

Outcomes Framework	Domain	Indicator / Outcome	Indicator Status	Comments	
NHS Outcomes Framework	Domain 1 - Preventing people from dying prematurely	Overarching indicator			
		1a Potential Years of Life Lost from causes considered amenable to healthcare	Green	Indicator added to the NHS Outcomes Framework	
		Reducing premature mortality from the major causes of death			
		1.4.viii Cancer survival rates for children and young people	Green	Indicator added to the NHS Outcomes Framework	
		Reducing premature death in babies and children and young people			
		1.6.i Infant mortality			
		1.6.ii Neonatal mortality and stillbirths			
	1.6.iii Childhood mortality	Green	The indicator on potential years of life lost provides information on childhood mortality for the NHS Outcomes Framework		
	Reducing the time taken to receive a diagnosis				
	Time from presentation at NHS setting to definitive diagnosis	Amber	Research to be undertaken, commissioned by DH		
	Domain 2 - Enhancing quality of life for people with long-term conditions	Overarching indicator			
		2b Quality of life for children and young people with long-term conditions (including long term mental health problems) and disabilities	Red	At present, there are no planned surveys with which to collect this information.	
		Ensuring people feel supported to manage their condition			
		2.1.ii Children and young people and their families feel supported to manage their condition	Red	At present, there are no planned surveys with which to collect this information.	
		2.1.iii Healthcare for children and young people is integrated	Amber	The Children's Health and Wellbeing Partnership has set up a task and finish group to define integration for children and young people, and to propose a method to capture this definition in an indicator	
		Improving functional ability in people with long term conditions			
		2.2.ii Pupil absence in children and young people with long-term conditions and disabilities	Red	extending the use of the NHS Number to children's social care.	
		Reducing time spend in hospital by people with long term conditions			
		2.3.ii Unplanned hospitalisation for children and young people with asthma, diabetes and epilepsy			
		Enhancing quality of life for carers			
		2.4.i Health related quality of life for carers - extend to measure carers of children separately	Red	At present, there are no planned surveys with which to collect this information.	
	2.4.ii Family Functioning Index for families where children and young people are carers	Red	At present, there are no planned surveys with which to collect this information.		
	Enhancing quality of life for people with mental illness				
	2.5.ii Pupil absence in children and young people with mental health problems	Red	extending the use of the NHS Number to children's social care.		
	Domain 3 – Helping people to recover from episodes of ill health or following injury	Overarching indicator			
		3a Emergency admissions for acute conditions that should not usually require hospital admission	Green	Age breakdown has been provided in the NHS Outcomes Framework	
		3b Emergency readmissions within 48 hours of discharge from hospital for children and young people	Amber	The NHS OF team will be looking at further development of this overarching indicator	
		Improving outcomes from planned procedures and treatment			
		3.1.iv PROM to measure outcomes from planned procedures for children and young people	Red	NHS England is currently in the process of expanding the PROMS programme	
		3.1.v PROMs for children and young people with mental health problems	Amber	NHS England is currently in the process of expanding the PROMS programme	
		Preventing lower respiratory tract infections in children and young people from becoming serious			
	3.2 Emergency admissions for children and young people with LRTI				
	Improving recovery from injuries and trauma				
3.3 Measure of functional recovery 1-2 years after discharge from PICU for children and young people with traumatic brain injury	Red				
Domain 4 – Ensuring that people have a positive experience of care	Improving women and their families' experience of maternity services				
	4.5 Women's experience of maternity services				
	Improving the experience of care for people at the end of their lives				
	4.6.ii Improving the experience of care for children and young people at the end of their lives	Red	At present, there are no planned surveys with which to collect this information.		
	Children and young people's experience of physical and mental healthcare				
4.8 Children and young people's experience of healthcare in all settings	Amber	NHS England and CQC are planning to measure the experience of young people in inpatient settings from 2014			
Children and young people's experience of transition to adult services					
4.9 Children and young people continue to receive the care they need following transfer from paediatric services	Amber	At present, there are no planned surveys with which to collect this information.			
Domain 5 – Treating and caring for people in a safe environment and protecting them from avoidable harm	Reducing the incidence of avoidable harm				
	5.2 Incidence of hospital acquired infection i MRSA ii C.Difficile iii. Late onset BSIs in children	Amber			
	5.4 Incidence of medication errors causing serious harm	Amber	Medications errors is an area of work picked up by the Medicines Board of the CMO's Children and Young People's Health Outcomes Board		
	Improving the safety of maternity services				
	5.5 Admission of full-term babies to neonatal care				
	Delivering safe care to children and young people in acute settings				
	5.6 Incidence of harm to children and young people due to "failure to monitor"				
5.7 Rates of admission to age inappropriate environments for children and young people	Amber	The proposed survey of children's experience includes questions about admission to age-appropriate wards			

