**MRRS 3701:TFE10 - Alcohol Free Foaming Hand Mousse with SteriZar®  
Technology**

14/10/2013

**Recommendation 5:** Insufficient clarity/evidence presented to enable full review of the product

**Use:** A hand mousse for use within the clinical environment to stop the spread and transmission of bacteria associated with a range of healthcare associated infections.

A range of products containing the active component 'SteriZar®', used for purposes ranging from surface disinfection to room fogging, were submitted in addition to the alcohol free foaming hand mouse. No proper data/information was provided to enable any meaningful review.
