Classroom learning qualification success rates 2013/2014

Success rate and minimum standards example report layouts

Date of issue   18 September 2014

___

Purpose of document

1. This document provides example report layouts for the 2013/14 classroom learning qualification success rate and minimum standards reports. The document also contains the format of the data files that will accompany the reports.

Overview of the report contents

2. The 2013/14 classroom learning qualification success rate reports and minimum standards reports will be output in six separate .pdf files.

    -   Report file 1 will contain qualification success rate reports based on the overall success rate measure, including a proportion of GCSE passes by age and grade report and a subcontractor report, reports 1 - 13.

    -   Report file 2 will contain qualification aim level information based on the overall success rate measure, reports 14 and 15.

    -   Report file 3 will contain overall classroom learning and workplace learning minimum standards reports based on the overall success rate measure, reports 16 and 17.

    -   Report file 4 will contain overall achievement and retention rate reports based on the overall success rate measure, reports 18 - 23.

    -   Report file 5 will contain the qualification success rate reports based on the timely success rate measure, including a subcontractor report, reports 24 - 35.

    -   Report file 6 will contain qualification aim level information based on the timely success rate measure, reports 36 and 37.

3. Two .csv data files will accompany the reports.

    -   Data file 1 will contain details of each learning aim included in the success rate calculations. Apart from the additional field at the end of the record this file is the same

format as the workplace learning file. This is to allow providers and software developers to produce a merged classroom learning and workplace learning file, if desired.

- Data file 2 will contain details of each learning aim that has been excluded from the success rate calculations, and the reason for exclusion. This file is the same format as the workplace learning file. This is to allow providers and software developers to produce a merged classroom learning and workplace learning file, if desired.

Points to note about the report layouts

4. The reports contain dummy data and the values in total lines are not the sum of the individual lines.

5. The reports do not show all the possible levels that could be output. Often some levels have been omitted so that the report example fits onto a single page.

6. A report will not be output if there is no data for the provider, For example, the subcontractor report (report 13) is not produced if the provider has no subcontracted provision.

7. Minimum standards reporting is incorporated into the qualification success rate reports. Report 16 shows where the success rate of a learning aim falls below the minimum standard tolerance. Report 17 shows whether amount of under-performing provision in a qualification type group is below the minimum standards threshold. The minimum standards thresholds and tolerances will be published at a later date.

8. Minimum standards will be determined for classroom learning and workplace learning combined and will use the overall success rate measure.

9. Where the 'Total Percentage Leavers Below MS Threshold' cell in the headline report and report 17 are coloured red this indicates that the total classroom learning and workplace learning 'Percentage Leavers Below MS Threshold' is greater than the minimum standards tolerance.

10. Where the 'Total Leavers' and 'Total Success Rate' cells in a report are coloured red this indicates that the total classroom learning and workplace learning qualification success rate is below the minimum standards threshold.

11. The definition of qualification type is published in the classroom learning qualification success rate dataset production specification document (where it is called Qualification_Size). The qualification types, and the composition of each qualification type group, are shown in report 17.

12. Suppression and rounding is applied to provider group and national values to protect the possible identification of individuals and to control the rigour of the statistics reported.

a) If the number of leavers is less than 30 the value is replaced with a dash (-)

b) The number of leavers values are rounded to the nearest 10

c) When calculating the success rate, achievement rate or retention rate, if the number of leavers is less than 5 then the success, achievement or retention rate is replaced with a dash (-)

</table>

etc… for each qualification type, level, map code and learning aim reference.

The map code heading and map code totals are only output when a learning aim has a map code. Map codes apply mainly to A Levels, AS Levels, A2 Levels, GCSE and functional skills.

The map code heading and map code totals are output even if the map code only has one learning aim.

The data is output in the sequence of sector subject area tier 1, sector subject area tier 2, qualification type, level, map code, learning aim reference.

A learning aim reference is only output if the provider has leavers for the learning aim for 2013/14.

etc… for each qualification type, level, map code and learning aim reference.

The map code heading and map code totals are only output when a learning aim has a map code. Map codes apply mainly to A Levels, AS Levels, A2 Levels, GCSE and functional skills.

The map code heading and map code totals are output even if the map code only has one learning aim.

The data is output in the sequence of sector subject area tier 1, sector subject area tier 2, qualification type, level, map code, learning aim reference.

A learning aim reference is only output if the provider has leavers for the learning aim for 2013/14.

The success rate value for 2013/14 is coloured orange if the success rate of the learning aim falls below the minimum standard tolerance for the qualification type.

etc… for each qualification type, level, map code and learning aim reference.

The map code heading and map code totals are only output when a learning aim has a map code. Map codes apply mainly to A Levels, AS Levels, A2 Levels, GCSE and functional skills.

The map code heading and map code totals are output even if the map code only has one learning aim.

The data is output in the sequence of sector subject area tier 1, sector subject area tier 2, qualification type, level, map code, learning aim reference.

A learning aim reference is only output if the provider has leavers for the learning aim for 2013/14.
