

Surrender SCR Evaluation Template
EPR/SP3133UX/S002 Peter Friend – Bluebell Farm

8.0 Decommissioning and removal of pollution risk	
To be completed by EM/PPC officers	
Has the applicant demonstrated that decommissioning works have been undertaken and that all pollution risks associated with the site have been removed? Has any contamination of land that has occurred during these activities been investigated and remediated?	All permitted activities ceased in 2012 and all sources of pollution risk (broilers / chemicals / manure etc) were removed. Operator has confirmed this and the Environment Officer (EO) has been to the site and also verifies this (see email 28/07/14). No contamination of land occurred.

10.0 Statement of site condition	
To be completed by EM/PPC officers	
Has the applicant provided a statement, backed up with evidence, confirming that the permitted activities have ceased, decommissioning works are complete and that pollution risk has been removed and that the land and waters at the site are in a satisfactory state?	Yes, (as above).

9.0 Reference data and remediation (where relevant)	
To be completed by GWCL officers	
Has the applicant provided details of any surrender reference data that they have collected and any remediation that they have undertaken? (Reference data for soils must meet the requirements of policy 307_03 Chemical test data on contaminated soils – quantification requirements). If the surrender reference data shows that the condition of the land has changed as a result of the permitted activities, the applicant will need to undertake remediation to return the condition of the land back to that at permit issue. You should not require remediation of historic contamination or contamination arising from non-permitted activities as part of the permit surrender.	No; none required.

10.0 Statement of site condition	
To be completed by GWCL officers	
Has the applicant provided a statement, backed up with evidence, confirming that the permitted activities have ceased, decommissioning works are complete and that pollution risk has been removed and that the land and waters at the site are in a satisfactory state?	Yes, (email response 02/08/14.)

Surrender SCR decision summary	
To be completed by GWCL officers and returned to NPS	
	Tick relevant decision
Sufficient information has been supplied to show that pollution risk has been removed and that the site is in a satisfactory state – accept the application to surrender the permit; or	✓

Insufficient information has been supplied to show that pollution risk has been removed or that the site is in a satisfactory state – do not accept the application to surrender the permit. The following information must to be obtained from the applicant before the permit is determined:	
Date and name of reviewer: Julia Ashley 04/08/14