Outcomes Framework	Domain	Indicator / Outcome	Indicator Status	Comments
Public Health Outcomes Framework	Domain 1- Improving the wider determinants of health	Children and young people in poverty		
		Number of children and young people living in decent housing	Red	It has not been possible to measure this indicator with existing data sources
		Statutory homelessness	Amber	Further work is needed with DCLG to establish how to define this indicator for children
		School readiness		
		Pupil absence - for all children, those with LTCs and disabilities, LAC, and those with mental health problems	Red	Discussions are planned between DH, NHS England, HSCIC and others to discuss the case for extending the use of the NHS Number to children's social care.
		Educational attainment and progress for children and young people with LTCs - including long term mental health problems - and disabilities, mental health issues, and children on free school meals	Red	Discussions are planned between DH, NHS England, HSCIC and others to discuss the case for extending the use of the NHS Number to children's social care.
		First time entrants to the youth justice system		
		16-18 year olds not in education, employment or training		
		Killed or seriously injured casualties on England's roads		
		Domestic abuse	Amber	Further work is planned to consider possible data sources for these indicators. Existing sources and definitions identified for adults were not suitable for children.
		Violent crime and sexual violence	Amber	
		Utilisation of green space for exercise/health reasons	Amber	It is not possible to measure this indicator with existing data sources - however, data on physical activity and sedentary behaviour will be available from the Local Health Survey of Young People
		Proportion of children who experience bullying	Green	Bullying has been included in the Local Health Survey of Young People
		Percentage of children and young people with mental health problems who experience stigma and discrimination	Red	Further work is needed to look at possible surveys of mental health in children and young people. Discussions are taking place between DH, PHE and NHS England
		Domain 2 – Health improvement	Low birth weight of term babies	
	Breastfeeding			
	Prevalence of exclusive breastfeeding at 4 months		Red	The Maternity and Children's dataset is under development - once this data is available, this indicator can be investigated further
	Smoking status at time of delivery - Percentage of women stopping smoking during pregnancy		Amber	The Maternity and Children's dataset is under development - once this data is available, this indicator can be investigated further
	Percentage of women abusing alcohol or non-prescription drugs at the time of booking with maternity services		Amber	The Maternity and Children's dataset is under development - once this data is available, this indicator can be investigated further
	Under 18 conceptions			
	Child development at 2-2.5 years			
	Healthy weight in 4-5 and 10-11 year olds			
	Healthy weight in young people		Red	No data source has been identified for this indicator
	Hospital admissions and A&E attendances for accidental and unintended injuries; and non-accidental injuries, neglect and maltreatment in children and young people		Green	Data has been included in the PHOF
	Emotional well-being of LAC			
	Self-reported well-being (all children and young people, LAC, and those with LTCs and disabilities)		Green	Wellbeing has been included in the Local Health Survey of Young People
	Smoking prevalence - 15 year olds			
	Hospital admissions as a result of self harm			
	Diet - Percentage of children and young people who eat at least 5 portions of fruit and vegetables a day; mean number of portions of fruit and veg eaten per day		Green	Diet has been included in the Local Health Survey of Young People
	Physical activity - Physical activity in 5-9, 10-14 and 15-19 year olds		Green	Physical activity has been included in the Local Health Survey of Young People
	Alcohol-related A&E attendances and hospital admissions		Amber	Further work is needed to define "alcohol-related admissions" using available data
	Access to non-cancer screening programmes			
	Percentage of women presenting as a healthy weight at the time of booking with maternity services i) in their first pregnancy; ii) in their second or subsequent pregnancy		Amber	The Maternity and Children's dataset is under development - once this data is available, this indicator can be investigated further
	Prevalence of drinking and substance misuse in children and young people		Green	Drinking and substance misuse has been included in the Local Health Survey of Young People
	Number of young people aged 15-19 presenting with HIV at a late stage of infection			
	Proportion of children and young people who play games on a computer 2+ hours on weekdays		Green	This data is available from the HBSC at a national level.
	Proportion of mothers with mental health problems, including postnatal depression		Amber	DH has commissioned the Policy Research Unit in Maternal Health and Care from the University of Oxford, and NPEU to develop a perinatal mental health indicator for inclusion in the Public Outcomes Framework from 2015.
	Measurement of parental attachment		Red	No data source has been identified for this indicator
	Measurement of parental self-efficacy		Red	No data source has been identified for this indicator
	Children and young people have access to age-appropriate health information to support them to lead healthy lives		Amber	This indicator to be considered as part of the Health Behaviours of School Age Children survey
	Children and young people are involved in decisions about their healthcare		Amber	Some aspect of this will be included in the Children's Inpatient experience survey
	Domain 3 - Health protection		Chlamydia diagnoses (15-24 year olds)	
		Treatment completion for TB		
		Population vaccination coverage - Vaccination coverage of preventable notifiable diseases		
		Infant mortality		

Outcomes Framework	Domain	Indicator / Outcome	Indicator Status	Comments
	Domain 4 – Healthcare, public health and preventing premature mortality	Tooth decay in children and young people aged 5		
		Suicide	Green	This data is available from ONS at a national level, but figures are too small to be presented at LA level
