NHS Foundation Trusts, the FReM makes reference to this MFA and to the Foundation Trust ARM as the source of detailed guidance for these bodies. CCGs, as vote-funded bodies, are required to follow the FReM.

~~4.8.~~ The MFA follows the FReM: ~~there are no significant except for a small number of divergences that have been formally agreed between the Department and Treasury. Divergences for 2013-14 relate to accounting for the transfer of assets and liabilities in 2014-15 under transition at 1 April 2013 (see paragraph 3.16).~~

1.9. Treasury is required to consult an independent body, the Financial Reporting Advisory Board (FRAB), when preparing the FReM. The MFA and FT ARM are also reviewed by the FRAB.

The Manual for Accounts: structure and relationship to other guidance.

1.10. The MFA is not an accounting textbook and does not repeat IFRS requirements where these can be applied without specific interpretation for the NHS. The MFA assumes that the user will be conversant with current accounting standards. The manual:

- Forms part of Accounts Directions issued to reporting bodies by the Secretary of State, and NHS England in the case of CCGs.
- Mandates particular accounting treatments where Standards permit a choice, to ensure consistency within the sector
- Draws attention to interpretations and adaptations of Standards set out in Treasury's Financial Reporting Manual (FReM), usually repeating the required departures from Standards
- Highlights further NHS-specific departures from the FReM, as agreed with Treasury
- Specifies contents and layout of Accounts and Annual Report scope and contents, to ensure that these documents meet Treasury expectations and provide consistent data for national summaries and consolidations

- Provides detailed accounting guidance in complex and technical areas (e.g. PFI and group reconstruction) where IFRS requirements are difficult to apply in the NHS context.

1.11. This Manual will be supplemented, as necessary, by numbered updates over the course of the year. Updates will be posted to the finance manual 'finman' website at www.info.doh.gov.uk/doh/finman.nsf. Any updates issued in this way should be treated as having the same status as guidance issued in this Manual. Users should check the 'finman' site regularly for new guidance under '[What's New](#)' and '[Frequently Asked Questions](#)'.

Changes to earlier versions

~~1.12. For 2013-14, the manual has been extensively revised to define Group accounting policies and applications in its core chapters.~~

~~1.13. Detailed guidance in the following areas has been removed and will be made available either on the “finman” website or by Monitor and NHS England to their sub-consolidation group bodies:~~

- ~~● **Detailed model accounts format:** A generic reporting format based on the Arms’ Length Bodies (ALB) consolidation schedules content is provided in the Manual. NHS trust specific accounts pro-formas (linked to the “FMA” consolidation forms will be issued in 2014 when the year-end FMA formats are complete~~
- ~~● **Detailed accounts completion guidance:** Guidance that assists in completing both the FMA and accounts documents has been removed from the manual and can be found with Quarterly FMA completion guidance on the finman website~~
- ~~● **Agreement of balances (AoB) guidance:** Detailed guidance will be posted on the DH website as required: the guidance will have the same status as that in this Manual. Guidance will be common to each type of entity within the consolidation group and will be agreed with Monitor and NHS England~~
- ~~● **Losses and special payments guidance:** This is drawn from Treasury’s *Managing Public Money* (updated in July 2013) and will be placed with Agreement of Balances and other detailed completion guidance on the website.~~

~~1.14.1.12.~~ The following items will be available on the ‘finman’ website (or Treasury website in the case of Treasury guidance). These do not form part of the Manual for Accounts, but form part of a wider body of guidance, as represented by the “finman” website:

- Quarterly monitoring guidance: produced for [the FMA forms quarterly monitoring returns](#), this guidance is specifically intended to facilitate completion of the quarterly returns. This guidance will draw on MFA guidance and the two sets of guidance will be consistent with each other. The MFA is intended to set accounting policy, whereas quarterly guidance provides the means of ensuring (a) internal consistency of reporting, and (b) consistency across the NHS, such that figures can be reliably consolidated at the national level
- For 2014-15 detailed accounts completion guidance for [NHS Trust types of entity including ALBs](#) is also provided alongside the quarterly monitoring (~~FMA~~) guidance
- [Treasury valuation guidance](#)
- [Treasury public sector spending and reporting](#)

Accounts submission and audit

NHS Group bodies/trusts

~~4.15.1.13.~~ A detailed accounts submission process, showing deadlines and procedures for handling statutory accounts and summarisation schedules, will be ~~posted to the 'finman' website provided by the responsible authorities (DH, Monitor or NHS England)~~ later in the year. ~~The Department require copies of NHS trust FMA forms and their local audited accounts as the Department itself consolidates the NHS trust financial data.~~

NHS FTs and CCGs

~~4.16.——~~ Monitor and NHS England will issue the relevant guidance to these bodies, setting timescales and procedures that permit the sub-consolidations to be carried out in time to meet the national consolidation timetable.

Chapter 1 Annex 1 – Accounts Directions

NATIONAL HEALTH SERVICE ACT 2006

~~DIRECTIONS BY THE SECRETARY OF STATE IN RESPECT OF NATIONAL HEALTH SERVICE TRUSTS' ACCOUNTS~~

Comment [SW1]: Move to Trust Annex

~~The Secretary of State for Health, with the approval of the Treasury, in exercise of powers conferred on him by section 232 (schedule 15,3(1)) of the National Health Service Act 2006 and of all other powers enabling him in that behalf, hereby gives the following Directions:~~

~~Application and interpretation~~

~~1. (1) These Directions apply to NHS trusts in England.~~

~~(2) In these Directions:~~

~~"The Accounts" means the accounts of a National Health Service trust for the financial year;~~

~~"the financial year" means the period from 1st April in any one calendar year to 31st March in the next calendar year;~~

~~"the trust" means the National Health Service trust in question.~~

~~Form of Accounts~~

~~2. (1) The Accounts submitted under section 232 schedule 15 of the 2006 Act shall show, and give a true and fair view of the trust's gains and losses, cash flows and financial state at the end of the financial year.~~

~~(2) The Accounts shall meet the accounting requirements of the NHS trusts Manual for Accounts in force for the relevant financial year, which shall be agreed with the Treasury.~~

~~Statement of directors' responsibilities~~

~~3. The statement of directors' responsibilities in respect of the Accounts shall be signed and dated by the Chief Executive and Finance Director of the trust.~~

~~Signed by the authority of the Secretary of State for Health~~

~~Member of the Senior Civil Service, Department of Health~~

Chapter 1 Annex 1 (cont) - Accounts Directions (structure)

Entity	Accounts Direction Determination by:	Accounts Direction Approved by:
NHS England (own accounts and consolidation of CCG accounts)	Department of Health (Secretary of State)	Treasury
Monitor (own accounts and consolidation of FT accounts)	Department of Health (Secretary of State)	Treasury
NHS Trusts	Department of Health (Secretary of State)	Treasury
NHS Foundation Trusts	Monitor	Department of Health (Secretary of State)
CCGs	NHS England	Department of Health (Secretary of State)
ALBs	Department of Health (Secretary of State)	Treasury

NHS Trust accounts: [National Health Service Act 2006 c. 41 Schedule 15: Preparation of annual accounts](#)

FT accounts: paragraph 24 of Schedule 7 to the National Health Service Act 2006 amended: [Health and Social Care Act 2012 c. 7 part 4: Governance and management Section 154](#)

Consolidated FT accounts (s.17) and Monitor's own accounts (s.18): [Health and Social Care Act 2012 c. 7 Schedule 8: Accounts of NHS foundation trusts](#)

NHS England: [Health and Social Care Act 2012 c. 7 Schedule 1 s.16: Annual Accounts](#)

CCG accounts: [Health and Social Care Act 2012 c. 7 Schedule 2 s.17](#)

2. Annual Report and Accounts

Introduction

2.1. NHS bodies are required to publish, as a single document, an annual report and accounts (ARA). This document includes:

- The annual report comprising the:
 - strategic report (replaces the business review),
 - directors' report,
 - remuneration report
- A statement of the Accountable Officer's responsibilities
- A Governance Statement
- The primary financial statements and notes to the accounts.
- The audit opinion and report.

Accounting Officer's signature

2.2. The Accounting Officer (or Accountable Officer for individual NHS bodies) shall sign and date the Annual Report, the Remuneration Report, the Governance Statement and the Statement of Financial Position. For the purposes of publication, the Accounting Officer/Chief Executive's signature on the Annual Report will also satisfy the requirement to sign the Remuneration Report, which is an integral part of the Annual Report.

Separate strategic report and supplementary material

2.3. Summary Financial Statements (SFS) are no longer referred to in the Companies Act.

Once the full annual report and accounts have been laid before Parliament (where bodies report directly to Parliament), NHS bodies have discretion as to whether they wish to publish the full document locally or a separate strategic report together with supplementary material.

2.4. The strategic report and supplementary material must be made available to the public free of charge, although a reasonable copying charge may be levied for copies of the full audited accounts where the decision has been made to publish the strategic report and supplementary material. The supplementary material must, as a minimum in accordance with s426A of the Companies Act 2006:

2.5. Contain a statement that the strategic report is only part of the entities' annual report and accounts;

- state how a person can obtain a copy of the full annual report and accounts;

- state whether the auditor's report on the full annual report and accounts was unqualified or qualified and, if qualified, set out the auditor's report in full together with any further material needed to understand the qualification;
- state whether, in that auditor's report, the auditor's statement as to whether the strategic report and directors' report was consistent with the accounts was unqualified or qualified and, if it was qualified, set out the qualified statement in full together with any further material needed to understand the qualification; and
- contain a copy of that part of the directors' remuneration report which sets out the single total figure table in respect of the entity directors' remuneration (see below).

2.6. The strategic report and supplementary material must also contain the Annual Governance Statement.

2.7. The strategic report and supplementary material must not be published before the full annual report and accounts have been laid before Parliament (where entities report directly to Parliament).

Annual Report

2.8. This guidance sets out the minimum content of the annual report. Beyond this however, the entity must take ownership of the annual report and ensure that additional information is included where necessary to reflect the position of the NHS body within the community and give sufficient information to meet the requirements of public accountability.

2.9. The auditors must be given a copy of the annual report and, where applicable, summary financial statements, in sufficient time to carry out the required work before the completion of the auditor's opinion. Certain information contained in the remuneration report is subject to audit and will be referred to in the audit opinion and the remuneration report must be available at the start of the audit. Other quantitative aspects of the annual report are reviewed by auditors to ensure consistency with the annual accounts.

2.10. Where NHS bodies are dissolved mid-year (with functions transferring to any other public sector entity), the application of absorption accounting (see Chapter 4) is consistent with the principle that an ARA is required in respect of any part-year period in which the entity existed. A closing body will have to prepare an ARA as the successor body will only bring its own transactions in the year to account from the date of transfer of functions. The authorisation of a NHS Trust as a Foundation Trust during a reporting year similarly requires the preparation of a part-year ARA.

2.11. The Annual Report consists of:

- A Strategic Report following the requirements of s414C in [Chapter 4A of the Companies Act 2006](#); and

- A Directors' Report, based on the requirements of [Chapter 5 of Part 15 of the Companies Act 2006](#), and Schedule 7 of SI 2008 no 410;
- A Remuneration Report based on [Chapter 6 of Part 15 of the Companies Act 2006](#) and Schedule 8 of SI 2008 no 410. (Chapter 9 of Part 15 does not apply)

The *directors' report* and the *strategic' report* together form the *management commentary*. The above legislation is interpreted for the public sector as below.

Strategic Report

- 2.12. The Companies Act 2006 (Strategic Report and Directors' Report) Regulations 2013 are applicable for periods ending on or after 30 September 2013, and Treasury has included the requirement for a Strategic Report in the 2013-14 FReM. Public entities should comply with the Act as adapted: i.e. they should treat themselves as if they were quoted companies.
- 2.13. The report should be free-standing, having similar status and signing requirements to the directors' report. Where relevant matters have been discussed in other documents, it may be sufficient to include a cross-reference to those other documents. s414C gives a detailed listing of the contents of the report. Sub-sections 414A(5) and (6) do not apply.
- 2.14. Reporting entities must not adopt a "tick-box" approach to the preparation of the report. The essential characteristics of the report have been outlined by the [Financial Reporting Council](#) as follows:
- fair, balanced and understandable
 - concise
 - forward-looking
 - entity-specific
 - closely linked to related information in the ARA (in many cases, the report will point to eg performance data rather than duplicating it)
 - material – includes only information that is relevant to users unless a statutory or FReM requirement

Strategic Report issues

- 2.15. The report should include information on:
- **Environmental matters:** NHS bodies are required to produce a [sustainability report](#) as part of the strategic report. Compliance with Treasury guidance in this

area (see below) is deemed sufficient to fulfil the environmental reporting requirements of s414C(7)(b)(i).

- **The entity's employees:** including an account of the entity's equal opportunities policy. Also required is an analysis of the gender distribution in the categories:
 - directors
 - other senior managers
 - employees
- **Social, community and human rights issues** should be discussed to the extent necessary for the understanding of the business.
- **Business information:** sufficient information to give the reader an understanding of the entity's history, development and performance, noting the main trends and factors likely to affect future development, performance and position. Requirements here will differ greatly according to the type of entity. It will be necessary to refer to the main sources of financing (grant-funding, allocations, earned income, PFI, DH loans or PDC etc).
- **Performance against key performance indicators:** in many cases key indicators will appear in the financial statements and so need not be duplicated here. Entities will however need to make reference to them, and provide more detailed explanations where significant over- or under achievement is indicated. Additionally, those indicators routinely used by senior management in managing the business (be they financial or other measures) will probably feature here.
- **Statutory basis:** Entities should refer to the legislation under which they were set up, and refer to the accounts direction under which they are reporting.
- **Further explanation:** of items in the financial statements considered to have a strategic significance. This will include an explanation of the adoption of the "going concern" basis where otherwise this might be called into doubt (FRoM 5.2.8(i) refers)

2.16. Items that would normally be dealt with in the directors' report may be moved to the strategic report where these are considered to be of strategic significance.

2.17. The strategic report is approved by the Board and signed and dated by the Accounting Officer.

Sustainability Report

2.18. NHS bodies are required to produce a Sustainability Report (SR) as part of their Annual Report: this element of the Annual Report is not subject to audit. The Sustainability Development Unit (SDU) at the Department has developed a standard reporting format for NHS bodies, and this should form the basis of the report. Further guidance and support is available from the SDU at <http://www.sdu.nhs.uk/corporate-requirements/governance/reporting.aspx>. NHS bodies may also wish to refer to general

HM Treasury guidance for the preparation of SRs at:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/279330/P_U1632_Sustainability_Reporting_Guidance.pdf

Directors' Report

- 2.19. The content of the directors' report is based on the disclosure requirements of [s416 and s418 of the Companies Act 2006](#) and [Schedule 7 of The Large and Medium-sized Companies and Groups \(Accounts and Reports\) Regulations 2008 \(SI 2008 No 410\)](#). In addition, NHS bodies are required, in accordance with the FReM, to include commentaries on the subjects below.
- 2.20. It is not necessary to report on Greenhouse Gas emissions under Schedule 7 of SI 2008 No 410. The production of a sustainability report, as outlined above, is considered to meet the legislative reporting requirements (FReM 5.2.16) refers.

Details of the directors

- 2.21. The report will provide:
- the names of the Chair and Chief Executive, and
 - the composition of the management board (including advisory and non-executive members) having authority or responsibility for directing or controlling the major activities of the entity during the year
 - (recommended) the names of the directors forming an audit committee or committees

Statement as to disclosure to auditors

- 2.22. The directors' report must contain a statement to the effect that, in the case of each of the persons who are directors at the time the report is approved:
- so far as the director is aware, there is no relevant audit information of which the company's auditor is unaware, and .
 - he/she has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditor is aware of that information. .
- 2.23. "Relevant audit information" means information needed by the company's auditor in connection with preparing his report.
- 2.24. [Companies Act 2006 s418](#) refers (note: s418 (5) and (6) are not applicable).

Additional disclosures

Pension Liabilities

- 2.25. An indication of how pension liabilities are treated in the accounts and a reference to the statements of the relevant pension scheme. A cross-reference to the accounting policy note in the accounts and the remuneration report will normally be sufficient.

Directors' interests

- 2.26. Details of company directorships or other significant interests held by directors where those companies are likely to do business, or are possibly seeking to do business with the NHS where this may conflict with their managerial responsibilities. Where a Register of Interests that is open to the public is maintained, the disclosure may be limited to a note that says how the Register can be accessed.

External auditor's remuneration

- 2.27. Information about the remuneration paid to auditors in respect of any non-audit work undertaken by them. Disclosure is required by Regulations made under s494 of the Companies Act 2006.

Sickness absence data

- 2.28. Detailed guidance on the source and content of this data is provided outside this Manual. Generally, the disclosure will appear in the audited financial statements, so a cross-reference here may suffice.

Cost allocation and charges for information

- 2.29. A statement that the entity has complied with HM Treasury's guidance on setting charges for information is required. This guidance is available in Chapter 6 of HM Treasury's [Managing Public Money](#).

Disclosure of "serious untoward incidents"

- 2.30. Details of incidents involving data loss or confidentiality breaches.

Employee consultation

- 2.31. The action taken to maintain or develop the provision of information to, and consultation with, employees.

Equality disclosures

- 2.32. The policy in relation to disabled employees and equal opportunities should be recorded. If an equality report is produced, this should be included here (or referenced here, if available elsewhere). Equality Act 2010 guidance is available at <https://www.gov.uk/government/publications/equality-act-guidance>

Health and safety

- 2.33. Information on health and safety performance.

Fraud

- 2.34. Information on policies and procedures relating to countering fraud and corruption

Better Payments Practice Code

- 2.35. Information as follows:
- A narrative summary of the Confederation of British Industry (CBI) Better Payments Practice code
 - Quantitative evidence of compliance with that code. Evidence can be provided as follows:
 - Where the annual report incorporates the full annual accounts, the annual report must, as a minimum, state "details of compliance with the code are given in note x to the accounts".

Prompt Payments Code

- 2.36. Disclose whether or not the body has signed up to the Code.

Emergency Preparedness

- 2.37. NHS organisations should ensure that they have in place a Major Incident Plan that is fully compliant with the requirements of the NHS Emergency Planning Guidance 2005 and all associated guidance.

Principles for Remedy

- 2.38. HM Treasury's [Managing Public Money](#) contains guidance at Annex 4.14 about the steps public bodies should take where they have caused injustice or hardship by maladministration or service failure. The Parliamentary and Health Service Ombudsman published a revised [Principles for Remedy](#) in May 2010, setting out six principles that represent best practice and are directly applicable to NHS procedures.
- 2.39. NHS bodies are required to include a reference in their Annual Reports to *Principles for Remedy* and state to what extent such principles have been adopted by the body and form part of its complaints handling procedure.

Exit packages and severance payments

- 2.40. The exit packages disclosure may be included in NHS bodies' annual reports, but also forms part of the auditable notes to the accounts. The figures to be disclosed here relate to exit packages agreed in the year. The actual date of departure might be in a subsequent period, and the expense in relation to the departure costs may have been accrued in a previous period. The data here is therefore presented on a different basis to other staff cost and expenditure notes in the accounts.

- 2.41. HM Treasury has issued specific guidance on severance payments (i.e. covering any payments that are not made under either legal or contractual obligation): this is now included in HM Treasury's [Managing Public Money](#). Special severance payments when staff leave a public sector employer should only rarely be considered. They will always require HM Treasury approval because they are usually novel, contentious and potentially repercussive: NHS bodies have no delegated authority to make such payments unless so approved.
- 2.42. For 2013-14 and beyond, additional disclosures are required in respect of non-compulsory departures agreed in the reporting period. A "FAQ" amendment to this Manual "[FAQ 1](#)" [DN incorporate FAQs into Manual](#)] (published on <http://www.info.doh.gov.uk/doh/finman.nsf> in February 2014) gives detailed guidance on the disclosures required. A new table supplements the existing "Exit Packages" disclosure in the accounts format, so it is probably only necessary for entities to reference this note in the directors' report. Exit packages and non-compulsory departure disclosures are an auditable part of the annual accounts.

Off-payroll engagements

- 2.43. For 2013-14 and beyond, Treasury requires public sector bodies to report arrangements whereby individuals are paid through their own companies (and so are responsible for their own tax and NI arrangements).
- 2.44. Detailed disclosure requirements are again contained in "[FAQ 1](#)" (published on <http://www.info.doh.gov.uk/doh/finman.nsf> , although these have been slightly amended in the second "FAQ" of the year to reflect subsequent revisions in PES (2014) 02 (11 March 2014). Please therefore refer [to "FAQ 2"](#) [\[DN incorporate FAQs into Manual\]](#) for the current guidance.
- 2.45. Entities may wish to present off-payroll data alongside the staff benefits and staff numbers accounts notes (in which case a reference in the report will probably suffice), or in the body of the directors' report. In either case, the report must state whether there are, or are not, engagements to report under this heading (ie a NIL return is required).

Remuneration Report

- 2.46. The FReM requires that a Remuneration Report shall be prepared by NHS bodies, providing information in accordance with Part 3 of Schedule 8 of [SI 2008 No. 410](#) to the extent that they are relevant. (FReM paragraphs 5.2.21 et seq refer)
- 2.47. Parts 1, 2, 4 and 6 of the Schedule are not applicable, other than to the extent required by the FReM. Sub-sections 420(2) and 420(3) of the Companies Act 2006 do not apply.
- 2.48. The definition of “Senior Managers” is:
‘those persons in senior positions having authority or responsibility for directing or controlling the major activities of the NHS body. This means those who influence the decisions of the entity as a whole rather than the decisions of individual directorates or departments.’
- 2.49. The Chief Executive should be asked to confirm whether this covers more than the executive and non-executive directors. It is usually considered that the regular attendees of the entity’s board meetings are its senior managers.
- 2.50. There is a presumption that information about named individuals will be given in all cases and that all disclosures in the remuneration report will be consistent with identifiable information on those individuals in the financial statements. Non-disclosure is acceptable only where publication would:
- be in breach of **any** confidentiality agreement;
 - prejudice **the** rights, freedom or legitimate interest of the individual; or,
 - cause or be likely to cause substantial damage or substantial distress to the individual or another, and that damage or distress would be unwarranted.
- 2.51. It is for the individual to make out a case for non-disclosure, which should be considered by the Board on a case-by-case basis. Where non-disclosure is agreed, the fact that certain disclosures have been omitted must be disclosed.
- 2.52. For staff-sharing arrangements: the remuneration report should include remuneration details of those senior managers holding a position in the entity, showing the *entity’s* share of the relevant components of remuneration. In addition, the senior manager’s total salary (e.g. for a number of organisations) should be shown separately.
- 2.53. Certain information is auditable (Part 5 of Schedule 8 of SI 2008 No 410) and will be referred to in the audit opinion. The report must be annotated to identify those items that are auditable.
- 2.54. The remuneration report must be signed and dated by the Accounting or Accountable Officer or Chief Executive. For the purpose of publication, the Accounting Officer/Chief Executive’s signature on the Annual Report will also satisfy the requirement to sign the Remuneration Report, which is an integral part of the Annual Report.

Relationship between the remuneration report and exit packages, severance payments and off-payroll engagements disclosures

2.55. In many cases, individuals who fall to be named in the remuneration report will also be included, although not individually identified by name, in the exit packages, non-compulsory departures or off-payroll engagements disclosures. Where this is the case, the remuneration report must provide the details of those agreements or payments on and individual by individual basis in a way that permits the user to cross-reference remuneration report data to that in the wider notes to the account.

Remuneration report (detail)

2.56. The tables for use as part of the Remuneration Report are reproduced below in [Annex 1](#). HM Treasury also requires the disclosure of exit package information in the format set out in Chapter 5 (Accounts example).

2.57. The figures relate to all those individuals who hold or have held office as a senior manager of the NHS body during the reporting year or in the prior period (If seconded into the organisation at no cost to the organisation, disclose the arrangement). It is irrelevant that:

- an individual was not substantively appointed (holding office is sufficient, irrespective of defects in appointment), or
- an individual's title as senior manager included a prefix such as "temporary" or "alternate", or
- an individual was engaged via a corporate body, such as an agency, and payments were made to that corporate body rather than to the individual directly.

2.58. The remuneration report will contain the following information where relevant:

- (a) Details of the membership of the Remuneration and Terms of Services Committee.
- (b) Statement of the policy on the remuneration of senior managers for current and future financial years.
- (c) Explanation of methods used to assess whether performance conditions were met and why those methods were chosen. If relevant, state why the methods involved comparison with other organisations.
- (d) Explanation of relative importance of the relevant proportions of remuneration which are, and which are not, subject to performance conditions.
- (e) Summary and explanation of policy on duration of contracts, and notice periods and termination payments.

- (f) Details of the service contract for each senior manager who has served during the year:
- date of the contract, the unexpired term, and details of the notice period;
 - provision for compensation for early termination; and
 - other details sufficient to determine the entity's liability in the event of early termination.
- (g) Explanation of any significant awards made to past senior managers. For each senior manager who served during the year the following three items (h; i; and j) of financial data should be given, in tabular form. The Annex gives the pro-forma tabular format, including bandings. This information is subject to audit:
- (h) Salaries and other remuneration in tabular format (see detail at Annex1)
- (i) Details of compensation payable to former senior managers [this information is subject to audit].
- (j) Details of amounts included above which are payable to third parties for services of a senior manager [this information is subject to audit].

Pay Multiples

2.59. Entities must report (a) the median remuneration of all staff; (b) the mid-point of the banded remuneration (remuneration includes that paid for work other than as a director) of the highest paid director, whether or not this is the Accounting Officer or Chief Executive; and (c) the ratio between the median remuneration of the reporting entity's staff and the highest paid director figure.. The calculation is based on the full-time equivalent staff of the reporting entity at the reporting period end date on an annualised basis and is subject to audit.

2.60. NHS organisations should include, in the remuneration report, a narrative highlighting the reasons for any variance in year-on-year multiples. This is because:

- it describes the purpose of including the ratios, and what they mean;
- it ensures transparency in executive remuneration;
- it allows the public to hold government to account for their use of public funds;
- it provides an opportunity for entities to monitor their own remuneration and note any adverse or anomalous trends.

2.61. The narrative should be concise and clearly linked to the figures disclosed in the remuneration report, and use terms that are easily understandable by the public. The narrative should be introduced by the following text:

“Reporting bodies are required to disclose the relationship between the remuneration of the highest-paid director in their organisation and the median remuneration of the organisation’s workforce.

The banded remuneration of the highest paid director in [the organisation] in the financial year 201X-1Y was £xx (201W-1X, £xx). This was – times (201W-1X,-) the median remuneration of the workforce, which was £xx (201W-1X, £xx).

In 201X-1Y, xx (201W-1X, xx) employees received remuneration in excess of the highest-paid director. Remuneration ranged from £xx to £xx (201W-1X £xx-£xx)

Total remuneration includes salary, non-consolidated performance-related pay, benefits-in-kind, but not severance payments. It does not include employer pension contributions and the cash equivalent transfer value of pensions.”

