Dear Mr Jackson

**Norfolk County Council - Residual Waste Treatment Project**

I can confirm that Norfolk County Council submitted to Defra the final version of its Final Business Case (FBC) in respect of the above Project on 5 July 2011. The FBC was approved by Defra on 18 January 2012.

The approval of the FBC was on the basis that the project met Defra's criteria for the award of Waste Infrastructure Credits.

These criteria cover a range of issues including value for money, the project's contribution to diverting biodegradable municipal waste from landfill, and the authority's approach to wider waste diversion and recycling.

Defra has approved over twenty Final Business Cases, all of which contain an element of energy from waste technology – whether through direct combustion or via a pre-processing route.

Yours sincerely

Nigel Atkinson  
WIDP Programme Director
