

[REDACTED]

I little light reading ahead of our meeting tomorrow.

[REDACTED]

I assume I should report to DEFRA at noon tomorrow.

For interest I attach a set of bullet points on the CAP Reform which reflect the common position of the EPA EBA countries .Also for interest I attach a letter received from Ciolos which indicates the rather dismissive attitude of the Commission to ACP/LDC concerns. Whilst I suppose it is a predictable attitude at this stage of the trilogue I believe it reflects a continuing disingenuous approach by the Commission to the commitments entered into in the EPA and EBA treaties. The implication that the financial support has been given is frankly absurd and the failure to differentiate between the duty free preference and the value intended to be conferred suggests that the EPA signed by the EU and CARIFORUM was a charade

Regards

Barry