2.62. It should then be followed by a concise and factual explanation of the changes on either side of the ratio, taking into account where relevant:

- Adjustment to the number or composition of the general workforce (e.g. through restructuring, downsizing and outsourcing);
- A change to the remuneration of the most highly paid individual. Departments should note that this may not necessarily be an increase to base pay, but a change in taxable expenses or allowances. Where the allowance is temporary (e.g. relocation allowance), departments should note this and its likely impact on the pay multiple.
- A change of the most highly paid individual (e.g. a new appointment, or the previously highest paid post having been vacated and/or eliminated); and
- The impact of any pay freeze on the multiple (e.g. senior pay freeze that does not affect the majority of staff).

2.63. The above list is not exhaustive and should be treated only as general guidance. It is not intended to act as a checklist of justifications for higher multiples.

2.64. Where there is a sharing arrangement, it is cost to the entity of an individual that identifies them as “highest paid” and not the total of that individual’s remuneration. Termination benefits must be excluded from the calculation of the highest-paid Director’s salary to avoid distorting the ratio.

Statement of Accountable Officer’s Responsibilities

2.65. The Accountable Officer should explain his/her responsibility for preparing the financial statements in a statement that should be positioned after the Annual Report and before the Governance Statement.

Governance Statement

- 2.66. In preparing the statement, the Accountable Officer should reflect the particular circumstances in which the entity operates. The full Governance Statement need not be included where summary accounts are provided with the annual report, as the full Governance Statement is available with the full accounts. The annual report and summary accounts must state prominently how the full Governance Statement may be obtained.

Primary Financial Statements and Notes

- 2.67. These are covered in [Chapter 4](#).

Audit Opinion and Report

- 2.68. [Chapter 1](#) outlines the audit process and requirements: arrangements differ between organisation types. The detailed accounts submission process, showing deadlines and procedures for handling statutory accounts and summarisation schedules, will be posted to the DH website later in the year.

Chapter 2 Annex 1 - Salary and Pension disclosure tables: information subject to audit

Salaries and allowances

Single total figure table

Name and title	(a) Salary (bands of £5,000)	(b) Expense payments (taxable) to nearest £100	(c) Performance pay and bonuses (bands of £5,000)	(d) Long term performance pay and bonuses (bands of £5,000)	(e) All pension-related benefits	(f) TOTAL (a to e)
	£000	£00	£000	£000	£000	£000

Provide comparative information for the prior year.

Disclose, for each individual, payments or compensation for loss of office, and cross-reference this to other disclosures and notes in the accounts (eg exit packages and non-compulsory departures)

Where more than one individual occupied the same post over the year details must be disclosed here

*Note: £ hundreds are used for the taxable expenses and benefits in kind disclosures

Pension Benefits

Name and title	(a) Real increase in pension at age 60 (bands of £2,500)	(b) Real increase in pension lump sum at aged 60 (bands of £2,500)	(c) Total accrued pension at age 60 at 31 March 20xx (bands of £5,000)	(d) Lump sum at age 60 related to accrued pension at 31 March 20xx (bands of £5,000)	(e) Cash Equivalent Transfer Value at 1 April 20xx	(f) Cash Equivalent Transfer Value at 31 March 20xx	(g) Real increase in Cash Equivalent Transfer Value	(h) Employer's contribution to stakeholder pension	(h) Total pension entitlement at 31 March 20xx (Bands of £5,000)
	£000	£000	£000	£000	£000	£000	£000	£000	£000

Add disclosures on total pension entitlement (see below)

As Non-Executive members do not receive pensionable remuneration, there will be no entries in respect of pensions for Non-Executive members.

Cash Equivalent Transfer Values

1. A Cash Equivalent Transfer Value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular point in time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries.

Real Increase in CETV

2. This reflects the increase in CETV effectively funded by the employer. It takes account of the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another scheme or arrangement) and uses common market valuation factors for the start and end of the period.

Content of tables: salaries and allowances

3. The requirements of Part 3 of [Schedule 8](#) are set out below.
4. In the table above:
 - column (a) is salary and fees (in bands of £5,000)
 - column (b) is all taxable benefits (total to the nearest £100)
 - column (c) is annual performance-related bonuses (in bands of £5,000)
 - column (d) is long-term performance-related bonuses
 - column (e) is all pension-related benefits
 - (additional columns must also be included for any other items in the nature of remuneration - but excluding payments to former senior managers (see below))
 - column (f) The final column is total of the above items.
 - Each of the above requirements is described in further detail below.
5. **Column (a):** the total amount of salary and fees paid to or receivable by the person in respect of qualifying services. Bandings of £5,000 apply.

Salary and other remuneration: this covers both pensionable and non-pensionable amounts. The amounts paid or payable by the NHS body in respect of the period the senior manager held office must be shown. Where, for example, an individual held a contract of employment for the entire financial year but was only a senior manager for six

months, it is the remuneration for six months which should be shown. Where there has been overlap in a post, e.g. where there have been two finance directors for a month, both must be shown, together with the date the post was started or vacated.

Where the senior manager has been employed under separate contracts for different services for the same entity, it may be useful to note this below the table.

Salary includes:

- all amounts paid or payable by the NHS body including recharges from any other health body
- the gross cost of any arrangement whereby a senior manager receives a net amount and an NHS body pays income tax on their behalf
- any financial loss allowances paid in place of remuneration
- geographical allowances such as London weighting, and
- any other allowance which is subject to UK taxation and any ex-gratia payments.

Salary excludes:

- recharges to any other health body
- reimbursement of out-of-pocket expenses
- reimbursement of "travelling and other allowances" (paid under determination order) including home to work travel costs
- taxable benefits
- employers' superannuation and National Insurance contributions
- performance related bonuses (these are recorded separately)
- golden hellos and compensation for loss of office (these are recorded separately), and
- any amount paid which the director must subsequently repay.

6. Column (b): all taxable benefits (to the nearest £100 and disclosed in £00s)

This is the gross value of such benefits before tax. It includes:

- expenses allowances that are subject to UK income tax and paid or payable to the person in respect of qualifying services; and
- benefits received by the person (other than salary) that are emoluments of the person and are received by them in respect of qualifying services.

A narrative disclosure is required to detail the nature of these benefits. Note: the disclosure is in £00s.

7. **Column (c):** annual performance pay and bonuses (in bandings of £5,000)

These comprise money or other assets received or receivable for the financial year as a result of achieving performance measures and targets relating to a period ending in the relevant financial year other than:

- those which result from awards made in a previous financial year and the final vesting is determined as a result of achieving performance measures or targets relating to a period ending in the relevant financial year; and
- those which are receivable subject to the achievement of performance measures or targets in a future financial year.

Where an amount included in column (c) is for a deferred bonus, the amount and percentage of such deferral should be disclosed in a note accompanying the table.

8. **Column (d):** long-term performance pay and bonuses (in bandings of £5,000):

These comprise money or other assets received or receivable for periods of more than one year where final vesting:

- is determined as a result of achieving performance measures or targets relating to a period ending in the relevant financial year; and
- is not subject to the achievement of performance measures or targets in a future financial year.

9. For both columns (c) and (d), where the performance measures or targets are substantially (but not fully) completed by the end of the financial year, the amount shown in the table may include sums which relate to the following financial year but this must be explained in the report. In the following year's report, the amount must not be included as remuneration for that year.

10. For every component of remuneration included in columns C or D, a note accompanying the table must disclose:

- details of any performance measures and the relative weighting of each;
- for each performance measure:
 - the performance targets set at the beginning of the performance period and the corresponding value of bonus achievable; and
 - details of actual performance against the targets set and measured over the performance period and the resulting bonus awarded.
- where discretion has been exercised in the award, details of how the discretion was exercised and how the resulting bonus was determined.

11. **Column (e):** all pension-related benefits (in bandings of £5,000), including:

- the cash value of payments (whether in cash or otherwise) in lieu of retirement benefits; and
- all benefits in year from participating in pension schemes. These are the aggregate input amounts, calculated using the method set out in [section 229 of the Finance Act 2004\(1\)](#). Any contributions by the employee in the period, or transferred in amounts, are excluded from this figure/

12. **Column (f):** the total of the values disclosed in columns (a) to (e).

Content of tables: pensions

2.69. **Pension entitlements:** The information required in FReM 5.c.27 should be disclosed as follows:

- (Cols (a) and (b)) the real increase during the reporting year in the pension and (if applicable) related lump sum at age 60 in bands of £2,500:
- (Cols (c) and (d)) the value at the end of the reporting year in the pension and (if applicable) related lump sum at age 60 in bands of £5,000:
- (Col (e)) the value of the cash equivalent transfer value at the beginning of the reporting period to the nearest £1,000
- (Col (f)) the value of the cash equivalent transfer value at the end of the reporting period to the nearest £1,000
- (Col (g)) the real increase in the cash equivalent transfer value at the end of the reporting period to the nearest £1,000; and,
- (Col (h)) in the case of a Partnership pension account, the employer's contribution (the first four bulleted disclosures will not apply)

2.70. **Total pension entitlement.** For each senior manager, regulations require disclosure of:

- the pension entitlement at the end of the year, being the pension they would receive, expressed in bands of £5,000. (Show the individual's normal retirement age).
- a description of additional benefits that will become receivable by the individual in the event that they retire early, and,
- separate disclosures where the individual is a member of more than one scheme

Payments for loss of office

2.71. For each individual who was a senior manager in the current or in a previous financial year, that has received a payment for loss of office during the financial year, the following must be disclosed:

- the total amount payable to the individual, broken down into each component;
- an explanation of how each component was calculated;
- any other payments to the individual in connection with the termination of services as a senior manager, including outstanding long term bonuses that vest on or following termination; and
- where any discretion was exercised in respect of the payment, an explanation of how it was exercised.

Payments to past senior managers

2.72. The report must contain details of any payments of money or other assets to any individual who was not a senior manager during the financial year but has previously been a senior manager at any time. The following payments do not need to be reported in this disclosure:

- payments for loss of office (which are separately reported above);
- payments that are otherwise shown in the single total figure table;
- payments that have already been disclosed by the entity in a previous remuneration report;
- payments for regular pension benefits that commenced in a previous year; and
- payments for employment or services provided by the individual other than as a senior manager of the entity.

~~2.73. Note: this chapter has been extensively amended to reflect FReM and Companies Act developments. Changes are not highlighted, as this would detract from legibility. NHS bodies are required to publish, as a single document, an annual report and accounts (ARA). This document includes:~~

- ~~• The annual report comprising the:
 - ~~* strategic report (replaces the business review),~~
 - ~~* directors' report,~~
 - ~~* remuneration report~~~~
- ~~• A statement of the Accountable Officer's responsibilities~~
- ~~• A Governance Statement~~

- The primary financial statements and notes to the accounts.
- The audit opinion and report.

Accounting Officer's signature

2.74. The Accounting Officer (or Accountable Officer for individual NHS bodies) shall sign and date the Annual Report, the Remuneration Report, the Governance Statement and the Statement of Financial Position. For the purposes of publication, the Accounting Officer/Chief Executive's signature on the Annual Report will also satisfy the requirement to sign the Remuneration Report, which is an integral part of the Annual Report.

Summary financial information

2.75. Summary Financial Statements (SFS) may be produced as an addition to the full accounts and annual report—they cannot replace these documents. The annual report and SFS (if produced) must contain a prominent note that the financial statements might not contain sufficient information for a full understanding of the entity's financial position and performance. The note should say how the user might obtain the full accounts, and these must be provided on request, subject to a reasonable copying charge if the entity chooses. The summary data must also be followed by an auditors' statement as to whether, in their opinion, the summary data is consistent with the full financial statements. (s426 of the Companies Act 2006 is relevant). Summary data must not be published in advance of the laying of the full Annual report and Accounts before Parliament, as this would be a breach of Parliamentary privilege).

Annual Report

2.76. This guidance sets out the minimum content of the annual report. Beyond this however, the entity must take ownership of the annual report and ensure that additional information is included where necessary to reflect the position of the NHS body within the community and give sufficient information to meet the requirements of public accountability.

2.77. The auditors must be given a copy of the annual report and, where applicable, summary financial statements, in sufficient time to carry out the required work before the completion of the auditor's opinion. Certain information contained in the remuneration report is subject to audit and will be referred to in the audit opinion and the remuneration report must be available at the start of the audit. Other quantitative aspects of the annual report are reviewed by auditors to ensure consistency with the annual accounts.

2.78. Where NHS bodies are dissolved mid-year (with functions transferring to any other public sector entity), the application of absorption accounting (see Chapter 4) is consistent with the principle that an ARA is required in respect of any part-year period in which the entity existed. A closing body will have to prepare an ARA as the successor body will only bring its own transactions in the year to account from the date of transfer

of functions. The authorisation of a NHS Trust as a Foundation Trust during a reporting year similarly requires the preparation of a part year ARA.

2.79. The Annual Report consists of:

- A Strategic Report following the requirements of s414C in Chapter 4A of the Companies Act 2006; and
- A Directors' Report, based on the requirements of Chapter 5 of Part 15 of the Companies Act 2006, and Schedule 7 of SI 2008 no 410;
- A Remuneration Report based on Chapter 6 of Part 15 of the Companies Act 2006 and Schedule 8 of SI 2008 no 410. (Chapter 9 of Part 15 does not apply)

The *directors' report* and the *strategic report* together form the *management commentary*. The above legislation is interpreted for the public sector as below.

Strategic Report

2.80. The Companies Act 2006 (Strategic Report and Directors' Report) Regulations 2013 are applicable for periods ending on or after 30 September 2013, and Treasury has included the requirement for a Strategic Report in the 2013-14 FReM. Public entities should comply with the Act as adapted: i.e. they should treat themselves as if they were quoted companies.

2.81. The report should be free standing, having similar status and signing requirements to the directors' report. Where relevant matters have been discussed in other documents, it may be sufficient to include a cross-reference to those other documents. s414C gives a detailed listing of the contents of the report. Sub-sections 414A(5) and (6) do not apply.

2.82. Reporting entities must not adopt a "tick-box" approach to the preparation of the report. The essential characteristics of the report have been outlined by the Financial Reporting Council as follows:

- fair, balanced and understandable
- concise
- forward-looking
- entity-specific
- closely linked to related information in the ARA (in many cases, the report will point to eg performance data rather than duplicating it)
- material—includes only information that is relevant to users unless a statutory or FReM requirement

Strategic Report issues

2.83. The report should include information on:

- **Environmental matters:** NHS bodies are required to produce a sustainability report as part of the strategic report. Compliance with Treasury guidance in this area (see below) is deemed sufficient to fulfil the environmental reporting requirements of s414C(7)(b)(i).
- **The entity's employees:** including an account of the entity's equal opportunities policy. Also required is an analysis of the gender distribution in the categories:
 - directors
 - other senior managers
 - employees
- **Social, community and human rights issues** should be discussed to the extent necessary for the understanding of the business.
- **Business information:** sufficient information to give the reader an understanding of the entity's history, development and performance, noting the main trends and factors likely to affect future development, performance and position. Requirements here will differ greatly according to the type of entity. It will be necessary to refer to the main sources of financing (grant funding, allocations, earned income, PFI, DH loans or PDC etc).
- **Performance against key performance indicators:** in many cases key indicators will appear in the financial statements and so need not be duplicated here. Entities will however need to make reference to them, and provide more detailed explanations where significant over or under achievement is indicated. Additionally, those indicators routinely used by senior management in managing the business (be they financial or other measures) will probably feature here.
- **Statutory basis:** Entities should refer to the legislation under which they were set up, and refer to the accounts direction under which they are reporting.
- **Further explanation:** of items in the financial statements considered to have a strategic significance. This will include an explanation of the adoption of the "going concern" basis where otherwise this might be called into doubt (FRoM 5.2.8(i) refers)

2.84. Items that would normally be dealt with in the directors' report may be moved to the strategic report where these are considered to be of strategic significance.

2.85. The strategic report is approved by the Board and signed and dated by the Accounting Officer.

Sustainability Report

2.86. NHS bodies are required to produce a Sustainability Report (SR) as part of their Annual Report: this element of the Annual Report is not subject to audit. The Sustainability Development Unit (SDU) at the Department has developed a standard reporting format for NHS bodies, and this should form the basis of the report. Further guidance and support is available from the SDU at <http://www.sdu.nhs.uk/corporate-requirements/governance/reporting.aspx>. NHS bodies may also wish to refer to general HM Treasury guidance for the preparation of SRs at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/279330/P_U1632_Sustainability_Reporting_Guidance.pdf

Directors' Report

2.87. The content of the directors' report is based on the disclosure requirements of s416 and s418 of the Companies Act 2006 and Schedule 7 of The Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations 2008 (SI 2008 No 410). In addition, NHS bodies are required, in accordance with the FReM, to include commentaries on the subjects below.

2.88. It is not necessary to report on Greenhouse Gas emissions under Schedule 7 of SI 2008 No 410. The production of a sustainability report, as outlined above, is considered to meet the legislative reporting requirements (FReM 5.2.16) refers.

Details of the directors

2.89. The report will provide:

- the names of the Chair and Chief Executive, and
- the composition of the management board (including advisory and non-executive members) having authority or responsibility for directing or controlling the major activities of the entity during the year
- (recommended) the names of the directors forming an audit committee or committees

Statement as to disclosure to auditors

2.90. The directors' report must contain a statement to the effect that, in the case of each of the persons who are directors at the time the report is approved:

- so far as the director is aware, there is no relevant audit information of which the company's auditor is unaware, and
- he/she has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditor is aware of that information.

~~2.91. — “Relevant audit information” means information needed by the company’s auditor in connection with preparing his report.~~

~~2.92. — Companies Act 2006 s418 refers (note: s418 (5) and (6) are not applicable).~~

Additional disclosures

Pension Liabilities

~~2.93. — An indication of how pension liabilities are treated in the accounts and a reference to the statements of the relevant pension scheme. A cross-reference to the accounting policy note in the accounts and the remuneration report will normally be sufficient.~~

Directors’ interests

~~2.94. — Details of company directorships or other significant interests held by directors where those companies are likely to do business, or are possibly seeking to do business with the NHS where this may conflict with their managerial responsibilities. Where a Register of Interests that is open to the public is maintained, the disclosure may be limited to a note that says how the Register can be accessed.~~

External auditor’s remuneration

~~2.95. — Information about the remuneration paid to auditors in respect of any non-audit work undertaken by them. Disclosure is required by Regulations made under s494 of the Companies Act 2006.~~

Sickness absence data

~~2.96. — Detailed guidance on the source and content of this data is provided outside this Manual. Generally, the disclosure will appear in the audited financial statements, so a cross-reference here may suffice.~~

Cost allocation and charges for information

~~2.97. — A statement that the entity has complied with HM Treasury’s guidance on setting charges for information is required. This guidance is available in Chapter b6 of HM Treasury’s Managing Public Money.~~

Disclosure of “serious untoward incidents”

~~2.98. — Details of incidents involving data loss or confidentiality breaches.~~

Employee consultation

~~2.99. — The action taken to maintain or develop the provision of information to, and consultation with, employees.~~

Equality disclosures

~~2.100.—The policy in relation to disabled employees and equal opportunities should be recorded. If an equality report is produced, this should be included here (or referenced here, if available elsewhere). Equality Act 2010 guidance is available at <https://www.gov.uk/government/publications/equality-act-guidance>~~

Health and safety

~~2.101.—Information on health and safety performance.~~

Fraud

~~2.102.—Information on policies and procedures relating to countering fraud and corruption~~

Better Payments Practice Code

~~2.103.—[Also paragraph 12 of schedule 7 to the [Large and Medium-sized Companies and Groups \(Accounts and Reports\) Regulations 2008 \(SI 2008 No. 410\)](#)]:~~

- ~~• A narrative summary of the Confederation of British Industry (CBI) Better Payments Practice code~~
- ~~• Quantitative evidence of compliance with that code. Evidence can be provided as follows:~~
- ~~• Where the annual report incorporates the full annual accounts, the annual report must, as a minimum, state "details of compliance with the code are given in note x to the accounts".~~

Prompt Payments Code

~~2.104.—Disclose whether or not the body has signed up to the Code.~~

Emergency Preparedness

~~2.105.—NHS organisations should ensure that they have in place a Major Incident Plan that is fully compliant with the requirements of the NHS Emergency Planning Guidance 2005 and all associated guidance.~~

Principles for Remedy

~~2.106.—HM Treasury's [Managing Public Money](#) contains guidance at Annex 4.14 about the steps public bodies should take where they have caused injustice or hardship by maladministration or service failure. The Parliamentary and Health Service Ombudsman published a revised [Principles for Remedy](#) in May 2010, setting out six principles that represent best practice and are directly applicable to NHS procedures.~~

2.107.— NHS bodies are required to include a reference in their Annual Reports to *Principles for Remedy* and state to what extent such principles have been adopted by the body and form part of its complaints handling procedure.

Exit packages and severance payments

2.108.— The exit packages disclosure may be included in NHS bodies' annual reports, but also forms part of the auditable notes to the accounts. The figures to be disclosed here relate to exit packages agreed in the year. The actual date of departure might be in a subsequent period, and the expense in relation to the departure costs may have been accrued in a previous period. The data here is therefore presented on a different basis to other staff cost and expenditure notes in the accounts.

2.109.— HM Treasury has issued specific guidance on severance payments (i.e. covering any payments that are not made under either legal or contractual obligation): this is now included in HM Treasury's *Managing Public Money*. Special severance payments when staff leave a public sector employer should only rarely be considered. They will always require HM Treasury approval because they are usually novel, contentious and potentially repercussive: NHS bodies have no delegated authority to make such payments unless so approved.

2.110.— For 2013-14 and beyond, additional disclosures are required in respect of non-compulsory departures agreed in the reporting period. A "FAQ" amendment to this Manual "FAQ 1" (published on <http://www.info.doh.gov.uk/doh/finman.nsf> in February 2014) gives detailed guidance on the disclosures required. A new table supplements the existing "Exit Packages" disclosure in the accounts format, so it is probably only necessary for entities to reference this note in the directors' report. Exit packages and non-compulsory departure disclosures are an auditable part of the annual accounts.

Comment [SW2]: DN – incorporate FAQs into manual

Off-payroll engagements

2.111.— For 2013-14 and beyond, Treasury requires public sector bodies to report arrangements whereby individuals are paid through their own companies (and so are responsible for their own tax and NI arrangements).

2.112.— Detailed disclosure requirements are again contained in "FAQ 1" (published on <http://www.info.doh.gov.uk/doh/finman.nsf>, although these have been slightly amended in the second "FAQ" of the year to reflect subsequent revisions in PES (2014) 02 (11 March 2014). Please therefore refer to "FAQ 2" for the current guidance.

Comment [SW3]: Link required or incorporate into manual

Formatted: Not Highlight

Formatted: Not Highlight

2.113.— Entities may wish to present off-payroll data alongside the staff benefits and staff numbers accounts notes (in which case a reference in the report will probably suffice), or in the body of the directors' report. In either case, the report must state whether there are, or are not, engagements to report under this heading (ie a NIL return is required).

|

Remuneration Report

- 2.114. — The FReM requires that a Remuneration Report shall be prepared by NHS bodies, providing information in accordance with Part 3 of Schedule 8 of SI 2008 No. 410 to the extent that they are relevant. (FReM paragraphs 5.2.21 et seq refer)
- 2.115. — Parts 1, 2, 4 and 6 of the Schedule are not applicable, other than to the extent required by the FReM. Sub-sections 420(2) and 420(3) of the Companies Act 2006 do not apply.
- 2.116. — The definition of “Senior Managers” is:
‘those persons in senior positions having authority or responsibility for directing or controlling the major activities of the NHS body. This means those who influence the decisions of the entity as a whole rather than the decisions of individual directorates or departments.’
- 2.117. — The Chief Executive should be asked to confirm whether this covers more than the executive and non-executive directors. It is usually considered that the regular attendees of the entity’s board meetings are its senior managers.
- 2.118. — There is a presumption that information about named individuals will be given in all cases and that all disclosures in the remuneration report will be consistent with identifiable information on those individuals in the financial statements. Non-disclosure is acceptable only where publication would:
- be in breach of **any** confidentiality agreement;
 - prejudice **the** rights, freedom or legitimate interest of the individual; or,
 - cause or be likely to cause substantial damage or substantial distress to the individual or another, and that damage or distress would be unwarranted.
- 2.119. — It is for the individual to make out a case for non-disclosure, which should be considered by the Board on a case-by-case basis. Where non-disclosure is agreed, the fact that certain disclosures have been omitted must be disclosed.
- 2.120. — For staff-sharing arrangements: the remuneration report should include remuneration details of those senior managers holding a position in the entity, showing the *entity’s* share of the relevant components of remuneration. In addition, the senior manager’s total salary (e.g. for a number of organisations) should be shown separately.
- 2.121. — Certain information is auditable (Part 5 of Schedule 8 of SI 2008 No 410) and will be referred to in the audit opinion. The report must be annotated to identify those items that are auditable.
- 2.122. — The remuneration report must be signed and dated by the Accounting or Accountable Officer or Chief Executive. For the purpose of publication, the Accounting Officer/Chief Executive’s signature on the Annual Report will also satisfy the requirement to sign the Remuneration Report, which is an integral part of the Annual Report.

Relationship between the remuneration report and exit packages, severance payments and off-payroll engagements disclosures

2.123. — In many cases, individuals who fall to be named in the remuneration report will also be included, although not individually identified by name, in the exit packages, non-compulsory departures or off-payroll engagements disclosures. Where this is the case, the remuneration report must provide the details of those agreements or payments on and individual by individual basis in a way that permits the user to cross-reference remuneration report data to that in the wider notes to the account.

Remuneration report (detail)

2.124. — The tables for use as part of the Remuneration Report are reproduced below in Annex 1. HM Treasury also requires the disclosure of exit package information in the format set out in Chapter 5 (Accounts example).

2.125. — The figures relate to all those individuals who hold or have held office as a senior manager of the NHS body during the reporting year or in the prior period (If seconded into the organisation at no cost to the organisation, disclose the arrangement). It is irrelevant that:

- an individual was not substantively appointed (holding office is sufficient, irrespective of defects in appointment), or
- an individual's title as senior manager included a prefix such as "temporary" or "alternate", or
- an individual was engaged via a corporate body, such as an agency, and payments were made to that corporate body rather than to the individual directly.

2.126. — The remuneration report will contain the following information where relevant:

- (a) — Details of the membership of the Remuneration and Terms of Services Committee.
- (b) — Statement of the policy on the remuneration of senior managers for current and future financial years.
- (c) — Explanation of methods used to assess whether performance conditions were met and why those methods were chosen. If relevant, state why the methods involved comparison with other organisations.
- (d) — Explanation of relative importance of the relevant proportions of remuneration which are, and which are not, subject to performance conditions.
- (e) — Summary and explanation of policy on duration of contracts, and notice periods and termination payments.

