Homeland Security Project Portfolio

[dstl]

This project portfolio provides Science and Technology (S&T) support to a number of Government departments – through their individual and jointly funded projects – and focuses on many aspects of homeland security, from policy advice to S&T delivery.

Areas of interest include:
- analysis to inform security policy
- threat detection and mitigation, including for explosives
- S&T support to transport and border security
- data analytics for security applications
- S&T support to counter-terrorism.

The project portfolio works to link the Ministry of Defence's (MOD's) S&T Programme and other Government departments to ensure that defence and security S&T is shared to realise best value for homeland security. The project portfolio's key stakeholders include MOD, the Home Office, Department for Transport, the Cabinet Office and Government Office for Science.

Working in partnership

Some aspects of this project portfolio may be contracted throughout the 2014/15 financial year.

Details of these routes to contracting can be found in the 'How to sell to Dstl - get involved' factsheet. Additionally some work is contracted direct by other Government departments.

For more information on this project portfolio, contact: PDD@dstl.gov.uk.
