Information released under the Freedom of Information Act

Title: Patent Box and UK patent filings

Date of release: 8 November 2013

Information request:

I am currently doing some research into identifying and quantifying the current success of the Patent Box scheme on UK Patents.

I see on the website that you list patent information for 2012. I wanted to get some kind of idea of how many patents have been applied for in the UK in 2013 also. Would you be able to provide me with any of this information?

It would be great to be able attribute some kind of positive link between the Patent Box and UK patent filings.

Information released:

The total figure for patent applications from January to the end of October is 18,721.