- (f) ~~Details of the service contract for each senior manager who has served during the year:~~
- ~~• date of the contract, the unexpired term, and details of the notice period;~~
 - ~~• provision for compensation for early termination; and~~
 - ~~• other details sufficient to determine the entity's liability in the event of early termination.~~
- (g) ~~Explanation of any significant awards made to past senior managers.~~
~~For each senior manager who served during the year the following three items (h; i; and j) of financial data should be given, in tabular form. The Annex gives the pro-forma tabular format, including bandings. This information is subject to audit:~~
- (h) ~~Salaries and other remuneration in tabular format (see detail at Annex1)~~
- (i) ~~Details of compensation payable to former senior managers [this information is subject to audit].~~
- (j) ~~Details of amounts included above which are payable to third parties for services of a senior manager [this information is subject to audit].~~

Pay Multiples

2.127. ~~Entities must report (a) the median remuneration of all staff; (b) the mid-point of the banded remuneration (remuneration includes that paid for work other than as a director) of the highest paid director, whether or not this is the Accounting Officer or Chief Executive; and (c) the ratio between the median remuneration of the reporting entity's staff and the highest paid director figure. The calculation is based on the full-time equivalent staff of the reporting entity at the reporting period end date on an annualised basis and is subject to audit.~~

2.128. ~~NHS organisations should include, in the remuneration report, a narrative highlighting the reasons for any variance in year-on-year multiples. This is because:~~

- ~~• it describes the purpose of including the ratios, and what they mean;~~
- ~~• it ensures transparency in executive remuneration;~~
- ~~• it allows the public to hold government to account for their use of public funds;~~
- ~~• it provides an opportunity for entities to monitor their own remuneration and note any adverse or anomalous trends.~~

2.129. ~~The narrative should be concise and clearly linked to the figures disclosed in the remuneration report, and use terms that are easily understandable by the public. The narrative should be introduced by the following text:~~

~~“Reporting bodies are required to disclose the relationship between the remuneration of the highest paid director in their organisation and the median remuneration of the organisation’s workforce.~~

~~The banded remuneration of the highest paid director in [the organisation] in the financial year 201X-1Y was £xx (201W-1X, £xx). This was times (201W-1X,-) the median remuneration of the workforce, which was £xx (201W-1X, £xx).~~

~~In 201X-1Y, xx (201W-1X, xx) employees received remuneration in excess of the highest paid director. Remuneration ranged from £xx to £xx (201W-1X £xx-£xx)~~

~~Total remuneration includes salary, non-consolidated performance-related pay, benefits in-kind, but not severance payments. It does not include employer pension contributions and the cash equivalent transfer value of pensions.”~~

~~2.130.— It should then be followed by a concise and factual explanation of the changes on either side of the ratio, taking into account where relevant:~~

- ~~• Adjustment to the number or composition of the general workforce (e.g. through restructuring, downsizing and outsourcing);~~
- ~~• A change to the remuneration of the most highly paid individual. Departments should note that this may not necessarily be an increase to base pay, but a change in taxable expenses or allowances. Where the allowance is temporary (e.g. relocation allowance), departments should note this and its likely impact on the pay multiple.~~
- ~~• A change of the most highly paid individual (e.g. a new appointment, or the previously highest paid post having been vacated and/or eliminated); and~~
- ~~• The impact of any pay freeze on the multiple (e.g. senior pay freeze that does not affect the majority of staff.~~

~~2.131.— The above list is not exhaustive and should be treated only as general guidance. It is not intended to act as a checklist of justifications for higher multiples.~~

~~2.132.— Where there is a sharing arrangement, it is cost to the entity of an individual that identifies them as “highest paid” and not the total of that individual’s remuneration. Termination benefits must be excluded from the calculation of the highest paid Director’s salary to avoid distorting the ratio.~~

Statement of Accountable Officer’s Responsibilities

~~2.133.— The Accountable Officer should explain his/her responsibility for preparing the financial statements in a statement that should be positioned after the Annual Report and before the Governance Statement.~~

Governance Statement

2.134. — In preparing the statement, the Accountable Officer should reflect the particular circumstances in which the entity operates. The full Governance Statement need not be included where summary accounts are provided with the annual report, as the full Governance Statement is available with the full accounts. The annual report and summary accounts must state prominently how the full Governance Statement may be obtained.

Primary Financial Statements and Notes

2.135. — These are covered in [Chapter 4](#).

Audit Opinion and Report

2.136. — [Chapter 1](#) outlines the audit process and requirements: arrangements differ between organisation types. The detailed accounts submission process, showing deadlines and procedures for handling statutory accounts and summarisation schedules, will be posted to the DH website later in the year.

~~Chapter 2 Annex 1 - Salary and Pension disclosure tables~~

~~Salaries and allowances~~

20xx-20xx						
Name and title	(a) Salary (bands of £5,000)	(b) Bonus Payments (bands of £5,000)	(c) Expense payments (taxable)	(d) Compensati on for loss of office (bands of £5,000)	(e) Payments in kind	(f) TOTAL (a-to-e) (bands of £5,000)
	£000	£000	£00	£000	£00	£000

~~Provide comparative information for the prior year.~~

~~[Cross-reference compensation for loss of office column (d) to “exit packages” and “non-compulsory departures” notes]~~

~~[Where more than one individual occupied the same post over the year details must be disclosed here]~~

~~*Note: £ hundreds are used for the taxable expenses and benefits in kind disclosures]~~

~~Pension Benefits~~

Name and title	(a) Real increase in pension at age 60 (bands of £2,500)	(b) Real increase in pension lump sum at aged 60 (bands of £2,500)	(c) Total accrued pension at age 60 at 31 March 20xx (bands of £5,000)	(d) Lump sum at age 60 related to accrued pension at 31 March 20xx (bands of £5,000)	(e) Cash Equivalent Transfer Value at 1 April 20xx	(f) Cash Equivalent Transfer Value at 31 March 20xx	(g) Real increase in Cash Equivalent Transfer Value	(h) Employer's contribution to stakeholder pension	(i) Total pension entitlement at 31 March 20xx (Bands of £5,000)
	£000	£000	£000	£000	£000	£000	£000	£000	£000

As Non-Executive members do not receive pensionable remuneration, there will be no entries in respect of pensions for Non-Executive members.

Cash Equivalent Transfer Values

13. A Cash Equivalent Transfer Value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular point in time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. A CETV is a payment made by a pension scheme or arrangement to secure pension benefits in another pension scheme or arrangement when the member leaves a scheme and chooses to transfer the benefits accrued in their former scheme. The pension figures shown relate to the benefits that the individual has accrued as a consequence of their total membership of the pension scheme, not just their service in a senior capacity to which disclosure applies. The CETV figures and the other pension details include the value of any pension benefits in another scheme or arrangement which the individual has transferred to the NHS pension scheme. They also include any additional pension benefit accrued to the member as a result of their purchasing additional years of pension service in the scheme at their own cost. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries.

Real Increase in CETV

14. This reflects the increase in CETV effectively funded by the employer. It takes account of the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another scheme or arrangement) and uses common market valuation factors for the start and end of the period.

Content of tables: salaries and allowances

15. The requirements of SI 2008 No. 410, Schedule 8, Part 3 (7) (1) to (4) are set out below.

16. **Column (a):** the total amount of salary and fees paid to or receivable by the person in respect of qualifying services. Bandings of £5,000 apply.

Name and title: If the senior manager was appointed or resigned during the year, the dates of holding of office should be shown.

Salary and other remuneration: this covers both pensionable and non-pensionable amounts. The amounts paid or payable by the NHS body in respect of the period the senior manager held office must be shown. Where, for example, an individual held a contract of employment for the entire financial year but was only a senior manager for six months, it is the remuneration for six months which should be shown. Where there has been overlap in a post, e.g. where there have been two finance directors for a month, both must be shown, together with the date the post was started or vacated.

Where the senior manager has been employed under separate contracts for different services for the same entity, it may be useful to note this below the table.

Salary includes:

- all amounts paid or payable by the NHS body including recharges from any other health body
- the gross cost of any arrangement whereby a senior manager receives a net amount and an NHS body pays income tax on their behalf
- any financial loss allowances paid in place of remuneration
- geographical allowances such as London weighting, and
- any other allowance which is subject to UK taxation and any ex-gratia payments.

Salary excludes:

- recharges to any other health body
- reimbursement of out-of-pocket expenses
- reimbursement of "travelling and other allowances" (paid under determination order) including home to work travel costs
- taxable benefits
- employers' superannuation and National Insurance contributions
- performance related bonuses (these are recorded separately)
- golden hellos and compensation for loss of office (these are recorded separately), and
- any amount paid which the director must subsequently repay.

17. Column (b): the total amount of bonuses paid or receivable.

Performance related pay and bonuses: Bonuses or bonuses payable should be disclosed separately from salary. The figure includes only that remuneration payable in respect of the current year's service: separate disclosure should be made of those bonuses earned but deferred to a future period. Amounts paid to medical consultants under the national clinical excellence reward scheme should be disclosed as bonuses. Bandings of £5,000 apply.

18. Column (c): the total amount of sums paid by way of expenses allowance that are—

- (i) chargeable to United Kingdom income tax (or would be if the person were an individual), and
- (ii) paid to or receivable by the person in respect of qualifying services;

A narrative disclosure is required to detail the nature of these benefits. Note: the disclosure is to the nearest £100.

19. **Column (d):** the total amount of compensation, including:

- (i) any compensation for loss of office paid to or receivable by the person, and
- (ii) any other payments paid to or receivable by the person in connection with the termination of qualifying services;

Sums here may also be included in the "exit packages" or "non-compulsory departure" notes, and a narrative here should cross refer to those disclosures. Bandings of £5,000 apply.

Formatted: Not Highlight

20. **Column (e):** the total estimated value of any benefits received by the person otherwise than in cash that —

- (i) do not fall within any of paragraphs (a) to (d) or elsewhere in the remuneration report
- (ii) are emoluments of the person, and
- (iii) are received by the person in respect of qualifying service

Narrative details of any such benefits are required, and these are to be estimated to the nearest £100.

21. **Column (f):** the amount that is the total of the sums mentioned in paragraphs (a) to (e). Note: because of the different units used in this table, the figure will not be a simple arithmetical sum of columns (a) to (e).

Content of tables: pensions

2.137. — **Pension entitlements:** The information required in Part 3 of Schedule 8 to ST 2008 No 410 should be disclosed as follows:

- (Cols (a) and (b)) the real increase during the reporting year in the pension and (if applicable) related lump sum at age 60 in bands of £2,500;
- (Cols (c) and (d)) the value at the end of the reporting year in the pension and (if applicable) related lump sum at age 60 in bands of £5,000;
- (Col (e)) the value of the cash equivalent transfer value at the beginning of the reporting period to the nearest £1,000
- (Col (f)) the value of the cash equivalent transfer value at the end of the reporting period to the nearest £1,000
- (Col (g)) the real increase in the cash equivalent transfer value at the end of the reporting period to the nearest £1,000; and,

- ~~(Col (h)) in the case of a Partnership pension account, the employer's contribution (the first four bulleted disclosures will not apply)~~

~~2.138. **Total pension entitlement.** For each senior manager, regulations require disclosure of:~~

- ~~the pension entitlement at the end of the year, being the pension they would receive, expressed in bands of £5,000.~~
- ~~a description of additional benefits that will become receivable by the individual in the event that they retire early, and~~
- ~~separate disclosures where the individual is a member of more than one scheme~~

3. Financial Reporting Requirements

Introduction

Government Financial Reporting Manual (FReM)

3.1. The financial reporting requirements for NHS bodies are determined by the Department of Health with the approval of HM Treasury. Bodies within the resource accounting boundary must follow the Treasury's [Government Financial Reporting Manual 2014 to 2015](#) (FReM). The FReM generally applies EU-adopted International Financial Reporting Standards (IFRS) in effect for accounting periods commencing on or before 1 January 2013. NHS bodies must follow the FReM unless there are any divergences agreed by HM Treasury. The one agreed divergence for 2013-14 relates to the accounting arrangements for NHS transition and the break-up of the Statement of Financial Position (SoFP) of those bodies that were dissolved on 1 April 2013 ([see paragraph 3.16 below](#)). FReM requirements are reflected, as appropriate, in this manual.

Generally accepted accounting practice (GAAP)

3.2. This manual follows GAAP to the extent that it is meaningful and appropriate in the NHS context. It was announced in the Government's 2008 budget that public sector bodies would produce financial statements based on International Financial Reporting Standards from 2009-10. From that year, therefore, GAAP consists of:

- the accounting and disclosure requirements of the Companies Act 2006, and
- pronouncements by or endorsed by the International Accounting Standards Board (IASB) including the Framework for the Preparation and Presentation of Financial Statements, International Financial Reporting Standards and interpretations,
interpreted as necessary by
- the body of accumulated knowledge built up over time and promulgated in, for example, textbooks, technical journals and research papers.

3.3. International Accounting Standard (IAS) 8 *Accounting Policies, Changes in Accounting Estimates and Errors* provides that, where there is no specific international standard or interpretation for a particular issue, users can look to the pronouncements of other standard setters (for example, the UK Accounting Standards Board) provided that they do not conflict with international standards and interpretations.

International Financial Reporting Standards (IFRS)

3.4. The Government FReM and the Manual for Accounts follow International Financial Reporting Standards (as adopted by the European Union) and interpretations to the extent that they are meaningful and appropriate to public benefit entities: the FReM often

applies interpretations and adaptations to EU-adopted Standards. A table below provides, for each international financial reporting standard and interpretation:

- its objective
- as dictated by the FReM, its applicability to the NHS, including any interpretations and adaptations
- a listing of those Standards not yet adopted

3.5. Disclosure requirements are reflected in proforma accounts and detailed guidance issued outside this Manual.

3.6. International Financial Reporting Standards can be obtained from the International Accounting Standards Board (IASB) at www.ifs.org.

Accounting convention

3.7. NHS financial statements are prepared under the historical cost convention modified by the revaluation of *non-current* assets and, where material, current asset investments and inventories, to fair value as determined by the relevant accounting standard.

The Framework

3.8. The IASB Framework for the Preparation and Presentation of Financial Statements (the Framework) sets out the principles that should underlie general purpose financial statements, the objective of which is to provide information about the financial position, performance and changes in financial position. Presentation should meet the 'common needs of most users'.

True and fair view

3.9. NHS financial statements should give a true and fair view of the state of affairs of the reporting body at the end of the financial year and of the results of the year. Section 393 of the Companies Act 2006 requires that directors must not approve accounts unless they are satisfied that they give a true and fair view. In applying section 393, any reference to 'company' should be read to mean 'NHS body'.

NHS Charities: local consolidation

3.10. From 2013-14, NHS bodies have been required to consolidate NHS Charitable Funds and any other Funds that are considered to be under common control under the terms of IAS 27 *Consolidated and Separate Financial Statements*. The consolidation, in both annual accounts and summarisation schedules, report core entity and Charitable Funds components of the consolidation distinctly. NHS bodies' performance outturns will be based on the core entity's returns, rather than on the consolidation outturn.

3.11. There is also a requirement for the Department to consolidate NHS Charities classified by the Office of National Statistics to the public sector. "NHS Charities" is

defined by section 43 of the Charities Act 1993, and includes those where trustees are appointed by the Appointment Commission under NHS Acts.

- 3.12. NHS bodies will therefore need to distinguish between:
- Those charitable funds that fall to be consolidated in the body's own accounts by virtue of IAS 27 and
 - Funds classified to the public sector by the ONS
- 3.13. In the rare event that a fund falls into the second category but not the first, a NHS body will be required to exclude that fund from its local consolidation, but to report financial data in respect of it to the Department to permit consolidation at the national level.
- 3.14. In general, it is likely that the IAS 27 criteria will apply to most NHS charities.
- 3.15. Detailed guidance on the format of the consolidated accounts and summarisation schedules will be issued separately by the relevant authorities.

~~Departure from the FReM~~

~~Transfer of assets from NHS bodies closed at 1 April 2013~~

- ~~3.16. The handling of transfers of assets from those NHS bodies that closed under NHS transition on 1 April 2013 is outlined in Chapter 4 Annex 10. More detailed guidance and instructions for the completion of central returns is given on the "finman" website under "closedown and transition FAQs".~~

Standards and Interpretations – applicability to the NHS

EU-adopted Standards applicable in 2014-15 (except where indicated)

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FRoM)
<p>IAS 1 Presentation of Financial Statements (as amended June 2011)</p> <p>IAS 1 prescribes the basis for presentation of general purpose financial statements to ensure comparability with the entity's financial statements of previous periods and with the financial statements of other entities. The standard sets out overall requirements for the presentation of financial statements, guidelines for their structure and minimum requirements for their content.</p>	<p>Applies in full with the following interpretations:</p> <p>References in IAS 1 to 'present fairly' and 'fair presentation' should be read to mean 'give a true and fair view' and 'truthful and fair presentation' to comply with the requirements of the Companies Act 2006.</p> <p>The notes to the accounts shall disclose the legislative authority for producing the accounts and the basis of preparation of the financial statements as being in accordance with the Manual for Accounts.</p> <p>The following provide the interpretations of going concern for the public sector context:</p> <ul style="list-style-type: none"> • for non-trading entities, the anticipated continuation of the provision of a service in the future, as evidenced by inclusion of financial provision for that service in published documents, is normally sufficient evidence of going concern. However, a trading entity needs to consider whether it is appropriate to continue to prepare its financial statements on a going concern basis where it is being, or is likely to be, wound up. • Where an entity ceases to exist, it should consider whether or not its services will continue to be provided (using the same assets, by another public sector entity) in determining whether to use the concept of going concern for the final set of financial statements. <p>NHS bodies (other than NHS Trusts and FTs) within the resource accounting boundary shall prepare a Statement of Comprehensive Net Expenditure (SOCNE) rather than a Statement of Comprehensive Income. NHS Trusts/FTs will prepare a Statement of Comprehensive Net Income (SOCNI).</p> <p>The flexibility to select the order of presentation of line items in the Statement of Financial Position and to present on a liquidity basis is withdrawn. NHS bodies</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
	<p>shall prepare their Statement of Financial Position in accordance with their respective pro forma accounts.</p> <p>Capital disclosures (IAS 1.79-80A and 134-136A) are not required. This is because the financing of public sector entities is ultimately tax-based.</p> <p>An amendment effective on or after 1 July 2012 has been incorporated in model accounts formats for 2013-14. This requires items of OCI to be grouped, separately identifying those that might at some point be reclassified ('recycled') from OCI to profit (e.g. available for sale financial assets and cash flow hedges) from those that will not (e.g. gains on PPE revaluation and actuarial gains/losses).</p>
<p>IAS 2 Inventories</p> <p>The objective of IAS 2 is to prescribe the accounting treatment for inventories. It provides guidance on the determination of cost and its subsequent recognition as an expense, including any write-down to net realisable value.</p>	<p>Applies with interpretations re strategic reserves and certain other central government categories. in full.</p>
<p>IAS 7 Statement of Cash Flows</p> <p>The objective of IAS 7 is to require the provision of information about the historical changes in cash and cash equivalents of an entity by means of a statement of cash flows that classifies cash flows during the period from operating, investing and financing activities.</p>	<p>Applies in full with interpretations on extended content.</p>
<p>IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors</p> <p>The objective of IAS 8 is to prescribe the criteria for selecting and changing accounting policies, and the accounting treatment and disclosure of changes in accounting policies, accounting estimates and</p>	<p>Applies in full.</p> <p>Note: Preparers should consult DH about any novel or contentious accounting policies they might propose to adopt to reflect their specific circumstances.</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
corrections of errors.	<p>Where preparers consider it necessary to adjust retrospectively for changes in accounting policies or material errors, they should first consult DH to ensure that the budgeting and Estimates implications have been properly considered.</p> <p>Additionally, preparers will need to differentiate between local prior period adjustments and TCS adjustments to opening balances and the DEL and AME impact of any such adjustments.</p>
<p>IAS 10 Events after the Reporting Period</p> <p>This standard prescribes when an entity should adjust its financial statements for events after the reporting period and the disclosures required.</p>	<p>Applies in full with the following interpretation, for NHS trusts:</p> <p>Any unpaid dividends for the year will be shown as liabilities in the Statement of Financial Position. (This is because public dividend capital is not an equity instrument as defined by IAS 32).</p>
<p>IAS 11 Construction Contracts</p> <p>The objective of IAS 11 is to prescribe the accounting treatment by contractors of revenue and costs associated with construction contracts.</p>	<p>Not relevant to NHS bodies other than as referred to by IAS 18.21 regarding the rendering of services.</p>
<p>IAS 12 Income Taxes</p> <p>The objectives of IAS 12 are to specify the accounting for current and deferred tax.</p>	<p>Not relevant.</p> <p>(Note: amendment effective 2013-14)</p>
<p>IAS 16 Property, Plant and Equipment</p> <p>The objective of IAS 16 is to prescribe the accounting treatment for property, plant and equipment so that users of the financial statements can discern information about an entity's investment in its property, plant and equipment and the changes in such investment.</p>	<p>Applies in full with the following interpretations and adaptations:</p> <p>Interpretations:</p> <p>All tangible non-current assets shall be carried at valuation at the end of the reporting period, that is, the option in IAS 16 to carry at cost is withdrawn.</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>Also, see:</p> <p>IAS 23 <i>Borrowing costs</i></p> <p>IAS 36 <i>Impairment of assets</i></p> <p>IFRS 5 <i>Non-current assets held for sale and discontinued operations</i>.</p>	<p>It is not necessary to disclose the historical cost carrying amounts.</p> <p>In considering the treatment of interest at initial recognition, entities shall not capitalise the Cost of Capital charge.</p> <p>The 'value in use' of a non cash-generating asset is the present value of the asset's remaining service potential, which can be assumed to be at least equal to the cost of replacing that service potential.</p> <p>Adaptations:</p> <p>Gains on revaluation of non-current assets shall be credited to the revaluation reserve.</p> <p>Losses on revaluation shall be debited to the relevant reserve (as above) to the extent that gains have been recorded previously, and otherwise to expenditure. (But see IAS 36 Impairments: FReM divergence).</p> <p>Also, note that following the annual review of the useful lives of assets required by IAS 16, NHS bodies shall discuss any significant proposals to change asset lives with DH, to ensure that the budgeting implications have been considered.</p> <p>For 'in use' non-specialised property assets fair value should be interpreted as market value for existing use. In the RICS Red Book, this is defined as 'market value on the assumption that property is sold as part of the continuing enterprise in occupation'.</p>
<p>IAS 17 Leases</p> <p>The objective of IAS 17 is to prescribe, for lessees and lessors, the appropriate accounting policies and disclosures to apply in relation to leases.</p> <p>Also see:</p> <p>SIC 15 <i>Operating leases – incentives</i></p>	<p>Applies in full.</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>SIC 27 <i>Evaluating the substance of transactions involving the legal form of a lease</i></p> <p>IFRIC 4 <i>Determining whether an arrangement contains a lease</i></p>	
<p>IAS 18 Revenue</p> <p>The objective of IAS 18 is to identify the circumstances when revenue recognition criteria will be met. It also provides practical guidance on the application of those criteria.</p> <p>Also see SIC 31 <i>Revenue – barter transactions involving advertising services</i></p>	<p>Applies in full.</p>
<p>IAS 19 Employee benefits</p> <p>IAS 19 prescribes the accounting and disclosures for all types of employee benefits:</p> <ul style="list-style-type: none"> • short-term benefits, for example salaries and wages, social security contributions, paid leave and non-monetary benefits • post-employment benefits that result from employment, for example retirement benefits • other long-term benefits, for example long service or sabbatical leave • termination benefits, that is, that arise directly from termination rather than from employment. <p>It requires an entity to recognise the cost of providing employee benefits in the period in which the benefit is earned rather than when paid or payable</p>	<p>Applies with the following interpretations:</p> <p>NHS bodies shall account for the NHS Superannuation Scheme as a defined contribution plan.</p> <p>For NHS bodies with staff who are in funded schemes e.g. the local government scheme:</p> <ul style="list-style-type: none"> • All actuarial gains and losses shall be recognised in reserves. The use of the corridor approach is not allowed. • The discount rate determined in accordance with IAS 19 by the scheme's actuary should be used. <p>Voluntary terminations with agreed terms under a pension scheme should be treated as post-employment benefits and so discounted using the rate applicable to pensions of that scheme. Involuntary terminations and voluntary terminations whose terms are available for a short time only should be treated as termination benefits and so discounted using the rate for provisions.</p> <p>For defined benefit obligations, the FReM interprets IAS</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
	<p>19's requirements on current valuations to mean that the period between formal actuarial valuations should be four years, with approximate valuations in intervening years.</p> <p>Note: 2011 revision is applicable in 2013-14.</p>
<p>IAS 20 Accounting for Government Grants and Disclosure of Government Assistance</p> <p>The objective of IAS 20 is to prescribe the accounting treatment for government grants and the disclosures about other government assistance.</p> <p>Also see SIC 10 <i>Government assistance – no specific relation to operating activities</i></p>	<p>Applies in full with the following interpretations:</p> <p>Parliamentary Supply does not fall within the meaning of government grants.</p> <p>Entities receiving a grant to fund the purchase of a specific asset should credit that grant to current year income, unless the entitlement to the asset is conditional such that the income should be deferred.</p> <p>A requirement that a grant or donate asset should be returned to the transferor contingent on some specified, future event does not in itself prevent the grant being recognised as income in the SOCNE/SOCNI. FReM 6.2.71 has more detail.</p>
<p>IAS 21 The Effects of Changes in Foreign Exchange Rates</p> <p>The objective of IAS 21 is to prescribe how to include foreign currency transactions and foreign operations in the financial statements of an entity and how to translate financial statements into a presentational currency.</p>	<p>Applies in full with the following interpretation:</p> <p>The presentational currency will be the same as the functional currency i.e. pounds sterling.</p>
<p>IAS 23 Borrowing Costs</p> <p>The objective of IAS 23 is to prescribe the accounting for borrowing costs.</p>	<p>Applies in full with the following interpretations:</p> <p>Borrowing costs in respect of qualifying assets held at fair value shall be expensed.</p>
<p>IAS 24 Related Party Disclosures</p>	<p>Applies in full with the following interpretations:</p> <p>NHS bodies must disclose the Department of Health as the parent department; a note of the main entities within</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>The objective of IAS 24 is to ensure that an entity's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and profit or loss may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.</p>	<p>the public sector with which the body has had dealings (no information needs to be given about these transactions), and details of material transactions between the body and individuals who are regarded as related parties.</p> <p>The requirement to disclose the compensation paid to management, expense allowances and similar items paid in the ordinary course of an entity's operations will be satisfied by the disclosures made in the notes to the accounts and in the remuneration report.</p> <p>In considering materiality, regard should be had to the definition in IAS 1, which requires materiality to be judged 'in the surrounding circumstances'. As a result, materiality should thus be judged from the viewpoint of both the entity and the related party, whether it is an individual or a corporate body.</p> <p>NHS bodies must disclose as a related party all linked charities (unless formally consolidated) including the nature of the relationship, and details of material transactions between the body and the linked charity.</p>
<p>IAS 26 Accounting and Reporting by Retirement Benefit Plans</p> <p>The objective of IAS 26 is to provide guidance on the form and content of the financial statements prepared by retirement benefit plans.</p>	<p>Not applicable</p>
<p>IAS 27 Consolidated and Separate Financial Statements</p> <p>IAS 27 requires parent undertakings to provide information about the economic activities of their group as a single economic entity in consolidated financial statements.</p>	<p>Applies in full, except for the following divergences:</p> <p>The divergence that NHS linked charitable funds are not to be consolidated where the NHS body is considered to have the power to control the funds in accordance with IAS 27 has been removed for 2013-14.</p> <p>NHS bodies within the resource accounting boundary shall only consolidate interests in other entities where:</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>Also see:</p> <p>SIC 12 <i>Consolidation – special purpose entities</i></p>	<ul style="list-style-type: none"> • the other entity is also within the resource accounting boundary; and • the parent entity exercises in-year budgetary control over the entity. <p>Even so, there is an exemption if both bodies are consolidated by an ultimate parent. If either of the above conditions for consolidation are not met, the interest shall be shown as an investment (see IAS 39).</p> <p>IAS 27 Separate Financial Statements has been issued but not yet adopted by FReM</p>
<p>IAS 28 Investments in Associates</p> <p>The objective of IAS 28 is to reflect the effect of investments in associates where the reporting entity is partly accountable for the associate's activities.</p>	<p>Not relevant, as FReM determines the treatment of investments in what would be, under this Standard, associates.</p> <p>IAS 28 Associates and Joint Ventures has been issued but not yet adopted by FReM. The Standard applies in full to ALBs.</p> <p><u>The Department and any agencies will follow FReM and apply IAS 28 without adaptation only where investments are classified to the private sector and rest of the world by ONS.</u></p>
<p>IAS 29 Financial Reporting in Hyperinflationary Economies</p> <p>IAS 29 requires the financial statements of an entity whose functional currency is that of a hyperinflationary economy to be stated in terms of the measuring unit current at the end of the reporting period.</p>	<p>Unlikely to be relevant.</p>
<p>IAS 31 Interests in Joint Ventures</p> <p>The objective of IAS 31 is to reflect the effect of a venturer's shares in joint ventures.</p>	<p>Relevant in respect of jointly controlled assets or jointly controlled operations that do not involve the creation of separate entities.</p> <p>Not relevant where separate entities exist, due to the Departmental Accounting boundary override.</p> <p>IAS 31 is superseded by IAS 28 (2011). EU adopted on 4 January 2014, so expected to apply to 2014-15</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
	subject to FReM adoption.
<p>IAS 32 Financial Instruments: Presentation</p> <p>IAS 32 establishes principles for presenting financial instruments as liabilities or equities and for offsetting financial assets and financial liabilities.</p> <p>Also see:</p> <p>IAS 39 <i>Financial instruments: recognition and measurement</i></p> <p>IFRS 7 <i>Financial instruments: disclosures</i></p> <p>IFRIC 9 <i>Reassessment of embedded derivatives</i></p>	<p>Applies in full with the following interpretation:</p> <p>Public dividend capital (PDC) is not an equity instrument as defined by the IAS. It should be presented as a form of financing in the Statement of Financial Position. Dividends payable on PDC should be charged in arriving at the trust's retained surplus/deficit for the year.</p>
<p>IAS 33 Earnings per Share</p> <p>The objective of IAS 33 is to prescribe principles for the determination and presentation of earnings per share to improve performance comparisons.</p>	Not relevant.
<p>IAS 34 Interim Financial Reporting</p> <p>IAS 34 prescribes the minimum content of an interim financial report and the principles for recognition and measurement for an interim period.</p> <p>Also see:</p> <p><i>IFRIC 10: Interim Financial Reporting and Impairment.</i></p>	<p>NHS bodies are not required to publish interim financial reports at present. Applies in full to a body that elects to do so.</p>
<p>IAS 36 Impairment of Assets</p>	<p>Applies in full with the following adaptations as per Treasury FReM:</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>The objective of IAS 36 is to ensure that assets are carried at no more than their recoverable amount.</p>	<p>Where an impairment arises from a clear consumption of economic value, this must be taken in full to the revenue account, whatever the state of the revaluation reserve on that asset.</p> <p>In other words, the Standard's requirement to take impairments in all cases to reserves in the first instance does not apply.</p> <p>Where impairments are posted to the revenue account and a revaluation reserve balance does exist, a transfer is to be made from the revaluation reserve to the General Fund/I&E Reserve. That transfer will be the lower of the total impairment or the balance available on the revaluation reserve.</p> <p>For impairments that do not represent a clear consumption of economic resources (generally, market/price fluctuations) the treatment is to take these to the revaluation reserve in the first instance, with any excess taken to the revenue account.</p> <p>Where an asset is not held for the purpose of generating cash flows, value in use is assumed to equal the cost of replacing the service potential provided by the asset, unless there has been a reduction in service potential.</p> <p>Reversal of impairment – FReM's adaptation of IAS 36 applies only to the recognition of impairments. Otherwise, IAS 36 applies in full. It follows then that reversals of impairments will be accounted for as in the Standard.</p>
<p>IAS 37 Provisions, Contingent Liabilities and Contingent Assets</p> <p>The objective of IAS 37 is to ensure that provisions, contingent liabilities and contingent assets are appropriately recognised and measured and that sufficient information is disclosed in the notes to the financial statements to enable users to understand their</p>	<p>Applies in full with the following interpretation:</p> <p>Where the cash flows to be discounted are expressed in current prices, entities should use the real discount rate set by Treasury (currently 2.2%).</p> <p>Note – voluntary early retirement provisions under scheme terms are discounted at the pensions rate rather than the general provisions rate:</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
nature, timing and amount.	Treasury sets discount rates for post employment benefits including injury benefit liabilities. (See Chapter 4 for more detail on Treasury standard discount rates)
<p>IAS 38 Intangible Assets</p> <p>IAS 38 prescribes the measurement and accounting for intangible assets that are not specifically dealt with in another standard. It allows an intangible asset to be recognised only if specific criteria are met.</p> <p>Also see:</p> <p>IAS 36 <i>Impairment of assets</i></p> <p>SIC 32 <i>Intangible assets – web site costs.</i></p>	<p>Applies in full with the following interpretations:</p> <p>An entity adopting the requirements of the FReM for the first time may only use retrospective capitalisation where it holds reliable original cost information in relation to the internally generated asset. FReM 7.2.4 provides more detail.</p> <p>Following initial recognition, for subsequent measurement IAS 38 permits the use of either the cost or revaluation model for each class of intangible asset.</p> <p>Where an active market exists, intangible assets should be carried at fair value at the end of the reporting period, that is, the cost option is withdrawn.</p> <p>Where no active market exists, entities should revalue the asset, using indices or some suitable model, to the lower of depreciated replacement cost and value in use where the asset is income generating.</p> <p>Where there is no value in use from income generation, the asset should be valued using depreciated replacement cost. These measures are an estimate of fair value.</p>
<p>IAS 39 Financial Instruments: Recognition and Measurement</p> <p>The objective of IAS 39 is to establish principles for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items.</p> <p>Also see:</p> <p>IAS 32 <i>Financial instruments: presentation</i></p>	<p>Applies in full with the following interpretations:</p> <p>Public dividend capital should be reported at historical cost, less any impairment.</p> <p>Where future cash flows are required to be discounted to measure fair value, entities should use the higher of the rate intrinsic to the financial instrument and the real discount rate set by HM Treasury.</p> <p>Liabilities under financial guarantee contracts that are not accounted for as insurance contracts should be</p>

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<p>IFRS 7 <i>Financial instruments: disclosures</i></p> <p>IFRIC 9 <i>Reassessment of embedded derivatives</i></p>	<p>measured initially at their fair value and, as appropriate, amortised subsequently to expenditure. Subsequent changes in probabilities should not be reflected in the carrying value except where the result is that IAS 37 would require recognition of a liability because it is more probable than not that a transfer of resources will occur.</p> <p>Any financial instrument that is not held in furtherance of the entity's objectives, but is held on behalf of government more generally, should be accounted for in a separate Trust Statement. In the event that this situation arises, entities should discuss with DH.</p> <p>Note: IAS 39 includes a number of alternative accounting treatments. Entities should discuss any significant choices to be made with DH to ensure that the budgeting implications have been properly considered.</p>
<p>IAS 40 Investment Properties</p> <p>The objective of IAS 40 is to prescribe the accounting treatment for investment property and related disclosure requirements.</p>	<p>Where properties are held for income generation or capital investment as their primary purpose then IAS 40 will apply. Such properties should be measured at their fair value, that is, the cost option in the standard is withdrawn.</p>
<p>IAS 41 Agriculture</p> <p>The objective of IAS 41 is to prescribe the accounting treatment and disclosures related to agricultural activity, which is the management of the biological transformation of biological assets for sale, into agricultural produce, or into additional biological assets.</p>	<p>Not relevant.</p>
<p>IFRS 1 First-time Adoption of International Financial Reporting Standards</p> <p>The objective of IFRS 1 is to ensure that the entity's first IFRS financial statements contain high quality information that:</p>	<p>Applies. The FReM lists interpretations:</p> <ul style="list-style-type: none"> • That assets are carried at valuation; and • Entities may not use the "corridor" approach permitted in IAS 19 Employee Benefits.

Standard/Interpretation and its objective	Applicability to the NHS (as prescribed by the FReM)
<ul style="list-style-type: none"> • is transparent for users and comparable over all periods presented; • provides a suitable starting point for accounting under IFRS, and • can be generated at a cost that does not exceed the benefits to users 	
<p>IFRS 2 Share-based Payment</p> <p>The objective of IFRS 2 is to specify the financial reporting by an entity when it undertakes a share-based payment transaction under which the entity acquires or receives goods or services.</p>	Not relevant.
<p>IFRS 3 Business Combinations</p> <p>IFRS 3 requires business combinations to be accounted for using the purchase method (also known as the acquisition method).</p>	<p>Applies in full to any combination of an NHS body with an entity outside the public sector.</p> <p>IFRS 3 does not apply to combinations involving entities under common control. The combination of two or more public sector bodies (i.e. entities within the boundary of the Whole of Government Accounts) into one new body, or the transfer of functions from one part of the public sector to another shall be accounted for using the absorption-based approach set out in the FReM.</p> <p>However, where two or more NHS trusts are dissolved and a new one established, there will be a new start, with public dividend capital set equal to the value of the net assets of the new body, as required under legislation.</p>
<p>IFRS 4 Insurance Contracts</p> <p>The objective of IFRS 4 is to specify the financial reporting for insurance contracts by an entity that issues such contracts (the insurer)</p>	Not relevant.

<p>IFRS 5 Non-current Assets Held for Sale and Discontinued Operations</p> <p>IFRS 5 sets out requirements for the classification, measurement and presentation of non-current assets held for sale.</p>	<p>Applies in full with the following interpretation:</p> <p>To qualify as 'discontinued operations' activities must cease completely. Responsibilities transferred from one part of the public sector to another are not discontinued operations.</p> <p>The 'value in use' of a non-cash-generating asset is the present value of the asset's remaining service potential, which can be assumed to be at least equal to the cost of replacing that service potential.</p>
<p>IFRS 6 Exploration for and Evaluation of Mineral Resources</p> <p>The objective of IFRS 6 is to specify the financial reporting for the exploration for and evaluation of mineral resources.</p>	<p>Not relevant.</p>
<p>IFRS 7 Financial Instruments: Disclosures</p> <p>The objective of IFRS 7 is to require entities to provide disclosures in their financial statements that enable users to evaluate</p> <ul style="list-style-type: none"> the significance of financial instruments to the entity's financial position and performances; and the nature and extent of risks from financial instruments and how the entity manages those risks. <p>Also see:</p> <p>IAS 32 <i>Financial instruments: presentation</i></p> <p>IAS 39 <i>Financial instruments: recognition and measurement</i></p> <p>IFRIC 9 <i>Reassessment of embedded derivatives</i></p>	<p>Applies in full subject to the interpretations as set out above for IAS 32 and IAS 39.</p> <p>Additional disclosures required where:</p> <ul style="list-style-type: none"> financial assets derecognised in their entirety, but the entity has continuing involvement in them financial assets are not derecognised in their entirety.

<p>IFRS 8 Operating Segments</p> <p>The objective of IFRS 8 is to require an entity to disclose information to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environment in which it operates.</p>	<p>Applies in full.</p> <p>Note: Unless already provided by IFRS 8 disclosures, NHS bodies are also required to provide the following fees and charges information for each income generation activity where the full cost is over £1m or is otherwise material:</p> <ul style="list-style-type: none"> • the financial objective; • full cost; • income; • surplus or deficit; and • performance against the financial objective.
<p>IFRS 9 Financial Instruments</p> <p>IFRS 9 specifies how an entity should classify and measure financial assets and financial liabilities, including some hybrid contracts.</p>	<p>Issued but not adopted by the FReM</p> <p>Deferred until January 2015</p> <p>This forms the first phase in the ASB’s project to replace IAS39.</p>
<p>IFRS 10 Consolidated Financial Statements</p> <p>The objective of this IFRS is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.</p>	<p><u>ALBs should apply in full, without adaptation. For the Department and agencies, subsidiaries will be consolidated only in they are designated for consolidation (on classification by the ONS to the public sector) Issued but not adopted by the FReM</u></p> <p><u>Published by IASB October 2010.</u></p> <p><u>Effective from 2014-15.</u></p>
<p>IFRS 11 Joint Arrangements</p> <p>The objective of the IFRS is to establish principles for financial reporting by entities that have an interest in arrangements that are controlled jointly (ie joint arrangements).</p>	<p>Issued but not adopted by the FReM</p> <p>Published by IASB May 2011.</p> <p>Effective from 2014-15. <u>ALBs should apply in full without adaptation.</u></p> <p><u>For the Department and agencies, will apply in full only where bodies are designated to the private sector and rest of the world by OND.</u></p> <p><u>The Department and agencies will apply IAS 39 to investments in a public sector body that has not</u></p>

Formatted: Font: Bold

	been designated for consolidation.
<p>IFRS 12 Disclosure of Interests in Other Entities</p> <p>The objective of this IFRS is to require an entity to disclose information that enables users of its financial statements to evaluate:</p> <p>(a) the nature of, and risks associated with, its interests in other entities; and</p> <p>(b) the effects of those interests on its financial position, financial performance and cash flows.</p>	<p>Guidance on IFRS 10, IFRS 11, IAS 27 and IAS 28 applies. Issued but not adopted by the FReM</p> <p>Published by IASB May 2011.</p> <p>Effective from 2014-15.</p>
<p>IFRS 13 Fair Value Measurement</p> <p>This IFRS:</p> <p>(a) defines fair value;</p> <p>(b) sets out in a single IFRS a framework for measuring fair value; and</p> <p>(c) requires disclosures about fair value measurements.</p>	<p>Issued but not adopted by the FReM Applies from 1 April 2015.</p> <p>A FReM Exposure Draft (12)03 refers.</p> <p>The Standard is not yet adopted or included in the FReM. Early adoption is not permitted.</p>
<p>SIC 7 Introduction of the Euro</p> <p>The requirements of IAS 21 regarding the translation of foreign currency transactions and financial statements of foreign operations should be strictly applied to the changeover to the Euro.</p>	Would apply in full but not relevant at present.
<p>SIC 10 Government Assistance – No Specific Relation to Operating Activities</p> <p>Government assistance to entities meets the definition of government grants in IAS 20 even if there are no conditions specifically relating to the operating activities of the entity other than the requirement to operate in certain regions or industry sectors. Such grants shall</p>	<p>Applies in full with the following interpretations:</p> <p>Parliamentary Supply does not fall within the meaning of government grants.</p> <p>Entities receiving a grant to fund the purchase of a specific asset should credit that grant to the revenue account, unless such conditions are attached to the grant that it cannot be recognised immediately (in which case the value of the receipt will be credited to deferred</p>

not be credited directly to equity.	income).
<p>SIC 12 Consolidation – Special Purpose Entities</p> <p>The objective of SIC 12 is to ensure that, regardless of the equity holding and control structure, where in substance the special purpose entity is controlled by the sponsor, it should be consolidated.</p>	<p>Applicable.</p> <p>NHS bodies within the resource accounting boundary shall only consolidate interests in other entities where:</p> <ul style="list-style-type: none"> the other entity is also within the resource accounting boundary; and the parent entity exercises in-year budgetary control over the entity. <p>Even so, there is an exemption if both bodies are consolidated by an ultimate parent. If either of the above conditions for consolidation are not met, the interest shall be shown as an investment.</p> <p>SIC 12 is superseded by IFRS 10 Consolidated Financial Statements which has a proposed FReM application date of 1 April 2014.</p>
<p>SIC 13 Jointly Controlled Entities – Non-Monetary Contributions by Venturers</p> <p>Where Venturers make non-monetary contributions in exchange for an equity share in a jointly controlled entity, the Venturer recognises in profit and loss the element of any gain or loss that is attributable to the equity interests of the other Venturers except when specific conditions are met.</p>	<p>Not relevant, as the FReM prescribes the method of accounting for investments in external entities.</p> <p>Withdrawn for periods starting on or after 1 January 2013 when SIC 13 is superseded by IFRS 11 Joint Arrangements.</p>
<p>SIC 15 Operating Leases – Incentives</p> <p>All incentives for the agreement of a new or renewed operating lease shall be recognised as an integral part of the net consideration agreed for the use of the leased asset, irrespective of the nature of the incentive or the timing of payments.</p>	<p>Applies in full.</p>
<p>SIC 21 Income Taxes – Recovery of Revalued Non-Depreciable Assets</p> <p>The deferred tax liability or asset arising from the</p>	<p>Not relevant.</p> <p>Withdrawn for periods starting on or after 1 January</p>

<p>revaluation of a non-depreciable asset should be measured on the basis of the tax consequences that would follow from recovery of the carrying amount of that asset through sale, regardless of the basis of measuring the carrying amount of the asset.</p>	<p>2012, when the SIC is superseded by the Deferred Tax: Recovery of Underlying Assets amendment to IAS 12.</p>
<p>SIC 25 Income Taxes – Changes in the Tax Status of an Entity or its Shareholders</p> <p>A change in tax status does not give rise to increases or decreases in amounts recognised directly in equity unless the consequences relate to transactions and events that result in a direct charge or credit to equity.</p>	<p>Not relevant.</p>
<p>SIC 27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease</p> <p>A series of transactions that involve the legal form of a lease is linked and shall be accounted for as one transaction when the overall economic effect cannot be understood without reference to the series of transactions as a whole.</p>	<p>Applies in full.</p>
<p>SIC 29 Service Concession Arrangements: Disclosures</p> <p>SIC 29 lists the disclosure requirements for service concession arrangements.</p> <p>Also see: IFRIC 12 <i>Service concession arrangements</i>.</p>	<p>The disclosures in SIC 29 ‘Service Concession Arrangements: Disclosures’ should be provided for all PFI and LIFT schemes where they are accounted for as service concession arrangements.</p>
<p>SIC 31 Revenue – Barter Transactions Involving Advertising Services</p> <p>Revenue from an exchange involving advertising services cannot be reliably measured by reference to the fair value of the services received. This is because reliable information is not available to the seller to support such measurement. However, a seller can</p>	<p>Applies in full.</p>

reliably measure revenue at fair value of the advertising service it provides in a barter transaction.	
<p>SIC 32 Intangible Assets – Web Site Costs</p> <p>SIC-32 lays down the conditions for an entity to recognise internal web site development costs as an intangible asset</p>	Applies in full.
<p>IFRIC 1 Changes in Existing Decommissioning, Restoration and Similar Liabilities</p> <p>IFRIC 1 prescribes the accounting for changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources, or a change in the discount rate.</p>	The circumstances are unlikely to arise. If they do, applies in full.
<p>IFRIC 2 Members' Shares in Co-operative Entities and Similar Instruments</p> <p>The entity must consider all the terms and conditions of the financial instrument in determining its classification as a financial liability or equity.</p>	Not relevant.
<p>IFRIC 4 Determining whether an Arrangement contains a Lease</p> <p>Determining whether an arrangement is, or contains, a lease shall be based on the substance of the arrangement and requires an assessment of whether:</p> <ul style="list-style-type: none"> fulfilment of the arrangement is dependent on the use of a specific asset or assets; and the arrangement conveys a right to use the asset. <p>See also: IAS 17 <i>Leases</i>.</p>	Applies in full.

<p>IFRIC 5 Rights to Interests arising from Decommissioning, Restoration and Environmental Rehabilitation Funds</p> <p>The contributor to a fund shall recognise its obligation to pay decommissioning costs as a liability and recognise its interest in the fund separately unless the contributor is not liable to pay decommissioning costs even if the fund fails to pay.</p>	Not relevant.
<p>IFRIC 6 Liabilities arising from Participating in a Specific Market – Waste Electrical and Electronic Equipment</p> <p>A liability for waste management costs for historical household equipment does not arise as the products are manufactured or sold. There is no obligation unless and until a market share exists during the measurement period.</p>	Not relevant
<p>IFRIC 7 Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies</p> <p>In the reporting period in which the entity first adopts IAS 29, the entity shall apply the requirements of IAS 29 as if the economy had always been hyperinflationary.</p>	Unlikely to be relevant.
<p>IFRIC 9 Reassessment of Embedded Derivatives</p> <p>An entity shall assess whether an embedded derivative is required under IAS 39 to be separated from the host contract and accounted for as a derivative when the entity first becomes a party to the contract. Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract, in which case reassessment is required.</p>	Applies in full.
<p>IFRIC 10 Interim Financial Reporting and</p>	NHS bodies are not required to publish interim financial

<p>Impairment</p> <p>An entity shall not reverse an impairment loss recognised in a previous interim period in respect of goodwill or an investment in either an equity instrument or a financial asset carried at cost.</p> <p>See also: <i>IAS 34 Interim Financial Reporting.</i></p>	<p>reports at present. Applies in full to a body that elects to do so.</p>
<p>IFRIC 11: IFRS 2 - Group and Treasury Share Transactions</p>	<p>Unlikely to be relevant.</p>
<p>IFRIC 12 Service Concession Arrangements</p> <p>IFRIC 12 deals primarily with public-to-private service concession arrangements for the delivery of public services. It applies only to concession agreements where the use of the infrastructure is controlled by the grantor.</p> <p>Also see: <i>SIC 29 Service Concession Arrangements: Disclosures</i></p>	<p>The FReM interprets IFRIC 12 to apply 'mirror accounting' arrangements to infrastructure service concession arrangements. In practice this means that the assets of most PFI schemes and many NHS LIFT schemes will be accounted for as Property, Plant and Equipment. The application of this interpretation is complex.</p> <p>NHS bodies should refer to both Treasury's guidance 'Accounting for PPP arrangements including PFI contracts under IFRS' in chapter 6 of the Financial Reporting Manual (FReM) at http://www.hm-treasury.gov.uk/frem_index.htm (6.2.49 et seq) and the DH guidance on accounting for PFI and NHS LIFT under IFRS published on the Download/IFRS section of the finman website.</p>
<p>IFRIC 13 Customer Loyalty Programmes</p> <p>An entity shall account for award credits as a separately identifiable component of the sales transaction(s) in which they are granted.</p>	<p>Not relevant</p>
<p>IFRIC 14 IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction</p> <p>An entity shall determine the availability of a refund or a</p>	<p>Potentially relevant where NHS bodies have pension assets and liabilities for staff who remain in a Local Government Pension Scheme.</p>

<p>reduction in future contributions in accordance with the terms and conditions of the plan and any statutory requirements in the jurisdiction of the plan.</p> <p>An entity shall analyse any minimum funding requirement at a given date into contributions that are required to cover (a) any existing shortfall for past service on the minimum funding basis and (b) the future accrual of benefits.</p> <p>If an entity has an obligation under a minimum funding requirement to pay contributions to cover an existing shortfall on the minimum funding basis in respect of services already received, the entity shall determine whether the contributions payable will be available as a refund or reduction in future contributions after they are paid into the plan.</p>	<p>FReM Chapter 12 lists the adaptations and interpretations of IAS 19 relevant to the public sector.</p>
<p>IFRIC 15 Agreements for the Construction of Real Estate</p> <p>If an entity contracts to deliver goods or services in addition to the construction of real estate, the agreement may need to be split into separately identifiable components.</p>	<p>Not relevant</p>
<p>IFRIC 16 Hedges of a Net Investment in a Foreign Operation</p> <p>Hedge accounting may be applied only to the foreign exchange differences arising between the functional currency of the foreign operation and the parent entity's functional currency.</p>	<p>Unlikely to be relevant.</p>
<p>IFRIC 17 Distributions of non-cash assets to owners</p> <p>This interpretation clarifies how an entity should measure distributions of assets, other than cash, when it pays dividends to its owners.</p>	<p>Applicable.</p>
<p>IFRIC 18 Transfer of assets from customers</p>	<p>Applicable.</p>

This interpretation clarifies the accounting for arrangements where an item of property, plant and equipment, which is provided by the customer, is used to provide an ongoing service.	
IFRIC 19 Extinguishing financial liabilities with equity instruments	Unlikely to be relevant
IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine	Not relevant

Standards issued or amended but not yet adopted in FReM	
IFRS 9 Financial Instruments	Published October 2010. Date of adoption uncertain.
IFRS 10 Consolidated Financial Statements	Published May 2011 Expected to be effective in 2014-15
IFRS 11 Joint Arrangements	Published May 2011 Expected to be effective in 2014-15
IFRS 12 Disclosure of Interests in Other Entities	Published May 2011 Expected to be effective in 2014-15
IFRS13 Fair Value	Published May 2011 FReM adaptations under consideration. May be adopted in 2013-14 <u>Effective from 1 April 2015</u>
IAS 27 Separate Financial statements	Published May 2011 Expected to be effective in 2014-15
IAS 28 Associates and Joint Ventures	Published May 2011 Expected to be effective in 2014-15
IAS 32 Financial instruments – presentation (amendment)	Published December 2011 Expected to be effective in 2014-15

4. Financial Statements and Notes

Introduction This chapter addresses the significant application issues that affect the Department of Health (DH) group and does not refer to International Financial Reporting Standards (IFRS) where there are no NHS-specific aspects to full IFRS application. It also outlines the additional requirements for group consolidation in general: there are additional requirements placed on NHS bodies (e.g. in handling prior-period adjustments, inter-authority transactions and reporting formats) that go beyond the straightforward application of Standards. ~~The contents and structure of the formats and summarisation schedules are subject to development in the year, under HM Treasury's "simplification project", for example. Further organisation-type specific information will be appended to this and other chapters of the manual where guidance CCG or NHS Trust specific.~~

Primary statements: terminology

- 4.2. The various types of NHS organisation use different presentations for financial data. HM Treasury permits certain departures from the Government Financial Reporting Manual (FReM) and Department Yellow formats in the interest of presentations that most appropriately report underlying transactions and business activity. Differences arise mainly between those bodies that are Vote-funded, for example commissioning bodies such as Clinical Commissioning Groups (CCGs), and those that generate revenue receipts (e.g. NHS providers such as NHS Trusts and NHS Foundation Trusts). Thus, the former will have a Statement of Comprehensive Net Expenditure (SoCNE), while the latter will have a Statement of Comprehensive Income (SOI). Again, the former will have a General Fund, while the latter will have a Retained Earnings Reserve.

Summarisation schedules

- 4.3. In addition to the statutory annual report and accounts produced by each entity, bodies need to communicate the same data, with further analysis to permit consolidation, to the Department, NHS England or Monitor in a standard format that can be automatically processed. For example, where NHS bodies will report intra-group transactions at a relatively summarised level appropriate for local reporting, more extensive entity-by-entity figures are required to meet the practical requirements of consolidation.
- 4.4. Summarisation schedules are therefore produced for each reporting entity by the body the entity reports to. For example, NHS Foundation Trusts (FTs) report directly to their regulator, Monitor, which submits consolidated information to DH. While such schedules are not formally audited, audit assurance that the schedules and accounts are consistent is sought. The Department is then able to establish that the national consolidated account is based on underlying audited accounts data.

- 4.5. Summarisation schedules are produced towards the end of the financial year and are supported by detailed completion instructions. NHS bodies will wish to adapt their Annual Reports and Accounts to reflect their unique business requirements and to meet the needs of their stakeholders (e.g. by adding detail to some notes and disclosures and omitting others where immaterial). Summarisation schedules, as computer-input documents, cannot be amended locally and must be completed as set out in completion instructions from the organisations that issue them.

Accounting policies and materiality (IAS 1, IAS 8)

- 4.6. DH group entities must adopt the accounting policies set out in this manual and shown in the example accounts format's Accounting Policies Note. While IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, permits entities to select appropriate accounting policies, DH group reporting requirements requires that the same standards are applied consistently across the group.
- 4.7. While an individual body's statutory accounts may be edited, for example to avoid disclosures of immaterial transactions, summarisation schedules may not be edited and all specified disclosures should be completed.

Estimation and judgement

- 4.8. Under IAS 1, *Presentation of Financial Statements*, NHS bodies should disclose information about key sources of estimation uncertainty at the Statement of Financial Position (SoFP) date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities in the next financial year. Notes must give details of their nature and carrying amount at the SoFP date.
- 4.9. The determination of the carrying values of some assets and liabilities may require estimation of the effects of future uncertain events. Examples include the estimation of the recoverable amount of plant, property and equipment in the absence of recently observed market prices, or the assumptions underlying the estimation of material provisions.

Gross and Net accounting

- 4.10. The overarching principle is that transactions should be accounted for in accordance with accounting standards, with all treatments having been agreed by both parties. Generally, this means revenue income and expenditure should be recorded gross unless the transaction is of a non-trading nature and an organisation is deemed to be acting solely as an agent and does not gain any economic benefit from the transaction. One example of where it may be appropriate to account for transactions on a net basis relates to employee benefits, where a member of staff is employed jointly by a NHS trust and another NHS body, that is, part-time for each. In this case, only the element of the salary relating to the Trust should be recorded as expenditure as in substance the employee works for both organisations and the recharge is merely an administrative arrangement.

- 4.11. Similarly, for full-time staff secondments, it is necessary to ensure that the national summarised accounts correctly consolidate employee benefits, and only costs and numbers of staff actually providing service for an individual body are reported in that account. As such it is important that each arrangement is assessed individually against the relevant accounting standards and that the treatment is agreed between parties to avoid mismatches during the agreement of transactions and balances process.
- 4.12. Where one NHS body “A” does work for another “B” on an agency basis, (for example, ordering supplies in bulk to gain efficiencies, then passing supplies on the B and recharging appropriately) and does not gain any economic benefit from the transaction, the transactions it processes on behalf of the other body should not be reflected in the A’s accounts. Where “A” is paid for providing the service and adds value to the process, a gross accounting approach would be appropriate. Transactions that are of a trading nature should be shown as gross by both parties.

Going concern

- 4.13. The FReM ([2.2.155.2.8\(i\)](#)) notes that in applying paragraphs 25 to 46 of IAS 1, preparers of financial statements should be aware of the following interpretations of Going Concern for the public sector context.
- For non-trading entities in the public sector, the anticipated continuation of the provision of a service in the future, as evidenced by inclusion of financial provision for that service in published documents, is normally sufficient evidence of going concern. However, a trading entity needs to consider whether it is appropriate to continue to prepare its financial statements on a going concern basis where it is being, or is likely to be, wound up.
 - Sponsored entities whose statements of financial position show total net liabilities should prepare their financial statements on the going concern basis unless, after discussion with their sponsors, the going concern basis is deemed inappropriate.
 - Where an entity ceases to exist, it should consider whether or not its services will continue to be provided (using the same assets, by another public sector entity) in determining whether to use the concept of going concern in its final set of financial statements.
- 4.14. Should a NHS body have concerns about its “going concern” status (and this will only be the case if there is a prospect of services ceasing altogether) it should raise the issue with [the Department’s sponsoring authority](#) as soon as possible.

Prior period adjustments (PPAs)

4.15. This manual makes a clear distinction between:

- Those PPAs required as a result in a change in accounting policy (a “national” PPA), and
- PPAs that are required under IAS 8 to correct material errors in the accounts (“local” PPAs).

4.16. In the case of the former, the FReM will usually prescribe the appropriate handling arrangements, and the Department will issue detailed guidance on restatement of accounts and the collection of restated data via summarisation schedules where appropriate, even if immaterial at a local body level.

~~4.17. For 2013-14, the consolidation of NHS Charitable Funds into underlying accounts in accordance with IAS 27, Consolidated and Separate Financial Statements, is likely to will require prior-year restatement, where material in prior or current year, as a change in the application of] accounting policies. For more information, see the section on the consolidation of charitable funds below.~~

~~4.18-4.17.~~ Local PPAs present difficulties in terms of reconciling local accounts data with that in national consolidated accounts. Generally, the correct application of IAS 8 will result in a requirement for local accounts to be restated, but will prohibit a matching national restatement (as the different materiality levels operating locally and nationally affect the decision on whether to restate).

~~4.19-4.18.~~ As a result, individual local PPAs may appear in the statutory accounts but such PPAs will not be disclosed in the summarisation schedules. If the national consolidated account is not to be restated, it follows that opening 1 April xx balances reported to the Department must be identical to closing 31 March xx balances. Similarly, at the national level, prior period comparator income and expenditure figures will be unchanged.

~~4.20-4.19.~~ The resulting inconsistency between local accounts and the summarisation schedules based on those accounts is handled by clear disclosures of the nature and impact of the PPA (as required by IAS 8) and a detailed reconciliation in the schedules between the accounts and the schedules opening balances.

Events after the reporting period

~~4.21-4.20.~~ IAS 10, *Events after the Reporting Period*, is applicable: it states the requirements as to whether events after the end of the reporting period should be adjusted in the financial statements. Adjusting events are those providing evidence of conditions existing at the end of the reporting period, whereas non-adjusting events are indicative of conditions arising after the reporting period (the latter being disclosed where material).

~~4.22.4.21. NHS bodies treated the closure of SHAs and PCTs on 1 April 2013 as non-adjusting events after the reporting period, as their 2012-13 statements were prepared on a going concern basis and the reporting of balances and transactions in that year were not directly affected by transition. Entities that close at the end of 2013-14 (whether formally on 31 March or 1 April 2014) are likely to report the event in the same way (unless going concern considerations apply and/or the successor entity is a body outside the public sector) that close, or are re-configured after their reporting date, will need to give information on both the reconfiguration and any public consultations that preceded the reconfiguration.~~

Absorption accounting

Transfer of functions within the public sector ~~(other than 1 April 2013 transition)~~

~~4.23.4.22. The FReM requires a form of absorption accounting in the public sector below Department level. Annex 9 outlines the normal application of absorption accounting in the NHS.~~

~~4.24.4.23. Annex 10 notes the agreed departure from the FReM in respect of transition and closure of bodies on 1 April 2013. In 2013-14 a departure from FReM was permitted in respect of those assets/liabilities transferred from closing SHAs and PCTs under transition. This departure from FReM was that the counter entry to the SOFP transaction dr/cr asset is to the General Fund/retained earnings reserve rather than current year income or expenditure. This arrangement is not applicable to 2014-15 and so there is no option to apply "modified absorption accounting".~~

~~4.25.4.24. In each case, rRevaluation reserves are preserved by means of a subsequent transaction (dr General Fund/retained earnings reserve, cr revaluation reserve).~~

~~4.26.4.25. Neither Absorption accounting does not require treatment requires restatement of prior-year results.~~

Charitable funds consolidation

~~4.27.4.26. Until 2012-13, Treasury required that NHS charitable funds were excluded from consolidation (the Office for National Statistics (ONS) classification of NHS Charitable Funds to the public sector required Resource Account consolidation, but this was not reflected in local accounts). From 2013-14 however, the FReM requires that IAS 27, *Consolidated and Separate Financial Statements*, is followed in this respect. Where the standard's IAS 27 criteria of control are satisfied, related charitable funds will be consolidated in the accounts of the individual entity.~~

~~4.28. As this is a change in national accounting policy, IAS 8 requires the restatement of comparators for 2012-13, with accounts presenting the SOFP position at 1 April 2012,~~

~~31 March 2013 and 31 March 2014 as if the a charitable fund had always been consolidated.~~

~~4.29. Detailed guidance and amended summarisation schedules will be issued to facilitate restatement and consolidation. Both local accounts and summarisation schedules will be presented so as to identify the NHS body's own transactions and the consolidated position in separate columns.~~

~~4.30.4.27.~~ Charitable funds' balances and transactions with the linked NHS body must be identified and eliminated in local consolidations. Further, elimination data (i.e. transactions and balances with other DH group or Whole of Government Accounts (WGA) entities) will need to be submitted to the Department to permit consolidation with other bodies at the group level.

~~4.34.4.28.~~ The charitable fund accounts themselves are prepared under the Charities Statement of Recommended Practice (SORP) which is UK GAAP based. Further, the legislative timetable for the production of the charity accounts to be submitted to the Charities Commission does not agree with fall within the NHS accounts' timetables. NHS bodies will need therefore to arrange to make the required consolidation adjustments to (a) align the charitable funds results with those prepared under IFRS and FReM; (b) eliminate transactions and balances between the host NHS body and the related funds; and (c) obtain charitable funds data in time to meet the entity's own accounts timetables.

Other business combinations (IFRS 3)

~~4.32.4.29.~~ IFRS 3, *Business Combinations*, does not apply to combinations involving entities under common control. Public sector bodies are deemed to be under common control, so IFRS 3 is applicable only to those business combinations that involve an entity or entities outside the public sector (as defined by the ONS).

~~4.33.4.30.~~ Where IFRS 3 is applicable, the combination is accounted for at fair value at the date of combination. Goodwill arising from the transaction is accounted for as an asset: it is not amortised but is subject to impairment testing as required by IAS 36 Impairment of Assets.

Subsidiaries, associates, joint ventures.

~~4.34.4.31.~~ The following [Group Accounting](#) Standards are relevant, subject to the FReM guidance on applicability:

- IFRS 10, *Consolidated Financial Statements*
- IFRS 11, *Joint arrangements*
- IFRS 12, *Disclosure of Interests in Other Entities*
- IAS 27 ~~Consolidated and~~ *Separate Financial Statements*

Formatted: Font: Italic

Formatted: Font: Italic

Formatted: Font: Italic

- IAS 28 *Investments in Associates and Joint Ventures*
- ~~IAS 31 *Interests in joint Ventures*~~
- ~~SIC 12 *Consolidation—Special Purpose Entities*~~
- ~~SIC 13 *Jointly Controlled Entities—non-monetary contributions by venturers*~~

~~4.35-4.32.~~ The group boundary is determined by the control criteria used by the ONS, rather than by reference to the Standards above.

~~4.33.~~ Public bodies that would fall to be consolidated within the group accounts under these Standards will only be consolidated BY the Department or its Agencies if they have been classified to the Departmental group by the ONS. If they are not classified in this way, an entity's investment in the subsidiary or associate should will be reported as an asset under IAS 39, *Financial Instruments: Recognition and Measurement*.

~~4.36-4.34.~~ ALBs will apply group accounting standards without adaptation or interpretation. This raises the possibility, where investments in other entities are material at the national level, that consolidation adjustments may be required between individual accounts and the consolidated account and budgets.

Merger accounting

~~4.37-4.35.~~ The FReM gives guidance on merger accounting. It is unlikely that NHS bodies will need to apply merger accounting as the arrangement applies to "machinery of Government" transactions that cross Departmental boundaries – transactions with Local Authorities will be dealt with by use of "absorption accounting". Even where the cross-Departmental arrangement applies (where merger accounting is applicable at the national account level), the local body will apply absorption accounting (see above para 4.23 et seq). The Department will however bring the transaction to account using merger accounting.

Formatted: Highlight

~~4.38-4.36.~~ NHS bodies therefore need to be aware of the circumstances in which merger accounting will be required in the group account, so that the Department can be advised of the arrangement on an individual case basis.

Business combinations etc. disclosures

~~4.39-4.37.~~ A NHS body that receives the transfer of functions, assets or liabilities must disclose:

- the fact that the transfer has taken place
- a brief description of the transfer, including:
 - the date of the transfer
 - the name of the body that transferred the function, and
 - the effect on the financial statements.

- the historical financial performance of the function, to enable users to understand the operational performance.

4.40.4.38 The party that transfers the functions, assets or liabilities outwards should provide similar disclosures. Where that body has dissolved, the final set of accounts should contain an “events after the balance sheet date” disclosure, giving this detail.

4.41.4.39 Summarisation schedules will require more a detailed analysis to enable the transitions to be reconciled between transferor and transferee.

Statement of Comprehensive Net Expenditure (SOCNE) / Statement of Comprehensive Income (SOCI)

Administration and programme expenditure analysis

~~4.42.4.40.~~ The consolidated DH group must analyse revenue and expenditure as administration or programme. Whilst the revenue and expenditure of NHS Trusts and Foundation Trusts, will be exclusively programme, other bodies are required to carry out this analysis in such a way that transactions can be eliminated correctly, by programme and admin splits, on consolidation. Detailed accounts and consolidation schedules formats and guidance are issued separately to those bodies reporting on this basis.

Gains and losses on transfers by absorption

~~4.43.4.41.~~ The general structure of the SOCNE/SOCI is given in the Chapter 5 example accounts format. A notable departure from IAS 1 formats is the presentation of gains or losses arising from transfers (of assets and liabilities) by absorption. Where these occur, the counter-entry to the SOFP addition/reduction in asset values is a credit to realised income in the year (gain) or a charge to expenditure (loss). These items are shown in the SOCNE/SOCI below net operating costs, but before "other comprehensive income". They thus impact on the performance of the entity for the year. ~~(Note the special arrangement in respect of 1 April 2013 "transition" events: paragraph 4.23 above refers).~~

~~4.44. — For NHS trusts, an adjustment to reported performance for the period is permitted: this removes the impact of such gains and losses from the reported underlying "breakeven" performance of the trust.~~

Comment [SW4]: remove to organisation-specific annex

Income

~~4.45.4.42.~~ IAS 18, *Revenue*, applies, and the classification of types of income is shown in the example accounts format. Vote-funded entities must distinguish between Parliamentary Funding and income: it is possible for entities to receive cash from the Department in either category. FReM (~~4.2.158.1.1~~) details those items that must be dealt with through the General fund and not as income. A rule of thumb is that entities will recognise income where it delivers a specific service or provides goods to the Department, using usual order and invoicing systems.

~~4.46.4.43.~~ Income and expenditure (in addition to the analysis by category required by the group account) must be analysed by intra-group or intra-WGA counter-party to permit consolidation. More detail is given on the DH website to assist with the 'Agreements of Balances' process.

~~4.47.4.44.~~ As noted above, the "gross" accounting principle applies to intra-NHS transactions. By default, income and expenditure are recorded separately and not netted off. For some transactions (for example, where a body acts as an agent for

another and receives no consideration for providing a service), it is appropriate to account “net” with the agent excluding both income and expenditure from its books.

Partially completed treatments spells [and maternity pathway transactions](#)

~~4.48-4.45~~ Partially completed treatment spells can pose practical difficulties, particularly between commissioners and providers of healthcare. Both parties should consider the terms of the contracts that they have entered into to determine how revenue should be recognised in accordance with IAS 18.

~~4.49-4.46~~ From the provider viewpoint, where it is certain to receive the income for a treatment or spell once the patient is admitted and treatment begins then the income for that treatment or spell can start to be recognised at the time of admission and treatment starting. Costs of treatment are then expensed as incurred.

4.47. Income relating to those spells which are partially completed at the financial year end should be apportioned across the financial years on a pro rata basis. This basis may be the expected or actual length of stay or may be based on the costs incurred over the length of the treatment. It is for the provider and commissioner to establish and agree a suitable pro rata basis, and where material, disclose this in the accounting policy note.

~~4.50-4.48~~ [Guidance issued by NHS England, Monitor and the Department addresses the issue of accounting for maternity pathway commissioning in the light of a potential non-symmetrical treatment by commissioners and providers. An entry on the “finman” website dated 14 March 2014 outlines the issues and suggests appropriate accounting treatments.](#)

~~4.51-4.49~~ It is of course essential that both parties share information to ensure consistent income and expenditure entries across the group.

Government grants (IAS 20) and donations

~~4.52-4.50~~ NHS bodies should apply IAS 20, *Accounting for Government Grants and Disclosure of Government Assistance*, to the treatment of government and other grants, with the following interpretations.

- The option in IAS 20 to deduct the grant from the carrying value of the asset is not permitted
- Grant income relating to assets is recognised within income when the entity becomes entitled to it. Where the grantor imposes conditions about the use and application of the grant or donation the grant is recognised as deferred and carried forward to future financial years to the extent that the condition has not yet been met.

~~4.53-4.51~~ A grant for an asset may be received subject to a condition that it is to be returned to the grantor if a specified future event does or does not occur. For example, a grant may need to be returned if the entity ceases to use the asset purchased with that grant

for a purpose specified by the grantor. In these cases, a return obligation does not arise until such time as it is expected that the condition will be breached and a liability is not recognised until that time. Such a condition would not therefore require the grant to be treated as deferred.

4.54.4.52. Credits arising from receipt of grants and donations are taken to the SOCNE/SOCI.

Statement of Financial Position (SOFP)

~~4.55-4.53~~ IAS 1, *Presentation of Financial Statements*, refers. The content and format of the SOFP is set out in HM Treasury's [Department Yellow](#) example format and reflected in Chapter 5 of this manual. The Chapter 5 format specifies the required analysis of Plant, Property and Equipment (PPE) and intangible non-current assets by category of asset.

~~4.56-4.54~~ Assets and liabilities must be analysed as "current" and "non-current" on the face of the SOFP. IAS 1 provides the following definitions:

~~4.57-4.55~~ An asset shall be classified as current when it satisfies any of the following criteria:

- it is expected to be realised in, or is intended for sale or consumption in, the entity's normal operating cycle
- it is held primarily for the purpose of being traded
- it is expected to be realised within twelve months after the end of the reporting period, or
- it is cash or a cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the end of the reporting period.

All other assets shall be classified as non-current.

~~4.58-4.56~~ A liability shall be classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the entity's normal operating cycle
- it is held primarily for the purpose of being traded
- it is due to be settled within twelve months after the end of the reporting period, or
- the entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the end of the reporting period.

All other liabilities shall be classified as non-current.

~~4.59-4.57~~ IAS 1 adds that "the operating cycle of an entity is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents" and that "when the entity's normal operating cycle is not clearly identifiable, it is assumed to be twelve months". The standard requires that where an asset or liability line in the statement of financial position combines amounts that fall due within and beyond one year, the split must be disclosed in the notes.

Statement of Comprehensive Taxpayers Equity (SOCTE)

~~4.60-4.58.~~ The relevant standards are IAS1, *Presentation of Financial Statements*, and IAS 20, *Accounting for Government Grants and Disclosure of Government Assistance*.

Points to note on the example accounts format:

- “Release of reserves to SOCNE/SOCI” shows transfers that are required e.g. on disposal of available-for-sale assets where earlier revaluation gains have been taken to the revaluation reserve
- “Reserves eliminated on dissolution” should be used only by those bodies involved in mid-year reconfigurations. It allows bodies closing before 31 March to reflect the disposal of their net assets and elimination of reserves in the period. Bodies that have merged mid-year should use this line to make adjustments for any reserves that have been eliminated as part of the merger.

“Transfers between reserves” include those:

- between the revaluation reserve and retained earnings, for the excess of current cost depreciation over the depreciation amount that would have been charged on a historic cost basis
- from the revaluation reserve to retained earnings where there is disposal of an asset with a balance in the revaluation reserve, or
- from the revaluation reserve to retained earnings in respect of “economic” impairments charged to the revenue account.

~~4.61. For NHS trusts and FTs: Public Dividend Capital (PDC) is issued only by Statutory Instrument (SI), in the case of a NHS trust's Originating Capital, or by drawing down cash from DH. Therefore, the only adjustments trusts can make to PDC balances are those notified by DH. When appropriate, “New PDC received” and “PDC repaid in year” must be gross figures. The line “PDC written off” should be used, if appropriate, for a mid-year merger and in the rare event that PDC write-off is agreed by Treasury. “Other movements in PDC in year” is used for “non-cash” PDC received on establishment.~~

Comment [SW5]: remove to organisation specific annexes

Statement of Cash Flows (SOCF)

~~4.62-4.59.~~ The relevant standard is IAS 7, *Statement of Cash Flows*. For foreign exchange entries, the relevant standard is IAS 21, *The Effects of Changes in Foreign Exchange Rates*. Points to note on the example accounts format:

- Amounts must be shown gross. This is very important for receipts and repayments of loans and PDC (where relevant), to enable DH reconciliations
- Non-cash elements of the operating surplus are now eliminated on the face of the Statement of Cash Flows
- “Net foreign exchange gains/(losses)” are those arising during the year. It does not include gains/losses accruing on the restatement of cash and cash equivalents at the end of the year (see below)
- ~~“Dividends paid” (NHS trusts, FTs) is the actual amount paid during the year~~
- **“Rental proceeds”** is cash received under rentals recognised in Note 14 “*Investment Revenue*”, that is:
 - normal planned rentals under finance leases where the NHS trust is the lessor, and
 - PFI contingent rental revenue where the NHS body sub-leases a PFI asset and where annual charges are increased by the full uplift in RPI each year.
- ~~“Public Dividend Capital received/repaid” refer only to cash movements in PDC (NHS trusts and FTs only)~~
- **“Other capital receipts”** includes government grants and donations from NHS charitable funds, to buy non-current assets
- **“Effect of exchange rate changes on the balance of cash and cash equivalents held in foreign currencies”**. This is the gain/loss on the restatement of year end cash and cash equivalent balances using foreign exchange rates ruling at the year end. This, plus the foreign exchange gains and losses, above, will equal the total “gain/loss on foreign exchange” in the “other gains and losses” note

Comment [SW6]: remove to organisation-specific annexes

~~4.63-4.60.~~ **Cash and cash equivalents** in the Statement of Cash Flows should include bank overdrafts where they are repayable on demand and form an integral part of the entity’s cash management. This is different to the treatment in the Statement of Financial Position, where IAS 39 prohibits overdrafts from being set-off in this way.

Notes to the Accounts

Note 1 - Accounting policies

~~4.64.4.61.~~ The relevant standards are IAS 1, *Presentation of Financial Statements*, and IAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*. Points to note:

- NHS bodies must use the accounting policies given in Note 1 of the example accounts in Chapter 5. This enables DH to prepare valid summarised accounts. Alternative policies are only allowed where indicated in the example accounts
- An individual policy should be omitted from the note if it has no material application in the entity.

~~4.65.4.62.~~ Extra information must be included where necessary to give a true and fair view.

Note 2 - Pooled budgets

~~4.66.4.63.~~ A “pooled budget” in the NHS context is likely to be a “joint operation” as defined by ~~the relevant standard: *is IAS 31, Interests in Joint Ventures*~~ *IFRS 11 Joint Arrangements*. Where the arrangement constitutes a “joint venture”, IAS 28 is applicable. Annex 1 refers. Points to note:

- Inclusion of a pooled budget note in the accounts is optional, where this is deemed to be a “joint arrangement”.
- When involved in such an arrangement, a NHS body must bring only its share of the transactions and balances of the arrangement to account. Where cash is held in a “pooled budget”, each party must bring its own share of that cash to account (i.e. one partner may hold cash on behalf of another, but each will bring a proportion of that cash to account).

Formatted: Font: Italic, No underline, Font color: Auto

Note 3 - Operating segments

~~4.67.4.64.~~ The relevant standard is IFRS 8, *Operating Segments*. An operating segment is a component of an entity:

- that engages in activities from which it may earn revenues and incur expenses (including revenue and expenses generated internally)
- whose operating results are regularly reviewed by the entity’s “chief operating decision maker” (CODM) to make decisions about resource allocation to the segment and assess its performance, and
- for which discrete financial information is available.

~~4.68.4.65.~~ A separate segment must be reported only if it exceeds one of the quantitative thresholds: 10% of revenue, profit/loss or assets; unless this would result in less than 75% of the body’s revenue being included in reportable segments. An “all other

segments” category must be included, as part of the reconciliation to total revenue, profit or loss, and assets.

~~4.69.4.66.~~ The amounts reported for each operating segment should be the amounts reported to the CODM. Only those elements of cost, revenue, assets and liabilities that are used by the CODM for the purposes of allocating resources and measuring performance should be given.

~~4.70.4.67.~~ The example accounts operating segments note is an example only: alternative formats can be used.

Note 4 - Income generation activities

~~4.71.4.68.~~ There is no relevant accounting standard: this note is a Treasury requirement.

~~4.72.4.69.~~ In addition to reporting operating segments under IFRS, Treasury’s FReM requires bodies to provide additional disclosures for fees and charges raised under legislation, where the full cost exceeds £1 million or the service is otherwise material in relation to the accounts. This includes NHS income generation activities. Where the additional disclosures are shown separately in the Note 3, Operating Segments, they do not need to be repeated.

Note 5 - Revenue from patient care activities

~~4.73.4.70.~~ (Not relevant for all types of entity). The relevant standard is IAS18, *Revenue*. Points to note:

- Revenue from patient transport services should only be included here by ambulance trusts. Non-ambulance trusts include patient transport services under “Other Operating Revenue”
- “Local Authorities” includes income from them under patient care joint arrangements and for delayed discharges.

~~4.74.4.71.~~ Injury costs recovery (ICR) revenue should be accrued only when form NHS2 has been received and it has been confirmed from the NHS provider’s records that injury treatment has been given. If there are discrepancies that need investigating, income should not be accrued. On average, the Compensation Recovery Unit advise that there is an ~~15.842.6%~~ (to be this figure may be updated during the year) probability of not receiving the income.

~~4.75.4.72.~~ Therefore, if it is material, ~~15.842.6%~~ of accrued ICR revenue should be included under the “Provision for impairment of receivables” heading within operating expenses. However, where providers ~~have evidence that this rate is not correct then are in a position to make a reliable estimate of their own provision percentage~~ they should use their own local information to inform the provision.

4.76.4.73. “Non-NHS – other” records all income for the provision of patient care services from sources other than those detailed above, such as prescription charges, income from social care clients and income from Scottish, Welsh and Irish bodies.

Note 6 - Other operating revenue

4.77.4.74. The relevant standard is IAS 18, *Revenue*. Points to note:

- **Education, training and research** includes income under contracts with DH from centrally held budgets and Health Education England
- **Charitable and other contributions to expenditure** is the total of all grants and other non-exchequer money received in support of the revenue activities of the entity, including transfers from grant deferred income. Where a contribution to expenditure is received in the form of a benefit in kind, the value of the benefit should be disclosed here and under the appropriate operating expenses line
- **Non-patient care services to other bodies** covers income from the provision of services such as laundry, pathology, payroll, internal audit, training, to bodies both within and outside the NHS
- **Income generation** is any income from non-patient-care activities that are designed to create surplus income, such as car-parking
- **Rental revenue** is the total revenue (normal and contingent) from operating leases where the body is the lessor. It also includes contingent rent from finance leases, but not from sub-leasing PFI where the annual payment increases annually by the full uplift of RPI (see Note 12). Guidance on this subject is given in Annex 4 to this chapter
- **Other revenue** is any income not chargeable to the above headings, such as staff payments for use of cars provided by the body, and income received directly from the Department of Health for non-patient care services. It also includes, in respect of PFI schemes:
 - the release of the deferred credits for PFI “free” lifecycle items
 - the release of deferred credits in respect of balances relating to schemes funded principally by third parties
 - the element of the unitary payment received from sub-lessee entities in respect of services

Guidance on these is in the document “Accounting for PFI under IFRS”, which is in the download/IFRS section of the finman website.

Note 7 - Revenue

4.78.4.75. The relevant standard is IAS 18, *Revenue*, paragraph 35(b).

4.79.4.76. Gross accounting is the default position for NHS bodies unless the transaction is of a non-trading nature and an organisation is deemed to be acting solely as an agent and does not gain any economic benefit from the transactions. In some circumstances, where each party agrees the accounting treatment and the sums involved, it may be appropriate to report net expenditure where entities share or jointly incur expenditure as opposed to entering into inter-authority trading transactions.

Note 8 - Operating expenses

~~4.80.4.77.~~ (The analysis will vary by types of entity, and immaterial items may be combined in accounts, but not in summarisation schedules). The relevant standards are IAS 1, *Presentation of Financial Statements*, paragraph 99 and IFRS 7, *Financial Instruments: Disclosures*, paragraph 20(e). The cost of services provided under PFI schemes should be shown under relevant headings. Operating lease rentals (normal and contingent) and finance lease contingent rentals (but not PFI contingent rentals where the annual unitary payment increases by the whole of RPI each year) should be included under the relevant heading. See [Annex 4](#) to this chapter.

~~4.81.4.78.~~ **Services from other NHS bodies** should be used only when services cannot be allocated to other expense lines. Recharges should be shown under the operating expense heading to which the recharge relates rather than under these headings.

~~4.82.4.79.~~ **Purchase of healthcare from non-NHS bodies** includes private patient care bought by the entity, and expenditure on healthcare from Scottish, Welsh and Irish health bodies.

~~4.83.4.80.~~ **Chair & Non Exec Directors (to be excluded from Employee Benefits)**: This line records the allowances paid to the Chair and non-executive directors. These are not included under employee benefits.

~~4.84.4.81.~~ **Employee Benefits**: This records all NHS body employee benefits, excluding any costs that are capitalised. It equals, and is recorded on the same basis as, the figure for non-capitalised employee benefits on the Employee Benefits Note.

~~4.85.4.82.~~ When staff are employed on research and development activities, include their cost here rather than under the "Research and development" line.

~~4.86.4.83.~~ **Supplies and services - clinical**. This is current expenditure on supplies and services for clinical use. It includes expenditure on occupational and industrial therapy materials, drugs, medical gases, dressings, X-ray equipment, and blood. It also includes expenditure under related maintenance contracts.

~~4.87.4.84.~~ **Supplies and services - general** is current expenditure on such things as cleaning equipment, materials and external contracts; food and contract catering; hardware and crockery; and staff uniforms, patient clothing, laundry and bedding and linen.

~~4.88.4.85.~~ **Consultancy services**. This line records spending on management consultancy. Please see [Annex 5](#) for a detailed description of what should be included here.

~~4.89.4.86.~~ **Establishment** is current expenditure on administrative expenses such as printing and stationery, advertising and telephones.

~~4.90-4.87~~ **Transport** includes all transport-related current expenditure, such as vehicle insurance, fuel, maintenance equipment, materials and external contracts.

~~4.91-4.88~~ **Premises** includes current expenditure on rates, electricity, gas and furnishings and fittings.

~~4.92-4.89~~ **Provision for impairment of receivables** should include ~~42-615.8~~% of accrued injury cost recovery (ICR) revenue to reflect the average value of claims withdrawn, as advised to DH by the Compensation Recovery Unit. Where a provider has evidence of its specific rate of withdrawal, that figure should be used instead. Further guidance on ICR can be found on the “finman” site at <http://www.info.doh.gov.uk/doh/finman.nsf/4db79df91d978b6c00256728004f9d6b/a47831c49cbf5c23002569ba003aaaae?OpenDocument>.

~~4.93-4.90~~ **Other auditor’s remuneration:** This excludes any internal audit costs, where not provided by an external auditor. Companies (Disclosure of Auditor Remuneration and Liability Agreements) Regulations 2008, as amended by the Companies Act (Disclosure of Auditor Remuneration and Liability Agreements) (Amendment) Regulations 2011 require, in addition to the audit fee, disclosure of non-audit fees across detailed headings. For consolidation purposes, DH collects details as analysed below, but NHS bodies will wish to consider fuller accounts disclosures in line with the Regulations:

- audit fee for associated companies
- taxation services
- IT services
- internal audit services
- valuation and actuarial services
- litigation services
- recruitment and remuneration services
- all other services

~~4.94-4.91~~ **Clinical negligence** is the entity’s contribution to the NHS Litigation Authority.

~~4.95-4.92~~ **Research and Development:** where research and development expenditure can be separated from patient care activity, it should be recorded here but the cost of staff employed on R&D activity should be included under “Other Employee Benefits” rather than here.

~~4.96-4.93~~ **Other** includes movements of provisions for emissions made under the EU Emissions Trading Scheme (see para 4.193-4.199) and compensation paid to cover debt recovery costs under the Late Payment of Commercial Debts (Interest) Act 1998. It does not include Interest on late payment of commercial debt, which is recorded under “Finance Costs” on Note 14.

Note 9 - Operating Leases

~~4.97-4.94.~~ The relevant standards are IAS 17, *Leases*, SIC 15, *Operating Leases – Incentives*, SIC 27, *Evaluation the Substance of Transactions Involving the Legal Form of a Lease*, IFRIC4, *Determining whether an Arrangement contains a Lease*.

~~4.98-4.95.~~ A contingent rent is the portion of a lease payment that is not fixed in amount but is based on the future amount of a factor that changes other than with the passage of time, such as, percentage of future sales or future price indices.

Note 10.1 - Employee benefits

~~4.99-4.96.~~ This note is a requirement of the Companies Act 2006, section 411. IAS 19, *Employee benefits*, is relevant. Points to note:

- The figures exclude non-executive directors but include executive board members and staff recharged by other NHS bodies. The total (after deduction of capitalised staff costs) will equal that for “employee benefits” in the expenses note which excludes all non-executive directors’ costs and any staff costs that have been capitalised
- Permanently employed staff – this is staff directly employed by the entity and includes staff on outward secondment or on loan to other organisations. The recovery of the cost of these staff should be netted off only where the transaction is deemed to be non-trading in nature and where the organisation is acting solely as an agent and does not gain any economic benefit from the transaction.
- The “Other” column includes those on inward secondment or loan from other organisations, agency staff and those engaged on a contract to undertake a project or other temporary task. It does not include amounts payable to contractors for services, that is, where the staff remain under the control of the contractor
- “Salaries and wages” exclude termination benefits (redundancy payments) and the value of non-monetary benefits
- “Social security costs” is the total of the employer’s national insurance contributions net of statutory maternity pay deductions
- “Employer contributions to NHS Pension Scheme” does not include early retirement costs
- “Other pension costs” includes early retirement costs and pension costs to non-NHS schemes, such as a local government scheme
- A line has been provided for “other post-employment benefits”, although NHS bodies are unlikely to have anything to record. IAS 19 gives the examples of post-employment life insurance and medical care

- Termination benefits will include redundancy payments, MARS and compensation for loss of office.

Note 10.2 - Staff numbers

~~4.100-4.97.~~ This note is a requirement of the Companies Act 2006, section 411. Points to note:

- This note is analysed over the same column headings as employee costs, above, and the same definitions apply. Staff on outward secondment should not be included in the average number of employees
- In allocating employees to categories, the employee definitions should be those in the Information Centre's Occupational Code Manual: <http://www.ic.nhs.uk/statistics-and-data-collections/data-collections/information-supporting-our-data-collections>
- The average number of employees is calculated as the whole time equivalent number of employees under contract of service in each week in the financial year, divided by the number of weeks in the financial year. The "contracted hours" method of calculating whole time equivalent number should be used, that is, dividing the contracted hours of each employee by the standard working hours.

Ill health retirements

~~4.101-4.98.~~ The number of people retired of ill health grounds and the associated additional accrued pension liabilities should be disclosed. Further information and guidance on completion of this note will be issued at year-end on the "finman" website.

Note 10.3 - Staff Sickness disclosures

~~4.102-4.99.~~ NHS bodies are also required to make a report on staff sickness. This disclosure is not necessarily required in the accounts themselves but must be included in the annual report and on summarisation schedules. Details of the disclosure are included in the guidance for summarisation schedules.

Note 10.4 - Exit Packages

~~4.103-4.100.~~ NHS bodies must provide an analysis of exit packages agreed during the financial year. The bandings for these are set out in the example contained in Chapter 5. Exceptionally in the accounts, this note is not on an accruals basis, rather it should be completed on the basis of the date when an agreement for the departure was made.

Note 10.5 – Pension costs

~~4.104.4.101. The relevant standard is IAS 19, Employee Benefits. A standard pensions disclosure note is provided each year by NHS BSA and this is made available on the 'finman' website.~~

Note 10.56 – Severance payments

4.102. [Guidance to follow] From 2013-14, additional disclosures in respect of departures agreed in the year that are not compulsory departures are required.

4.103. This note discloses the number of non-compulsory departures which attracted an exit package in the year, and the values of the associated payment(s) by individual type.

4.104. The note is prepared on the same basis as Note 10.4 i.e. showing the exit packages **agreed** in the year, irrespective of the actual date of accrual or payment.

4.105. The total value in this Note should agree with the Total Resource Cost for Other Departures Agreed in Note 10.4. However, there are likely to be differences in the component numbers as Note 10.4 relates to the number of individuals receiving an exit package while this note gives the number for each component. As a single exit package is likely to be made up of several components each of which will be counted separately, the total number is likely to be higher than the number of individuals.

4.106. Contractual payments relating to individual contractual entitlements are to be disclosed in the following categories:

- voluntary redundancies including early retirement costs (the cost to be used must include any top-up to compensation provided by the employer to buy out the actuarial reduction on an individual's pension)
- mutually agreed resignations (MARS)
- early retirements in the efficiency of the service and payments in lieu of notice (contractual)

4.107. Exit payments made following an Employment Tribunal or court order are also included. Any such payments are considered contractual as the orders have to be paid by the party against whom the order is made, although may relate to compensation for loss of office.

4.108. Non-contractual payments are those made outwith contractual or legal obligation, including those from judicial mediation. Pre-authorisation from the HM Treasury (or the parent body for cases below de minimis limits) must be sought for such payments before they are agreed with the employee. In the footnote the amount of any non-contractual payments in lieu of notice are to be listed. A further footnote discloses the number and value of non-contractual payments made to individuals where the payment was more than 12 months annual salary. The reference salary for this disclosure is the annualised

Formatted: List bullet1

salary at the date of termination of employment, and excludes bonus payments and employer's pension contributions.

4.109. It follows that for any values included here, working papers will document the relevant approval for the payment.

Note 10.65 - Pension costs

4.105-4.110. The relevant standard is IAS 19, *Employee Benefits*. A standard pensions disclosure note is provided each year by NHS BSA and this is made available on the 'finman' website.

Formatted: Outline numbered + Level: 2 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.4 cm + Indent at: 1.4 cm

Note 11.1 - Better Payment Practice code – measure of compliance

4.106-4.111. The note reports compliance with the better payment practice code in respect of invoices received from both NHS and non-NHS trade creditors. The code is summarised as:

- Target: pay all NHS and non-NHS trade creditors within 30 calendar days of receipt of goods or a valid invoice (whichever is later) unless other payment terms have been agreed
- Compliance: at least 95% of invoices paid (by the bank automated credit system or date and issue of a cheque) within thirty days or within agreed contract terms.

Points to note:

- The note must relate to all invoices paid during the year, excluding those issued up to 31 March that are in dispute at the year-end
- Further details and guidance on the Better Payment Practice Code and "A User's Guide to late payments legislation" can be found at <http://www.payontime.co.uk>.

Note 11.2 - The Late Payment of Commercial Debts (Interest) Act 1998

4.107-4.112. The Late Payment of Commercial Debts (Interest) Act 1998 allows entities to claim interest on the late payment of debts by contracting partners.

Note 12 - Investment revenue

4.108-4.113. The relevant standards are IAS 17, *Leases*, IAS 18, *Revenue*, paragraph 35(b), IFRS 7, *Financial Instruments: Disclosures*, paragraphs 20(b) and (d).

4.109-4.114. PFI contingent rental revenue is the contingent rent received under a PFI sublease under which the annual payment increases by the whole RPI uplift each year. See [Annex 4, Lease Accounting Entries](#), below.

4.110-4.115. Other finance lease revenue is the finance cost element of finance leases where the entity is the lessor.

4.111-4.116. **“Other loans and receivables”** includes the interest element of finance leases where the entity is the lessor.

4.112-4.117. Where any financial asset has been impaired (directly or through the “provision for impairment of receivables” account) any investment revenue receivable (e.g. interest; unwinding of discount on long-term financial asset) should be disclosed under “impaired financial assets” in this note.

Note 13 - Other gains and losses

4.113-4.118. The relevant standards are IAS 1, *Presentation of Financial Statements*, paragraph 98(c) and (d), and IFRS 7, *Financial Instruments: Disclosures*, paragraph 20. Realised overage should be included as a gain on disposal of property.

4.114-4.119. Guidance on financial instruments is given in [Annex 3, Financial Instruments](#), below.

Note 14 - Finance costs

4.115-4.120. The relevant standard is IFRS 7, *Financial Instruments: Disclosures*, paragraph 20(b)

4.116-4.121. Interest on loans includes interest payable on loans received under the capital loans and deposits scheme.

4.117-4.122. Guidance for “interest on obligations under PFI contracts” is available in the document “Accounting for PFI under IFRS”, which is available on the download/IFRS section of the “finman” website.

4.118-4.123. Interest on late payment of commercial debt must equal the amount disclosed in the note “The Late Payment of Commercial Debts (Interest) Act 1998.

4.119-4.124. Other interest expense includes interest on early retirements payable over five instalments.

4.120-4.125. Other finance costs include unwinding of the discount on provisions and the net finance cost of non-NHS pension schemes (see [Annex 2, Accounting for Defined Benefit Pension Schemes](#)).

Note 15 - Property, plant and equipment

4.121-4.126. The relevant standard is IAS 16, *Property, Plant and Equipment*, and IFRS 5, *Non-current assets held for sale and discontinued operations*. NHS bodies are required to follow the revaluation model. FReM guidance [\(6.2.7\)](#) and the associated

Formatted: No underline, Font color: Auto, Highlight

guidance on the Treasury website refers. [Annex 7, Valuation Issues](#), discusses revaluation issues in the NHS context.

~~4.122-4.127.~~ For “in use” non-specialised property assets fair value should be interpreted as market value for existing use. For specialised property for which no effective market exists, “fair value” is deemed to be the depreciated replacement cost for a modern equivalent asset (i.e. one that is capable of delivering the same throughput or volume of service).

~~4.123-4.128.~~ Note that a Treasury consultation is underway in 2013-14, consequent on the issue of IFRS 13, *Fair Value*. FReM amendments in the future are likely to include adaptations and interpretations of this standard for the public sector.

~~4.124-4.129.~~ The example accounts format at Chapter 5 provides the categorisation of PPE into the required headings.

~~4.125-4.130.~~ Asset transactions between NHS bodies must be dealt with as non-cash transfers, accounted for under the absorption accounting methodology (where these are in connection with a transfer of functions or “machinery of Government” change).

~~4.126-4.131.~~ Disposals by sale do not feature in this note as assets are reclassified as “non-current assets held for sale” before the sale.

~~4.127-4.132.~~ Charges on properties will result in the property being included in this note if the conditions of IFRIC 12 (as adapted by the FReM) or IFRIC 4 apply. See the guidance Accounting under IFRS for properties where a body holds a legal charge on the Download/IFRS section of the Finman website.

~~4.128-4.133.~~ **Land** includes land underlying buildings. Land underlying or associated with dwellings should be separately disclosed.

~~4.129-4.134.~~ **Dwellings** are buildings used entirely or primarily as residences. Include any associated structures, such as garages, and parking areas.

~~4.130-4.135.~~ **Assets under construction** include contributions of land and cash to PFI and LIFT schemes until the property is made available to the entity.

~~4.131-4.136.~~ **Transport equipment** is equipment for moving people and/or objects, for instance cars, ambulances.

~~4.132-4.137.~~ **Information technology** relates to hardware used for processing data and communications. Where purchased software is integral to the operation of hardware, for example operating system software, the cost should be capitalised as part of that item of property, plant and equipment.

~~4.133-4.138.~~ **Reclassifications** are the movement of assets from one category to another within the entity. The most likely occurrence is from assets under construction to buildings, on completion of construction.

~~4.134-4.139.~~ **Reclassified as held for sale.** This line removes assets from “property plant and equipment” when they become available for sale, as defined by IFRS 5.

~~4.135-4.140.~~ Points to note for the cost or valuation section of the table:

- Cumulative depreciation
 - Cost and cumulative depreciation balances must be carried forward, without adjustment, from year to year, hence:
 - Adjustments to cumulative depreciation balances are made in-year (at the date of revaluation);
 - On formal revaluation (as opposed to indexation), cumulative depreciation is “zeroed” as an in-year movement. A corresponding adjustment to the “cost” lines ensures that the “zeroing” arrangement does not itself distort net book values.
 - A revalued asset may attract further depreciation charges after “zeroing” at the date of revaluation, such that (depending on the date of revaluation) some cumulative depreciation may still be attached to the asset at the year-end.
- Revaluation gains. NHS bodies are required to ensure that assets are carried at a valuation using a suitable method selected by them. Where indices are used, these should be widely recognised and in common use. The source of the index should be disclosed in the narrative to the note in the accounts. The revaluations line should only be used for upward revaluations, and even so, only when the upward revaluation is not the reversal of an impairment.
- Impairments relate to impairment losses charged to reserves. This includes downward revaluations.
- Reversals of impairments relates to increases in the value of assets that reverse earlier impairments taken to reserves.

Points to note for the depreciation section of the table:

- Depreciation at 1 April XX is used for opening depreciation relating to plant and machinery, transport and equipment, information technology, and furniture and fittings. No cumulative depreciation should be carried forward for land, buildings and dwellings where these have been revalued in the period.
- Impairments relates to impairment losses charged to expenditure. Note the FReM adaptation of IAS 36, *Impairment of Assets*, outlined in Chapter 3. Economic losses are always taken, in full, to the SOCNE/SOCI as a realised operating expense in the year, even if the revaluation reserve is in credit. This contrasts with the Standard’s approach, which takes losses to the revaluation reserve in the first instance. The FReM brings the SOFP in line with one

prepared under IAS 36 by requiring a subsequent transfer of a balance from the revaluation reserve to the General Fund/Retained Earnings

- Reversal of impairments relates to increases in the value of assets that reverse earlier impairments taken to expenditure.

Capitalisation threshold of non-current assets – de minimis limits

~~4.136-4.141.~~ NHS bodies adopt a capitalisation threshold of £5,000. This figure includes VAT where it is not recoverable.

Grouped assets

~~4.137-4.142.~~ "Grouped assets" are a collection of assets which individually may be valued at less than £5,000 but which together form a single collective asset because the items fulfil all the following criteria:

- the items are functionally interdependent
- the items are acquired at about the same date and are planned for disposal at about the same date
- the items are under single managerial control, and
- each individual asset thus grouped has a value of over £250.

IT assets

~~4.138-4.143.~~ It is expected that IT hardware will be considered interdependent if it is attached to a network, the fact that it may be capable of stand-alone use notwithstanding. The effect of this will be that all IT equipment purchases, where the final three criteria listed above apply, will be capitalised.

Initial equipping and setting-up costs of a new building

~~4.139-4.144.~~ Assets which are capital in nature, but which are individually valued at less than £5,000 but more than £250, may be capitalised as collective, or "grouped", assets where they are acquired as part of the initial setting-up of a new building. The enhancement or refurbishment of a ward or unit should be treated in the same way as "new build", provided that the work would be considered as "subsequent expenditure" in IAS16 terms.

Note 16 - Intangible Non-Current assets

~~4.140-4.145.~~ The relevant standards are IAS 38, *Intangible Assets*, and SIC 32, *Intangible Assets – Web Site Costs*.

~~4.141-4.146.~~ Guidance under Note 15: Property Plant and Equipment is generally applicable. The same points as for property plant and equipment, apply in respect of donated assets; disposals; reclassifications; reclassified as held for sale; impairments and reversals of impairments.

~~4.142-4.147.~~ Where there is an active market, intangible assets must be carried at a market value. In all other respects, the guidance above, for "Property Plant and Equipment", applies.

~~4.143~~~~4.148~~. CRC and EU Emissions Trading Scheme allowances should be included here (under “licences”) if they are not expected to be realised within twelve months of the end of the reporting period.

Economic Lives of Non-Current Assets

~~4.144~~~~4.149~~. The range of the remaining economic lives of non-current assets used by NHS bodies should be disclosed below the non-current assets Note, together with other revaluation details.

Note 17 - Analysis of impairments and reversals

~~4.145~~~~4.150~~. The relevant standard is IAS 36, *Impairment of Assets*, paragraph 130. Downward revaluations are included in impairments. However, the Treasury FReM has a public sector-specific adaptation of the Standard (see Chap 3 on IAS 36) which follows more closely the UK GAAP treatment. An impairment arising from the consumption of economic resources will be taken in full to the revenue account, whatever the state of the associated revaluation reserve. Where a balance exists on the revaluation reserve, this is transferred to the General Fund/Retained Earnings Reserve (the transfer being equal to the lower of: (a) the amount charges to expense as impairment and (b) the balance remaining on the revaluation reserve that relates to the asset). Price/market movement impairments should be taken to the revaluation reserve, to the extent that a balance on that reserve exists. The revaluation reserve should not show a negative balance.

~~4.146~~~~4.151~~. More detailed guidance and definitions on the components of this note is issued separately as part of summarisation schedule completion guidance.

Note 18 - Investment property

~~4.147~~~~4.152~~. The definition of investment property in IAS 40, *Investment Property*, applies. The property is held “to earn rentals or for capital appreciation, or both, rather than for: (a) use in the production or supply of goods or services or for administrative purposes: or (b) sale in the ordinary course of business.

Note 19 - Commitments

~~4.148~~~~4.153~~. For capital commitments, the relevant standards are IAS 16, *Property, Plant and Equipment*, paragraph 74(c) and IAS 38, *Intangible Assets*, paragraph 122(e).

~~4.149~~~~4.154~~. Other commitments (excluding leases, PFI and LIFT) under non-cancellable contracts are also shown.

Note 19.1 - Capital commitments.

~~4.150~~~~4.155~~. IAS 16 (para 74c) and IAS 38 (para 122e) require that the contractual commitments at the year end to purchase property, plant and equipment and intangible

assets are disclosed. An asset provided under a finance lease does not give rise to statement of financial position entries in respect of the creation of the non-current asset and its related capital creditor until the asset is delivered and is operational in the entity's hands. When a NHS body has signed an "on-balance sheet" finance lease contract in the accounting period (whether PFI or other), but the asset does not become operational until a future period, a disclosure in the format provided in Chapter 5 should be included as a note to the Accounts.

Note 20 - Intra Government and other balances

4.151-4.156. This note is a FReM requirement. Intra-government balances are defined as balances between the reporting entity and other bodies within the boundary set for the whole of government accounts. Details of this boundary and a full list of public corporations and trading funds are available on the Treasury website at: http://www.hm-treasury.gov.uk/wga_guidance_centralgov.htm

4.152-4.157. The disclosure should be analysed between:

- balances with other central government bodies
- balances with local authorities
- balances with NHS Bodies
- balances with public corporations and trading funds
- balances with bodies external to government .The current/non-current totals must agree to the current/non-current totals at Notes 22.1 and 27.

Note 21 - Inventories

4.153-4.158. The relevant standard is IAS 2, *Inventories*. The example accounts provide the headings thought to be most relevant to NHS bodies. Where other categories of material amounts of inventory are held the accounts, the format should be expanded to include these.

4.154-4.159. Work-in-progress is the value of items in the process of manufacture. It does not include partially completed episodes of healthcare.

Note 22.1 - Trade and other receivables

4.155-4.160. The relevant standards are IAS 1, *Presentation of Financial Statements*, paragraph 78(b) and IFRS 7, *Financial Instruments Disclosures*, paragraph 36. Receivables from Scottish, Welsh and Irish health bodies should be treated as non-NHS.

4.156-4.161. Prepayments and accrued income includes PFI lifecycle items received later than planned. Guidance is given in the document "Accounting for PFI under IFRS", which is on the download/IFRS section of the finman website.

~~4.157-4.162.~~ Other receivables includes operating lease receivables and income due from the Compensation Recovery Unit under the Injury Costs Recovery Scheme.

Note 22.2 - Receivables past their due date but not impaired

~~4.158-4.163.~~ The relevant standard is IFRS 7, *Financial Instruments: Disclosures*, paragraph 37(a).

Note 22.3 - Provision for impairment of receivables

~~4.159-4.164.~~ The relevant standard is IFRS 7, *Financial Instruments: Disclosures*, paragraph 16. The term "impaired" is used in the standard; this includes the write-off or provision for an irrecoverable debt.

~~4.160-4.165.~~ Amount written off during the period refers to receivables written off that were included in the provision. When included in the provision the entries would have been:

Dr SOCNE/SOCI
Cr Provision for impairment of receivables

At write-off, the entries are:

Dr Provision for impairment of receivables
Cr Receivables

~~4.161-4.166.~~ "Amount recovered during the year" refers to income received in respect of receivables that were included in the provision. When included in the provision the entries would have been:

Dr SOCNE/SOCI
Cr Provision for impairment of receivables

At write-back, the entries are:

Dr Provision for impairment of receivables
Cr SOCNE/SOCI

And, (on payment):

Dr Cash
Cr Receivables

Note 23 - NHS LIFT investments

~~4.162-4.167.~~ This note gives details of any LIFT investments held by the entity. Details of investments held at the closing Statement of Financial Position date should be disclosed in the accounts and analysed by equity shareholding and loan-stock holding.

Note 24 - Other financial assets

~~4.163~~4.168. The relevant standards ~~are is~~ IFRS 7, *Financial Instruments: Disclosures*, paragraph 8, IAS 32, *Financial Instruments: Presentation*, IAS 39, *Financial Instruments: Recognition and Measurement*, and IFRIC 9, *Reassessment of Embedded Derivatives*.

~~4.164~~4.169. Guidance on financial instruments is given in [Annex 3, Financial Instruments](#). Financial assets carried at fair value through profit or loss includes embedded derivatives.

Note 25 - Other current assets

~~4.165~~4.170. The relevant standard is IAS 1, *Presentation of Financial Statements*, paragraph 77.

~~4.166~~4.171. EU Emissions Trading Scheme allowances should be included here when they are expected to be realised within twelve months of the end of the reporting period. Further guidance on accounting for EU ETS can be found at [Annex 3](#).

Note 26 - Cash and cash equivalents

~~4.167~~4.172. The relevant standard is IAS 7, *Statement of Cash Flows*.

~~4.168~~4.173. The definition of cash and cash equivalents may be different between the Statement of Financial Position and the Statement of Cash Flows due to the treatment of bank overdrafts. Where overdrafts are used as part of day-to-day cash management, then they may be included within cash and cash equivalents in the Statement of Cash Flows. However, for the Statement of Financial Position, bank overdrafts are included under "borrowings". This note reconciles the two.

~~4.169~~4.174. The figure for "Current Investments" should capture only cash equivalent balances that fall within the definition in IAS 7: "Short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value".

~~4.170~~4.175. There should be no "cash equivalents" balances included in the lines for cash at GBS and cash at bank and in hand, notwithstanding that some cash-equivalents may be held in commercial bank accounts.

Note 27 - Non-current assets held for sale

~~4.171~~4.176. The relevant standard is IFRS 5, *Non-current Assets Held for Sale and Discontinued Operations*. A "disposal group" is a group of assets to be disposed of (by sale or otherwise) together as a group in a single transaction. Associated liabilities are liabilities directly associated with those assets that will be transferred in the transaction.

Note 28 - Trade and other payables

~~4.172-4.177.~~ The relevant standard is IAS 1, *Presentation of Financial Statements*, paragraph 77. Payables to Scottish, Welsh and Irish health bodies should be treated as non-NHS.

Note 29 - Other liabilities

~~4.173-4.178.~~ The relevant standard is IAS 1, *Presentation of Financial Statements*, paragraph 77.

~~4.174-4.179.~~ The "PFI asset – deferred credit" line reflects free lifecycle items and balances relating to schemes funded principally by third parties. Guidance on these is in the document "Accounting for PFI under IFRS" on the download/IFRS section of the finman website.

~~4.175-4.180.~~ Pension liabilities (non-NHS scheme) should be included under "Other".

Note 30 - Borrowings

~~4.176-4.181.~~ The relevant standard is IAS 1, *Presentation of Financial Statements*, paragraph 77.

~~4.177-4.182.~~ Bank overdrafts include any cash balances that are negative in the entity's books, regardless of whether there is a formal overdraft with the bank.

~~4.178-4.183.~~ Guidance on PFI lifecycle costs is given in "Accounting for PFI under IFRS", which is available on the Download/IFRS section of the finman website.

Note 31 - Other financial liabilities

~~4.179-4.184.~~ The relevant standard is IFRS 7, *Financial Instruments: disclosures*, paragraph 8 (e).

~~4.180-4.185.~~ Guidance on financial instruments is provided at [Annex 3, Financial Instruments](#).

Note 32 - Deferred income

~~4.181-4.186.~~ This note tracks movements in deferred income balances.

Note 33 - Finance obligations (as lessee)

~~4.182-4.187.~~ The relevant standards for this note are IAS 17, *Leases*, SIC 27, *Evaluating the Substance of Transactions Involving the Legal Form of a Lease* and IFRIC 4, *Determining whether an Arrangement contains a Lease*.

~~4.183-4.188.~~ The minimum lease payments are:

- the payments over the term of the lease,

- less the following:
 - contingent rent;
 - costs for services;
 - costs that will be reimbursed;
 - any amounts guaranteed by the other party or a related party to them, and,
 - where the lessee has the option to purchase the asset at a price that makes it reasonably certain at the inception of the lease that the option will be exercised, the payment to exercise the option.

~~4.184-4.189.~~ Minimum lease payments are shown in those columns undiscounted: discounting is applied under “less future finance charges” to bring the total to a discounted (present value) figure.

~~4.185-4.190.~~ The present values of minimum lease payments are the “minimum lease payments” discounted to present value. As the discounting has been applied in these three rows, no entry is required against “less future finance charges”.

~~4.186-4.191.~~ A general description of significant lease arrangements should also be included in this note.

Note 34 - Finance lease receivables as lessor

~~4.187-4.192.~~ The note should include a reconciliation between the gross investment in finance leases at the Statement of Financial Position date and the present value of the minimum lease payments receivable at the Statement of Financial Position date.

Note 35 - Provisions

~~4.188-4.193.~~ The relevant standard is IAS 37, *Provisions, Contingent Liabilities and Contingent Assets*. IAS 19, *Employee benefits*, is also relevant.

~~4.189-4.194.~~ “Other” includes provisions for emissions under the EU Emissions Trading Scheme.

~~4.190-4.195.~~ There is no need to provide a disclosure of the movements in provisions in the prior year because IAS37 (paragraph 84) provides an exemption from the general IAS 1 requirement for comparative information.

~~4.191-4.196.~~ Treasury requires the expected timing of cash flows to be stated in relation to the remainder of the current Spending Review period then five yearly periods rather than the time bands required by IAS 37. The relevant periods are given in the example accounts at chapter 5. In addition, the timing of expected cashflows determines the current & non-current split required for the accounts.

~~4.192.~~ Where the time value of money is material, futures cashflows are discounted. Treasury issues guidance on appropriate discount rates, and this is summarised below at [Annex 6, Treasury Discount Rates](#).

Formatted: Indent: Left: 0.63 cm,
Hanging: 0.76 cm, No bullets or
numbering

|

4.194. ~~Clinical negligence provisions~~

~~4.195-4.197.~~ Where the NHS Litigation Authority has assumed responsibility for settlement of claims, the relevant provisions will be brought to account by the NHSLA. NHS bodies should however disclose, within the provisions note, the value of those liabilities recognised by the NHSLA on their behalf. The NHS Litigation Authority will provide the figure for the narrative disclosure of clinical negligence liabilities each year.

Carbon Reduction Commitment Energy Efficiency Scheme (CRC)

~~4.196-4.198.~~ The CRC scheme is a mandatory cap and trade scheme for non-transport CO² emissions. Where NHS organisations are registered with the CRC scheme, they are required to surrender to the government an allowance for every tonne of CO² they emit during the financial year. Therefore, in line with IAS 37, *Provisions, contingent liabilities and contingent assets*, NHS organisations should recognise a liability (and related expense) in respect of this obligation as CO² emissions are made.

~~4.197-4.199.~~ The scheme is operated by the Environment Agency. Full details of the CRC Scheme are available at the Agency's website: <http://www.environment-agency.gov.uk/crc>.

4.198. ~~The FReM guidance is as follows:~~

- Participation by reporting entities in the CRC Scheme gives rise to an asset for allowances held, and for a liability, which is recognised (as emissions are generated) for the surrender of the allowances to the CRC Registry
- CRC Scheme assets are classified as either current or non-current intangible assets, or if held for the purpose of trading, as a current asset. The asset, whether classified as a current or as an intangible (current or non-current) asset shall be measured initially at cost. Allowances that are issued for less than their fair value shall be measured initially at their fair value, with the difference between fair value and the purchase price recognised as income
- Scheme assets in respect of allowances shall be revalued at fair value where there is evidence of an active market. Where there is no evidence of an active market, scheme assets in respect of allowances shall be measured at cost, as a proxy for fair value.

~~4.199-4.200.~~ The carrying amount of the liability at 31 March ~~2014-2015~~ will, therefore, reflect the CO² emissions that have been made during ~~2013-14-14-15~~

~~4.200-4.201.~~ The liability will be measured at the amount expected to be incurred in settling the obligation. Where there is evidence of an active secondary market for CRC allowances, they should be measured subsequently at fair value. If there is no evidence of an active secondary market, then the allowances should be measured at cost, less impairment.

Note 36 - Contingencies

~~4.201.4.202.~~ The relevant standard is IAS 37, *Provisions, contingent liabilities and contingent assets*. The likely outcome of a contingency will usually be based on legal advice, and disclosure is only required where an inflow of resources is probable, should the contingent event occur.

~~4.202.4.203.~~ "Overage" in property transactions is a contingent asset.

Note 37 - PFI and LIFT - additional information

~~4.203.4.204.~~ The relevant standards are IFRIC 12, *Service Concession Arrangements*, and SIC 29, *Service Concession Arrangements: Disclosures*.

~~4.204.4.205.~~ Discounting: where a discount rate implicit in the transaction cannot be established, the Treasury discount rate used for investment appraisal and arriving at current asset/liability values is used. Treasury "Green Book": [Green Book - HM Treasury refers](#).

~~4.205.4.206.~~ NHS bodies should apply both Treasury's guidance Accounting for PPP arrangements, including PFI contracts, under IFRS, in chapter [6-7 \(7.1.44 et seq\)](#) of [the Government Financial Reporting Manual](#) (FRoM) at www.financial-reporting.gov.uk and DH guidance Accounting for PFI/LIFT under IFRS on the download/IFRS section of [finman](#).

~~4.206.4.207.~~ IFRIC 12 applies to service concession arrangements for infrastructure assets.

Recognition of assets under PPP or PFI arrangements

~~4.207.4.208.~~ ~~An amendment to the FRoM (6.2.54)~~ notes that the grantor (under a service concession arrangement) should recognise the infrastructure as a non-current asset and value it in the same way as other non-current assets of that generic type. The asset will be recognised when:

- it is probable that future economic benefits associated with the asset will flow to the organisation, and
- the cost of the asset can be measured reliably.

~~4.208.4.209.~~ The grantor should consider the asset recognition criteria, together with the specific terms and conditions of the binding arrangement, when determining whether to recognise the service concession asset during the period in which the asset is constructed or developed. If the asset recognition criteria have been met a work-in-progress service concession asset and associated liability should be recognised. If not and the grantor makes contributions to the operator in advance of the asset coming into use, the grantor should account for those payments as prepayments and then set against the finance lease liability established when the asset is recognised.

~~4.209-4.210.~~ Any embedded derivatives in the arrangement and any guarantees to the operator must be accounted for under financial instrument standards (IAS 32 and IAS 39). Guidance on financial instruments is provided in [Annex 3, Financial Instruments](#).

~~4.210-4.211.~~ Enhancements/additions to on-Statement of Financial Position PFI assets that are financed through the unitary charge should be recognised when they are provided. Those financed by the NHS body should be recognised as its own asset.

Note 38 - Impact of IFRS treatment

~~4.211-4.212.~~ This note reflects budgetary information that was collected as management information in previous years. It identifies impacts to revenue expenditure flowing from the implementation of IFRS and where DH budgetary treatments may differ from the IFRS treatment. Under alignment/CLOS this data forms part of the Department's Resource Account and so is now included as an auditable part of the Annual Accounts format.

~~4.212-4.213.~~ Detailed guidance on the completion of this note is included separately in the summarisation schedule guidance. Comparator figures are not required for prior years as the disclosure (a) is not required by IFRS and (b) only current year information is of relevance to the Department.

Note 39 - Financial Instruments

~~4.213-4.214.~~ The relevant standards are IAS 32, *Financial Instruments: Presentation*, IAS 39, *Financial Instruments: Recognition and Measurement*, IFRS 7, *Financial Instruments: Disclosures* and, IFRIC 9, *Reassessment of Embedded Derivatives*.

~~4.214-4.215.~~ The disclosures in this note apply to all the entity's financial instruments except:

- interests in subsidiaries, associates and joint ventures where they are consolidated, partially consolidated or equity-accounted; and
- employers' rights and obligations under employee benefit plans.

~~4.215-4.216.~~ They therefore apply to financial instruments whose accounting is unchanged by the financial instrument standards, such as current payables and receivables, and financial instruments that are measured under other standards, such as provisions arising under contracts, finance leases and PFI liabilities. See paragraph 7 of [Annex 3, Financial Instruments](#) for the full list of financial instruments.

~~4.216-4.217.~~ Borrowings includes financial liabilities under PFI contracts and finance leases.

Note 40 - Events after the reporting period

4.217-4.218. The relevant standard is IAS 10, *Events after the Reporting Period*. Adjusting events will be reflected in the financial statements.

4.218-4.219. Where non-adjusting events after the reporting period are so material that non-disclosure could influence the economic decisions of users taken on the basis of the financial statements, the following information is required:

- the nature of the event, and
- an estimate of its financial effect, or a statement that such an estimate cannot be made.

4.219-4.220. NHS bodies should disclose the date when the financial statements were authorised for issue and who gave that authorisation (IAS 10.17).

Note 41 - Related party transactions

4.220-4.221. Related party disclosures must be in accordance with IAS 24, *Related Party Disclosures*.

4.221-4.222. HM Treasury considers Government Departments and their agencies, and Department of Health Ministers, their close families and entities controlled or influenced by them, as being parties related to NHS bodies.

4.222-4.223. A disclosure is required if a transaction (or series of transactions) is material on either side, i.e. if a transaction is immaterial from the entity's perspective but material from a related party viewpoint then the entity must disclose it.

4.223-4.224. NHS bodies must disclose as a related party all linked charities (where these are not consolidated) including the nature of the relationship, and details of material transactions between the body and the linked charity.

Note 42 – Losses and special payments

4.224-4.225. HM Treasury's *Managing Public Money* and detailed summarisation schedule completion guidance on the subject should be followed. The example accounts format at Chapter 5 illustrates the contents of this disclosure. Figures recorded here are recorded on an accruals basis.

4.225-4.226. The relevant standard is IAS1, *Presentation of Financial Statements*, paragraph 77.

Note 43 - Performance information (NHS trusts only)

4.226-4.227. The performance outturn against targets listed below are reported in this note by NHS trusts. These results form part of the NHS trust's annual report and accounts. Detailed descriptions of their operation and instructions on the completion of the note are given in the trust-specific summarisation schedules completion guidance.

- Breakeven performance
- Capital cost absorption rate
- External financing limit
- Capital Resource limit

Note 44 - Third party assets

~~4.227-4.228.~~ This note is a HMT requirement. Third party assets are assets held by the entity on behalf of a third party. Examples are money held on behalf of patients, or balances belonging to other parties to a pooled budget where the organisation is the host. Third party assets are not recognised in the entity's SOFP.

Chapter 4 Annex 1: Pooled Budgets

The relevant standard is ~~IAS 31, *Interests in Joint Ventures*~~. ~~IFRS 11, *Joint Arrangements*~~

1. A pooled budget is not an entity in its own right and ~~so will fall into the IAS31 category “jointly controlled operations” (IAS 31.13-17) or, if there is joint control or joint ownership of assets, the IAS31 category “jointly controlled assets” (IAS 31.18-23) is likely to fall into the category “joint operation” under the Standard.~~
2. If the entity is in a “jointly controlled operation”, it must recognise in the financial statements:
 - the assets the entity controls
 - the liabilities it incurs
 - the expenses it incurs
 - its share of the income from the pooled budget activities.
3. If the entity is involved in a “jointly controlled assets” arrangement, in addition to the above, the following must be recognised:
 - the entity’s share of the jointly controlled assets (classified according to the nature of the assets)
 - its share of any liabilities incurred jointly
 - its share of the expenses jointly incurred.
4. It is for the entity to decide whether to include in the financial statements a policy note on the subject and a note of the income and expenditure and balances of the pooled budget. There is no IFRS requirement to do so but, either way, working papers will be needed to support accounts entries that result from pooled budget activities.
5. It is important to remember that a pooled budget is simply an aggregation of balances that belong to the pooled budget partners rather than an entity in its own right. For example, if cash is injected into a pooled budget and this is used to contribute to the purchase of an asset and to buy services, with some cash held at the year end, the financial statements must include:
 - the share of the asset purchased (plus share of the depreciation and any change in value)
 - the expenditure (and payables, if relevant) on which the cash has been used
 - an appropriate share of income (and receivables, if relevant) in line with the pooled budget agreement
 - the cash balance remaining at year-end, even if this is held on an agency basis by a pooled budget partner (in their financial statements the cash would be a “Third Party Asset”).

Formatted: Font: Italic, No underline,
Font color: Auto

6. An entity may purchase services available under a pooled budget of which it is a partner. The expenditure on the services will become income of the pooled budget, of which the entity will be due a share as a partner of the pooled budget. Similarly, if the entity owes money for services provided under the pooled budget, the creditor balance in its books will be a debtor balance of the pooled budget, of which it owns a share. The agreement of balances exercise will only apply to the share owned by other partners of the pooled budget.

Chapter 4 Annex 2: Accounting for Defined Benefit Pension Schemes

1. The relevant standard is IAS19, *Employee Benefits*. The FReM requires NHS bodies to account for the NHS Pension Scheme as a defined contribution scheme and so they will generally recognise an expense each year equal to their total employer contribution.
2. For NHS bodies that have staff who are members of a defined benefit pension scheme other than the NHS Pension Scheme) and where their assets and liabilities in the scheme can be separately identified, for example, Local Government Pension Schemes) IAS 19 (revised 2011) is relevant.
3. The Standard requires:
 - that the expected return on assets and the interest cost on the defined benefit obligation are no longer calculated as separate items. Instead the discount rate is applied to the net pension liability
 - that administration costs are now generally charged to expenses as incurred
 - that “Actuarial gains and losses” are renamed “remeasurement of the defined benefit liability”. It continues to be presented in other comprehensive income, and although the revised standard now permits it to be recognised in a separate component of taxpayers’ equity, NHS bodies should continue to recognise it in the General Fund/Retained Earnings Reserve.
4. Where NHS bodies employ staff who are members of a Local Government Pension Scheme, it is common for the scheme to contract with an actuary on behalf of all member bodies.

Disclosures

5. IAS 19 contains disclosure requirements in respect of defined benefit pension plans. (IAS 19, paragraph 135). NHS bodies will wish to take into account materiality, particularly where there are relatively few employees belonging to such schemes. Disclosures should:
 - explain the characteristics of the defined benefit plans and risks associated with them
 - identify and explain the amounts in the financial statements arising from the defined benefit plans
 - describe how the defined benefit plan may affect the timing and uncertainty of the entity’s future cash flows.

Chapter 4 Annex 3: Financial Instruments

Introduction

1. The relevant standards are:
 - IAS32 *Financial Instruments: Presentation*
 - IAS39 *Financial Instruments: Recognition and Measurement*
 - IFRS7 *Financial Instruments: Disclosures*
 - IFRIC9 *Reassessment of Embedded Derivatives*
2. The standards are complex and this guidance provides only a basic overview of the issues that may affect NHS bodies.
3. DH and all NHS bodies have financial instruments. However, the accounting for basic short-term financial instruments will be unchanged by the adoption of these standards. All bodies will need to check whether they have longer-term or more complex financial instruments whose accounting may change. If so, you will need to ensure that the requirements in the standards are followed. [Treasury has also provided some guidance \(Chapter 9 of the FREM\), which is available at \[http://www.hm-treasury.gov.uk/from_index.htm\]\(http://www.hm-treasury.gov.uk/from_index.htm\)](http://www.hm-treasury.gov.uk/from_index.htm)

Financial instruments

4. IAS 32 defines a financial instrument as:

“a contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity”.
5. The definitions for financial assets and liabilities are complex. From DH/NHS bodies’ perspective: financial assets will be:
 - Cash
 - An equity instrument (e.g. shareholding) of another entity, or
 - A contractual right to receive cash or another financial asset (or to exchange financial assets/liabilities with conditions favourable to the entity)and financial liabilities will be:
 - a contractual obligation to pay cash or another financial asset (or to exchange financial assets/liabilities with conditions unfavourable to the entity).
6. Some examples of what are and what are not financial instruments will help understanding. Firstly, other than for cash, there has to be a contract.
7. The following are not financial instruments because they arise under legislation rather than under contract:
 - Public Dividend Capital

- European Union Emissions Trading Scheme allowances
- Early retirement liabilities (with the NHS Business Services Authority)
- Injury benefit liabilities (with the NHS Business Services Authority)

The following are, or could be, financial instruments:

- Cash at bank and in hand
- Receivables and payables
- Loans
- Investments
- Provisions (which arise under contract)
- Finance leases
- PFI
- Interests in subsidiaries, associates and (in some circumstances) joint ventures

However, to be classed as financial assets or liabilities, they must meet the definitions in 5, above, for example, prepayments are not financial assets because they are contractual rights to receive goods or services rather than to receive cash or another financial asset.

8. The accounting for some financial instruments is already covered by specific financial reporting standards:
 - Provisions (IAS 37)
 - Leases (IAS 17)
 - PFI (Mirror of IFRIC 12)
 - Interests in subsidiaries, associates and joint ventures (IAS 27, 28 and 31)
9. This leaves cash, other receivables and payables, loans, and other investments to be accounted for under the financial instrument standards. The standards require financial instruments to be recognised initially at fair value. In many instances the transaction value is fair value and so the accounting will not change. This is the case for cash, short-term receivables, short-term payables, and loans and investments that carry a market rate of interest. Also, the government financial reporting manual dictates the accounting for investments of resource account bodies in entities outside the resource accounting boundary (for example loans and public dividend capital). It requires these to be held at historic cost less any impairment. The accounting for these investments is not affected by the financial instrument standards.
10. The financial instrument standards are therefore only likely to bring changed accounting for:
 - Long-term receivables and payables that are financial instruments. They are likely to require discounting to reflect fair value.

- Any loans that are not at a market rate of interest. Their value would need to be adjusted to reflect fair value.
- Any investments that are not at a market rate of interest, that are not interests in subsidiaries, associates or joint ventures and that are not investments of resource account bodies in bodies outside the resource accounting boundary. Their value would need to be adjusted to reflect fair value.
- Derivatives and embedded derivatives. These may need to be recognised for the first time.
- Any financial guarantees
- Any hedge instruments.

Derivatives

11. A derivative is a financial instrument that derives its value from an underlying variable. For a financial instrument to be a derivative it must have all three of the following characteristics:
- The value changes in response to a change in a specified variable eg interest rate, foreign exchange rate, prices index, credit rating, commodity price and so on
 - Requires no or little initial investment, and
 - Is settled at a future date
- A contract with a bank to buy foreign currency, at a future date, at an agreed rate, is an example of a derivative.
12. Embedded derivatives are derivatives that form part of another contract and cannot be transferred independently. IAS 39 defines an embedded derivative as:
- “a component of a hybrid (combined) instrument that also includes a non-derivative host contract – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.”
13. A critical indicator of an embedded derivative is variation of cash flows over the life of a contract. Embedded derivatives can arise inadvertently through market practices or common contracting arrangements. An example is given at the end of this section.
14. Examples of host contracts that could have embedded derivatives are:
- Purchase and sale agreements
 - Debt instruments

- Leases (operating and finance)
- PFI contracts

Contracts rarely make explicit reference to a derivative. Instead they may include reference to, for example:

- Pricing based on a formula
- Right to purchase/sell additional units
- Indexed to/adjusted by
- Limits
- Rights to cancel/extend/repurchase

15. However, an embedded derivative is only accounted for separately from the host contract if the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract i.e. the economic characteristics or risks of the embedded derivative differ from those of the host contract.
16. For instance, if a loan with an RPI-linked component is given by DH to a PFI consortium, the index-linked element does not need to be accounted for separately. This is because the index relates to inflation in the entity's own economic environment: it is closely related because all parties are UK-based and all the materials and workforce are being paid for in Sterling.
17. However, a lease for a photocopier where part of the price of the contract varies with the price of paper is an example of an embedded derivative that is not closely related. The cost of paper does not have the same economic characteristics or risks of the lease of the machine. In this case, the embedded derivative would be accounted for separately from the lease.
18. Care must be taken in this assessment since, for example, if the effect on the fair value or cash flows is magnified e.g. twice the rate of RPI, this may be sufficient to remove the close relationship. IAS 39 does not define the term "closely related" but a series of examples is contained in the Application Guidance of the standard.
19. If an embedded derivative is closely related to the host contract, the embedded derivative can be ignored and the contract accounted for in accordance with the relevant standard. If an embedded derivative is not closely related to the host contract and the value of the embedded derivative cannot be determined, the whole contract must be accounted for "at fair value through profit and loss", that is, changes in fair value of the whole contract go through the operating cost statement or income and expenditure account.
20. Unless clearly immaterial, DH/NHS bodies will need to review all contracts to identify any embedded derivatives that are not closely related to the host contracts, so that they can be accounted for separately from the host contracts, with changes in fair value taken through the operating cost statement or income and expenditure account (unless the derivative is used for hedging). Auditors will need to see evidence of the review. Bodies

will also need to implement a system change to ensure that, in future, embedded derivatives that are not closely related are identified at the time of entering into contracts.

21. Example: An NHS Trust enters into a contract to buy a large machine from the US. The machine was built using US components and was assembled in the US. If the contract was settled in US dollars, the embedded foreign currency derivative would be closely related to the host contract and so would not be accounted for separately. However, if the contract was settled in Euros, the embedded derivative would not be closely related, movements on the exchange rate with the Euro having different economic characteristics and risks from those of the host contract. If the value of the host contract was 2m Euros, the fair value of the derivative would be the difference between the 2m Euros translated at the period closing rate and the original spot rate when the contract was entered into. If the Euro spot rate when the contract was entered into was 1.48 and the period end spot rate was 1.61, the accounting treatment would be:

$$2\text{m}/1.48 = \text{£}1,351,351$$

$$2\text{m}/1.61 = \text{£}1,242,236$$

$$\text{The fair value is } \text{£}1,351,351 - \text{£}1,242,236 = \text{£}109,115$$

The accounting entries would be:

Dr: Derivatives £109,115

Cr: Gains/losses from derivatives (I&E A/c) £109,115

Financial guarantees

22. Public sector organisations may take on liabilities by issuing specific guarantees (usually for loans) and writing letters of comfort.
23. Under IAS 39, a financial guarantee is “a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make a payment when due in accordance with the original or modified terms of a debt instrument.” These contracts can take various legal forms, including a guarantee, some types of letters of credit, letters of comfort or a credit insurance contract.
24. Indemnities, for example for activities of board members, do not meet the above definition for financial guarantees. Instead, they should be treated as contingent liabilities under FRS 12.
25. Example: DH guarantees a private sector loan to an NHS body, to secure a beneficial rate of interest. The fair value of the guarantee is the present value of the interest saving (i.e. the difference between the interest charged and what would have been charged without the guarantee) over the life of the loan. DH would account for this as:

Dr: Investment in NHS body

Cr: Guarantee liability

The guarantee liability is amortised to the operating cost statement over 5 years.

In the NHS body's accounts, the same figure is credited to equity (capital contribution by DH). This, together with the credit to "loan payable" balances the cash received.

Hedge instruments

26. Hedging is the use of financial instruments provided by commercial markets to offset changes in fair values or cash flows of another transaction, to control or limit risk. It is unlikely that DH/NHS bodies use hedge instruments.

Recognition and de-recognition

27. Financial assets and liabilities are recognised when the body becomes a party to the contract or, in the case of trade receivables/payables, when the goods have been delivered.
28. Financial assets should be derecognised when:
- the contractual rights to the cash flows of the financial asset have expired, or
 - the financial asset has been transferred (e.g. sold) and the risks and rewards of ownership have transferred.

Financial liabilities should be derecognised when the liability has been discharged, that is, paid or expired.

Measurement and classification

29. Initially, all financial instruments must be measured at fair value. Fair value is a quoted market price, if available. If there is no market price, a valuation technique should be used, for example the value of a recent similar transaction at arms length or discounted cash flows from the transaction. If discounted cash flows are used, the discount rate to use is the higher of the rate intrinsic to the financial instrument and the real discount rate set by Treasury. Exceptionally, if no reliable estimate of fair value can be made, cost can be used.
30. Subsequent measurement is different for different categories of financial Instruments. The categories in the tables, below, are defined in IAS 39.

Financial assets	Examples	Subsequent Measurement
Financial assets carried at 'fair value through profit and loss'	Derivatives (other than if a financial guarantee or a hedge instrument)	Fair value with movements through OCS/I&E A/c
Held to maturity investments	These are rare in practice. They are long term investments unlikely to be	*Amortised cost

	held by DH and NHS bodies	
Loans and receivables		*Amortised cost (except loans by DH to bodies outside the departmental boundary. Treasury requires these to be carried at cost less impairment)
Available for sale	LIFT investments	Fair value with movements through reserves. Accumulated gains or losses in equity are recycled to OCS/I&E A/c on de-recognition or impairment of the investment

Financial Liabilities	Examples	Subsequent Measurement
Financial liabilities carried at 'fair value through profit and loss'	Derivatives	Fair value with movements through OCS/I&E A/c
Financial Guarantees		The higher of The amount determined in accordance with FRS 12 and The amount initially recognised less, where appropriate, cumulative amortisation
Other financial liabilities	Loans from DH	*Amortised cost

*Amortised cost is the initial value minus both principal repayments and cumulative amortisation.

31. In determining the categorisation of their financial instruments, DH and NHS bodies must ensure that they are aware of, and can manage, the financial consequences.

Impairments

32. Financial assets, other than those measured at fair value through profit and loss, must be reviewed for impairment at each statement of financial position date. There is no requirement to impair financial liabilities.
33. Impairments should be recognised when they occur, not when expected. An impairment loss must impact on future cash flows, and there must be objective evidence of impairment as a result of one or more events that occurred after initial recognition. IAS 39 provides examples. Impairments are always charged to the SOCNE/SOCI, not to reserves.
34. The measurement and accounting for impairments varies depending on the classification of the financial asset:

Financial assets carried at amortised cost (loans and receivables, and held to maturity investments) – the impairment loss is measured as the difference between the carrying amount and the present value of future estimated cash flows discounted at the asset's original effective interest rate (see FRS 26.9). If the impairment loss decreases in a subsequent period, and this can be related to an objective event occurring after the impairment was recognised (for example, an improvement in credit rating) the impairment can be reversed. The reversal must not result in a carrying amount higher than what the amortised cost would have been had the impairment not been recognised.

Financial assets carried at cost – the impairment is calculated as the difference between the carrying amount and the present value of the estimated future cash flows discounted at the current market rate for similar financial assets. These impairment losses may not be reversed.

Available for sale financial assets – Where there is evidence of impairment of this class of asset the amount of any fall in value previously recognised in reserves must be removed from reserves and charged to the operating cost statement or income and expenditure account. The impairment loss may be reversed if its reversal can be objectively linked to an event occurring after the impairment was recognised in the income statement.

Disclosures

35. The objective of IAS 32 is to require entities to provide disclosures in their financial statements that enable users to evaluate:

- the significance of financial instruments for the entity's financial position and performance, and
- the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the reporting date, and how the entity manages those risks.

Chapter 4 Annex 4: Lease accounting entries

Operating leases

1. The minimum lease payments of operating leases are recognised on a straight line basis over the life of the lease. Contingent rentals are recognised as and when incurred but IAS 17 requires the amount of contingent rental recognised to be disclosed each year.
2. Where the NHS body is the lessee, all of the rental expense (normal plus contingent) is recognised in Note 8 Operating Expenses under the relevant heading. The disclosure of the split between “normal” and contingent rent is disclosed in Note 9.1.
3. Where the entity is the lessor, all of the rental income (normal plus contingent) should be recognised in Note 6 Other Operating Revenue under the “Rental revenue” line. The disclosure of the split between “normal” and “contingent” is picked up by Note 9.2.

Finance leases

4. Since finance leases are akin to borrowing, the minimum lease payments are split between the finance cost and repayment of the borrowing. Where the entity acts as lessee, the finance cost will be recorded as a finance expense in Note 16, and where the entity is lessor it will be recorded as finance income in Note 14.
5. The complication is around contingent rental. As with operating leases, contingent rental is only recorded as income or expense when it is actually incurred. IAS 17 is silent on where this is recorded. Under this manual, it should be recognised in Note 6 Other Operating Revenue – Rental revenue or Note 8 Operating Expense against the relevant line, as appropriate. The disclosure of the contingent rental is given in Notes 30 and 31.
6. There is a special case for particular PFI schemes where the annual unitary payment is increased by the whole of RPI each year (rather than a proportion) and therefore some of this RPI uplift is attributable to the finance lease element recognised. The substance of this contingent rental is a finance cost due to the way that the PFI operator sculpts its finance cost in the model. It is therefore appropriate to disclose this specific contingent rental within Note 16 Finance Costs.

Chapter 4 Annex 5: Consultancy

The provision to management of objective advice and assistance relating to strategy, structure, management or operations of an organisation in pursuit of its purposes and objectives. Such assistance will be provided outside the “business as usual” (BAU) environment when in-house skills are not available and will be of no essential consequence and time-limited. Services may include the identification of options with recommendations and/or assistance with (but not delivery of) the implementation of solutions. The consultancy category will include areas such as:

- **Strategy:** The provision of objective advice and assistance relating to corporate strategies, appraising business structures, value for money reviews, business performance measurement, management services, product design and process and production management.
- **Finance:** The provision of objective advice and assistance relating to corporate financing structures, accountancy, control mechanisms and systems. This does not include “auditor’s remuneration”, this is reported separately. It will include:
 - **Strategic Finance:** Providing specialist services and support in the form of financial, legal, insurance advice to develop a Public Private partnership/Private Finance Initiative deal for procurement requirement.
 - **Operational Finance:** Procurement advice on risk management and internal control systems including audit arrangements. Advice on the commercial viability of grant recipients, suppliers and partners; solvency checks
- **Organisation and Change Management:** Provision to management of objective advice and assistance relating to the strategy, structure management and operations of an organisation in pursuit of its purposes and objectives. Long range planning, re-organisation of structure, rationalisation of services, general business appraisal of organisation.
- **IT/IS:** The provision of objective advice and assistance relating to IT/IS systems and concepts, including strategic studies and development of specific projects. Defining information needs, computer feasibility studies and making computer hardware evaluations. Including consultancy related to e-business.
- **Property and Construction:** The provision of specialist advice relating to the design, planning and construction, tenure, holding and disposal strategies. This can also include the advice and services provided by surveyors and architects.
- **Procurement:** the provision of objective advice and assistance when establishing procurement strategies.
- **Legal Services:** The provision of external specialist legal advice and opinion in connection with the policy formulation and strategy development particularly on commercial and contractual matters.
- **Marketing and Communication:** The provision of objective advice, assistance and support in the development of publicising and the promotion of the DoH’s

Business Support programmes, including advice on design, programme branding, media handling and advertising.

- Human Resource, training and education: The provision of objective advice and assistance in the formulation of recruitment, retention, manpower planning and HR strategies and advice and assistance relating to the development of training and education strategies.
- Programme and Project Management: The provision of advice relating to ongoing programmes and one-off projects. Support in assessing, managing and or mitigating the potential risks involved in a specific initiative; work to ensure expected benefits of a project are realised.
- Technical: The provision of applied technical knowledge. To aid understanding, this can be sub-divided into:
 - Technical Studies: Research based activity including studies, prototyping and technical demonstrators.
 - Project Support: Project based activities including technical consultancy, concept, development and in-service support activities.
 - Engineering Support: Task based support including Post Design Services, repair, calibration, analysis testing and integration.

Chapter 4 Annex 6 - Treasury Discount Rates

1. The "Green Book" is Treasury's investment appraisal manual, and contains guidance on the use of discounting for option appraisal purposes only.
2. Treasury has set standard discount rates applicable for 31 March 2014⁴³, as detailed below. ~~These rates will determine the unwinding of provisions charges for 2013-14. It is expected that Treasury will issue revised rates applicable at 31 March 2014 towards the end of the 2013 calendar year.~~

3. ~~The following PES papers were published on 30 November 2012:~~

- ~~PES(2012)15 *Discount Rates for General Provisions: Announcement of Rates*, and~~
- ~~PES(2012)16 *Now Discount Rate for Valuing Post-Employment Benefits*~~

~~Copies of these Papers have been posted to the "finman" website ([FAQ 4th February 2013](#)), and their key points are summarised below.~~

General Provisions

4. ~~Treasury now gives rates for short, medium and long term general provisions. These are defined:~~
 - ~~Short-term rate: A real discount rate to be applied to the cash flows of general provisions in a time boundary of between 0 and up to and including 5 years from the Statement of Financial Position date.~~
 - ~~Medium-term rate: A real discount rate to be applied to the cash flows of general provisions in a time boundary of after 5 and up to and including 10 years from the Statement of Financial Position date.~~
 - ~~Long-term rate: A real discount rate to be applied to the cash flows of general provisions in a time boundary exceeding 10 years from the Statement of Financial Position date.~~

~~The rates to be applied on 31 March are:~~

~~Timing of Cash Flows — Real Rate~~

0 to 5 years inclusive	Minus 1.80%
6 to 10 years inclusive	Minus 1.00%
Over 10 years	Plus 2.20%

5. ~~Note: it is the timing of the cash flow that governs the discount rate used — the PES papers make no reference to setting discount rates according to the overall term of the arrangement. Thus, to arrive at the SOFP balance for a provision with expected cashflows occurring in each year for 20 years, each of the three rates will be applied in arriving at the final balance. It would not be correct to discount cashflows at 2.20% in the~~

first 10 years simply because the liability is not expected to be wholly discharged until year 20.

Post-Employment Benefits Provisions

6. The real discount rate applicable on 31 March 2013 is 2.35% (the previous year's rate was 2.80%).
7. The rate is applicable for all provisions arising from continuing obligations arising from previous employment service.

Accounting—Both Categories of Discount Rate

8. Any change in the 31 March 2014 discount rates will result in an increase or decrease in the carrying amount of the provision at 31 March and this will be matched by a corresponding charge/credit to the current year SOCNE or SOCI.
9. The new rates will impact on unwinding charges or credits in 2013-14.

Chapter 4 Annex 7 - Valuation Issues

1. In considering how best to apply the valuation requirements of IAS 16 to ensure that the SOFP gives a true and fair view of the value of the assets at the reporting period, entities should consider the following guidance (together with Treasury guidance – see 4.120 above).
2. For “in use” non-specialised property assets fair value should be interpreted as market value for existing use. In the RICS Red Book, this is defined as “market value on the assumption that property is sold as part of the continuing enterprise in occupation”.

Modern Equivalent Asset (MEA) valuations

3. For specialised properties (i.e. those for which no active market exists), depreciated replacement cost is considered to be a satisfactory approximation of fair value. Within that methodology, the MEA concept is applied: the “replacement cost” is based on the cost of a modern replacement asset that has the same productive capacity as the property being valued.

Recognition and measurement

4. Entities should value their property using the most appropriate valuation methodology. Such methods might include:
 - a quinquennial valuation supplemented by annual indexation and no interim professional valuation
 - annual valuations, or
 - a rolling programme of valuations of properties (whether specialised or non-specialised).
5. It is for valuers, using the Royal Institution of Chartered Surveyors; (RICS) “Red Book” (RICS Appraisal and Valuation Standards), and following discussions with the entity, to determine the most appropriate methodology for obtaining a fair value. Where a valuer, following discussion with the entity, determined that depreciated replacement cost (DRC) is the most appropriate, entities and their valuers should have regard to the RICS Valuation Information Paper No. 10. VIP extracts. Other detailed valuation guidance is available on the FReM dedicated website: http://www.hm-treasury.gov.uk/d/guidance_on_asset_valuation.pdf
6. Where DRC is used as the valuation methodology, entities should normally value a modern equivalent asset in line with the Red Book. Any plans to value a reproduction of the existing asset instead should be discussed with the Department to determine whether such an approach is appropriate to the entity’s circumstances.
7. Where DRC is used as the valuation methodology, entities should use the “instant build” approach;

Comment [SW7]: Incorporate FAQ into Manual

Formatted: No underline, Font color: Auto, Highlight

Formatted: No underline, Font color: Auto, Highlight

8. Where DRC is used as the valuation methodology, the choice of an alternative site will normally hinge on the policy in respect of the locational requirements of the service that is being provided. Where the practical requirements of healthcare delivery, for example, require that a hospital is located within the same geographical area it now occupies, the valuation should be based on that site and not an alternative. A valuation on an alternative site basis may however be appropriate where it is clear that the alternative would offer advantages in serving the target population.
9. The cost of enhancements to existing assets (such as building of a new wing within an existing hospital) should be capitalised during the construction phase as an asset under construction. At the first valuation after the asset is brought into use, any write down of cost should be treated as an impairment and charged to the revenue account.
10. For “in use” non-specialised property assets fair value should be interpreted as market value for existing use. In the RICS Red Book, this is defined as “market value on the assumption that property is sold as part of the continuing enterprise in occupation” (FRM 6.2.5).

Disclosure

11. Entities should:
 - disclose in the accounting policies note the fact that assets are carried at fair value. Entities should also provide information about the approach to valuing their estates, including a statement (where applicable) that alternative sites have been used in DRC valuations;
 - disclose in the notes on tangible non-current assets: the date of the last valuations of those property assets that are subject to revaluation, and the names and qualifications of the valuer; and
 - discuss in the Management Commentary, where they hold extensive estates: their estate management strategy; the indicative alternative use values provided by the valuer as part of the routine valuation work, and what those alternative use values mean in terms of their estate management policy.

Equipment

12. The accounting policy remains that equipment is carried at current cost. However, where non-property assets are short-lived, or are of low value (or both) it is acceptable for such assets to be carried at depreciated historic cost as this will be a reasonable proxy for current cost. The main consideration is that no material difference should arise in the financial statements as a consequence of the use of depreciated historic cost in preference to other possible measures of current cost, including indexation.
13. The following disclosures must be given: in the accounting policies note, that the assets are carried at fair value, with depreciated historical cost used as a proxy for fair value for named classes of assets, if appropriate, with the reasons why. Information must also be given about any significant estimation techniques, if applicable.

Chapter 4 Annex 8 - IFRIC 12 further information

IFRIC 12 Service Concession Arrangements

1. Also relevant:
 - IAS 17 *Leases*
 - SIC 15 *Operating Leases – Incentives*
 - SIC 27 *Evaluating the Substance of Transactions Involving the Legal Form of a Lease*
 - IFRIC 4 *Determining whether an Arrangement contains a Lease*
 - SIC 29 *Service Concession Arrangements: Disclosures*
2. This guidance outlines the key considerations for NHS bodies that enter into PPP or PFI arrangements that meet the IFRIC 12 definition of “service concession arrangements”.

Identification of “service concession arrangements”

3. IFRIC 12 is applicable only where:
 - the infrastructure (i.e. the property) is used to deliver public services; and
 - the public sector grantor (the NHS body) controls or regulates what services the operator must provide with the infrastructure, to whom it must provide them, and at what price; and
 - the public sector grantor (the NHS body) controls the residual interest in the asset at the end of the term of the arrangement.

Summary of required accounting – on-SOFP under IFRIC12

4. Properties that are on-SOFP under IFRIC 12 should be included in the PFI disclosures. The property will be recorded in the SOFP, together with an associated liability. The unitary payment stream is separated into: the interest element; the capital creditor repayment element; and the service element.
5. While the required accounting mirrors that for a finance lease, and techniques for apportioning the payments as above may also be the same as used for finance leases, the arrangement is not reported as a finance lease. IFRS make a distinction between finance lease arrangements and IFRIC 12 arrangements.
6. The arrangement should instead be included in the PFI disclosures, as the FReM places both PFI and IFRIC 12 arrangements within the category of Public-Private Partnerships.

Summary of required accounting – on-SOFP under IFRIC4

7. Properties that are on-SOFP by virtue of IFRIC 4 (i.e. where an IFRIC 12 service concession does not exist) should be included within the normal leasing disclosure notes.
8. Where the following conditions apply:

- The fulfilment of the arrangement is dependent on the use of a specific asset; and
- The arrangement conveys the right to use the asset; and
- IAS 17 tests require the recognition of a finance lease,

the NHS body will be required to account for the transaction as a finance lease. In such cases, disclosure is within the finance lease notes to the SOFP in accordance with IAS 17.

Sale of asset that subsequently requires recognition on the seller's SOFP

9. The IFRICs do not specifically address this situation, but the arrangement is similar to a "sale and leaseback" arrangement which is dealt with by IAS 17, *Leases*. This guidance therefore follows the principles set out in IAS 17.
10. The transaction is considered as a financing transaction: the seller or lessee never disposes of the risks and rewards of ownership of the asset and so should not recognise a profit or loss on the sale. Any apparent profit (i.e. the difference between carrying amount and sale proceeds) should be deferred and amortised over the lease term. (IAS 17, para 59).

New transactions funded by "s28" and "s64" grants

11. Where a grant for the purchase of a NHS asset is made in the current year, and the arrangement results in the retention of the asset under IFRIC 12 or IFRIC 4 it is important to identify the substance of the transaction.
12. Cash is granted by the NHS body to the purchaser. The purchaser then buys the asset from the NHS body, but the NHS body retains the asset on its SOFP by virtue of IFRIC 12 or IFRIC4. A circular flow of cash has taken place: from the NHS to the purchaser and then back to the NHS; and the asset has remained on the NHS body's SOFP. Assuming no "profit" or "loss" has been made (in which case the IAS 17 sale and leaseback principles outlined above come into play) the economic and accounting reality is that no substantive transactions have taken place. At the completion of the series of transactions there should be no net impact either on the revenue account or SOFP.
13. This means that there will be no expense recognised in the NHS body's SOCNE as the circular flow of cash neither generates expenditure nor a capital receipt. In this situation there is therefore no need to record the issue of a capital grant and there is no need for the Department to effect a budgetary transfer from capital to revenue.
14. While no accounting entries should therefore be made, a narrative disclosure of the nature of the transaction should be provided in the accounts.

Chapter 4 Annex 9 - Transfer by Absorption

1. IFRS 3, *Business Combinations*, does not include intra-public sector combinations within its scope.
2. Amendments to the FReM were effective from 2012-13. Transfers of non-current assets that are not connected to “machinery of Government” or transfers of functions are outside the scope of this guidance.
3. The FReM adaptation of IFRS 3 is outlined in Chapter 3 and the following paragraphs offer some practical guidance to NHS bodies.
4. The authorisation of a NHS Foundation Trust is governed by statute, and the guidance in this Annex is not applicable to the situation where a NHS Trust is authorised as a NHS Foundation Trust.

Accounting entries

5. Prior-period figures must not be restated on a transfer of functions, assets or liabilities between public sector bodies under absorption accounting.
6. Each party in a transfer will account for transactions in the period in which they fell. The “successor” does not account for any transactions carried out by the “transferor” prior to the date of transfer.
7. Where assets and liabilities transfer as part of a transfer of functions, the date of transfer will normally coincide with the date that responsibilities passed from one body to the other. Normal IFRS asset recognition criteria will apply: clearly if the transferor of functions retains control of the related assets, there may be nothing to record in this respect.
8. Where a transfer takes place in-year, or where an entity closes down mid-year, both parties record the transfer and receipt of assets and liabilities as in-year transactions. In the event of a mid-year closedown, the closing body will prepare closing SOFPs for the year showing zero entries.
9. For closure on 31 March xx, the closing body will present a full SOFP: this will include all the assets and liabilities that transfer to either a new entity or an existing successor on 1 April xx.
10. The successor body excludes the transferred assets and liabilities from its closing 31 March xx and its opening 1 April xx SOFP. It will record the receipt of the assets and liabilities as an in-year movement at the start of the new period.
11. Transfers of assets and liabilities are balanced by corresponding entries to the SOCNE/SOCI as gains/losses that impact on in-year performance, but identified separately from operating costs.
12. As reserves are not transferred, it will be necessary for entities to make manual transfers between the General Fund/Retained Earnings and the Revaluation Reserve (to preserve the Revaluation Reserve value associated with a transferred asset). NHS bodies will

therefore need to provide information on the associated Revaluation reserve values, as well as the carrying amount value, to the successor body.

13. Transfers of assets and liabilities must be recorded in detail, listing counter-parties, in both the Accounts and Summarisation Schedules. Accounts will need to contain meaningful narrative disclosures about the transfer event. These disclosures might fall under “events after the reporting period” if the transfers are a consequence of the dissolution of a NHS body.

Chapter 4 Annex 10 – NHS Transition: Modified Absorption Accounting for 1 April 2013 Transfers

Accounting for assets transferred from closed NHS bodies

- 1 — For 2013-14, the default arrangement for handling routine intra-NHS asset transfers (on transfer of functions) and intra-Group reconstructions remains absorption accounting (see above, Annex 9). Treasury has, however, agreed a departure from the FReM in accounting for the transfer of assets, liabilities and functions in respect of the closure of: SHAs; PCTs; and certain Special Health Authorities (SpHA) on 1 April 2013. For the sake of simplicity, these are referred to as “closed” entities below.
- 2 — Where a NHS body receives assets or liabilities on 1 April 2013, and those assets or liabilities were brought to account at 31 March 2013 in the SOFP of a body that was dissolved on 1 April 2013, it shall account for the transaction through reserves using modified absorption accounting.
- 3 — For all other asset/liability transfers between NHS bodies that follow transfers of functions, absorption accounting must be applied, as in 2012-13. In summary, modified absorption accounting is appropriate only where two conditions are met:
 - The transfer is from a SHA, PCT or SpHA that dissolved at the end of 2012-13 (i.e. 1 April 2013); and,
 - The asset or liabilities involved were included in the closing balance sheet of the closed entity.

Background

- 4 — Those entities that closed on 1 April 2013 prepared full accounts on a going concern basis in respect of 2012-13 and therefore reported a full set of SOFP balances at 31 March 2013. They will not however produce any financial statements in respect of 2013-14.
- 5 — Most of the successor bodies to the closed entities either did not exist at 31 March 2013 or had not assumed their full functions at that date (CCGs, NHS Property Services, PHE). None of the successor bodies has a counter party in 2013-14 against which to record transition transactions.
- 6 — It is necessary, for the Group consolidation, that aggregate 1 April 2013 balances are identical to the aggregate position on the previous day.
- 7 — A further consideration is that absorption accounting recognises the receipt of e.g. net assets by a successor as dr asset, cr current year income, thereby generating an in-year surplus or over-performance position in the successor on the date of transfer. To balance performance nationally, it would be necessary for the core Department to recognise an in-year loss to the same value.
- 8 — The Department considers that it would be misleading and distorting to allow the reconfiguration of the NHS to generate reported performance gains or losses on the first

day of the accounting period. For successor bodies, and CCGs in particular, this arrangement would also fail to convey the reality of having new entities set up under Statute and vested with certain assets by Secretary of State.

Accounting for 1 April 2013 transition receipts from closed bodies

9 The Department, with Treasury approval, has therefore set the following accounting requirements:

- Successor bodies must balance receipts of net assets/liabilities by means of credits/debits to reserves, thereby avoiding distorting performance entries
- Transferred assets/liabilities are shown as 2013-14 adjustments to opening balances. This ensures that for each successor, whether a new entity or existing organisation, closing and opening balances are identical. The adjustment to opening balances in respect of transfers from closed entities will be clearly identified within accounts and will be accompanied by full and detailed disclosures to explain the source and circumstances of the asset/liability receipts
- This accounting policy is not applied retrospectively. No restatement of 2012-13 figures is required in respect of NHS transition closures except by means of the formal 1 April 2013 adjustment to opening balances
- Revaluation reserves are preserved. Following the practice adopted in 2012-13, those bodies that receive net assets that are funded in part by revaluation reserves will preserve those reserves by means of a second transaction subsequent to the initial recognition of the asset transfer itself. This transaction will transfer an amount from the General Fund (or retained earnings reserve) to the credit of the revaluation reserve, such that the asset's historic revaluation reserve is recognised by the successor. While this achieves the same effect as "transferring" the reserve itself, this is not strictly the case. The transaction is dr Gen Fund, cr reval reserve and not dr asset, cr reval reserve. This revaluation reserve transaction should take place in all cases in 2013-14 (i.e. in both transition-related closures and under "normal" absorption accounting).

10 The formats of the 2013-14 accounts and consolidation schedules have not been finalised but they will show, for the SOFP and each Note to the SOFP:

Opening balance (will equal 12-13 closing balance)	100
Transfer of asset (liability) from closed NHS body – received	20
Balance at 1 April following adjustment	120
In-year movements etc	30

In-year transfer of (liability) under absorption accounting – received	(25)
Closing balance	<u>125</u>

- 11 — For bodies that became operational on 1 April 2013 (e.g. CCGs), the brought forward balances will, strictly speaking, be zero. The receipt of transferred assets and liabilities will be clearly identified and result in an adjusted 1 April 2013 balance being shown.
- 12 — In the example above, the net asset receipt of 20 will be further analysed in accounts and summarisation schedules to detail the type of asset or liability transferred, and the identities of the source bodies. This meets Treasury disclosure requirements, and will permit a national reconciliation of closing balance sheets to (adjusted) 1 April 2013 balances. It is of course essential that both senders and receivers of asset and liabilities agree values and categories.
- 13 — The reserves transactions will be reflected in accounts and summarisation schedules as follows:
- | | |
|------------------|----|
| dr asset | 20 |
| cr General Fund* | 20 |
- and subsequently (if we assume the asset carried a revaluation balance of 5 in the closed body):
- | | |
|------------------------|---|
| dr General Fund* | 5 |
| cr revaluation reserve | 5 |
- * for Trusts & FTs, retained earnings.

Other in-year machinery of government changes

- 14 — Where the conditions at 3 above are not met, NHS bodies' accounting defaults to absorption accounting as set out in the FRoM, FT ARM and above.
- 15 — The accounts and summarisation schedules will need to distinguish between 1 April 2013 transactions outlined above and other in-year transfers. This second category will, as in 2012-13, be dealt with through the in-year revenue account. The SOFP and Notes to the SOFP will therefore include lines in which to report such transfers, and these entries will be detailed by category and counter party and reconciled to the gain or loss recognised in the SOCNE/SOCI for the period.
- 16 — In the example at 10 above, the entity will, in addition to the 1 April 2013 transaction, also report a transfer in of liabilities (25), resulting in a realised loss, recognised in the SOCNE/SOCI.

Asset valuation

- 17 Assets and liabilities transferring within the DH Group, whether under transition or other functions transfer arrangements, transfer at their net book value in the transferor's SOFP. Revaluation is not required simply because the asset is transferring: absorption accounting does not require revaluation.
- 18 However, either the transferring body or the recipient may have cause to revalue assets as in-year transactions before or after the date of transfer (e.g. within the routine valuation cycle, or where a current reduction in service potential has been identified). Any such revaluation must be accounted for as a distinct and separate exercise from the transfer itself to ensure that asset values are identical in each set of accounts.
- 19 The normal considerations on impairment apply – where a review of an asset's service potential is required (e.g. because it has already been taken out of service) it may be necessary to recognise an impairment in the normal way. Where an asset is however still operational at the point of transfer, and the transferor has no control over its future use, the transferor should not make any assumptions about the future use of the asset. The successor body (including NHS PS) will carry out an impairment review when and if it considers it necessary to do so. In other words, the fact that an asset is being transferred to another part of the DH Group is not in itself a sufficient reason to impair it while it remains in use by the transferor.

5. Proforma Accounts

- 5.1. Proforma accounts are provided in a separate excel file in the 'finman' website. A converted PDF version of this file is included below.
